# AÍN I AKBARI

BY

# ABUL FAZL ALLÁMI,

TRANSLATED FROM THE ORIGINAL PERSIAN.

BY

## COLONEL H. S. JARRETT,

SECRETARY AT MEMBER. BOARD OF EXAMINERS, CALCUTTA.

PUBLISHED BY THE ASIATIC SOCIETY OF BENGAL.

VOL. II.

### CALCUTTA:

FRINTED AT THE LAPHIST MISSION PRESS

# PREFACE.

Though the reason that has compelled a change of authorship in the continued translation of the Ain i Akbari is doubtless universally known, the regretful duty of its formal announcement is imperative in the introduction of this The early and somewhat sudden death of Professor Blochmann is a loss which Oriental literature may be permitted to share with his personal friends, and its regrets, though differing in kind and measure from theirs, will not be less grateful to his neemory from its independence of associations in which friendship bears a part, and as a testimony to his appreciation in a wider sphere where partial judgments have This is not the place to pass in review his services to no sway. letters which have been adequately commemorated elsewhere by the Asiatic Society of Bengal for whom he so largely laboured, but as commissioned by their authority to continue the work which death has snatched from an able hand, it is fitting that these few words from his successor should record the unfortunate necessity of their action. It was at one time supposed that the manuscript of the whole translation had been completed by Professor Blochmann and prepared for the press, but whatever the origin of the rumour, no trace of the work was discovered amongst his papers, and the interval of five years between the conclusion of the first volume and his leath, leaves little doubt that the report had no foundation.

> deplores or excuses the delay that had already ocranslation of the volume then issued, and e omitted mention of the early completion of the manuscript of the remainder ready for The enumeration of the difficulties which stood

IV PREFACE.

in his way is expressed in terms which imply that they had not been overcome, else his silence, when silence might be interpreted to his prejudice, is inexplicable. It may be, therefore, safely assumed that want of leisure, or other weighty reason, had hindered his continuance of a work which had become the preoccupation of his most serious study and which he hoped to leave to posterity as a record-that he had not toiled in vain. But the event was otherwise ordained.

While sensible of the honour conferred upon me by the Asiatic Society in selecting me for the duty of entering upon the labours and sharing the reward of my predecessor, I cannot but express my diffidence in presenting this second volume to public notice under their auspices, lest a comparison should discredit the wisdom of the choice. But whatever the verdict of those competent from linguistic knowledge and acquaintance with the abrupt, close and enigmatic style of the original to judge of the merits of the translation, no pains at least have been spared to render it a faithful counterpart consistently with a clearness of statement which the text does not everywhere show. The peculiar tone and spirit of Abul Fazl are difficult to eatch and to sustain in a foreign tongue. His style, in my opinion, is not deserving of imitation even in his own. His merits as a writer have, in general, been greatly exaggerated. Omitting the contemporary and interesting memoirs of Al Badáoni, whose scathing comments on the deeds and motives of king and minister have an independent value of their own, the accident that Abul Fazl's works form the most complete and authoritative history of the events of Akbar's reign, has given them peculiar importance as state records. deserve, but as exemplars of style, in compa immutable types of excellence fixed for ever b Rome, they have no place. His unique position

court and somee enhanced the repuiscone it all that he wrote, and his great industry in a position which secured wealth and invited indolence, fully merited the admiration of his countrymen. Regarded as a statistician, no details from the revenues of a province to the cost of a pine-apple, from the organisation of an army and the grades and duties of the nobility to the shape of a candlestick and the price of a curry comb, are beyond his miscrospic and patient investigation: as an annalist, the movements and conduct of his sovereign are surrounded with the impeccability that fences and deifies Oriental de notism, and chronicled with none of the skill and power, and nore than the flattery of Velleius Paterculus: as a finished diplomatist, his letters to recalcitrant generals and rebedious viceroys are Eastern models of astute persuasion, veiling threats with compliments, and insinuating rewards and promises without committing his master to their fulfilment. But these epistles which form one of his monuments to fame, consist of interminable sentences involved in frequent parentheses difficult to unravel, and paralleled in the West only by the decadence of taste, soaring in prose, as Gibbon justly remarks, to the vicious affectation of poetry, and in poetry sinking below the flatness and insipidity of prose, which characterizes Byzantine eloquence in the tenth century. A similar affectation, and probably its prototype, is to be found in the most approved Arab masters of florid composition of the same epoch, held by Ibn Khallikan's crude and undisciplined criticism to be the perfection of art, and which still remains in Hindustan the ideal of every aspiring scribe. His annals have none of the pregnant meaning and point that in a few masterly strokes, exalt or brand a name to all time, and flash the actors of his drama across the living page in scenes that dwell for ever in the memory. The history of nearly forty-six years of his vi PREFACE.

master's reign contains not a line that lives in household words among his own countrymen, not a beautiful image that the mind delights to recall, not a description that rises to great power or pathos, nor the unconscious simplicity redeeming its wearisome length which lends such a charm to Herodotus, and which in the very exordium of Thucydides, in Lucian's happy phrase, breathes the fragrance of Attic thyme. His narrative affects a quaint and stiff phrascology which renders it often obscure, and continues in an even monotone, never rising or falling save in reference to the Emperor whose lightest mention compels the adoring prostration of his pen, and round whom the world of his characters and events revolves as its central sun. ever its merit as a faithful representation, in a restricted sense, of a reign in which he was a capable and distinguished actor, it lacks the interesting details and portraiture of the life and manners of the nation which are commonly thought to be below the dignity of history but which brighten the pages of Eastern historians less celebrated than himself, and are necessary to the light and shade of a perfect picture. His statistical and geographical survey of the empire which this volume comprises is a laborious though somewhat lifeless compilation, of the first importance indeed as a record of a past and almost forgotten administration to guide and instruct the historian of the future or the statesman of to-day, but uninformed by deductive comment and illustration which might relieve the long array of bald detail. His historical summaries of dynasties and events in the various Súbahs under their ancient autonomous rule, are incoherent abridgments, often so obscurely phrased as not to be understood without a previous knowledge of the events to which they relate and his meaning is rather to be conjectured than elicited from the grammatical analysis of his sentences. The sources from which he drew his information are never

PREFACE. vii

acknowledged. This of itself would have been of no moment and their indication might perhaps have disturbed the unity of his design had he otherwise so incorporated the labours of others with his own as to stamp the whole with the impress of originality, but he not seldom extracts passages word for word from other authors undeterred by the fear, or heedless of the charge, of plagiarism.

Such, in my opinion, is the reverse of the medal which represents Abul Fazl unrivalled as a writer and beyond the reach of imitation. The fashion of exaggerating the importance and merits of a subject or an author by those who make them their special study, especially when that study lies outside the common track of letters, inevitably brings its own retribution and ends by easting general discredit on what in its place and of its kind has its due share of honour or utility. The merit and the only merit of the Ain i Akbari is in what it tells and not in the manner of its telling which has little to recommend it. It will deservedly go down to posterity as a unique compilation of the systems of administration and control throughout the various departments of Government in a great empire, faithfully and minutely recorded in their smallest detail, with such an array of facts illustrative of its extent, resources, condition, population, industry and wealth as the abundant material supplied from official sources could furnish. This in itself is praise and fortune of no common order and it needs not the fictitious ascription of unparalleled powers of historiography in its support. The value of the Ain in this regard has been universally acknowledged by European scholars and it may not be out of place to quote here the opinion of the learned Reinaud on this work in his 1st vol. of the Geographie d'Abulfeda, as it accurately represents its nature and worth and the style and quality of its literary composition.

viii PREFACE.

L'Inde musulmane nous offre, dans les commencements du xviie siècle, un ouvrage de compilation, qui est d'un grand intérêt pour la géographie; c'est le traité persan, composé par Aboul-Fazel, ministre de l'empereur mogol Akbar, et intitulé Ayyn-Akbery ou Institutes d' Akbar, par suite de 1' intérêt qu' Akbar avait apporté à sa composition. L'empire fondé dans 1' Inde par Babour, un des descendants de Tamerlan, avait pris, sous le règne d' Akbar, une grande extension et s' étendait depuis l' Afganistan jusqu 'au fond du golfe du Bengale, depuis l' Himalaïa jusqu'au Dekhan. Grâce à l'excellent gouvernement établi par Akbar, les provinces, pendant longtemps ravagées par les guerres intestines, avaient acquis une physionomie nouvelle. D'un autre côté, les vues libérales de l'empereur et de son ministre n'avaient rien de commun avec l'esprit étroit et exclusif qui caractérise l'islamisme, et ils avaient fait traduire en persan les meilleurs livres de la littérature sanscrite. Aboul-Fazel. se mettant à la tête d'une société de savants, entreprit une description géographique, physique et historique de l'empire, accompagnée de tableaux statistiques. Chacun des seize soubah ou gouvernements dont se composait alors l'empire mogol, y est décrit avec une minutieuse exactitude; la situation géographique et relative des villes et des bourgs y est indiquée; l'énumération des produits naturels et industriels y est soigneusement tracée, ainsi que la nomenclature des princes, soit idolâtres, soit musulmans, auxquels les soubah avaient été soumis avant d'être enclavés dans l'empire. trouve ensuite un exposé de l'état militaire de l'empire, et l'énumération de ce qui composait la maison du souverain, etc. L'ouvrage se termine par un précis, sait en général d'aprés les sources indigènes, de la religion brahmanique, des divers systèmes de la philosophie hindoue, etc.

L'auteur, par une recherche d'érudition deplacée, a effecté le style des anciens auteurs persans; on a souvent de

la peine à le comprendre. En 1783, Francis Gladwin, encouragé par le gouverneur général Hastings, publia une version anglaise abrégée de l'ouvrage. Placé aussi favorablement qu'il l'était et aidé des conseils des indigènes, il vint à bout de difficultés qui auraient été partout ailleurs insurmontables. La version anglaise, plusieurs fois réimprimée, se répandit à la fois dans l'Inde et en Europe, et cette publication n'a pas été, surtout dans les commencements, sous influence sur les progrès des études indiennes.

Maintenant, si on entreprenait une nouvelle édition de la version de Gladwin, l'on pourrait la rendre d'un usage encore plus utile. L'ouvrage fourmille de noms indigènes particulièrement de mots sanscrits, et ces mots, en passant à travers les caractères de l'alphabet arabe, ont souvent subi d'horribles altérations. Au temps de Gladwin, l'on n'était pas assez avancé dans les études indiennes pour rendre à ces mots leur véritable physionomie. Maintenant, un indianiste qu'i saurait passablement le persan, rétablirait facilement les termes dans leur véritable état. Pour ma part, dans le cours de mes travaux sur l'Inde, j'ai fait subir des corrections à la transcription, au 'ur et à mesure des besoins.

Je ne dois pas négliger de dire un mot sur la table de noms de lieux, reproduite dans la version anglaise en carac tères arabes avec leur transcription, et disposée d'après l'ordr des sept climats. Non-sculement beaucoup de noms son altérés, mais encore les noms sont placés au hasard. En e qui concerne la confusion, elle existe dans le texte origina Evidenment, la personne qui dans le principe, fut charge de dre-ser cette table, était peu au courant de la géographi

The criticism of Gladwin's version is just and this decate animadversion I desire to imitate. His difficulties wit varying and corrupt MSS, from which he had to translat were very considerable, and it is much to his credit that he has on the whole succeeded so well. But it is not to be

X PREFACE.

denied that omissions are frequent and considerable and that he has often misconstrued his author and thus led those who followed and relied on him astray. In the Tables of Longitudes and Latitudes in the fourth book, the geographical names whether Persian or English are quite untrustworthy and very few are correctly spelt or transliterated. the burden of this blame is to be laid on the original text which has been composed or transcribed without intelligence, discrimination or geographical knowledge, and for purposes of reference is so frequently incorrect as to be worthless. The fourth and fifth books which form the concluding volume of this work are now in course of translation and if the little leisure I can command will permit of it, I trust that their publication will not long be delayed. The constant elucidation which the text requires, involves no inconsiderble research which, while it lightens the exertion and enourages the patience of the reader, is among the translaor's most anxious and laborious tasks. I have dispensed vith two indices, such as are appended to the first volume, he advantage of which I have not been able to discover. 'here appears to me no more reason for distinguishing cographical from other proper names than for disjoining ames of men from those of women, or animate from innimate objects. I have therefore included all in a single idex. The names of the towns and villages in the list of arkars, twice recorded by Abul Fazl both under the Ten 'ears' Settlement (p. 88. et seq.) and in the histories of the bahs, have not been separately entered, to avoid augmentthe index without necessity. A reference to the Súbah id then to the Sarkár will suffice to trace the location i any particular town.

H. S. JARRETT.

## ADDENDA.

Page 125, line 9, to Sherganj add the following note:

Cissa Sinensis, Brisson. Cissa Venatoria, Blyth—the green jay. It is found in the South Eastern Himalayas and in the hill ranges of Assam, Sylhet, Arakan and Tonasserim. These birds wander about from tree to tree and pick grasshoppers, mantides and other insects, are frequently tamed and caged and are amusing and imitative. They sing lustily a loud screeching strain and are highly carnivorous. The shrike-like habit, in confinement, of placing a bit of food between the bars of their cage is in no species more exemplified than in this—Jerdon, II, 312.

Page 56, line 6, to kudán add following note:

The text has 'kudán,' with a variant 'kullán.'—I accepted the former without investigation at the time, but the true reading is Faddán (()) which means a certain measure of land, subdivided into 24 kírát—loosely rechoned as the quantity which a yoke of exen will plough in one day and commonly defined as consisting of 3331 kasabehs, the latter being 24 kabdah, and the kabdah being the measure of a man's fist with the thumb erect, or about 61 inches. Lane's Arab. Lex.

# BOOK THIRD. IMPERIAL ADMINISTRATION.

Since somewhat of the recent imperial institutions regulating the Army and the Household have been set down, I shall now record the excellent ordinances of that sagacious intellect that energizes the world.

#### ATN 1.

#### THE DIVINE ERA.

The connection of monetary transactions without fixity of date would slip from the grasp, and through forgetfulness and falsehood raise a tumult of strife; for this reason every community devises a remedy and fixes an epoch. Since thought fosters well-being and is an aid to facility (of action), to displace obsolete chronology and establish a new usage is a necessity of government. For this reason, the prince regent on the throne of felicity in the 29th year of the Divine Era, for the purpose of refreshing that pleasure-ground of dominion and revenue, directed its irrigation and rendered blooming and lush the palace-garden of the State.

Compassing events within a determinate time, the Persian calls  $m\bar{a}hroz$  (date); the Arab has converted this into muarrakh (chronicled), and thence "tarikh (date) is a household word. Some derive the Arabic from  $ir\bar{a}kh$ , a wild bull. This conjugation of the measure of  $t\bar{a}fa'il^2$  means, to polish. As ignorance of the time of an event grew less, it became dis-

<sup>&</sup>lt;sup>2</sup> 1585. See Vol. I, p. 195. The Useful Tables published as an appendix to the Journal of the Asiatic Society, state that the date of the establishment of the era is the thirtieth of Akbar's reign. It gives the epoch of the Báhy era as falling on Friday the 5th Rabi us Sáni A. II. 963, corresponding with the 19th February 1556. It is used on inscriptions, coins and records of Jehangir's and the following reigns, but generally coupled with the Hejira date.

<sup>\*</sup> I can find no authority for this statement—no dictionary that I have consulted gives this meaning. Lane says that 'tarikh' is an arabicized word according to some, borrowed apparently from the Hebrew "", "a month," or from the Chaldean. Others say it is pure Arabic, Al Birúniquotes Maimun-b-Mihrañ for the etymology of "Mohroz" and 'Tarikh.' Athar-úl Bākiya, Sachan's translation, p. 34.

tinguished by this name. Some assert that it is transposed from 'tákhír which is referring a late period to an antecedent age. Others understand it to be a limit of time wherein an event determines. They say "such a one is the táríkh of his tribe," that is, from whom dates the nobility of his line.\(^1\) It is commonly understood to be a definite day to which subsequent time is referred and which constitutes an epoch. On this account they choose a day distinguished by some remarkable event,\(^3\) such as the birth of a sect, a royal accession, a flood or an earthquake. By considerable labour and the aid of fortune, by constant divine worship and the observance of times, by illumination of the understanding and felicity of destiny, by the gathering together of far-seeing intelligences and by varied knowledge especially in the exact sciences and the Almighty favour, observatories were built: wonderful upper and lower rooms with diversity of window and stair arose on elevated sites little affected by dust.

By this means and with the aid of instruments such as the armillary sphere and others double-limbed and bi-tubular,<sup>3</sup> and the quadrant of altitude,<sup>4</sup> the astrolabe, the globe and others, the face of astronomy was illumined and the computation of the heavens, the position of the stars, the extent of their orbits in length and breadth, their distance from each other and from the earth, the comparative magnitude of the heavenly bodies and the like were ascertained. So great a work without the daily increasing anspiciousness of a just monarch and his abundant solicitude, is not to be

# 1 The Arabic phrase is, فاللن تاريخ قوعك

- <sup>2</sup> This passage is so strikingly similar to the opening of the 3rd chapter of Al Birúni's Athár ul Bákiya that it can scarcely be accidental. There is nothing to hinder the supposition that Abúl Fazl was acquainted with that w.:ter's works and not a little indebted to him.
- I cannot determine accurately what these may be. No dictionary renders the expressions. It is possible that the first may be the skaphium of Aristarchus which was a gnomon, the shadow of which was received on a concave hemispherical surface, having the extremity of its style at the centre, so that angles might be measured directly by arcs instead of the tangents. The second may refer to the invention of Archimedes to
- ascertain the apparent diameter of the snn by an apparatus of double cylinders. There was another, too, of Aristarchus to find the distance of the sun by measuring the angle of elongation of the moon when dichotomized. The kitab ul Fihrist mentions only the astrolabe and the armillary sphere, p. 284. Sédillot (Prologoménes des Tables Astron. d'Olong Beg) speaks of a "gnomon à trou" used by Naşîrûddîn Tûsi.
- \* So I venture to interpret the term, Dozy (Supplem. Dict. Arab.) quotes Berbrugger on this word "Ruba'a-elmoudjib, le quart de cercle herodictique, instrument d'une grande simplicite dont on fait usage pour connaître l'heure par la hauteur du soleil." Moudjib should be "mujayyab."

accomplished. The gathering together of learned men of liberal minds is not achievable simply by means of ample wealth, and the philosophic treatises of the past and the institutions of the ancients cannot be secured without the most strenuous endeavours of the sovereign. With all this, thirty years are needed to observe a single revolution of the seven planets. The longer the period and the greater the care bestowed upon a task, the more perfect its completion.

In this time-worn world of affliction Divine Providence has vouchsafed its aid to many who have attained considerable renown in these constructions, such as Archimedes, Aristarchus and Hipparchus in Egypt, from whose time to the present, the 40th year of the divine era, 1769 years have clapsed<sup>2</sup>; such as Plotemy in Alexandria who flourished some 1410 years ago; as the Caliph Mámún in Baghdad, 790 years past, and Sind<sup>3</sup> bin 'Ali

1 The ancients gave the name of planets to the five planets visible to the naked eye and the sun and moon. The names of the five-Mercury, Venus, Mars, Jupiter, and Saturn first occur in the cosmical scheme of Philolans. (Lowis. Astron. of the Ancients) The thirty years must refer to that planet of the seven occupying the longest period in its revolution, namely, Saturn which was the most remote then known. It takes 29 years and 51 months (very nearly) to return to the same place among the fixed stars, whether the centre of motion be the Sun or the Earth. The Copernican system had been published fifty-six years before Abúl, Fazl began this volume.

<sup>2</sup> It is needless to say that all these figures are very inexact. Archimedes flourished 287-212 B. C. Aristarchus somewhere about 280-264 B.C. and Hipparchus is placed by Suidas at from B.C. 160 to 145, and yet they are all bracketed together. The date of Plotemy, illustrious as he is as a mathematician, astronomer and geographer, is uncertain. He observed at Alexandria, A. D. 139 and was alive in A. D. 161. Mamún succeeded to the Caliphate on the 24th September 813. He caused all Greek works that he could procure to be translated, and in

particular the Almagest of Plotemy. The real title of this work is Μεγάλη Σύνταξις There was another της 'Αστρονομίας. called μαθηματική σύνταξις. The Arabs, to distinguish the two probably called the greater work μεγάλη and afterwards μεγιστη and Almagest is a compound of the Greek with a prefix of the Arabic article. Mámún is said to have made the delivery of certain Greek MSS, at Constantinople, one of the conditions of peace with Michael the III. He ordered the obliquity of the Ecliptic to be observed at Baghdad which was found to be 23° 35', and less than some preceding observations had indicated. important operation was the measure of a degree of the terrestrial meridian. There is still preserved, a work composed under Mámún's direction entitled, according to the Latin translation, Astronomia Elaborata a compluribus D. D. jussu regis Maimun. (Encycl. Metropolitana. Art. Astron.)

\* Abu Tayyib Sind-b-'Ali was a Jew converted to Islam in the Caliphute of Mémûn and was appointed his astronomer and superintendent of observatories. A list of his books may be found in the Kitáb ul Fihrist, p. 275, and in Hammer-Purgstall's Literaturgesch der Araber, p.

and Khálid' bin 'Abdul Malik al Marwazi 764 years since at Damascus. Hákim and lbn³ Ka'lam also laid the foundations of an observatory at Baghdad which remained unfinished, 712 years, and Battáni³ at Racca 654 years previous to this time. Three hundred and sixty-two solar years have passed since Khwájah⁴ Naṣîr of Tús built another at Múrágha

258, Vol. III, but the latter is inexact and has in two places misunderstood his original, the Fihrist: see also, Sedillot-Prolégomènes d'Olong Beg, Introd. ix.

<sup>1</sup> Khalid-b-'Abdul Malik, A. ii. 217 (832) a native of Merv. He is included among three astronomers who first among the Arabs, instituted observations from the Shammásíyah observatory at Baghdad. His son Mahammad b. Khálid was an astronomer in Mamún's service. Ham. Purg. Lit. Gesch. der Arab. p. 259. Vol. III. and Sedillot. p. x.

<sup>2</sup> Ibn w'l' A'a'lam A. H. 375 (A. D. 985), stood in great credit with Adhad ud daulah, but finding himself in less estimation with his son Shamsud Daulah, he left the court but returned to Baghdad a year before his death. His astronomical tables were celebrated not only in his own time but by later astronomers. He died on his return from a pilgrimage to Mecca. Ibid. p. 311. Vol. V. Of Al Hâkimi, I can learn nothing.

 Muhammad b. Jábir al Baltáni. (Albatenius) a native of Harrán and inhabitant of Rakka. His observations were begun in A. II. 264 (A. D. 877-8) and he continued them till A. ni. 306. He died in 317 A. H. He was the author of the astronomical work entitled the Sabean tables. It is doubtful whether he embraced Islamism. His ancestors were Sabcans and he was probably so himself. In his table he marked the positions of the fixed stars in A. H. 299 (A. D. 911-12). Among other works he wrote a treatise on the mode of calculating the amplitude of the Zodiacal signs for every latitude, which would be of use in the

history of spherical trigonometry: also an explanation of Ptolemy's quadripartitum. cf. Ibn Khallikân, art al Battâni and the Fibrist, p. 279. In the Encyclopædia Metropolitana it is stated that he was surnamed the Ptolemy of the Arabs. He .corrected the determination of Ptolemy respecting the motion of the stars in longitude, ascertaining it to be one degree in 70 instead of 100 years; modern observations make it one degree in 72 years. He also determined very exactly the eccentricity of the ecliptic and corrected the length of the year, making it consist of 365 days, 5 hours, 46 minutes, 24 seconds," which is about 2 minutes short of but 4 minutes nearer the truth than had been given by Ptolemy. He also discovered the motion of the apogee. His works have been collected and published in two vols. 4to, under the title of De Scientia Stellarum, of which there are two editions, one in 1537 and the other in 1646.

4 Naşiru'ddin is the surname of Muhammad-b-Hassan or Ibn Muhammad at Túsi, often simply called Khwajah Nasiru'ddin (A. II. 597-672, or according to some 687). Huláku the Tartar chief placed him at the head of the philosophers and astronomers whom his elemency had spared in the sack of Moslem towns, and gave him the administration of all the colleges in his acquired dominions. The town of Murágha in Azarbayján was assigned to him and he was ordered to prepare the astronomical tables which were termed Imperial (Elkhán). He studied and explained the elements of Euclid and wrote on the near Tabriz and 156 is the age of that of Mirza Ulugh Beg1 in Samarkand.

Rasad signifies 'watching' in the Arabic tongue and the watchers, therefore, are a body who, in a specially-adapted edifice, observe the movements of the stars and study their aspects. The results of their investigations and their discoveries regarding these sublime mysteries are tabulated and reduced to writing. This is called an astronomical table (zij). This word is an Arabicized form of the Persian, zik which means the threads that guide the embroiderers in weaving brocaded stuffs. In the same way, an astronomical table is a guide to the astronomer in recognising the conditions of the heavens, and the linear extensions and columns, in length and breadth, resemble these threads. It is said to be the Arabic rendering of zih from

spheries of Theodosius and Menelaus in 663 and 670. The Akhlák i Násiri, a work on morals was translated into Persian by this savant from the Arabic original the Kitáb at Tahsrat, written by Abu Ali b. Maskawaih, minister of the house of Buwaih, with additions on domestic and political subjects. Cf. d'Herbelot art. Nassiruddin. Sédillot. Prolog. Introd. p. xevii. Abul Pharaj-ed. Pocoko. 1663, p. 548 in which his death is placed in 675 A. II.

الهلك السيد إلغ بك ) Ulugh Beg

(بن شالا رخ بن تيمور كوركان محمد تراغاي was the son of Shah Rukh and grandson of Tamerlane born at Sultanich A. II. 796, (A. D. 1393). In 810 he possessed the government of some provinces of Khorasán and Mazanderán and in \$12, that of Turkistán and Transoxania. He however, quickly abandoned and devoted himself passionately to his favourite studies. He desired that his tables should be scrupplously exact and procured the best instruments then available. These at this period, were of extraordinary size. The obliquity of the coliptic was observed in A. D. 995 with a quadrant of 15 cubits' radius (21 feet 8 inches). The sextant of Abu Muhammed al Khojandi used in 992 had a radius of 40 cubits (57 feet

9 inches). The quadrant used by Ulugh Beg to determine the elevation of the pole at Samarcand, was as high as the summit of St. Sophia at Constantinople (about 180 feet). The astronomical tables were first published in A. II. 841 (A. D. 1437). The ancient astronomy had produced only one catalogue of the fixed stars, that of Hipparchus. Ulugh Beg, after an interval of sixteen centuries, produced the second. Like all orientals he fell into the slough of astrology. The stars foretold his assas-His suspicious pointed to sination. his son, whom unmerited ill-treatment drove into rebellion and this brought about the catastrophe he dreaded. He was slain in 1449, and with his death closes the line of Arabian astronomers. A century and a half separates him from the great Keppler. Purbach, Regiomontanus, Copernicus and Tycho Brahe filled the interval and not a little of the honour accredited to Western astronomers is due to the labour of the Arabs. The subject is exhaustively discussed by Sedillot. Prolegom. d'Olong Beg, Vols. I and II.

See Sedillot. Prolog. des Tab. Ast. Tome I, p. 686. Note 1. where the words of the text are almost literally given from Sháh Kulji. the frequent necessity of its use, which the intelligent will understand. Some maintain it to be Persian, signifying a mason's rule, and as he, through its instrumentality determines the evenness of a building, so an astronomer aims at accuracy by means of this astronomical table.

Many men have left such compilations to chronicle their fame. Among these are the Canons of

#### 1. Maju'r the Turk.

There are two of this family whom Sédillot terms the Benon Amadjour, viz., who will be some person but adds another name of the Canon called al Bediáor the Wonderful; the latter of works on other astronomical tables with disputed titles. He appears to quote from the Fibrist and from Casiri who borrows from Ibn Jounis, but the Fibrist distinctly states that Abn'l Hasan was the son not the brother of Ali b. Amajúr. Ibn Jounis speaks of Abu'l Kásim also, and as a native of Herat, ou lettel here the vidently refers to his Turkish origin but mis-translated by Casiri and copied by Ham-Purgstall descended from the Pharaohs." (Sedillot. p. xxxix note). The Benou A.aajúr were astronomers of repute and made their observations between the years 885-933, leading the way to important discoveries. (Scd p. xxxv et seq).

- 2. Hipparchus,
- 3. Ptolemy.
- 4. Pythagoras.
- 5. Zoroaster.
- Theon of Alexandria.
- 7. Sa'ma't the Greek.

Another reading is Sábát (ماباط) but I cannot recognize nor trace the name satisfactorily. The epithet يوذاني inclines me to believe the name to be that of a Greek astronomer in Islamic times.

8. Tha'bit-b-Kurrah b Hárán was anative of Harán, of the Sabean sect, and rose to eminence in medicine, mathematics and philosophy, born A. H. 221 (A. D. 836) died in A. H. 288 (A. D. 901). He was much favoured by the Caliph Al Mua'tadhid who kept him at Court as an astrologer. He wrote on the Spherics of Theodosius, and retranslated Euclid already turned into Arabic by Hunain-b-Ishák al Ibádi. He was also author of a work in Syriae on the Sabean doctrines and the customs and ceremonics of their adherents. Ibn Khall. D'Herb. Sedillot. p. xxv. et seq. For a list of his works, see the Fihrist, p. 272.

#### 9. Husa'm b. Sina'n. (var. Shabán.)

I believe the first name to be an error. The Fihrist mentions a son of Sinán with the patronymic Abúl Ḥasan who is no doubt here meant. He was grandson of Thábit-b-Kurrah, and named also Thábit according to D'Herb. as well as Abúl Ḥasan after his grandfather. (Sodillot). Equally proficient in astronomy with his grandfather, he was also a celebrated physician and practised in Baghdad. He wrote a history of his own time from about A. H. 290 to his death in 360. Abúl Faraj speaks of it as an excellent work. See also Ibn Khall. De Slane. Vol. II. p. 289 and note 7. His

father Sinán the son of Thábit-b-Kurrah, died at Baghdad A. H. 331. They were both Harranians, the last representatives of ancient Greek learning through whom Greek sciences were communicated to the illiterate Arabs. Sinán made a collection of meteorological observations called the Kitáb ul anwá, compiled from ancient sources, incorporated by Albiruni in his Chronology, and thereby preserved to us the most complete Parapegma of the ancient Greek world. See Albirúni. Chronol. Sachau's Transl. p. 427. n.

#### 10. Tha'bit-b-Mu'sa.

I can find no such name The Fibrist gives Thábit-b- Ahúsa, head of the Sabeau sect in Harrán.

11. Muhammad-b-Ja'bir al Batta'ni. See p. 4, note 3.

#### 12. Ahmad-b-'Abdu'llah Jaba'.

Jaba is a copyist's error for Habsh حبث Ho was one of Al Mamún's astronomers, and distinguished by the title of Al Húsib or the Reckoner. He was employed by Mamún at Sinjar to observe the obliquity of the Ecliptic and to test the measurements of geometrical degrees. He compiled a set of tables by the Caliph's order. Ham. Purg. B. III, p. 260. Abu'l Faraj (ed. 1663, p. 247) says that he was the author of three Canons; the first modelled on the Sindhind, the second termed Mumtahan or Provens(after his return from his observations) and the third the Lesser Canon, known as the 'Sháh'. He lived to the age of a hundred. Though Ham. Purg. writes the name Hubaysh (حبيش) and Habsh, the Fihrist and Sedillot confirm the latter reading. A list of this astronomer's works will be found in the last named work.

#### 13. Abu' Rayha'n.

Abu Rayhán-Muhummad-b-Ahmad Albiráni, born 362. A. H. (A. D. 973), d. 440. (A. D. 1048). For further particulars I refer the reader to Sachan's preface to the Indica and the Chronology of this famous Savant.

14. Kha'lid-b-'Abdu'l Malik. See p. 4 note 1.

#### 15. Yahya-b-Mansu'r.

More correctly Yahya-b-Abi Mansúr, was one of Al Mámún's most famous astronomers. Abu'l Faraj (p. 248), says that he was appointed by that Caliph to the Shammásiyah observatory at Baghdad and to that of Mount Kásiun at Damascus. The Fihrist gives a list of his works (p. 275) and (p. 143) his genealogy and descendants who appear to have shared and augmented their father's fame. He died about 833, (A. H. 218) in Mámún's expedition to Tarsus and was buried at Aleppo.

#### 16. Ha'mid Marwaru'di.

This is doubtless, Abn Hamid, Ahmad-b-Mohammad as Ságháni. Sághán is a town near Marw. Ibn Khallikán's derivation of Marwarrúd will explain the difference in the titular adjectives of place. I transcribe De Slane. V. I, p. 50. "Marwarrúdi means natire of Marwarrúd, a well-known city in Khorasán, built on a river, in Persian ar-rúd, and situated 40 parasangs from Marw as Sháhján; these are the two Marws so frequently mentioned by poets: the word Sháhján is added to the name of the larger one from which also is derived the relative adjective Marwari; the word rúd is joined to that of the other city in order to distinguish between them. Marwarid has for relative adjective Marwarrúdi and Marwazi, also, according to as Sanáni." Sháhján is, of course, Sághán. Abu Hámid, was one of the first geometricians and astronomers of his time (d. 379. A. H. 989), and a maker of astrolabes at Baghdad and was employed to certify the correctness of the royal astronomical reports. Ham Purg. B. V. 313.

- tabulae astronomicae sufficientes, البغني tabulae astronomicae sufficientes, mentioned by Háji Khalífa, p. 568, Art. زيي
- 18. Sharki. (Var. Sharfi.) probably Abu'l Kásim as Saraķi (السرقي) of whom Casiri writes. 'Abûlcassam Alsaraki Aractensis (of Rakka), Astrologiæ judiciariæ et astronomize doctrina, uti etiam Tabularum et Spherze peritia haud ignobilis, inter familiares atque intimes Saifeldaulati Ali-ben-Abdalla-ben Hamdan, per ca tempera Regis, habitus est, quibuscumque Sermones Academicos frequens conferebat (Saifeldaulatus Syriæ Rex, anno Egiræ 356 obiit. (Sedillot, p. xlviii.)
- Abu'l Wafa'-Nu'rha'ni. An error for Búzjáni. Búzján is a small town in the Nisábúr district in the direction of Herát. He was born A. H. 328 (939) d. 388 (998). In his 20th year he settled in Irák. A list of his works will be found in the Fihrist, p. 283. Ham. Purg. B. V. 306. His Canon was termed "as Shamil." His most important work was the Almagest, which contains the formulas of tangents and secants employed by Arab geometricians in the same manner as in trigonometrical calculations of the present day. In the time of Al Battáni, sines were substituted for chords. By the introduction of tangents he simplified and shortened the expression of circular ratios. His anticipation of the discoveries of Tycho Brahe, may be seen in Sed. p. ix.
  - The Ja'mi'. (Plura continens)
  - The Ba'li'gh. (Summun attingens) of Kyakúshyár.
  - 22. The 'Adhadi.

wrote three Canons, av-Kúshyár-b-Kenán al Hanbali. cording to Háji Khalífa. Two were the Jámi' and the Sáli' ( ( Báligh is however, confirmed by D'Herbelot art Zig). These works were on stellar computations, on almanacs, the motions of the heavenly bodies and their number, supported by geometrical proofs. His compendium (mujural) summarises their contents (p. 564.) Tho Jami' is again mentioned lower down .s a work in 85 chapters applied by the anthor to rectify or clacidate the Persian era. He added to it a supplement in illustration of each chapter of the Jami' entitled كتأب اللامع في اهللة الجامع The third Canon is called simply كتأب اللامع في اهله المعادة المعاد This was probably dedicated to Adhad 'ud Daulah Alp Arslan lord of Khorasan who had condescended to accept this title from his creature the feeble Káim bi amrí' lláh at Baghdad. Hence, I conjecture, the name Adhadie

23. Sulayma'n-b-Muhammad. Untraceable. This name does not occur in one of the MSS. of the Ain.

#### 24. Abu Ha'mid Ansa'ri.

The only descendant of the Ausars that I can find among the astronomers is 1bn as Sháṭir. d. 777 A. H. (1375); the name was Aláu'ddin, patronymic not given. See Haj. Khal. pp. 557. 566. It is possible that the celebrated Abu Hamid al Ghazzali may be meant.

- 25. Safa'ih. Evidently the name of a Canon and not of its author.
- 26. Abu'l Farah Shira'zi.
- Majmu'a'. Apparently the name of a Canon mentioned by Háji Khalífa. auctore Ibn Shari'. (ابن شرع) collecta de astrologia judiciaria.
  - Mukhta'r المختار من كتب الاختيارات الفلكية auct. Shaikh Abu Mansúr 28

Sulaiman b. al Ḥusain-b-Bardowaih. Another work of the same name (Dilectus e libris electionis dierum, astrologicae) was composed by the physician Abu Naşr Yahya b. Jarír at Takríti for Sadíd ud Daulah Abu'l Ghanáim Abdu'l Karím.

29. Abu'l Hasan Tu'si. This name occurs in the Fihrist (p. 71) as that of a scholar learned in tribal history and poetry. A son of the same name is mentioned as a distinguished doctor, but there is no notice of his astronomical knowledge.

#### 30. Ahmad-b-Isha'k Sarakhsi.

The name of Ishak does not occur in the genealogy of any Sarakhsi that I can discover. The text probably refers to Ahmad-b-Md. b. at Tayyib, the well known preceptor of the Caliph al Mnatadhid by whom he was put to death in A. H. 286 (899) for revealing his pupil's confidences. D' Herb. states that he wrote on the Είσαγωγή of Porphirius, and Albiráni (Chronology) mentions him as an astrologer and cites a prophecy of his where he speaks of the conjunction of Saturn and Mars in the sign of Cancer.

31. Ghara'ri. Probably Al Fazari. Abú Ishak Ibrahim-b-Habib the earliest maker of astrolabes among the Arabs, who was the author of a canon and several astronomical works. Fibrist, p. 273, date not given.

#### 32. Al Ha'ru'ni.

It is difficult in such bald mention of names, where so many are alike, to be sure of the correctness of allusion. This is, probably, Hárún-b-al Munujjim, an astrologer, native of Baghdad and an accomplished scholar. His great grandfather was astrologer to the Caliph al-Mansur and his son Yahya served al Fadhl-b-Sahl in the same capacity, died A. H. 288 (901). Ibn Khall. IV. p. 605.

33. Adwa'r i Kira'in (Cycles of conjunctions) the name of a Canon whose author I cannot discover.

#### 34. Ya'ku'b-b-Ta'u's.

I may tafely hazard the emendation Tárik (اقَارَتُ) for Táús. This astronomer is mentioned by Albiráni. Ham. Purg. gives his date A. II. 218 (833) and a list of his works apparently copied from the Fibrist, p. 278.

#### 35. Khwa'razmi.

Muḥammad-b-Músa, by command of al Mámún, compiled an abridgment of the Sindhind (Siddhánta); better known as a mathematicism than as astronomer—see Sedillot, 1. xvi. He was the author of a Canon according to the Fihrist, p. 274.

- 36. Yu'sufi. The secretary of Al Mámún, Abu't Tayyib-b-'Abdi'llah is the only name I discover in this relative form. The Fihrist, (p. 123) mentions no astronomical works of his. Perhaps, Yúsuf-b-Ali Thatta (1043) or Ibn Yúsuf al Massisi may be meant: the text is too vague to determine accurately.
- 37. Wa'fi—the work of Ulugh Beg "fi Mawiji ul śa'mśl un Nnjúmiya, (de transitibus operationum astronomicarum) is the only title approaching that of the text that I discover.
- 38. Jauzharayn—Jauzhar the Arabic form of Gauzhar, is the head and tail of Draco. The two points in the Ecliptic which mark its intersection by the orbit of a planet in ascent and descent, are called its Nodes or two Jauzhars—(Istilálıát n'1 Funcon, arts. جوزهر ألجوزهر do motu في مقوم ألجوزهر ألجوزهر ). There is a Canon called في مقوم ألجوزهر do motu vero capitis et caudœ draconis, by Shaikh lbn ul Kádir al Barallusi—see Haj-Khall p. 561.
  - 39. Sama'a'ni. D'Herbelot mentions under this surname Abn Saa'd Abdú

Kárim Muhammad, the author of a work on Mathematics entitled Adáb fi ist'imál il llisáb. A. II. 506-62. The Fibrist p. 244, records another Sama'án as a commentator on the Canon of lPtolemy, and a third Ibn Sama'án, the slave of Abu Ma'shar, and author of an astronomical work.

#### 40. Ibn Sahra.

The variants of this mane suggest its doubtful orthography. Ibn Abí Sahari (إبن البي سخري) is mentioned by Ham. Purg. as an astrologer of Baghdad whose predictions were fortunate. He lived in the latter half of the century, 132—232, (749—846) the most brilliant period in the annals of Arab literature.

- 41. Abu"l Fadhl Ma'sha'llah, incorrectly Ma'sha'da in the text.—Born in Al Mansúr's reign, he lived to that of Al Mamún. His name "What God wills" is simply a rendering of the Hebrew Mischa. The Fibrist calls him Ibn Athra بأن اثرى and notes his voluminous writings, copied by Mam. Purg. B. III. 257.
  - 42. 'Aa'simi-untraceable.
- - 44. Sind-b-'Ali. See note p. 3.
  - 45. Ibn A'a'lam Do. p. 4.
  - 46. Shahrya'ra'n.

This Canon occurs in Albiráni (Chronol.) with the addition of the word Sháh.—Sachan confesses his ignorance of it. Haj. Khal. gives a Canon called Shahryár which is well-known—translated into Arabic by At Tamúni from the Persian. Fihrist, 244. v. also Sachan's preface to Albiráni's India, p. xxx.

47. Arkand.—In Albirúni called "the days of Arkand." The more correct form according to Reinaud, Memoire sur l' Inde., p. 322, would be the Sanskrit Ahargana—See Sachau's note p. 375 of Albirúni's Chronol. from which I quote.

Albiráni made a new edition of the Days of Arkand, putting into clearer words and more idiomatic Arabic, the then existing translation which followed too closely the Sanskrit original.

#### 48. Ibn Su'fl.

Al Shaikh Md. b. Abi'l Fath as Súfi al Misri wrote an epitome of the Canon of Ulugh Beg with additional tables and notes. It was with reference to this epitome that the work of Al Earallusi, Bihjat ul Fikr fi Hall is Shams Wál Kamr was written, of which the Jauzhar, one of its three parts, is alluded to in 38.

#### 49. Sehela'n Ka'shi.

Scholán, Schilán or Ibn Schilán according to D'Herbelot was the name of the Minister of Sultán ud Daugah of the Buyido family, whose enmity with his brother Mushrafúd Doulah was due to the policy or personal feeling of that statesman. A canon might have been published under his patronage and name.

- 50. Ahwa'zi. D'Herbelot alludes to several authors under this name; one a commentator on Euclid. The Fibrist names Md-b-Ishak al Ahwazi, without date. He appears to have written on agriculture and architecture.
  - 51. The 'Uru's of Abu' Ja'far Bu'shanji.

Búshanj, according to Yakút (Mu'jam il Buldán) is a small town about 40 miles from Herat, which has given birth to some eminent scholars, but I can find no astronomer among them.

- 52. Abu"l Fath-Shaikh Abu'l Fath as Súfi who amended the tables termed Samarcandi. Haji Khal, 566. III.
  - 53. A'kkah Ra'hibi-untraceable.
- 54. Masa'u'di.-The Canon Masudicus is extant in 4 good copies in European libraries, and waits for the combination of two scholars, an astronomer and an Arabic philogist, for the purpose of an addition and translation, v. Sachau, pref. to Alb. India, p. xvi.
- 55. Mua'tabar of Sanjari. The surname of Abu'l Fath Abdarrahman, called the treasurer; he was a slave of Greek origin, in the service of A'li al Kházin al Marwazi and much in his favour. On the completion of his Canon, the Sultan Sanjar sent him a thousand dinars which he returned. Haj. Khal. III. 564.
- ...56. Wajı'z-i-Mua'tabar is doubtless, as its name imports, an epitome of the foregoing.
- 57. Ahmad Abdu'l Jali'l Sanjari, author of two treatises on stellar influences. D'Herbelot monsions him as an astrologer of note, but adds no particulars.
  - 58. Muhammad Ha'sib Tabari.

Untraceable.

- 59 'Adani
- 61. Asa'ba'i.
- 62. Kirma'ni.

These are names of tables which I do not find mentioned. By the term Taylasán is meant a paradigm 60. Taylasa'ni showing astronomical calculations, in the shape of half an oblong quadrangular field divided by a diagonal. It is named after the form of the Scarf (Taylasán) worn by learned men in the East. . A model will be found in Albirúni's Chronology. (Sachan), p. 133.

- 63. Sulta'n 'Ali Khwa'razmi· Ali. Shah-b-Md-b-il Kasim commonly known as 'Alá'uddín Al Khwárazmi, the author of a Canon called Sháhi—the royal; also of a Persian epitome from the Elkháni Tables, called the Umdat úl Elkhániya. Haj. Khal. p. 565, III.
  - 64. Fa'khir 'Ali Nasabi.

The variants indicate a corrupt reading—untraceable.

65. The Alai of Shirwa'ni. Fariduddin Abu'l Hasan Ali-b-il Karim as Shirwani, known as Al Fahhad, eminent among the later astronomers, the author of several canons besides the one mentioned—See Haj. Khal. p. 567, in two places.

There are two other Canons called 'Alái. H. K. 556-7.

- 66. Ra'hiri-var. Záhidi-untraceable.
- 67. Mustawfi-mentioned by Haj. Khal. without author's name.
- 68. Muntakhab (Selectus) of Yazdi.
- 69. Abu' Raza' Yazdi.

Yazd is a town between Naysabúr and Shíráz. I find no record of either the canon or the astronomer.

- 70. Kaydu'rah.
- 71. Ikli'li.

Al Iklil is the 17th Lunar Station—three stars in the head of Scorpio. I infer from the absence of any mention of such astronomers that these canons are named after stars. I can learn nothing of Kaydurah.

- 72. Na'siri—perhaps called after Násiru'd-Daulah-b-Hamdán, temp. Mutii bi'lláh, A. H. 334. (946 A. D.)
  - 73. Mulakhkhas. (Summarium).
- 74. Dastu'r. Dastúr u'l Aml fi Tashih il Jadwal—a Persian commentary by Mahmúd-b-Mahd.-b-Kádhizáda (known as Meriem Chelebi, ייבריק in H. K. and D'-Herb.) of the Canon of Ulugh Beg. See H. K. p. 560, 111. and Sedillot, clv. I.
  - 75. Murakkab. (Compositus).
  - 76. Miklamah. (Caldmarium).
  - 77. 'Asa'. (Baculus).
  - 78. Shatsalah. Var. Shashtalah.
  - 79. Ha'sil. (Commodum).
- 80. Khata'i. A name of N. China: its people possessed an Astronomical Calendar in common with the Aighur Tribe, v. D'Herb. Art. 1gur.

#### 81. Daylami.

This is a bare list of tables of whose authors there is no certain record. Two of them, Khatái and Daylam point to the countries where they were in vogue. Kublai Khan the brother of Ilaláku after his conquest of China, introduced into the Celestial Empire the astronomical learning of Baghdad, and Cocheon-king in 1280, received the tables of I'an Yúnas from the hands of the Persian Jamálu'ddín. For the extent of Chinese science at this time, see Sedillot. ci. I.

- 82. Mufrad. (Simplex) of Md.-b-Ayyub.
- This Canon is in H. K. without the author's name.
- 83. Ka'mil (Integer) of Abu Rashid.

There is a commentary of the Shámil of al Búzjáni by Hasan-b-Ali al Kumnáti, ontitled the Kámil, mentioned in H. K. p. 565. III

#### 84. Elkha'ni.

There are the tables of Naşíru'ddin Túsi.'

- 85. Jamshi'di. Ghiyáthu'ddín Jamshíd together with the astronomer kuown as Ķádhizádah, assisted Ulugh Beg in the preparation of his Canon. The former died during the beginning of the work, the latter before its completion. H. K. 559. D'Herbelot (Art. zig. Ulug. Beg.) reverses this order and asserts that Jamshid finished it. I suspect that he has copied and mistaken the sense of H. K.
  - 86. Gurga'ni. Another name for the Canon of Ulugh Beg. See Sed. p. exix.

Whatever they set down, year by year from an astronomical table, as to the particular motions and individual positions of the heavenly bodies, they call an Almanac. It embodies, in fact, the diurnal progression of a planet from its first entrance into Aries to a determinate point in the ecliptic, in succession, and is in Hindi called patrah. The Indian sage considers astronomy to be inspired by divine intelligences. A mortal endowed with purity of nature, disposed to meditation, with accordant

harmony of conduct, transported in soul beyond the restraints of sense and matter, may attain to such an elevation that earthly and divine forms, whether as universals or particularized, in the sublime or nethermost regions, future or past, are conceived in his mind. From kindliness of disposition and in the interests of science they impart their knowledge to enquirers of anspicious character, who commit their lessons to writing, and this writing they term Silldhant. Nine such books are still extant; the Brahm-Siddhánt, the Súraj-Siddhánt, the Sóm-Siddhánt, the Brahaspat-Siddhant, inspired by Brahma, the sun, moon, and Jupiter respectively. Their origin is referred to immemorial time and they are held in great vencration, especially the first two. The Garg-Siddhant, the Narad-Siddhant, the Párásar Siddhánt the Pulast-Siddhánt, the Bashistah-Siddhánt,—these five they ascribe to an earthly source. The unenlightened may loosen the tongue of reproval and imagine that these mysteries acquired by observation of Stellar movements, have been kept secret and revealed only in such a way as to ensure the gratitude of reverential hearts, but the keensighted and just observer will, nevertheless, not refuse his assent the more especially as men of innate excellence and outward respectability of character have for myriads of years transmitted a uniform tradition.

Among all nations the Nychthemeron<sup>2</sup> is the measure of time and this in two aspects, firstly., Natural, as in Turán and the Wess, from noon to noon, or as in China and Chineso Tartary<sup>3</sup> from midnight to midnight; but the reckoning from sunset to sunset more universally prevails. According to the Hindu' sages, in Jagmot<sup>2</sup>—the eastern extremity of the

1 These last are named after five celebrated Rishis or Munis. The antiquity of Indian astronomy is a matter. of dispute among the learned. The curious inquirer may refer to the 8th Vol. of the Asiatic Researches where Mr. Bentley reduces its age, maintained by Monsieur Bailly to date back to the commencement of the Kali Yug, 3102 B. C .- to within a few hundred years, and fixes the date of the Súraj-Siddhánt -the most ancient astronomical treatise of the Hindus and professed to have been inspired by divine revelation 2,164,899 years ago,-to 1038 of our era. Mr. Bentley is in turn learnedly answered by a writer in the Edinburgh Review for July 1807. Sir W.

Jones' essay on the Chronology of the Hindus may be read in conjunction with the preceding papers, v. Alb. India, Cap. XIV. where the names of the Siddhants and their sources are differently given.

- This term for the twenty-four hours of light and darkness was used by the later Greeks and occurs in 2 Cor. xi.
  25. νυχθήμερον ἐν τῶ βυθῶ πεποίηκα
  Its precision of meaning commends its use which Sachau has adopted.
- is the name of a Chaghtai tribe eponymously applied to this country, see D'Herb. Art. Igur and the observations thereon Vol. IV, p. 300.
- <sup>4</sup> Cf Albirúni's India, Edit. Sachau. p. 133. Cap. XXVI. This word should

globe, they reckon it from sunrise to sunrise; in Rúmak—the extreme west, from sunset to sunset; in Cevlon, the extreme south, from midnight to midnight and the same computation obtains in Dehli: in Sadhpúr, the extreme north, from noon to noon. Secondly, the Equated also called Artificial, which consists of a complete revolution of the celestial sphere measured by the sun's course in the ecliptic. For facility of calculation, they take the whole period of the sun's revolution and divide equally the days thereof and consider the fractional remainder as the mean of each day, but as the duration of the revolutions is found to vary, a difference between the natural and artificial day arises. The tables of Al-Battáni assume it as 59 minutes, 8 seconds, 8 thirds, 46 fourths, 56 fifths and 14 sixths. Those of Elkhárli make the minutes and seconds the same, but have 19 thirds, 44 fourths, 10 fifths and 37 sixths. recent Gurgáni tables agree with the Khwajahl up to the thirds, but give 37 fourths, and 43 fifths. Ptolemy in the Almagest accords in minutes and seconds, but sets down 17 thirds, 13 fourths, 12 fifths and 31 sixths. In the same way ancient tables record discrepancies, which doubtless arise from varying knowledge and difference of instruments. The cycle of the year and the seasons depend upon the sun. From the time of his quitting one determinate point till his return to it, they reckon as one year. The speriod that he remains in one sign is a solar month. The interval of the moon's departure from a given position to its return thereto with the sun in conjunction or opposition or the like, is a lunar month. And since twelve lunations are nearly equal to one annual revolution of the sun, they are called a lunar year. Thus both the year and the month

ho "Jamkót." Albirúni quotes from the Siddhánta. The 4 cardinal points mentioned are given as the names of 4 large towns-the globe is described a spheroid, half land, half water : the mountain Miru occupies the centre, through which the Equator (Nalkash) passes. thern half of the mountain is the abode of angelic spirits, the southern that of Daityas and Nágs and is therefore called Daitantar. When the sun is in the meridian of Míru, it is midday at Jamkót, midnight at Rumak and evening at Saddpur. The latter name is spelt by Abiráni with a double d. See a man of this peculiar geographical system prefixed, to Gladwin's translation of the Ain and in Blochmann's text edition, following the preface.

<sup>1</sup> Nasíru'ddín Túsi, author of the Elkbúni tables.

<sup>2</sup> A synodical month, the interval between two conjunctions of the sun and moon, is 29 d. 12 h. 4½. m. It was founded on the most obvious determination of the moon's course and furnished the original month of the Greeks, which was taken in round numbers. at 30 days. By combining the course of the sun with that of the moon, the tropical year was assumed at a rough computation to consist of 12 nuntions or 360 days. See Astron. of the Ancients, Lewis, p. 16.

are solar and lunar: and each of these two is Natural when the planetary revolutions are regarded and not the computation of days, and Equated when the computation is in days and not in the time of revolution. The Hindu sage divides the year, like the month, into four parts, allotting a particular purpose to each. Having now given a short account of the night, the day, the year and the month which form the basis of chronological notation, we herein set down somewhat of the ancient eras to complete our exposition.

#### Era of the Hindús.

The creation of Brahma is taken as its commencement and each of his days is an epoch. They assert that when 70'kalps are completed, each consisting of 4 Yugs1 and the total of these being 4,320,000 years, a Mann appears. He is the offspring of the volition of Brahma and his cooperator in the creation. In each of his days fourteen successive Manus arise. At this time which is the beginning of the 51st year of the age of Brahma, there have been six Manus, and of the seventh, 27 kalps have elapsed, and three Yugs of the 28th, and of the fourth Yug, 4,700 years. In the beginning of the present Yug, Raja Judhishthira conquered the universe and being at the completion of an epoch, constituted his own reign an era and since that time to the present which is the fortieth of the Divine era, 4,696 years have clapsed. It continued in observance 3,044 years. After him Bikraniájíts reckoned from his own accession to the throne and thus in some measure gave relief to mankind. He reigned 135 years. In this year 1652 years have since then gone by. They relate that a youth named Sálbáhan,3 was victorious through some supernatural agency and

- <sup>1</sup> Viz., the Satya or Krita, Treta, Dwápar and Káli; the first comprises <sup>1</sup> 1,728,000 years; the second, 1,296,000, the third, 864,000, the fourth 432,000—being a total of 4,320,000.
- 1 The first is Svayambhuva (as sprung from Svayam-bhu, the self-existent,) the author of the famous Code: the next five are Svarochesha, Uttama, Támasa, Raivata, Chakshusha; the seventh is called Vaivasvata, or the Sun-born and is the Manu of the present period,—conjectured to be Noah, as the first is thought to be Adam.—Prinsep's Usoful Tables.
- \* This era to which the luni-solar system is exclusively adapted is called

Sanvat, Vulg. Sambat. It began when 3044 years of the Kali Yug had elapsed, i. e., 57 years before Christ, so that if any year, say 4925 of the Kali Yug be proposed and the last expired year of Vikramaditya be required, subtract 3044 therefrom and the result, 1881, is the year sought. To convert Samvat into Christian years, subtract, 57; nuless they are less than 58 in which case deduct the amount from 58 and the result will be the date B. C. This cra is in general use throughout Hindustan properly so cylled.—Useful Tables, Part II, p 26.

Sáliváhan, a mythological prince of Deccan who opposed Vikramáditya

took the Rájá prisoner on the field of battle. Since the captive was not deserving of death, he treated him with consideration and asked him if he had any request to make. He replied that though all his desire was centred in retirement from the world and in the worship of the one Supreme Creator, he still retained the wish that his era might not be obliterated from the records of the age. It is said that the boon was granted, and although he introduced his own era, he did not interfere with the observance of the other. Since this era, 1517 years have expired, and they believe that it will continue in use for 18,000 years more, after which Rajah Bijiyábhinandan will institute a new era from his own reign which will last 10,000 years. Then Nágá Arjun will come to the throne and promulgate another era which will continue for 400,000 years, after which Kalki, whom they regard as an avatar, will establish a fresh era to last 821 years. These six are considered the principal eras and are called Sáká, for there were many epochs and each termed "Sanpat." After the invasion of Sálbáhan, the era of Bikramájít was changed from "Sáká" to "Sanpat." After the expiration of these six, 'tho Sat3 Yug will re-commence and a new epoch be instituted.

The Hindú astronomers regard the months and years as of four kinds—1st, "Saurmás," which is the sun's continuance in one sign of the Zodiac, and such a year consists of 365 days, 15 gharis, 430 pals, and 22½ bipals; 2nd, "Chándramás," which is computed from the first day of the moon's increase to the night of the new moon. This year is of 354 days, 22 gharis and one 'pal.' The beginning of the year is reckoned from the entry of the sun into Arics. This month consists of 30 lunar days

raja of Ujjain. His capital was Pratishthána on the Godaveri. The Sáká cra, dates from his birth and commences on the 1st Bysákh, 3179. K. Y. which fell on Monday, 14th March, 78 A. D. Julian style.—Ibid. p. 22.

- ¹ Vishnu, in his future capacity of destroyer of the wicked and liberator of the world. This is to constitute the tenth and last avatár and is to take place at the end of the four yugs. Ho is to re-appear as a Brahman, in the town of Sambhal, in the family of Vishnu Sarmá.
- <sup>2</sup> Properly 'Sanwat.' Salka signifies an era or opoch and is generally applied to that of Salivahan.

- \* The text is here in error. The full stop after min nullifies the sense. It should be omitted together with the alif of min the sentence is then complete and the meaning obvious and consistent. is the ordinary Persian transliteration of the Sanskrit un.
- \* A ghari is 24 minutes, a pal 24 seconds, a bipal, a second. This would give 6 hours, 12 minutes and 22½ seconds, whereas according to our calculation, it should be 5 hours, 48 m. 47½s. very nearly. Saur and Chandra signify 'solar' and 'lunar'—Más is a 'month.'
- <sup>5</sup> This minus the 'pal' is our calculation exactly.

(tithi). Each twelve degrees of the moon's course, reckoning from its departure from conjunction with the sun is a tithi: and from the slowness or speed of the moon's progress there is a difference in the number of gharis from a maximum of 65 to a minimum of 54. The first, tithi is called Pariwá; the second Dúj; the third Tij; the fourth Chauth; the fifth Panchamin; the sixth Chhath; the seventh Saptamin; the eighth Ashtamin; the ninth Naumin; the tenth Dasmin; the eleventh Ekádasi; the twelfth Duádasi; the thirteenth Tirúdasi; the fourteenth Chaudas: the fifteenth Púranmási; and from the 16th to the 29th, they use the same names up to the 14th. The 30th is called Amáwas. From Pariwá the 1st to the 15th they call Shuklapachch, and the other half Kishupachch. Some begin the month from the 1st of Kishupachch. In their ephemerides generally the year is solar and the month lunar.

And since the lunar year is less than the solar by ten days, 53 gharis 29 pals and  $22\frac{1}{2}$  bipals, on the calculation of a mean rate of motion of the sun and moon, the difference, after 2 years, 8 months, 15 days and 3 gharis, would amount to one month, and according to the reckoning in the ephemeris would occur in not more than 3 years or in less than 2 years and one month. According to the first calculation, there is this difference in every twelve months and in such a year they reckon one month twice: according to the latter system, in every solar month when there are two conjunctions; and this must necessarily occur between Chait and Kuár (ásin) and does not go beyond these seven months. They term this intercalary month Adhik (adied), vulgarly called Laund.

The third kind of month is Sawan Mas. They fix its commencement at any day they please: it is completed in thirty days. The year is 360 days.

one solar month, the name of the corresponding lunar month is repeated, the year being then intercalary or containing 13 months. The two months of the same name are distinguished by the terms adhika (added) and nija (proper or ordinary). U. T. p. 23.

As the place of the sun's and moon's apogee, the equinoctial precession, and the obliquity of the ecliptic are necessary, among other subordinate bases of calculation, for the true computation of the lunar days, I leave the verification of the text to the possessors of this knowledge.

¹ The year commences at the true instant of conjunction with the sun and moon, that is on the new moon which immediately precedes the beginning of the solar year, falling, somewhere within the 30 or 31 days of the solar month Chaitra. The day of conjunction (amávasya) is the last day of the expired month; the first of the new month being the day after conjunction. The tilhis are computed according to apparent time, yet registered in civil time. For the comprehension of this perplexing notation I refer the reader to the Useful Tables, Part II, p. 24.

<sup>2</sup> When two new moons fall within

The fourth, Nachhattar, is reckoned from the time the moon quits any mansion to her return thereto. This month consists of 27 days and the year of 324.

The number of the seasons is, with them, six<sup>1</sup> and each they call Ritu. The period that the sun remains in Pisces and Aries, they term Basant: this is the temperate season: when in Taurus and Gemini, Girckham, the hot season; in Cancer and Leo, Barkha, the rainy season; in Virgo and Libra, Sard, the close of the rainy season and the beginning of winter; in Scorpio and Sagittarius, Hemant, winter; in Capricornus and Aquarius, Shishra, the season between winter and spring.

They divide the year likewise into three parts: to each they give the name of Kál, beginning from Phágun. They call the four hot months Dhupkál; the four rainy months Barkhakál and the four cold months Sitkul. Throughout the cultivable area of Hindustan, there are but three seasons. Pisces, Aries, Taurus and Gemini are the summer; Cancer, Leo, Virgo, Libra, the rains; Scorpio, Sagittarius, Capricornus and Aquarius, the winter. The solar year they divide into two parts. The first beginning with Aries to the extreme of Virgo they term Uttargól, which is the sun's progress to the north of the Equator, and from the beginning of Libra to the extreme of Pisces, Dakkhangól, the sun's course to the south of the Equator. Also from the first of Capricorn to the end of Gemini, they call Uttaráyan, the sun's northern declination (the summer solstice): and from the 1st of Cancer to the end of Sagittarius Dachchhanayan, or the sun's southern declination (the winter solstice). Many events, occurring in the first of these divisions, especially death, are deemed fortunate.

The Nycthemeron they divide into 60 could parts and to each they give the name of ghatis, more commonly ghari. Each ghari is subdivided into the same number of parts, each of which they call pal. In the same way they apportion the pal, and each part they term nári and also bipal. Each nári is equal to six respirations of a man of an equable temperament, undisturbed by running, the emotions of anger and the like.

A man in good health respires 360 times in the space of one ghari, and 21,600 times in a Nycthemeron. Some affirm that the breath which is respired, they term Swás and that which is inspired Parswás, and both together they called a parán. Six paráns make a pal, and 60 pals a ghari. An astronomical hour which is the 24th part of a Nycthemeron

will depend upon the position of the equinoctial colure.—U. T. II, 18.

<sup>&</sup>lt;sup>1</sup> Of two sidereal months each, the uccession of which is always the same: but the vicissitudes of climate in them

is equal to  $2\frac{1}{2}$  gharis. Each night and each day is again divided into 4 parts, each of which is called a pahr, but these are not all equal.

### The Khatái era.

They reckon from the creation of the world, which in their belief took place 8,884 Wans and 60 years previous to the present date. Each Wan is 10,000 years. They believe that the duration of the world will be 300,000 Wans—according to some 360,000. They employ the natural solar year and the natural lunar month. They begin the year from the sun's mid passage though Aquarius. Muḥi'u'ddin¹ Maghrebi places it at the 16th degree, others between the 16th and 18th. They divide the Nycthemeron into 12 Chághs. Each of which is subdivided into 8 Kels, and to every one of these they give a different name.

They divide the Nycthemeron also into Feneks. For this computation of time they have three cycles, viz., Sháng Wan, Jung Wang, and Khá Wan, each comprising 60 years and each year of the cycle is defined by a double notation. The revolution of the cycle is marked by a series

- ¹ He was a distinguished philosopher and mathematician in the service of the Saltan of Aleppo. Surnamed al Mughrebi from his having been educated in Spain and Africa. On the taking of Aleppo by Hulágu, he was spared in the name, and for the caase of science associated in A. H. 658 with Nasiru'ddín Túsi in the superintendence of the observatory at Murágha, and shared in the composition of the Elkháni tubles. D'Herbelot.
- <sup>2</sup> See D'Herb. (Vol. IV. p. 42.) on this nomenclature and his tables of the cycles.
- The word 9th may also grammatically but in point of fact less accurately apply to the cycle. The following explanation taken from the Useful Tables will elucidate the text. They have two series of words, one of ten and the other of twelve words; a combination of the first words in both orders is the name of the 1st year: the next in each series are taken for the 2nd year, and so to the 10th, in the 11th, the series of 10

being exhausted, they begin again with the first combining it with the eleventh of the second series: in the 12th year, the second world of the first series is combined with the twelfth of the second: for the 13th year, the third word of the first list with the first of the second list is taken, that list also being now exhausted. Thus designating the series of 10 by Roman letters, and that of 12 by italies, the cycle of 60 will stand thus.

| 1 a a    | 21 a i | 41 a o |
|----------|--------|--------|
| 2 b b    | 22 b k | 42 b f |
| 3 c c    | 23 cl  | 43 cg  |
| 4 d d    | 24 d m | 44 d h |
| 5 e e    | 25 о а | 45 e i |
| 6 f f    | 26 f b | 46 f k |
| 7 g g    | 27 g c | 47 g l |
| 8 h h    | 28 h d | 48 h m |
| 9 i i    | 29 i e | 49 in  |
| 10 k k   | 30 k f | 50 k b |
| 11 al    | 31 a g | 51 a c |
| 12 b m • | 32 b h | 52 b d |
| 13 ca    | 33 c i | 53 c o |
| 11 d b   | 34 d k | 51 df  |
|          |        |        |

of ten and a series of twelve symbols. The first is employed for the notation of the year and the day; the second is similarly applied and is likewise horary. By the combination of these two series, they form the cycle of 60 and work out detailed calculations.

#### The Turkish Era.

Called also the Aighúri. It is similar to the foregoing, except that this cycle is based on the series of 12. They reckon their, years and days after the same manner, but it is said that some astronomical tables also employ the series of 10. The commencement of their era is unknown. Abu Raihán (Albirúni) says¹ that the Turks add nine to the incomplete Syromacedonian years and divide it by¹ 12: and in whatever animal the remainder terminates, counting from the Sign of the Mouse, the year is named therefrom. But weighed in the balance of experiment, this is found wanting by one year. The intention, undoubtedly, is to carry the remainder down the animal signs of the series, and, beginning from the Mouse, to adopt the name of the animal in which it terminates. Although the commencement of the era is unknown, yet we gather sufficient information regarding the year of the cycle and its name. And if 7 years be added to the imperfect years of the Maliki era, dividing by 12, whatever

| 15 e c | 35 e l | 55 e g |
|--------|--------|--------|
| 16 f d | 36 f m | 56 f h |
| 17 g e | 37 g a | 57 g i |
| 18 h f | 38 h b | 58 h k |
| 19 i g | 39 i c | 59 i l |
| 20 k h | 40 k d | 60 k m |

The series of 10 is designated in China by the name of tien kan or celestial signs. Their characters and names are 1. Kéa. 2. yih. 3. ping. 4. ting. 5. 1000. 6. ke. 7. kang. 8. kin. 9. jin. 10. kwey.

The series of 12 are the horary characters and are named teche, terrestrial signs, they are as follows:

1. tsze. 2. chow. 3. yin. 4. maon. 5 shin. 6. sze. 7. woo. 8. wo. 9. shin. 10. yew. 11. seo. 12. hae.

Those characters being substituted for their equivalent letters in the cycle, will show the Chinese name of every

year; for example. Kea tsze is the first year. Kang uin the 27th. Their months are lunar of 29 and 30 days. Their years ordinarily 12 months, but a 13th added whenever there are two new moons, while the sun is in one sign of the . Zodiac, which occurs 7 times in 19 years. The first cycle, according to the Jesuits, began in February 2397 B. C.; we are now, therefore, in the 72nd cycle, the 28th of which will begin in 1890. To find the Chinese time, multiply the elapsed cycle by 60, and add the odd years: then if the time be before Christ, subtract the sum from 2398; but if after Christ, subtract 2397 from it; the remainder will be the year required.

<sup>3</sup> This reference I have not been able to trace in Albirúni's Athár ul Bákiya, or his India. remains is the year of the animal reckoning from the Mouse. This will prove correct according! to the following series.

### Names of the twelve years of the Cycle.

1. Sijkán, the Mouse. 2. Ud, the Ox. 3. Párs, the Leopard. 4. Tawishkán the Hare. 5. Lóiy, the Dragon. 6. Y'ilán, the Serpent. 7. Yúnt, the Horse. 8. Kú, the Sheep. 9. Bíj, the Ape. 10. Takhákú, the Cock. 11. Yít, the Dog. 12. Tankúz the Hog. They add the word el to each of these words, which signifies year.

### The Astrological Era.

The astrologers reckon from the Creation and assert that all the planets were then in Arics. The year is solar. According to their calculation, from that time to the present 184,696 years have elapsed.

### The Era of Adam.

Its beginning dates from his birth. The years are solar, the months lunar. According to the Elkháni tables, 5,353 solar years have clapsed to the present date. But some of those possessing a book of divine revelation make it 6,346 solar years; others 6,938 solar: others again, 6,920, solar, but according to what has been reported from learned Christians, it is 6,793.

# The Jewish Era.

Begins with the creation of Adam. Their years are natural, solar: their months, artificial, lunar. They reckon their months and days like the Arabians according to an intermediate system. The year is of two kinds, viz., Simple,<sup>2</sup> which is not intercalary, and Composite, in which an

¹ These 12 signs of the Zodiac exactly correspond with the animals in the series of the Japanese Cycle given in the Useful Tables, but the vernacular names are different. The calculations based on them are vaguely stated: in Albiráni's Chronology, some information may be obtained from the Rules for the reduction of Eras. Chapters VI and VII may be read by the curious, but will be understood only by the learned. See also D'Herbelot art. Chagathai and the interesting observa-

tions thereon, followed by tables of the denary and duodenary cycles, in Vol. IV, p. 43.

s אָלָנ from אָלָנ to pass or cross. Albirúni says that the Jewish leap year is called 'Ibbúr (אָבוּר) derived from Me'ubbereth (אַבּרי) meaning a "pregnant woman." For they compared the insertion of the supernumerary month, to a woman's bearing in her womb a foreign organism. Chronl. Sach. p. 63.

# 228465

THE RAMAK IT IN A MISSION
INSTITUTE OF CULTURE
LILLARY

intercalation is effected. Like the Hindus they intercalate a month every three years.<sup>1</sup>

### The Era of the Deluge.

This era is computed from this event; the year is natural, solar, the month natural, lunar. The year begins from the entry of the Sun into Aries. Abu Ma'shar<sup>2</sup> of Balkh based his calculations regarding the mean places of the stars on this era from which to the present year 4,696 years have elapsed.

# The Era of Bukht Nassar's (Nebuchadnezzar).

This monarch instituted an era from the beginning of his own reign. The year is solar, artificial, of 365 days without a fraction. The month,

- <sup>1</sup> Or 7 months in 19 lunar years. Cf. Albiráni's Chronology, p. 13 where the Jewish Luni-solar year is discussed. The Jews usually employed the Era of the Seleucides till the 15th century, and though some insist on the antiquity of their present era, it is generally believed to be not more ancient than the century named. They date from the Creation which they number at 3,760 years. Their year is luni-solar, of 12 or 13 months each and each of 29 or 30 davs. The civil year commences with or immediately after the new moon following the equinox of autumn. The length of the year of 12 months varies between 353 and 355 days; that of 13, may contain 385. In 19 years, 12 years have 12 months each, and 7 years 13 months. A table of 19 years is given in the Useful Tables. The year must be divided by 19 and the remainder will show the year of the Cycle. If there be no remainder, it is the 19th year. To reduce the Jewish time to ours, subtract 3761 and the remainder will show the year. The ecclesiastical year begins 6 months earlier with the month of Nisán. Consequently when the given year is ecclesiastical, deduct a year in the date from Nisan to Elul inclusive. Useful Tables, P. II, p. 8.
- <sup>2</sup> Albiráni chastises what he calls the follies of this savant on every opportunity. Abu Ma'shar had calculated on the basis mentioned in the text that the deluge had happefied once in every 180,000 years and would thus continue to recur. The heavy hand of Albiráni buries the astronomer under the ruins of his own system. See the Chronology, p. 29.
  - Albiruni says that this word in its Persian form, Bukht-narsi, means one "who laments and weeps;" in Hebrew, "Mercury speaking" as he cherished science and favoured scholars. era is based on Egyptian years. This is not the same king who sacked Jerusalem; there is an interval of 143 years between the two. (Chronol. p. 31). To find the day of any Julian year on which the year of Nabonassar begins, subtract the given year, if B. C., from 748 and if A. C. add to it 747. Divide the result by 4, omitting fractions, and subtract the quotient from 57 (i. e. number of days from January 1, to February 26-the 1st day of the era being 26th February 747, B. C.) If the quotient exceed 57, add 365, as often as necessary, before subtraction. The remainder will be the day of the year given. The first result before the division by 4

likewise, is of 30 days and five days are added at the end of the year. Ptolemy in his Almagest computed the planetary motions on this era. Since its commencement 2,341 years have clapsed.

# The Era of Philipus (Arrhidæus).1

Called also Filbus or Filkus. It is also known as the Era of Alexander of Macedon. It dates from his death. The years and months are artificial, solar. Theon of Alexandria has based his calculations of the mean places of the stars in his Canon on this Era, and Ptolemy has recorded some of his observations regarding it, in the Almagest. Of this period, 1,917 years have elapsed.

# The Coptic Era.

This is of ancient date. Al Battáni states that its years are solar, artificial, consisting of 365 days without a fraction. The Sultáni tables say

increased by a unit for each 365 added to 57, will be the year of N. then beginning. The day of the week may be known by dividing by 7—if no remainder, the day will be Tuesday: if there be a remainder, the day placed below it on the following table will be the day required.

2. 3.

4. , 5.

0.

Tu. W. Th. F. Sa. Su. M...

The year of N. being given, to find when it begins. Rule. Divide by 4; subtract quotient from 57 adding 365, if necessary, as before; the remainder will be number of days from 1st January. The given year diminished, as often as 365 has been added, will shew the number of Julian years from 747 B. C. If less than 748, subtract from that number and the remainder will be the year B. C.; if equal or more, subtract 747 from it and the remainder is

<sup>1</sup> He was half brother of Alexander the Great, the son of Philip and a fomale dancer, Philinna of Larissa. He and his wife Eurydice were put to death by Olympias B. C. 317. Of Theon's life no particulars are known, save that he

A. C. Usefal Tables, P. II, p. 9.

was the father of the famous and hapless Hypatia. His works may be found in Smith's Class. Dict.

<sup>2</sup> This is the era of Dioclesian or the Martyrs; was, much used by the Christian writers till the introduction of the Christian era in the 6th century, and is still employed by the Abyssiniaus and Copts. It dates from 29th August, 284, the supposed date of Diocletian's assumption of sovereignty at Chalcedon. The year consists of 365 days with an additional day every 4th year. Divide the date by 4 and if 3 remain, the year is bisextile. The Coptic months are as follows:

Coptic. O. S. Thoth. August 29. Paophi. September 28. Athyr. October 28. Cohiac. November 27. Tvbi. December 27. Mesir. January 26. Phamenoth. February 25. Pharmouti. March 27. Pashons. April 26. Pyni. May 26. Epiphi. June 25. Mesori. July 25.

that its years and months resemble the Syro-Macedonian. It has the same intercalations, but the Coptic intercalary days precede those of the Syro-Macedonian by six months.

# The Syro-Macedonian Era.

The years and months are artificial, solar, and they' reckon the year at 3651 days exactly. In some astronomical observations, the fraction in excess is less than 1/4. According to Ptolemy, it is 14 m. 48 s. The Elkháni observations make the minutes the same, but 32 seconds and 30 thirds. According to the calculations of the Cathayans the minutes are the same, and 36 seconds, 57 thirds; to the recent Gurgáni observations, the minutes agree, with 33 seconds; the Maghrebi has 12 m.: the Battáni, 13 m. 36 s. Muhiyu'ddin Maghrebi says that some of the Syro-Macedonian calculations make the fraction more than a quarter, others less than a quarter, and thus a quarter has been taken as the medium. Others assert that the Syro-Macedonians have by observation determined the fraction to be a full 1. Consequently it is a natural solar year, although Mulla 'Ali Kúshji' makes it a solar year even on the first mentioned basis. This era dates from the death of Alexander the second,3 Bicornutus, but was not employed till 12 years after his death. Others assert that he established it in the 7th year of his reign when he set out from Macedonia, his kingdom, bent on foreign conquest. Muhiyu'ddin Mughrebi on the other hand, states that it began with the reign of Seleucus (Nicator) who founded Antioch. This era was in use both with the Jews and Syrians. They relate that when Alexander the son of Philip marched from Greece to the conquest of Persia, he passed through Je-Summoning the learned Jews of Syria he directed them to rusalem. discontinue the Mosaical era and to employ his own. They thus answered "Our forefathers never observed any cra above a thousand years and this year our Era will complete the thousand; from next year, therefore, thy command shall be obeyed." And they acted accordingly. And this took place in Alexander': 27th year. Some maintain that this Gre-

The additional days are called by the modern Copts, Nisi, in common years, and Kebús, in leap years. To reduce the years of this Era to those of the Christians, add 283 y. 240 d. When the Dioclesian year is the year after leap year, it begins one day later than usual, and in consequence, one day must be added to the Christian year, from 29th August to

end of February following. Useful Tables.

- <sup>1</sup> V. p. 12.
- <sup>2</sup> Anno. 1445. Sedillot. Proleg. clv.
- Properly III.
- \* Besides the capital of Syria, he is said to have founded 15 other cities of this name, called after his father.

cian era is of Hebrew origin. Kushyár¹ in his Jámi' says that there is no difference between the Syro-Maccdonian and the Syrian era, except in the names of the months. The Syrian year begins on the 1st day of Tishrín ul Awwal. This happened formerly when the sun was in the 4th degree of Libra, and now falls on the 11th.² With the Syro-Maccdonians, that date is the 1st of Kánúni i Sáni, when the sun is near the 20th degree of Capricorn. Battáni mentions this era³ as beginning with Philip, father of Alexander Bicornutus, but that he called it after his son to exalt his fame; and he has based on it the calculation of the mean places of the planets in his Canon. Of this era 1905 years have elapsed.

## The Augustan Era. '

He was the first of the Roman Emperors. The birth of Jesus Christ happened in his reign. The era begins with his accession. The year is the same as the Syro-Macedonian, and the months are Coptic; the last month in the common years has 35 days and in leap years 36. Of this era 1623 years have clapsed.

- <sup>1</sup> V. p. 8.
- <sup>2</sup> Another reading is 15th. Gladwin has 16th.
- There is a discrepancy among chronologors as to the commencement of this era. Some determine it to the 1st October 312 B. C. (W. Shith, Cl. Dicart Seleuc): the U. T. places it, 311 y. 4 m. B. C. The Syrian Greeks began their years in September, other Syrians in October: the Jews, about the autumnal equinox. It is used in the book of Maccabees and appears to have began in Nisán. Supposing it to begin on 1st September 312, B. C.; to reduce it to our era, subtract 311 y. 4 m. The following are the months used by Greeks and Syrians, according to the U. T.:

Surian. Macedonian. English. RIGI. Gorpiœus. September. Tishrin I. Hyperbere-October. tæus. " II. November. Dius. Kanún I. Appellæus. December. " II. Audynœus. January. Shubát. Peritius. February.

- Adár. Dystrus. March. Nisán. Xanticus. April. Ayár. Artemisius. May. Hazirán. Dasins. Jane. Tamúz. Pancemus. July. Кb. Lous. August.
- Albiráni says that the word Casar in Latin, means, "he has been drawn forth after a cutting has been made' alluding to the death of his mother in parturition and his birth by means of the "Casarcan operation," from which he received his name. An ingenious though fictitious etymology from ewdo.
- \* The Spanish era of the Cæsars is reckened from 1st January, 38 B. C., being the year following the conquest of Spain by Augustus. It was much used in Africa, Spain, and the south of France. By a Synod held in 1180, its use was abolished in all the churches dependent on Barcelona. Pedro IV of Arragon abolished it in 1350. John of Castile in 1382? It continued to be used in Portugal till 1455.—U. T.

### The Christian Era.

Begins with the birth of Jesus Christ. The year consists, like the Syro-Macedonian, of 365 d. 5 h. At the end of 4 years, they add a day to the end of the second month. The beginning of their Nyethemeron is reckoned from midnight. Like the Arabians, they name the days of the week, beginning with Sunday. The commencement of their year, some take to be the entry of the sun in Capricorn: others, from the 8th degree of the same.

# The Era of Antoninus of Rome.

It begins with his accession.\footnote{1} The years are Syro-Macedonian, the months Coptic. Ptolemy determined the position of the fixed stars in his Almagest on this era of which 1457 years have clapsed.

# The Era of Diocletian2 of Rome.

He was a Christian emperor. The era begins with his accession. The years are Syro-Macedonian, the months Coptic; 1010 years have since elapsed.

# The Era of the Hijra.

In pre-Islamic times, the Arabs had various cras, such as the building of the Ka'bah, and the sovereignty of Omar<sup>3</sup> b. Rabíi'a to whom was due

- 1 A. D. 138.
- قلطيانوس The name in the text is with a variant دقلطيانوس. tian. Abul Fazl evidently meant Constantine, but probably following the text of Albiráni, (Chronol) he copied the heading of the Era of Diceletian, without noticing in the body of the passage, the change of name to Constantine, as the 1st Christian Emperor. The number 1010 is an error. Gladwin has 1410. If Abul Fazl counts from the era of Diocletian A. D. 284, the intermediate years would be about 1310; if from A. D. 324, the date of Constantine's sole mastership of the empire 1270, if from his proclamation as Emperor by the legious in 306, the number would be 1290. His father Constantius was proclaimed Cosar by Diocletian in A. D. 292.
- An error for 'Amr-b-Lohayy-born about 167 A. D., was king of Hijáz; for his genealogy see Caus. de Perc. Essai Sur l'hist. Arab. Tabl. II, The great tribe of Khuzáa'h trace their descent from him. Whilst at Balká in Syria, he had seen its inhabitants practising idolatry: their idols, they averred. protected and favoured them, granting rain at their prayers. At his request they presented him with the idol, Hobal, which he set up in Mecca and introduced its worship. It was made of red agate or cornelian and represented an old man with a long beard. "Quam pulchre convenit figmento isti nomon suum," says Pococke. (Spec. p. 97) " ut sit Zanitas." He also brought two other idols, Asaf and Nailah in the figure of a man and a woman and placed them upon

the rise of idolatry in Hijáz, and this continued in use till the year of the Elephant, which they, in turn, observed as a fresh epoch. Every Arab tribe constituted any important event in their history, an era. In the time of the prophet this thread of custom had no coherence, but from the date of the Hijra, they gave each year a special name. Thus that year was called the 'year of Permission," that is, the permission to go from Mecca to Medina. The second-year was named the "year of Command," i. e, to fight the unbelievers.2 At the accession of the second Caliph (Omar), Abú Músa Asha'ri,3 governor of Yaman made the following representation: "Your despatches have arrived dated the month of Shaban. I cannot discover what date is understood by Shabau." The Caliph summoned the learned. Some of the Jews advised the use of their era. The sage Húrmuzán4 said; "the Persians have a computation which they call Máhroz" and this he explained. But as there were intercalations in both, and their skill in calculation was slight, he did not accept either but adopted the era of the Hijrah. The month according to their system is reckoned from the sight of one new moon, after the sun has completely set, till the next is visible. It is never more than 30 nor less than 29 days. It sometimes occurs that four successive months are of 30 days, and three of 29. Chronologers putting aside calculations based on the moon's appearance, feekon lunar months

mounts Safa and Merwa. The following references deal fully with this subject. Poc. Spec. 90 et seq. Caus, de Perc. I, 223. Shahrastani, p. 434. Sírat ur Rasúl. Ibn Hisháun, p. 50. Sale, Prel. Disc. Kur. p. 14. The same error in the name Rabia' occurs in Albiráni Chronol. p. 39.

J. 570 A. D. the year in which Mahomed was born, and the name of which commemorates the defeat of Abraha, the Ethiopian king of Yaman. The story is well known v. Sale's Kurán, p. 499. Essai sur l'Histoire des Arabes Caussin, de Perceval, 1, 268.

<sup>2</sup> The 3rd year was called, the year of the trial

> 4th ,, ,, year of Congratulation on the occasion of marriage.

> 5th ,, ,, year of the earthquake.

6th ,, ,, year of inquiring.

7th ,, ,, year of victory.

8th ,, ,, year of equality.

10th ", ", year of farewell. Chronol. Albiráni, Sachan, p. 35.

\* Abú Músa Al Asha'ri was one of the Companions, a native of Kúfah. He joined the prophet at Meeca and was a convert before the Flight to Medina. He was also one of the fugitives to Abyssinia and including his journey from Yaman to Meeca, shared in the unusual distinction of three flights. His reading of the Karan was unequalled. He died at Medina A. H. 50 or 51. Nawawi. Tahzib w'l Asmá.

\* Hurmuzan was a learned Persian, taken prisoner by Abú Músa and sent to the Caliph Omar by whom his life was spared, though the grace was obtained with some difficulty. He subsequently became a convert. Ibid.

in two ways, viz., Natural, which is the interval of the moon's departure from a determinate position, with the sun in conjunction or opposition or the liker to its return thereto; 2ndly, Artificial; since the motions of the moon are inconstant and their methodisation as well as an exact discrimination of its phases difficult, its mean rate of motion is taken and thus the task is facilitated. In the recent (Gurgáni) tables, this is 29 days, 12 hours and 44 minutes. The rule is this, that when the fraction is in excess of half, it is reckoned as one day. Thus when the excess is over a half, they take the month of Muharram as 30 days, and the second month 29, and so on alternately to the last. In common years, therefore, Dhi'l Hijjah is 29 days. The mean lunar year consists of 354 d. 8. h. 48 m. which is less than a solar artificial year by 10 d. 21 h 12 m. Mirza Ulugh Beg has based his new Canon on this era of which 1002 years have elapsed to the present time.

### The Era of Yazdajird.

He was the son of Shahryar Aparwez<sup>4</sup> b. Hurmuz b. Noshirwan. It began with the accession of Jamshid. After him every succeeding monarch renewed its designation by his own accession and Yazdajird also rejustituted it from his assumption of sovereignty. The years are like the Syro-Macedonian; but the fraction in excess was reserved till at the end of 120 years, it amounted to a whole month, and that year was reckoned at 13 months. The first intercalation was after Farwardin, and it was called by the name of that month. Then Urdibihisht was twice counted and so on. When the era was renewed under the name of Yazdajird, and his authority terminated in disaster, the continuity of intercalation was neglected. The years and months are Artificial, solar. 963 years have since elapsed.

- <sup>2</sup> And 36 seconds. Ibid.
- \* For the prohibition of intercalation

- by Mahomed. See Albiruni Sachau. Chronol. p. 74.
- \* In Albirúni, Shahryár-b-Parwez. Parwez or Aparwez signifies Victorious. All the five tables of the Sassanian kings in the Chronology vary somewhat, but are agreed in naming Shahryar as the father of Parwez, though he is not placed as a reigning sovereign. The U. T. however mentions him after Ardeshir III. A. D. 629.
  - <sup>5</sup> A. D. 632.
- "In Persia, since the age of Zoroaster, the revolution of the sun has been

<sup>1</sup> This is a lunation or synodical month, the interval between two conjunctions of the Sun and Moon. The periodical month, as distinguished from this, is the time taken in transit by the moon from any point of the Zodiac back to the same point: it consists of 27 d. 7 h. 43 m. Hence a lunar month is sometimes taken in round numbers at 28 d. and this is the length of a lunar month according to the law of England. Lewis. Astr. of the Anc. 9. 20.

### The Maliki Era.

It is also called Jaláli. The Persian Era was used at that period. Through the interruption of continuity in intercalation, the commencements of the years fell into confusion. At the instance of Sultán Jalálu'ddiu¹ Malik Sháh Saljúki, Omar Khayyam and several other learned men instituted this era. The beginning of the year was determined from the sun's entry into Aries. The years and months were at first Natural, but now the month is the ordinary Artificial. Each month consists of 30 days and at the end of Isfandármuz, they add 5 or 6 days. Of this era, 516 years have elapsed.

# The Kháni Era

dates from the reign of Gházán² Khán and is founded on the Elkháni tables. The years and months are Natural, solar. Before its adoption the State records bore date from the Hijrah and the lunar year was current. By this means the road was opened to grievous oppression, because 31 lunar years are equal to only 30 solar years and great loss occurred to the agriculturists, as the revenue was taken on the lunar years and the harvest depended on the solar. Abolishing this practice Gházán Khán promoted the cause of justice³ by the introduction of this era. The names of the month are the Turkish with the addition of the word kháni. Of this, 293 years have elapsed.

known and celebrated as an annual festival, but after the fall of the Magian empire, the intercalation had been neglected: the fractions of minutes and hours were multiplied into days, and the date of the spring was removed from the sign of Arios to that of Pisces." Gibbon. Decl. and Fall. Vol. X. p. 367. Ed. 1797.

<sup>1</sup> A brilliant sketch of his life may be read in Gibbon. I need not multiply references. "The reign of Malek was illustrated by the Gelalæan era: and all errors, either past or future, were corrected by a computation of time, which surpasses the Julian and approaches the accuracy of the Gregorian style. The Gelalæan era is fixed to the 15th March A. H. 471 (A. D. 1079) Vol. X. p. 367.

- <sup>2</sup> Gházán Khán, Mahmúd, eldest son of Arghún, tho 8th from Mangu Khán son of Jenghiz, of the Moghul Tartar or Ilkhanian Dynasty of Persia. cended the throne in A. H. 694 (A. D. 1294) and was succeeded by Ghiásu'ddin An-guptu Khudá bandah Muhammad, A. H. 703. (A. D. 1303). U. T. P. II, p. 146. A history of Gházan Khán was written by Shamsu'ddin Muhammad al Káshi, temp Sultán Abu Said. Khalifah gives the date of the author's death about A. H. 930, which does not agree with the date of Abu Said in the U. T.
- A similar act of justice is recorded of the Calipit al Muatadhid in his reform of the Calendar. V. Albirúni, Chronol. p. 36.

#### The Iláhi Era.

His Majesty had long desired to introduce a new computation of years and months throughout the fair regions of Hindustan in order that perplexity might give place to easiness. He was likewise averse to the era of the Hijra (Flight) which was of ominous signification, but, because of the number of short-sighted, ignorant men who believe the currency of the era to be inseparable from religion, His Imperial Majesty in his graciousness, dearly regarding the attachment of the hearts of his subjects did not carry out his design of suppressing it. Although it is evident to right-minded people of the world, what relevancy exists between the market-coin of commercial dealing and the night-gleaming jewel of faith, and what participation between this chain of objective connection and the twofold cord of spiritual truth, yet the world is full of the dust of indiscrimination, and the discerning are heedful of the fable of the foxl that took to flight when camels were being impressed. In 9922 of the Novilunar year, the lamp of knowledge received another light from the flame of his sublime intelligence and its full blaze shone upon mankind. The fortunately gifted, lovers of truth raised their heads from the pillow of disappointment and the crooked-charactered, drowsy-willed lay in the corner of disuse. Meanwhile the imperial design was accomplished. Amir Fathu'llah Shirazi,3 the representative of ancient sages, the paragon of the house of wisdom, set himself to the fulfilment of this object, and taking as his base the recent Gurgáni Canon, began the era with the accession of his Imperial Majesty. The splendour of visible sublimity which had its manifestation in the lord of the universe commended itself to this chosen one, especially as it also concentrated the leadership of the world of spirituality, and for its cognition by vassals of auspicious mind, the characteristics of the divine essence were ascribed to it, and the glad tidings of its perpetual adoption proclaimed. The years and months are natural solar without intercalation and the Persion names of the months and days have been left unaltered. The days of the month are reckoned from 29 to 32, and the two days of the last are called Roz o Shab (Day and Night). The names of the months of each era are tabulated for facility of reference. 228465

<sup>&</sup>lt;sup>1</sup> These months are somewhat different in Albiráni. Chronol. p. 82.

<sup>&</sup>lt;sup>2</sup> The choice of variants in these names might have been decided by a reference to Gesenius: the correct spellings appear to be relegated to the notes of the text.

<sup>&</sup>lt;sup>a</sup> In the Ceptic months, I have followthe spelling of Sachau's Albirúni (Chrono). p. 83) and the U. T. p. 10. P. 11. They are to be found also in Masaúdi's Murúj uḍ Dahab. Chap. 55, and in Abúl Mahásin (Annals) Vol. I, p. 36.

The events of the world recorded in chronological sequence, are accounted the science of history, and he who is proficient in them, is a historian. Many writings in this branch of knowledge regarding India, Khatá, the Franks, Jews and other peoples are extant. Of the Muhammadan sect, the first who in Hijáz occupied himself with this subject was Muhammad-b-Isḥák,¹ then follow Wahab-b-Murabbih,² Wákidi,³ Asma'i,⁴ Tabari,⁵ Abu A'bdu'llab Muslim-b-Kutaybah,⁵

- <sup>1</sup> Author of the well known work Al Mayházi wa's Siyar (expeditiones bellicæ et biographim); he was a native of Medina, and as a traditionist held a high rank, and regarded by Al Bukhári and as Sháfa'i as the first authority on the Muslim conquests. He died at Baghdad A. H. 151 (A. D. 768) other dates (151-2-3) are also given. It is from his work that Ibn Hisham extracted the materials for his life of the prophet. v. Ibn Khalakan. Others accord the honour of being the first writer on this subject to U'rwahb-Zubayr. Haj. Khal. V. 646.
- \* Was a native of Yaman and one of the "Abná" i. e., a descendant of one of the Persian soldiers settled there. Ho died at Sana'á in Yaman A. H. 110. in Muharram (April—May A. D. 728)—(others say in 114 or 116) at the age of 90. He was a great transmitter of narrations and legends. A great part of the information given by Moslem historians regarding the antislamic history of Porsia, Greece, Yaman, Egypt &c. comes from him. He was an audacious liar, as Moslem critics of a later period discovered. Ibn Khall. De. Sl. 1v. p. 672-3.
- Abu A'bdu'llah Muhammad-b-Omar. Wakid, al Wakidi, a native of Mocca, author of the well known "conquests" of the Moslems. He was born A. H. 130 (Sep. A. D. 747) and died on the eve of Monday 11 Zúl Hijjah. A. H. 207 (27th April A. D. 823), being then Kádhi of the quarter of Baghdad, situated on the

- west bank of the Tigris; wikidi means descended from Wakid, an ancestor of this name., I. K. III. p. 61.
- \*Abu Said 'Abdu'l Malik-b-Kuraib al Asma'i, the celebrated philologor, a complete master of Arabic. He was native of Basra, but removed to Baghdad in the reign of Harún ar Rashid. It is said he knew by heart 16,000 pieces of verse. He was born A. H. 122 (A. D. 746) and died at Basra in the mouth of Safar A. H. 216 (March—April A. D. 831). Others say he died at Marw. The voluminous treatises of this author are detailed by I. K.
- <sup>5</sup> Ibn Jarír at Tabari (native of Tabarestán) author of the great commentary of the Kurán and of the celebrated history. He is regarded as an exact traditionist, born A. H. 224 (A. D. 838-9) at Amol in Tabarestán and died at Baghdad A. H. 310 (A. D. 923)., I. K.
- Marw, author of the Kitab ul Ma'áríf and Adáb úl Kātib; the first a work of general knowledge, from which Eichhoru extracted his genealogies of the Arabs published in his Monumenta historiæ Arabum: it contains a number of short biographical notices of the early Moslems. A list of other works will be found in I. K.'s biography. 1I. p. 22. He was born A. H. 213 (A. D. 828-9) and died A. H. 270 (A. D. 884). Other dates given are A. H. 271 and 296 (A. D. 909). The Adáb ul Kütib or Writer's Guide is

Aa'tham of Kúfa, Muḥammad Mukanna', Ḥakim A'li Miskawaih, Fakhru'ddin Muḥammad-b-A'li Daud Sulaiman Binakiti, Abu'l Faraj,

remarkable for its long preface, though itself a short work on philology, and was called by the learned 'a preface without a book,' in contradistinction to Ibn as Sikkít's work, the Isláh úl Mantik, a book without a preface.

- ¹ Muhammad-b-A'li, known as Aa'sim Kúfi; his work, the Futúh Aa'thim (H. K.) is a short account of events from the death of the prophet to the death of Husain at Karbala. It was translated into Persian by Ahmad-b-Md. Mustaufi: a copy of it is among the MSS. of the Asiatic Society. In this latter the name is spelt with a Prinstead of
- <sup>2</sup> This name occurs in the Hamasah. معاتبني في الدين قومي A poem beginning the 39th of the "Báb úl Adab" is by Al Mukanna' al Kindi. Freytag gives his name from the Scholia as Muhammadb-Ohmaizah. He is said to have been called Mukanna' from the toil he wore to protect the beauty of his person. He squandered his wealth in lavish gifts and in the time of the Omayyads was still living, of much account with his people, but in poverty. This single poem scarcely deserves to place him in the roll of Arab writers of note. The variant Mukaffa' must refer to Ibn al Mukaffa'. He was known as the Kátib or Secretary and was the author of some celebrated epistles. He also translated Kalila and Damua into Arabic. He was Secretary to I'sa-b-A'li, uncle to the first two Abbaside Caliphs, as Saffáh and al Manşúr. His horrible death by order of the governor of Basra, Sofyán-b-Muawiyah al Muhallabi may be read in Ibn-Khall, It occurred in A. H. 142 (A. D. 759-60). The latter states that some of his poetry may be found in the Ha-

- masah. He is evidently confounding him, with Mukanna' above mentioned. According to H. K. the 'Taríkhu'l Furs, an ancient history of Persia by an unknown author and the principal source of the Shahnamah was translated from the Pehlevi into Arabic by Ibn al Mukanna' I suspect Mukaffa' is the right reading.
- Abu A'li Ahmad-b-Miskawaih, a Persian of good birth and distinguished attainments. He was treasurer to Malik Adhd'ud Daulah-b-Buwaih, who placed the utmost trust in him. He was the author of several works. Abúl Faraj relates (Hist. Dynast. p. 328) that Avicenna consulted him on a certain abstruse point; and finding him slow of intelligence and intapable of solving his difficulty, left him. His death is placed about A. II. 420. Haj. Khal. makes it 421 (A. D. 1030.) The latter mentions one of his works. Tajárib-úl-Umum wa Tawakib u'l Himam (experientiæ populorum et studia animorum) of much repute.
- Binákit is placed by Yakút (Mua'ja-múl Buldún) in Transoxiana. He is the author of the Raudhat ul Albáb (viridarium cordatorum) a compendium of Persian history. He lived tempore Jinghiz Khan and wrote on the history of the Khátái kings at the request or command of Sultán Abú Saíd Bahádur. H. K. See Elliot's Bibl. Index to Muhammadan Historians India p. 70.
- The well known author of the Historia Dynastiarum, born A. D. 1226; and died 1286 according to Chaufepié. Pococke and D'Herbelot briefly allude to him; Bayle at some length, whose cynicism enlivens if it does not add to the value of his notes.

Imádu'ddín-b-Kathír,¹ Muḥaddasi,² Abú Ḥauífah Dinawari,³ Muḥammad-b-'Abdu'llah Masa'údi,⁴ Ibu Khallákán,⁵ Yáfa'i,⁶ Abú Naṣr Utbi;² amongst the Persians, Firdausi, Ţúsi, Abúl Ḥusain Baihak,³ Abúl

- <sup>1</sup> The Háfidh I'mádu'ddín, Ismáil-b-A'bdu'llah ad Dimashki died in A. H. 774 (A. D. 1372). The name of his history is 'Al Bidáyah wa'l Niháyah (initium et finis) and is continued to his own time. See H. K.
- There are several of this name. See D'Herb. art. Mocaddes. Shamsu'ddin'Abdu'llah was the author of a geography entitled.—Ahsanu'l taksim fi Mu'rifati'la kâlim, a description of the seven climates, died A. II. 441, (A. D. 1049: a second, Husamuddin Md.-b:-A'bul Wahid author of a work on judicial decisions; died A. H. 643 (A. D. 1245): a third, probably the one alluded to, Shahabaddin Aba Mahmud as Shafa'i author of the work Muthiru'l Charam ild Ziarati Kūds wal Sham (liber, cupidinem excitans Hierosolyma et Damascum visendi.) Ile died in 765, (A. D. 1363). II. K.
- Abú Hanífa Ahmad-b-Dáúd ad Dinawari, author of a work Isláh wt . Mantik (emendatio sermonis). He died 290 (A. D. 902). H. K.
- 4 The author of the Murúj ud Dahab. (Prata Auria) which he composed in the reign of the Caliph Mutia Billáh. It begins with the creation of the world, and is continued through the Caliphs to his own time. He died in Cairo iu 346. A. H.(A. D. 957). See D'Herb. and it. K.
- The famous biographer: his work the Wafayátu'l Aa'yán containing the lives of illustrious men is well known. It was composed in Egypt under Sultán Baybars of the Mameluke dynasty. He has given a few particulars of his life at the close of this work which was finished in A. H. 672 (A. D. 1273-4). He was born in 608 (A. D. 1211) and died in 681 (A. D. 1282). D'Horb, and H. K.

- \* A'bd'nllah-b-Asa'd al Yáfa'i al Yamani, died 768 A. II. (A. D. 1366). He wrote the Mirat u'l Janán wa I'brat u'l Yakdhán (speculum cordis et exemplum vigilantis), a historical work beginning with the Flight and continued to his own time. Another is the Randhai u'l Riáhín (viridarium hyacinthorum) containing lives of Moslem saints. This last is not mentioned by II. K. cf. D'Herb.
- <sup>7</sup> Author of the Tarikh Yamini which contains the history of the Ghaznivide Sultán Yamin a'd Daulah Maḥmud-b-Subuktakin of whom the was a contemporary: it is brought down to the year 428 (A. D. 1036-7): De Sacy has given an analysis of it in the 4th Vol. of Notices et extraits. I. K. III. p. 266. Another of his name is Al Utbi the poot of Basra; his surname was drawn from Utba son of Abú Sufyán. It also signifies descended from Utba-b-Ghazán one of the prophet's companions. I. K. III. 107.
- Abú Hasan' Ali-b-Zavd al Baihaki · author of the Wishahi Damyatil Kasr; a supplement to the Dumyat u'l Kaşr of N Bákharzi the poet who died. A. H. 467. (A. D. 1075). He is mentioned in I. K. under the latter name; also by H. K., but his date is omitted; also as the author of a work called Tarikhi Baihak. v. under Tarikh; Baihak, derived from the Persian baiha, good (bihin), according to Yakút is a collection of 321 villages between Nisabúr and Kúmis, there are two others given in H. K. one: the author of the Arba'in (quadragenariæ de Moribus) Abu Bakr Ahmad-b-A'li as Shafa'i, died 458, (A. D. 1065) and Abu'l Mahasin Masa'úd-b-A'li-d-544 (A.

- 14 D'Horbelot and the Raudhat give the name A'lau'ddin A'ta Malik al Juwaini; the apthor of the Jahán Kushá a Persian bistory; no other particulars are stated.

wrote the Tarikh Jahánkushá, *Historia*, orbis terrarum victrix) Ḥamdu'llah Mustaufi Ķazwíni, Kádhi Nidhám Bayḍháwi, Khwajah-Rashídi Ṭabíb, Háfiz Abru, and other trustworthy writers.

For a long time past, likewise, it has been the practice to record current events by a chronogram and to make the computation of years appear from a single word, a hemistich and the like and this too they term a date; as for instance, for the accession of his Majesty, they have devised the words "Nasrat i Akbar" (نصوت الكبر) victoria insignis and "Kam Baksh" (كام الخش ). Optatis respondens), but the ancients practised it little; thus the following was written on Avicenna.

The Demonstration of Truth, Abu, A'li Sina.

Entered in Shaja' (عَدُهُ 373) from non-existence into being.

In Shaṣá (شعا 391) he acquired complete knowledge.

In Takaz (كذ ككر 427) he bade the world farewell.

- ¹ Author of the Tarikh Guzida (prestantissima exhistoria) which ranks among the best general histories of the East, written for the Wazir Ghiathu'ddin Muhammad. It was first composed in 50,000 verses, and then turned into prose about A. II. 730 (A. D. 1329-30). It begins with the creation and gives an account of the prophets, preislamite monarchies, and subsequent Caliphate to his own time with the usual digressions in biography, geography and genealogy. The various chapters of this work are detailed in H. K. See Elliot's Bibl. Index, p. 75.,
- <sup>2</sup> Kádhi Naşiru'ddin Abdu'llah-b-Omar al Baidháwi-d-A. H. 684 (A. D. 1285) author of the Nidhámu't Tawáríkh (Ordo historiarum), a compendium of Porsian history with an account of Moslem dynasties from the house of Umayyah to that of Khwárazm and the Mongols. The text has the word Nidhám as a name instead of the titles of his work.
- Khwájah Rashidu'ddín Fadhlu'llah. the Wazir (put to death in 718 (A. D. 1318), author of the Jamigu't Tawáríkh (historia universalis). He began it just before the death of Gházán Khán A. H. 704 (1304. A. D.) His successor

- Khudabandah Muhammad ordered him to complete it and preface it with his name and to add to the history of the Jingiz dynasty, a more general account of the nations of the world. The full details will be found in H. K. under art. جامع التوازيخ A more extended notice of the author and his work may be read in Elliot's Ribl. Index p. 1. Vol. I.
- Núru'ddín Lutfullah, al Harawi-b-A'bdullah, known as Háfidh Abrú, author of the Zubdatu't Tawúrikh composed for Pai Sankar Mírza, an account of the principal events and strange or extraordinary occurrences recorded in the history of the world carried down to A. H. 829 (1425 A. D.) He died in 834 (A. D. 1430). Elliot's Bibl. Index p. 81.

The whole of this series of authors is taken bodily and in the same order by Abu'l Fazl from the Raudhatu's Safá without acknowledgement.

<sup>6</sup> Pur i Sína signifies the same as Ibn Sína, The full name of this philosopher is Abu 'Ali Ḥusain-b-'Abdu'llahb-Sína, as Shaikh. ar Ráis. He was born in Buhkára A. H. 370 (A. D. 980) and died in 428 (1036) at the age of 58. The length to which these notes have run

### A'I'N I.

# The Commander of the Forces.

He is the vicegerent of His Majesty. The troops and people of the province are under his orders and their welfare depends upon his just administration. He must seek the will of God in all that he undertakes and be constant in praise and supplication. He must never lay aside the consideration of the people's prosperity nor suffer his zeal to sleep. He must not be prompt to vain converse or asperity of manner. Vigilance and the due distinction of ranks must be his care, especially towards subordinates near his person and officials at a distance. What is the duty of dependents must not be committed to his sons, and what these can perform he should not execute himself. In all transactions he should confide in one wiser than himself and if he can find none such, he should confer with a few chosen individuals and weigh carefully their deliberations.

It haps at times, the heary sage
May fail at need in counsel right,
And unskilled hands of tender age
A change shaft wing within the white.

He should not admit many men to his secret councils, for the prudent, zealous, warm, disinterested adviser'is rare, lest one of them should provoke dissension, and opportunities for timely action escape. He should regard his office of command as that of a guardian, and exercise caution, and making a knowledge of the disposition of men a rule of government, live as it behoves his office. Levity and anger he should keep under the restraint of reason. He should reclaim the rebellious by a just insight into the conduct of affairs and by good counsel, failing which, he should be swift to punish by reprimands, threats, imprisonment, stripes or amputation of limb, but he must use the utmost deliberation before severing the bond of the principle of life. He should not pollute his tongue with abuse which is the manner of noisy vagabonds of the market place. He should refrain from the use of oaths in speech for this is imputing falsehood to himself by implication and distrust in the person he addresses. investigations, he should not be satisfied with witnesses and oaths, but pursue them by manifold inquiries, by the study of physiognomy and the

compel me to reject information which the reader may easily gather for himself. The life of Avicenna will be found in I. K. Under art Sina D'Herbelot transcribes his life and under Canún the contents of his famous work on Medicine which has been a mine of knowledge and contention to all subsequent Moslem writers on this subject.

' Gulistán of Sa'di, Chap. III.

exercise of foresight, nor, laying the burden of it on others, live absolved from solicitude.

Beware lest justice to that judge belong, Whose own ill-deed hath wrought the suppliant's wrong.

Let him not inflict the distress of expectation upon supplicants for justice. He should shut his eyes against faults and accept excuses, and adopt such a course of conduct as will not disparage his good breeding and dignity. He should not interfere with any man's creed. A wise man, in worldly affairs that are transient, seeks not his own loss, why then should he knowingly abandon the spiritual life that is eternal, for if it be true, disturbance is criminal and if otherwise it is the malady of ignorance and is deserving of kind treatment. Each division of the kingdom, he should entrust to zealous upright men and provide for the safety of the roads by the establishment of trusty guards and from time to time receive reports of them. He should select for purposes of secret intelligence honest, provident, truthful and unavaricious men, and if such needful individuals, are not to be obtained, in every affair he should associate several who are unknown to each other and inspecting their several reports thus ascertain the truth. His expenditure should be less than his income, and from his treasury he should supply the needy, especially those who loose not their tongues in solicitation. He should never be negligent of the supplies and accoutrements of the troops. He should not refrain from the practice of horsemanship, and should use the bow and the matchlock and command this exercise to his men. In attaching individuals to his own person and in the increase of confidence, he should employ a cautious circumspection. Many are the evil dispositioned and licentious of nature who profess sincerity and sell themselves at a high price. He should turn his attention to the increase of agriculture and the flourishing condition of the land and earn the gratitude of the people by the faithful discharge of his obligations and account the befriending of the agriculturists as an excellent service to the Almighty. He should retain impartial collectors of revenue and from time to time obtain information regarding their actions. Let him store for himself a goodly reward in the making of reservoirs, wells, watercourses, gardens, serais and other pious foundations, and set about the repairing if what has fallen into ruin. He should not be given to retirement nor be unsettled in mind which is the manner of recluses, nor make a practice of associating with the common people nor be ever surrounded by a crowd which is the fashion of blind worshippers of outward appearances.

Court not the world nor to it wholly die; Walk wisely: neither phænix be nor fly.

Let him hold in honour the chosen servants of God, and entreat the assistance of spiritually-minded anchorites and of mendicants of tangled hair and naked of foot. The imploring blessings from the sun and the solar lamp, he should not consider as its deification or a worshipping of fire.1 Let him accustom himself to night vigils and partake of sleep and food in moderation. He should pass the dawn and the evening in meditation and pray at noon and at midnight. When he is at leisure from worldly affairs and introspection of conscience, he should study works of philosophy and act according to their precepts. If this does not satisfy his mind, he should peruse the spiritual admonitions of the Masnawi<sup>2</sup> and regardless of the letter imbibe its spirit. He should entertain his mind with the instructive stories of Kalila and Damna, and thus gaining a knowledge of the vicissitudes of life, regard the experience of the ancients as his own. Let him apply himself to the cultivation of true knowledge and put aside childish tales. Let him associate with a discreet and trusty friend and give him permission to look carefully into his daily conduct in order that he may privately represent whatever, in the balance of his discretion, appears blameworthy and if at any time his penetration should be at fault he should not be thereat displeased for men have ever been backward in uttering a displeasing truth especially in a season of anger when reason slumbers and the spirit is affame. Courtiers, for the most part, seek pretexts of evasion and lend a false colouring to error, and if perchance one of them should be really concerned, he will hold his peace for fear, for he is indeed difficult to find who would prefer another's benefit to his Let him not be roused to anger by the representations of detractors, but rest in the path of circumspection, for men of evil nature. dissemblers in speech, palm off their tales with the semblance of truth and representing themselves as disinterested, labour to injure others. should not consider himself as fixed of residence but hold himself ever ready for a summons to the presence. Let him not be malevolent, but prefer courtesy and gentleness. He should not subvert ancient families but let an illustrious ancestry redeem unworthy successors. that the younger among his followers when they meet, use the greeting "God is great," and the elder reply 'Glorious is His Majesty." Let him not take as food a sheep or a goat of under one year and he should abstain from flesh for a month after the anniversary of his birthday. He shall not eat of anything that he has himself killed. He should restrict himself in sensual gratification and approach not a pregnant woman.

<sup>&</sup>lt;sup>1</sup> Sec. Vol. I, pp. 200-202.

<sup>\*</sup> Of Jalála'ddin Rúmi.

See Vol. I, p. 166.

food which is bestowed in memory of the deceased, he should prepare each year on his birthday and regale the needy.

With heavenly treasures store thy grave—provide!
While yet in life—none may when he hath died.

When the sun advances from one sign of the zodiac to another, let him offer up a thanksgiving and discharge cannon and musketry to arouse the slumberers in forgetfulness. At the first beams of the world-illumining sun and at midnight which is the turning point of its re-ascension, let him sound the kettle-drum and enforce vigilance.

### A'I'N II.

### The Foujdar.

In the same way that His Majesty, for the prosperity of the empire, has appointed a Commander of the forces for each province, so by his rectitude of judgment and wise statesmanship he apportions several pargannahs to the care of one of his trusty, just and disinterested servants, appreciative of what, is equitable, and faithful to his engagements; and him they style by the above name. As a subordinate and assistant he holds the first place. Should a cultivator or a collector of the crown lands or an assignce of government estates prove rebellious, he should induce him to submit by fair words, and if this fail, he shall take the written evidence of the principal officers and proceed to chastise him. He should pitch his camp in the neighbourhood of the body of rebels and at every opportunity inflict loss upon their persons and property but not risk at once a general engagement. If the affair can be concluded with the infantry he should not employ cavalry. He should not be rash in attacking a fort, but encamp beyond bowshot and the reach of its guns and musketry, and obstruct the roads of communication. He should be vigilant against night attacks and devise a place of retreat, and be constant in patrolling. When he has captured the rebel camp, he must observe equity in the division of the spoil and reserve a fifth for the royal exchequer. If a balance of revenue be due from the village, this should be first taken into account. He should constantly inspect the horses and accourrements of the troops. If a trooper be without a horse, his comrades should be assessed to provide for him and if a horse be killed in action, it should be made good at the expense of the State. He must duly furnish a roll of the troops present

<sup>&</sup>lt;sup>1</sup> Sa'di-Gulistán Preface.

and absent, to the royal court and ever bear in mind the duty of carrying out its sacred ordinances.

### AIN III.

### The Mir A'dl and the Kázi.

Although the supreme authority and the redress of grievances rests with sovereign monarchs, yet the capacity of a single person is inadequate to the superintendence of the entire administration. It is therefore necessary that he should appoint one of his discreet and unbiassed servants as his judiciary delegate. This person must not be content with witnesses and oaths, but hold diligent investigation of the first importance, for the inquirer is uninformed and the two litigants are cognisant of the facts. Without full inquiry, and just insight, it is difficult to acquire requisite certitude. From the excessive depravity of human nature and its covetousness, no dependence can be placed on a witness or his oath. By impartiality, and knowledge of character, he should distinguish the oppressed from the oppressor and boldly and equitably take action on his conclusions. He must begin with a thorough interrogation and learn the circumstances of the case; and should keep in view what is fitting in each particular and take the question in detail, and in this manner set down separately the evidence of each witness. When he has accomplished his task with intelligence, deliberation and perspicacity, he should, for a time, turn to other business and keep his counsel from others. He should then take up the case and reinvestigate and inquire into it anew, and with discrimination and singleness of view search it to its core. If capacity and vigour are not to be found united, he should appoint two persons, one to investigate whom they call a Kázi; the other the Mir A'dl to carry out his finding.

#### AIN IV.

### The Kotwál.

The appropriate person for this office should be vigorous, experienced, active, deliberate, patient, astute and humane. Through his watchfulness and night patrolling the citizens should enjoy the repose of security, and the evil-disposed lie in the slough of non-existence. He should keep a register of houses, and frequented roads, and engage the citizens in a pledge of reciprocal assistance, and bind them to a common participation of weal and woe. He should form a quarter by the union of a certain number of habitations, and name one of his intelligent subordinates for its superintendence and receive a daily report under his seal of those who enter or

lcave it, and of whatever events therein occur. And he should appoint as a spy one among the obscure residents with whom the other should have no acquaintance, and keeping their reports in writing, employ a heedful scrutiny. He should establish a separate serái and cause unknown arrivals to alight therein, and by the aid of divers detectives take account of them. He should minutely observe the income and expenditure of the various classes of men and by a refined address, make his vigilance reflect honour on his administration. Of every guild of artificers, he should name one as guildmaster, and another as broker, by whose intelligence the business of purchase and sale should be conducted. From these also he should require frequent reports. He should see to the open thoroughfare of the streets and erect barriers at the entrances and secure freedom from defilement. When night is a little advanced, he should prohibit people from entering or leav-He should set the idle to some handicraft. He should remove former grievances and forbid any one from forcibly entering the house of another. He shall discover thieves and the goods they have stolen or be responsible for the loss. He should so direct that no one shall demand a tax or cess save on arms, elephants, horses, cattle, camels, sheep, goats and merchandise. In every Subah a slight impost shall be levied at an appointed place. Old coins should be given in to be melted down or consigned to the treasury as bullion. He should suffer no alteration of value in the gold and silver coin of the realm, and its diminution by wear in circulation, he shall recover to the amount of the deficiency. He should use his discretion in the reduction of prices and not allow purchases to be made outside the city. The rich shall not take beyond what is necessary for their consumption. He shall examine the weights and make the ser not more or less than thirty dams. In the quz? hereinafter to be mentioned, he should permit neither decrease or increase, and restrain the people from the making, the dispensing, the buying or selling of wine, but refrain from invading the privacy of domestic life. Of the property of a deceased or missing person who may have no heir, he shall take an inventory and keep it in his care. He should reserve separate ferries and wells for men and women. He should appoint persons of respectable character to supply the public watercourses, and prohibit women from riding on horseback. He should direct that no ox or buffalo or horse, or camel be slaughtered, and forbid the restriction of personal liberty and the selling of slaves. He should not suffer a woman to be burnt against her inclination, nor a criminal deserving of death, to be impaled,

<sup>&</sup>lt;sup>1</sup> See Vol. I, pp. 16, 32, et seq.

<sup>&</sup>lt;sup>2</sup> See Vol. I, p. 88. n. and Ain 11 of this book.

nor any one to be circumcised under the age of twelve. Above this limit of age, the permission may be accorded. Religious enthusiasts, calendars, and dishonest tradesmen he should expel or deter from their course of conduct, but he should be careful in this matter not to molest a God-fearing recluse, or persecute barefooted wandering anchorites. He should allot separate quarters to butchers, hunters of animals, washers of the dead, and sweepers, and restrainmen from associating with such stony-hearted gloomydispositioned creatures. He shall amputate the hand of any who is the pot-companion of an executioner, and the finger of such as converse with his family. He should locate the cemetery outside of, and to the west of the city. He should prohibit his adherents from wearing sombre garments in mourning and induce them to wear red. From the first till the nineteenth of the month of Farwardin, during the whole of the month of Aban, the days of the sun's passage from one sign of the zodiac to another, viz., the first of every solar month, the sixteenth of the same, the Iláhi festivals, the days of the eclipse of the sun and moon, and on the first day of the week, he shall prohibit men from slaughtering animals, but hold it lawful as a necessity for feeding animals used in hunting and for the sick. shall remove the place of execution to without the city and see that the Iláhi festivals are observed. He shall have lamps lit on the night of the Nauroz! (New Year's day) and on the night of the 19th of Farwardin. On the eve of a festival, as well as on the festival itself he shall cause a kettledrum to be sounded at each watch. In the Persian and Hindu almanacs, he shall cause the Ilahi era to be adopted and the beginning of the month according to the Hindu nomenclature he shall place in Shuklapachch.2

### AIN V.

# The Collector of the Revenue

Should be a friend of the agriculturist. Zeal and truthfulness should be his rule of conduct. He should consider himself the representative of the lord paramount and establish himself where every one may have easy access to him without the intervention of a mediator. He should deal with the contumacious and the dishonest by admonition and if this avail not, proceed to chastisement, nor should he be in apprehension of the land falling waste. He should not cease from punishing highway robbers, murderers and evildoers, nor from heavily mulcting them, and so administer that the cry of complaint shall be stilled. He should assist the needy husbandman with

1

<sup>&</sup>lt;sup>1</sup> See Ain 22, 2nd Book.

<sup>2</sup> See p. 17 of this book.

advances of money and recover them gradually. And when through the exertions of the village headman the full rental is received, he should allow him half a biswahl on each bighah, or otherwise reward him according to the measure of his services. He should ascertain the extent of the soil in cultivation and weigh each several portion in the scales of personal observation and be acquainted with its quality. The agricultural value of land varies in different districts and certain soils are adapted to certain crops. should deal differently, therefore, with each agriculturist and take his case into consideration. He should take into account with discrimination the engagements of former collectors and remedy the procedure of ignorance or dishonesty. He should strive to bring waste lands into cultivation and take heed that what is in cultivation fall not waste. He should stimulate the increase of valuable produce and remit somewhat of the assessment with a view to its augmentation. And if the husbandman cultivate less and urge a plausible excuse, let him not accept it. Should there be no waste land in a village and a husbandman be capable of adding to his cultivation, he should allow him land in some other village. He should be just and provident in his measurements. Let him increase the facilities of the husbandman year by year, and under the pledge of his engagements. take nothing beyond the actual area under tillage. Should some prefer to engage by measurement and others by appraisement of crops, let him forward the contracts with all despatch to the royal presence. Let him not make it a practice of taking only in cash payments but also in kind. This latter is effected in several ways. First, kankút: kan in the Hindi language signifies grain, and kút, estimate. The whole land is taken either by actual mensuration or by pacing it, and the standing crops estimated in the balance of inspection. The experienced in these matters say that this comes little short of the mark. If any doubt arise, the crops should be cut and estimated in three lots, the good, the middling and the inferior, and the hesitation removed. Often, too, 'the land taken by appraisement, gives a sufficiently accurate return. Secondly, batái, also called bháoli; the crops are reaped and stacked and divided by agreement in the presence of the parties. But in this case several intelligent inspectors are required. otherwise the evil-minded and false are given to deception. Thirdly, khet batái, when they divide the fields after they are sown. Fourthly, láng batái; after cutting the grain, they form it in heaps and divide it among themselves, and each takes his share home to clean it and turn it to profit. If it be not prejudicial to the husbandman, he may take the value of the corn-hear-

<sup>1</sup> The 20th part of a bighah.

ing land in cash at the market rate. If on this land they sow the best kinds of produce, in the first year he should remit a fourth of the usual assessment. If at the time of collection, the better produce is found to be larger in quantity than the previous year, but less land cultivated, and the revenue be the same, let him not be provoked or moved to contention. He should always seek to satisfy the owner of the crops. He should not entrust the appraisement to the headman of the village lest it give rise to remissness and incompetence and undue authority be conferred on high-handed oppressors, but he should deal with each husbandman, present his demand, and separately and civilly receive his dues.

He must take security from land surveyors, assessors and other officers of revenue. He should supply the officials engaged in the land measurements, for each day on which they are employed, with  $16~d\acute{a}ms$  and 31~sers, and as a monthly ration, on the following scale:

|                                | Flour.      | Oil.          | Grain. | Vegetables &c. |
|--------------------------------|-------------|---------------|--------|----------------|
| _                              | sér         | sér           | sér    | dám            |
| Superintendent of survey,      | 5.          | $\frac{1}{2}$ | 7.     | 4.             |
| Writer,                        | · 4.        | $\frac{1}{2}$ | 5.     | 4.             |
| Land surveyor and four thanada | rs,each, 8. | • 1           |        | 5.             |

He shall affix a mark to the land surveyed and shall take a bond from the headman that there shall be no concealment regarding the land, and the various crops shall be duly reported. In the process of measurement if any inferior portion of land be observed, he shall at once estimate its quantity. and from day to day take a note of its quality and this voucher he shall deliver to the husbandman. But if this discovery be made after the collection of the revenue, he shall gather information from the neighbours and from unofficial documents and strike, an average. In the same way as the kárkun (registrar of collections) sets down the transactions of the assessments, the mukaddam (chief village revenue officer) and the patwári (landsteward) shall keep their respective accounts. The Collector shall compare these documents and keep them under his seal and give a copy thereof to the clerk. When the assessment of the village is completed, he shall enter it in the abstract of the village accounts, and after verifying it anew. cause its authentication by the karkun and patwari, and this document he shall forward weekly to the royal presence and never delay it beyond fifteen days. After the despatch of the draft estimates to the imperial court, should any disaster to the crops occur, on ascertaining the exact

inferior crops, such as maize.

such as sugar, pán or ection in contradistinction to جنس ادني

particulars on the spot, he shall calculate the extent of the loss and recording it in writing, transmit it without delay in order that it may be approved or a commissioner despatched. He should collect the revenue in an amicable manner and extend not the hand of demand out of season. He should begin the collection of the spring harvest from the Holi, which is a Hindu festival occurring when the sun is about to pass from Aquarius and is entering or has reached midway in Pisces, and the Autumn harvest from the Dasharah, which is a festival falling when the sun is in the middle or last ten days of Virgo, or the first ten of Libra. Let him see that the treasurer does not demand any special1 kind of coin, but take what is of standard weight and proof and receive the equivalent of the deficiency at the value of current coin and record the difference in the voucher. He should stipulate that the husbandman bring his rents himself at definite periods so that the malpractices of low intermediaries may be avoided. When there is a full harvest, he should collect the appropriate revenue and accept no adjournment of payments on future crops. Whosoever does not cultivate land liable to taxation but encloses it for pasturage, the Collector shall take for each buffalo six dáms, and for an ox, three dams yearly, but for a calf or a buffalo which has not yet calved, he shall make no demand. He shall assign four oxen, two cows and one buffalo to each plough and shall lay no impost on these. Whatever is paid into the treasury, he shall himself examine and count and compare it with the day-ledger of the karkun. This he shall verify by the signature of the treasurer and placing it in bags under scal, shall deposit it in a strong room and fasten the door thereof with several locks of different construction. He shall keep the key of one himself and leave the others with the treasurer. At the end of the month, he shall take from the writer (bitikchi) the account of the daily receipts and expenditure and forward it to the presence. When two lakks of dams are collected, he shall remit them by the hands of trusty agents. He shall carefully instruct the patwári of each village to enter in detail in the memorandum which he gives to the husbandman, the amount he receives from the same; any balances he shall enter under each name in a book and forward it attested by the signatures of the headmen; and these, at the next harvest, he shall recover without distress. He shall carefully inspect the suyúrghál3 tenures, sending

if the word خالصي be read instead of مان as occurs in one MS., the rendering will then be "fine gold" instead of special coin.

<sup>&</sup>lt;sup>2</sup> An assignment of land revenue for charitable purposes: also a grant without stipulation of any condition. See Vol. I, p. 270.

copies of them to the registry office to be compared. He should ascertain the correctness of the chaknámah, and resume the share of a deceased grantee or one who is an absentee or actually in service of the state. should take care that land cultivated by the farmer himself and not by the tenant, as well as resumed lands, should not be suffered to fall waste; the property of the absentee or of him that dies without an heir he should duly keep under ward and report the circumstances. He should see that no capitation-tax be imposed nor interfere with the remission of dues granted by former governments. He shall not make the occasions of journeying, feasting or mourning au opportunity for exactions, and refrain from accepting presents. Whenever a mukaddam or patwári shall bring money or, advancing to the dais, shall present a dám in obcisance, he shall not accept it. In the same way he shall renounce balkati, which is the practice of taking a small fee from each village when the harvest is ready for reaping. He shall also waive all perquisites on handicrafts, marketbooths, police, travelling passports, garden produce, temporary sheds, enclosure, fishing rights, port-dues, butter, oil of sesame, blanketing, leather, wool, and the like malpractices of the avaricious who fear not God. He shall provide for the periodic appointment of one among those best acquainted with the district, to reside at the royal quart and furnish it with the minutest particulars. Every month he shall submit a statement of the condition of the people, of the júgirdúrs, the neighbouring residents, the submission of the rebellious, the market prices, the current rents of tenements, the state of the destitute poor, of artificers, and all other contingencies. Should there be no kotwál, the Collector must take the duties of that office upon himself.

### AľŇ VI.

#### The Bitikchi

Must be conscientious, a good writer, and a skilful accountant. He is indispensable to the collector. It is his duty to take from the kanúngo<sup>3</sup> the

- <sup>1</sup> This is a grant of alienated lands specifying the boundary limits thereof. Chak, according to Elliot, is a patch of rent-free land detached from a village.
- <sup>2</sup> A word of Turkish origin, signifying a writer or scribe.
- \* An officer in each district acquainted with its customs and land-tenures and

whose appointment is usually hereditary. He receives report from the patwáris of new cases of alluvion and diluvion, sales, leases, gifts of land &c. which entail a change in the register of mutations. He is a revonne Alicer and subordinate to the tahsildár. Carnegy. Kachh. Technical,

average decennial state of the village revenues in money and kind, and having made himself acquainted with the customs and regulations of the district, satisfy the Collector in this regard, and lend his utmost assistance and attention. He shall record all engagements made with the agriculturists, define the village boundaries, and estimate the amount of arable and waste land. He shall note the names of the munsif, the superintendent, the land-surveyor and thanadar, also that of the cultivator and headman, and record below, the kind of produce cultivated. He should also set down the village, the pergunnah and the harvest, and subtracting the deficiency take the value of the assets, or after the manner of the people of the country, inscribe the name, the kind of produce, and the deficiency below the date of cultivation. When the survey of the village is complete, he shall determine the assessment of each cultivator and specify the revenue of the whole village. The Collector shall take the revenue on this basis. and forward a copy of the survey, called in Hindi khasra to the royal court. When drawing out the rolls, if the former documents are not available, he should take down in writing from the patwari the cultivation of each husbandman by name and thus effect his purpose, and transmit the roll together with the balances and collections punctually, and he shall enter the name of the tahsildan below each village, in the day-ledger. He shall record the name of each husbandman who brings his rent and grant him a receipt signed by the treasurer. Copies of the rolls of the patwári and mukaddam by means of which they have made the collections, together with the sarkhat, that is the memorandum given to the husbandman, he shall receive from the patwári, and inspecting them, shall carefully scrutinize them. If any falsification appears, he shall fine them and report to the Collector daily the collection and balances of each village and facilitate the performance of his duty. Whenever any cultivator desires a reference to his account, he shall settle it without delay and at the close of each harvest he shall record the collections and balances of each village and compare them with the patwari's, and enter each day in the ledger the receipts and disbursements under each name and heading, and anthenticate it by the signature of the Collector and treasurer. At the end of the month, he shall enclose it in a bag under the seal of the Collector and forward it to the presence. He shall also despatch daily the price-current of mohurs and rupees and other articles under the seals of the principal men, and at the end of each harvest, he shall take the receipts and disbursements of the treasurer, and forward it authenticated by his signature. The abstract and settlement of the assessment, at the close of each year, he shall transmit under the signature of the Collector. He shall enter the effects and cattle

plundered in any village, in the day-ledger, and report the circumstances. At the year's end, when the time of the revenue-collections has closed, he shall record the balances due from the village and deliver the record to the Collector and forward a copy to the royal court. When removed from office, he shall make over to the Collector for the time being his account under the head's of balances, advances &c., and after satisfying him in this regard, take the detail thereof and repair to the Court.

### AIN VII.

### The Treasurer.1

Called in the language of the day Fotadár2. The treasury should be located near the residence of the governor and the situation should be such where it is not liable to injury. He should receive from the cultivator any kind of mohurs, rupees or copper that he may bring, and not demand any particular coin. He shall require no rebate on the august coinage of the realm but take merely the equivalent of the deficiency in coin-weight. Coinage of former reigns he shall accept as bullion. keep the treasure in a strong room with the knowledge of the shikdar3 and the registrar, and count it every evening and cause a memorandum thereof to be signed by the Collector and compare the day-ledger with the registrar's account and authenticate it by his signature. On the door of the treasury as sealed by the Collector, he should place a lock of his own, and open it only with the cognisance of the Collector and registrar. He shall not receive any monies from the cultivator save with the knowledge of the Collector and registrar, and he shall grant a receipt for the same. He shall cause the patwari's signature to be affixed to the ledger known in Hindustan as bahi, so that discrepancy may be avoided. He shall consent

- 1 Khizánadár.
- <sup>2</sup> The term fola is applied in Arabio, to cloths used as waist wrappers brought from Sind, and the word itself is supposed to be derived from that country and not to be of Arabic origin. Do Sacy in his Chrest. Arabe I, 195 quotes from M. Varsy that these cloths are made in the Levant and Arabia, and are used for the bath, as veils for women and for turbans. He adds, Les pagues sont tres-connos dans nos ports meridionaux qui font le commerce du levant, sous le nom de foutes. De la
- An officer appointed to collect the revenue from a certain division of land under the Moghul government; it was sometimes applied to the chief financial officer of a province or to the vicercy in his financial capacity.—Wilson's Glossary.

to no disbursements without the voucher of the diván, and shall enter into no usurious transactions. If any expenditure should be necessary that admits of no delay, he may act under the authority of the registrar and shikdár and represent the case to government. The aforementioned duties, from those of the commander of the troops up to this point, are primarily under the direct cognisance of the sovereign authority and as no one individual can perform them, a deputy is appointed for each function and thus the necessary links in administration are strongthened.

# Currency of the means of Subsistence.

Since the benefit and vigour of human action are referrible to bodily sustenance, so in proportion to its purity is the spirit strengthened; the body, were it otherwise, would grow corpulent and the spirit weak: the thoughts too under such a regimen, incline to refinement and actions to The seekers of felicity, sober in conduct, are before all things particularly careful in the matter of food and do not pollute their hands with every meat. To the simple in heart who fear God, labour is difficult and their means of living straitened. They have not that luminous insight which penetrating to the essence of things, dwells in repose, but through fear of the displeasure of God, are sunk in exhaustion of soul from the pangs of hunger. As for instance in the case of the man who possessed a few cows, his legitimate property, and subsisted on their milk. By the accident of fortune, it chanced that they were carried off, and he passed some days fasting. An active fellow after diligent pursuit brought them back, but he would not accept them and replied, "I know not whence those dumb animals have had food during these past few days." In a short space this simple soul died. Many tales are told of such dull-witted creatures who have thus passed away. There are also avaricious worldlings who do not recognize the difference between other people's property and their own, and gratify themselves at the expense of their spiritual and temporal good. The ignorant and distraught in mind, making their own necessities an occasion of spoilation and seizure, prepare for themselves eternal punishment.

Simple, innocent-minded folk consider that there are no unappropriated waste lands and were they obtainable, it would be difficult to furnish the implements of cultivation, and if these could be had, the means of providing

<sup>2</sup> This term was especially applied to the head financial minister whether of the state or of a province, being charged in the latter with the collection of the revenue, its remittance to the imperial treasury and invested with extensive judicial powers in all civil and financial causes.—Ivid.

food which would enable them to labour, are not manifest. They can discover no mine to excavate, and if one were pointed out to them which had no owner, it would be extremely onerous to obtain a living therefrom. are averse too, from the profession of arms, lest dear life be the exchange for base lucre. They withdraw themselves also from commerce for this reason that many ask a high price for their goods, conceal their deficiencies and praise them for qualities which are not in them, while they close their eyes to the evident excellencies of what they purchase and disparage it for faults it does not possess, preferring their own benefit to another's loss. And they disapprove also of those who are content to hold lawful the sequestration of the goods of rival sectaries, and they affirm that if the fautor of such pretension be discerning and wise, it will seem an occasion for additional anxiety rather than a sanction to retain the property of another; for how can the illicit seizure of what is another's be commendable on the score of a difference of faith? On the contrary, it is a suggestion of the evil one, a phantasy of the dreams of the avaricious and unfit for the cars of the good. At the present time His Majesty has placed a lamp upon the highway before all, men, that they may distinguish the road from the pitfalls, and sink not into the slough of perdition, nor pass their dear lives in unprofitableness.

Since there is infinite diversity in the natures of men and distractions internal and external daily increase, and heavy-footed greed travels post haste, and light-headed rage breaks its rein, where friendship in this demon-haunted waste of dishonour is rure, and justice lost to view, there is, in sooth, no remedy for such a world of confusion but in autocracy, and this panacea in administration is attainable only in the majesty of just monarchs. If a house or a quarter cannot be administered without the sanctions of hope and fear of a sagacions ruler, how can the tumult of this world-nest of hornets be silenced save by the authority of a vicegerent of Almighty power? How, in such a case can the property, lives, honour, and religion of the people be protected, notwithstanding that some recluses have imagined that this can be supernaturally accomplished, but a wellordered administration has never been effected without the aid of sovereign monarchs. That fiery wilderness of talismanic power, too, is haunted by spells and sorcerers, and storms of confusion from this sea of undiscernment have arisen and arise, and many souls, through simplicity and shortsightedness, in the turbulent billows of inexperience have been and are still ever engulfed, while those who by the light of wisdom and through the grace of acceptance have bridled their desires and garnered provisions for the long journey to come, have, in the cross-roads of distraction, become

the reproach of high and low, for their folly, irreligion and unbelief. In that assembly of ignorance should a philosopher of experience enter, he must needs take up the fashion of fools and so escape from the contumely of the base.

It is evident that in all cultivated areas, the possessors of property are numerous, and they hold their lands by ancestral descent, but through malevolence and despite, their titles become obscured by the dust of uncertainty and the hand of firmness is no longer stretched above them. If the cultivator hold in awe the power of the Adorner of the universe and the Elixir of the living, and the merchant turn back from evil designing and reflect in his heart on the favour of the lord of the world, the depository of divine grace, his possessions would assuredly be approved of wisdom. Thus the virtue of property lies in the pledge of intention, and a just ruler, like a saltbed, makes clean the unclean, and the evil good. But without honest condittors, abundant accessories of state and a full treasury even he could effect nothing and the condition of subserviency and obedience would lack the bloom of discipline. Now the man of robust frame should, in the first place, choose the profession of arms and reflect on the assistance which he is capable of rendering, so as to regard his life as devoted to the task of preserving human society from dissolution. The means of sustenance are likewise as abundant to the labourer as forage for his cattle. man is unequal to this, he should endeavour, in some way, to enter into the number of state servants. Thus the currency of the means of subsistence rests on a twofold basis, wiz., the justice of sovereign monarchs and regard to the welfare of well-disposed dependents. The base materialist understands not the language of reason and never transcends the This unfertile soil needs the water of the sword, limits of bodily sense. not the limpid spring of demonstration. In the presence of the majesty of the prince, the proud and perverse of disposition sink into obscurity while the prosperity of the good who seek after justice is ever continuous.

Of a truth, whatever be the recompense of the guardianship over the four! priceless elements of the constitution, it is both meet and expedient and according to the Almighty will. To the watchmen over the house, the lord thereof appoints the guerdon, and to the watchmen of the universe, its shepherds.<sup>2</sup> If the whole of a man's possessions were spent for the protection of his honour, it would be but fitting if in gratitude he further pledged his whole credit, how much the more when it is a question of the guardianship of the four great elements of State polity? But just mo-

<sup>&</sup>lt;sup>1</sup> See Vol. I, p. IV. Abul Fazl's pre-

<sup>&</sup>lt;sup>2</sup> i. e., in the Homeric sonse, ποιμένες λαῶν

narchs exact not more than is necessary to effect their purpose and stain not their hands with avarice; and hence it is that this principle varies, as has been stated, according to diversities of age and country. From this suggestive digression, it will be evident that whatever circumspect rulers exact from their subjects after due deliberation and to subserve the interests of justice and grant to their submissive dependents, has a perfect propriety and is universally in vogue. It is also clear that the maintenance of the soldier should be ampler and more choice. Next follow the cultivators and then other artisans. Ancient Greek1 treatises affirm that professions are circumscribed to three classes, the Noble, the Base, and the Intermediate. The former refers to the mind and is, also, of not more than three kinds: the first concerns the pure intellect, as sagacity and capability of administration; the second, acquired knowledge, as composition or eloquence; the third personal courage, as military duty. The Base also is of three kinds; the first is opposed to the common weal of mankind, such as the hoarding of grain: the second is the contrary of any one virtue, as buffoonery; the third is such as the disposition is naturally averse from, as the trade of a barber, a tanner or a sweeper. The Intermediate comprises various callings and trades; some that are of necessity,2 such as agriculture; others which could be dispensed with, as dyeing; others again simple, as carpentry and ironmongery; and some compound, as the manufacturing of scales or knives.3

From this exposition the distinguished character of the military profession is evident. In short, the noblest source of maintenance is to be found in a profession which is associated with just dealing, self-restraint and bravery and apart from evil doing and sensuality. The good regard

¹ The reference is, no doubt, to • Aristotle's Politics z. (△) the true sense of which has been lost by filtration through some Arabic version or paraphrase.

Έν ἀπάσαις δὴ ταῖς πόλεσιν ἐστι τρία μέρη τῆς πόλεως, οἱ μὲν εὖποροι σφοδρα, οἱ δὲ τρίτοι οἱ μεσόι τούτων ἐπεὶ τοίνυν ὁμολογεῖται τὸ μέτριον ἄριστον και τὸ μέσον, φανερὸν ὅτι καὶ τῶν εὐτυχημάτων ἡ κτῆσις ἡ μέση βελτίστη πάντων.

The three classes of citizens are differently described by Theseus in the

- Suppliants of Euripides but the middle class is there also adjudged to be the most serviceable to the State. v. Iket. 238.
- 2. δεύτερον δὲ τὸ καλούμενον βάνα αυσον ἔστι δὲ τοῦτο περὶ τὰς τέχνας ὧν ἄνευ πόλιν ἀδύνατον οἰκεῖσθαι τούτων δὲ τῶν τεχνων τὰς μὲν ἐξ ἀνάγκης ὑπάρχειν δεῖ, τὰς δὲ εἰς τρυφὴν ἤ τὰ κα λῶς ζῆν· Id. z. (Δ)
- Perhaps this distinction may lie between arts and instruments made by the arts. So Aristotle, Δ (Η); ἔπειτα τέχνας, πολλών γὰρ ὀργάνων δείται τὸ ζήν

three things as necessary in a profession—avoidance of tyranny, refraining from what is dishonourable, abstinence from all that is mean; by what is dishonourable, is meant buffoonery and the like low pursuits; by what is mean, is understood an inclination to base callings.<sup>6</sup>

When an appropriate means of maintenance is secured, it is a requisite condition of economy to husband a portion of one's means, provided that the household is not thereby straitened. The mendicant should not be turned away disappointed nor subjected to the reproof of covetousness and greed. The proper control of an estate is conditional on the expenditure being less than the income; it is permitted to indulge a little in commercial speculation and engage in remunerative undertakings, reserving a part in coin and valuables, a part in goods and wares, and somewhat invested in the speculations of others, and yet a portion in lands and immoveable estates, and a share may be entrusted to borrowers of credit, and expenditure regulated with circumspection, justice and modesty. Let such a one be frank in his commercial dealings and give no place in his heart to self-reproach. He should keep in view of his purpose, the will of God, not the hope of gratitude, the increase of reputation or the expectation of reward. He should also give freely to the needy whose destitution is unexposed. There is also a twofold manner of munificence which if exercised in just measure, is meritorious. Firstly, what is given in pure generosity or largesse such as a present and the like. should be done quickly and secretly and without setting store on its amplitude or abundance, nor yet so as to cripple one's resources or exhaust them.

Secondly what is called for by occasional exigencies, either in procuring comforts or removing grievances, such as what is given to oppressors or to the profligate in order that person, property and honour may escape their injury. But in this he should use moderation. In procuring the conveniences of life, however, it is better that the bounty should be liberal.

People of the world in the matter of living are to be resolved into three classes. One class are tallen into such heedlessness that spiritual needs do not enter their comprehension, much less are practically considered. Another through their luminous fortune are so immersed in the consideration of essential truths that they give no thought to their means of sustenance. But those who seek the felicity to come, the circumspect in conduct, neglect not a just appreciation of life but make external

Aristotle counts among these, the mechanical and commercial professions.
οὔτε βάναυσον βίον οὔτ' αγοραῖον δεῖ

ζην τοὺς πολίτας· ἀγεννης γαρ ὁ τοιοῦτος βίος καὶ πρὸς ἀρετην ὑπεναντίος·  $\Delta$  (H).

conditions the instrument of interior well being in the hope of admission among those absorbed in divine love, and so attaining to the third degree of felicity, whence after traversing the arid waste of deliverance, they may repose in the second.<sup>1</sup>

The dues of sovereignty have thus been set forth. The circulation of the means of sustenance, thus, is seen to rest on the justice of prudent monarchs and the integrity of conscientious dependents. And because the conditions of the royal state and prerogative vary in different countries, and soils are diverse in character, some producing abundantly with little labour, and others the reverse, and as incqualities exist also, through the remoteness or vicinity of water and cultivated tracts, the administration of each state must take these circumstances into consideration and fix its demands accordingly. Throughout the whole extent of Hindustan where at all times so many enlightened monarchs have reigned, one-sixth of the produce was exacted; in the Turkish empire, Irán and Turán a fifth, a sixth, and a tenth respectively. In ancient times a capitation tax was imposed called, khiráj. Kubád disapproved of this practice, and resolved that the revenue should be fixed upon arable land accurately surveyed. But his death occurred before he could accomplish his design. Noshirwan (his son) carried it to completion and made the jarib of ten square reeds.2 This was sixty royal yards square. One fourth of this was taken as a kafiz and valued at three dirhams, and the third part was fixed as the contribution due to the state. Kafiz is a measure, called also súa' weighing eight ratl, and, some say, more. The dirhem is equal in weight to one miskal. When the Caliphate fell to Omar, at the suggestion of the learned, he adopted the plan of Noshirwan but through the vicissi-

the mystics, the third stage in the progressive spiritual life is the attraction, of the soul to God على ; the second is immersion in the Divine love الله supreme stage is the unitive عما الله reserved for his chosen saints.

<sup>&</sup>lt;sup>9</sup> In the original, the word kabzah is written erroneously for kasbah which is corrected in the subsequent page with the following note. "According to the glossaries, 6 barleycorns make an asba, (finger breadth): 4 asba, a kabzah: 6 kabzah, a zaráa' (cubit): 10 cubits, a kasbah: 10 kasbah, an ashl: a jaréb is 1

square ashl, i. c. 10 square kashah or 100 square cubits. According to the kadámah, 4 asha' is equal to a kabzah, and 10 kabzah a cubit, and 60 cabits an ashl. According to this, a jarib would be 60 square cubits."

<sup>8</sup> A space of ground containing from about 124 to 144 cubits square. It is also a dry measure.

See Vol. I, p. 35.

<sup>6</sup> This is variously rated at 12 to 16 oz. At Bombay it is said to be equal to 36 Surat rupces. In the Red Sca littoral the Rottolo, as it is corruptly called, varies from 10 to 24 oz. avoirdupois. Wilson's Gloss.

tudes of temporal conditions, he introduced some alterations which may be gathered from ancient volumes. In Turán and Iráu from ages past, they have exacted a tenth, but the exactions have increased to more than a half which does not appear exorbitant to a despotic government. In Egypt they take for a

Kudán of the best soil, 3 Ibrahímis

,, ,, middling, 2 ,, 
,, worst, 1 ,,

The kudún is a measure of land of 100 square reeds, each of which is equal to one báa'.¹ An Ibrahími is current for 40 kabirs and 14 kabírs is equal to a rupce of Akbar Sháh. In some parts of the Turkish empire, they exact from the husbandman 30 Akchehs for every yoke of oxen. The Akcheh is a silver coin equal to 81 Ibrahímis. And from crown lands the demand is 42 Akcheh, and from each soldier 21, besides which the governor of the Súbah takes 15 more. In some parts for each plough 20, and from each soldier 7 Akcheh, while the Governor takes six. In others, the Sanjakbeyi² receives 27 and the Súbashi (kotwál) twelve. Other systems are also given which obtain in that empire.

The Muhammadaus account conquered lands of 3 kinds; U'shri, Khiráji and Sulhíy. The first two are subdivided into five kinds and the last into two. U'shri, 1st, kind; the district of Tehámah which comprises Mecca, Táif, Yemen, O'mán, Bahrayn. 2nd, kind; land of which the owner has voluntarily embraced that faith. 3rd, Lands which have been conquered and apportioned. 4th, Land on which an adherent of that faith has built a mosque or planted a vine or laid out a garden or fertilized it with rain water; otherwise other conditions apply. 5th, Waste land which has been

A fathom-the arms extended to their full reach.

This word in Tarkish, (properly Sanjik with the long alif) signifies a flag or standard: it also means a mnor province of which several in one Eyálat or Government. It is in this latter sense that the word should probably be taken, signifying the provincial governor. An Akcheh is  $\frac{1}{3}$  of a paira and consequently the  $\frac{1}{12}$  of a piastre or the  $\frac{1}{25}$  of a penny; it is frequently mentioned under the name of asper, a corruption of the Greek equivalent for the proper Turkish word.

The text has a word following "Bahrayn" which may possibly be read as a proper name. Either Rabah or Rayah, but Abu'l Fazl quotes evidently from the Fatáwa of Kázi Khan (A. H. 592. Háj. Khal.) where the definition of the limits of Ushari are laid down exactly as in the text with the emission of Rabah. The Fatáwa i A'lamgíri follows Kázi Khán. From the variants of this doubtful reading given in the notes, it is clear that there is some corruption and perhaps the variant of M. S. (3) is correct.

brought into cultivation by permission of the owner. Khiráji 1st kind; Persia proper and Kirmán. 2nd, Land which a tributary subject has laid out as grounds round about his house. 3rd, Land which a Muslim has reclaimed and irrigates from a source constructed from the public revenues. 4th, Land which has been acquired by convention. 5th, Land cultivated by means of water that pays revenue. Sulhiy, Lands of the Bani Najrán and Bani Taghlib; the details of these may be learnt from ancient documents. Likewise, in some treatises, land is regarded under three heads. cultivated by Muslims which they deem U'shr.2 2nd, Land of which the proprietors have accepted that faith. According to some, this is U'shri, and others say that it is U'shri or Khiráji, according to the determination of the Imam. 3rd, Land acquired by conquest, which some make U'shri and others khiráji, and others again affirm that its classification rests with the Imam. 4th, Land which those outside the faith rotain on convention. This they call khiráji. Tribute paid by khiráji lands is of two kinds. 1. Mukúsamah (divided), is the 5th or 6th produce of the soil. 2. Wazifah3 which is settled according to the capability and convenience of the tributaries. Some call the whole produce of the revenue khiráj, and as the share of the producing body is in excess of their expenditure, the Zakáti is taken from the amount under certain stipulations and this they call a tithe, but on each of these points there is much difference of opinion. The Caliph Omar, during his time, taxed those who were not of his faith at the rate of 48 dirhams for persons of condition, 24 for those of the middle class, and 12 for the lowest class. This was called the Jaziyah (capitation tax).

In every kingdom government taxes the property of the subject over and above the land revenue and this they call Tamqha.<sup>5</sup> In Irán and

possessor that he may purify it thereby, the root of the word, by denoting purity. The proportion varies, but is generally a fortieth or 2½ p. c., provided that the property is of a certain amount and has been in possession eleven months. See Lane under

• The Turkish word meaning a royal seal or stamp: sometimes written altampha from the Turkish al, red. The word also signifies a royal grant under the seal of some of the former native

<sup>&</sup>lt;sup>2</sup> This word signifies a tenth and is the tithe assessed on lands under Muslim rule. *U'shri* are therefore those lands subject to the tithe.

<sup>8</sup> Wazifah signifies a stipend or any thing stipulated or agreed upon; hence, revenue collected at a stipulated or fixed rate for a certain quantity of land. Wilson's Gloss.

<sup>&</sup>lt;sup>4</sup> The poor rate, the portion there-

Turán they collect the land tax from some, from others the Jihát and from others again the Sáir Jihát, while other cesses under the name of Wajúhát and Farúa'át are exacted. In short, what is imposed on cultivated lands by way of quit-rent is termed Mál. Imports on manufactures of respectable kinds are called Jihát, and the remainder Sáir Jihát. Extra collections over and above the land tax if taken by revenue officers are Wajúhát; otherwise they are termed Furúa'át.

In every country such demands are troublesome and vexatious to the people. His Majesty in his wise statemanship and benevolence of rule carefully examined the subject and abolished all arbitrary taxation, disapproving that these oppressions should become established by custom. He first defined the gaz, the tenáb, and the bighah and laid down their bases of measurement: after which he classed the lands according to their relative values in production and fixed the revenue accordingly.

## A'IN VIII.

## The Iláhi Gaz.

Is a measure of length and a standard gauge. High and low refer to it, and it is the desire of the rightcous and the unrighteous. Throughout Hindustan there were three such measures current, viz., long, middling and short. Each was divided into 24 equal parts and each part called Tassúj.

princes and recognised by the British Government as conferring a title to fenterel land in perpetuity, hereditary and transferable. Although, perhaps, originally bearing a red or purple stamp, the colour of the imperial seal or signature became in Indian practice indifferent. Wilson's Gloss.

¹ In its original purport, the word signifies moving, walking, or the remainder: from the latter it came to denote the remaining or all other sources of revenue in addition to the land tax from a variety of imposts, as customs, transit dues, houses, fees, market tax &c., in which sense it is current throughout India: the several imposts under this name were abolished by the British Government, except customs, duties on spiritnous liquors and other minor items. The privilege of imposing local taxes

under the name of Sáir, was also taken away from private individuals, but it still applies to various items of the income from landed property not comprised in the produce of cultivation, as rent from fisheries, timber, fruit-trees, bees'-wax &c; it also designates certain admitted manorial rights or prescriptive fees and cesses levied from residents in a village, or from cultivators by the proprietors, which have long been established and are upon the record: the former of these additions are usually taken into account, the latter not, in fixing the assessment. It is also a tax on personal property. In Marathi it also signifies the place where the customs are levied. Wilson's Gloss.

<sup>2</sup> This is an arabicized word from the Pers. <sup>200</sup> a weight of 4 barley-corns, the 24th part of a weight measure or day. A Tassij of the 1st kind was equal to 8 ordinary barley-corns placed together breadthways, and of the other two respectively, to 7 and 6 barley-corns. The long gaz was used for the measurement of cultivated lands, roads, distances, forts, reservoirs and mud walls. The middling was employed to measure buildings of stone and wood, bamboo-built houses, places of worship, wells' and gardens, and the short gaz for cloth, arms, beds, scats of state, sedan chairs, palanquins, chairs, carts and the like.

In some other countries, although they reckon the gaz as consisting of 24 Tassúj, they make

| 11 | Tassúj       | equal | to | 2  | Habbah (grain). |

Some make 4 Tassúj equal to 1 Dáng.
6 Dáng , 1 Gaz.

Others reckon the gaz as 24 fingers, each finger equal to the breadth of 6 barley-corns, and each barley-corn equal in thickness to 6 hairs from the mane of a cob. In some ancient books they make the gaz equal to two spans and twice round the joint (girih) of the thumb, and they divided it into 16 girih and each girih was subdivided into 4 parts which they called 4 pahr, so that a pahr was the sixty-fourth part of a gaz.

In other ancient records the gaz is reckoned of seven kinds. 1st, The Gaz i Sauda (Gaz of traffic) consisting of 24 digits and two-thirds of a digit. Harún úr Rashíd of the House of 'Abbás took this measure from the hand of an Abyssinian slave who was one of his attendants: the Nilometer's

In Arabic, it is a weight of 2 barley-corns, a quarter of a dirham: the plur. is طساسية. It also means a district or province or a township, as Ardabil is of the Hulwan. This term for an agglomeration of villages or townships is analogous to the

of the people of Syria, the اجناد of El Irak and the مساتيق of El Jibal. See

<sup>1</sup> This scale is given under Ain II. Vol. I, p. 36.

The cubit of the Nilometer is supposed to be the same as that of the Jews, which is exactly two feet English: if so

of Egypt is on this measure, and houses and cloths are also measured by it. 2nd, Ziráa' i kasbah, (Reed-yard) called also A'ámah, and Daur, of 24 digits: this was introduced by Ibn Abi Laila. 3rd, The Yusufiyah, used by the provincial governors of Baghdad for the measurement of houses: it consisted of 25 digits. 4th, The short Húshimíyah, of 28 digits and a Bilál<sup>8</sup> the son of Abi Bardah introduced it: according to some it was Abu Músa Ash'ari his grandfather. 5th, The long Πάshimiyah of 29 digits and two-thirds which Mansur the A'bbaside favoured. It is also called the Malik and Ziyádíyah. Ziyád8 was the so-called son of Abú Sufiyan who used it to measure the lands in Arabian I'rak. 6th, The Omariyah of 31 digits. During his Caliphate, Omar carefully considered the long, short and middling quz.4 He took the three kinds together and to one-third of the aggregate he added the height of the closed fist and the thumb erect. He closed both ends of the measure with tin and sent it to Hudaifah and Othmán b-Hunaif which they used for the measurement of the villages in Arabian Irák. 7th, The Mámuniyah of 70 digits less a third. Mamun brought it into use, and it was employed for measuring rivers, plains and road distances.

Some in former times reckoned the cloth-measure (yaz) to be seven times the fist, and the fist was equal to four fingers closed; according to others, one finger less. The survey yaz, according to some, was the same seven fists: others made it seven fists together with one finger (thumb?) erect added to the seventh fist. Others again added another finger to that fist; while some made it seven fists with one finger adjoined to each fist.

the 24 digits will be precisely inches. Volney makes it 20½ French or 22 English inches. Some allowance must probably be made for the broad hand of a negro, but the other measures will not be affected by the same error, as they must be referred to the ordinary delicate hand of a native of Asia. A finger's breadth may be safely taken as three quarters of an inch. Useful Tables, pp. 87, 88.

<sup>&</sup>lt;sup>1</sup> Muhammad-b-Abdúr Rahnan, surnamed Ibn Abi Layla, was a distinguished jurisconsult and one of the Tabiis. He was Kadhi of Kúfa where he was born A. H. 74, and died in A. H. 148, D'Herb.

The grandson of Abu Músa al Ashari, Kádhi of Basrah, of which his grand-

father had been Governor. See a brief notice of him in Ibn Khall. Vol. II, p. 2.

See D'Herb. and Ockley, p. 358 under art. Ziad for a fuller account of him.

<sup>\*</sup>I think it probable that the word "long" has here been inadvertently omitted from the MSS used for this edition. Gladwin has the word which confirms my suspicion.

<sup>5</sup> One of the most eminent of the Companions of Muhammad. Omar appointed him to the government of Madáin, where he died after the assassination of Othmán and 40 days after the accession of 'Ali. Ibn Hajar. Biog. Diet.

<sup>•</sup> He was governor of Basrah under the Caliph 'Ali. Ibn Khall, p. 391, Vol. IV.

Sultan Sikander Lodi in Hindustán introduced another gaz of the breadth of 41 Iskandaris and a half. This was a copper coin mixed with silver. Humayún added a half and it was thus completed to 42. Its length was 32 digits. But some authors anterior to his time make mention of a similar measure. Sher Khán and Salim Khán, under whom Hindustán was released from the custom of dividing the grain and its apportionment, in measuring land used this gaz. Till the thirty first-year of the Divine Era, although the Akbar Shúhi gaz of 46 fingers was used as a cloth-measure, the Iskandari gaz was used for cultivated lands and buildings. His Majesty in his wisdom, seeing that the variety of measures was a source of inconvenience to his subjects, and regarding it as subservient only to the dishonest, abolished them all and brought a medium gaz of 41 digits into general use. He named it the Ilihi guz and it is employed by the public for all purposes.

## AIN IX.

## The Tanáb.

His Majesty fixed for the jarib the former reckoning in yards and

Of the family of Súr who reigned between the expulsion and restoration of Humayun.

\* The Tanáb, Jarib and Bigha seem to have been indiscriminately used as nearly interchangeable terms. The Jarib in its original use, according to Wilson (Glossary), was a measure of capacity equal to 60 kafiz or 384 madd, about 768 pounds. It then became applied to a land measure, or as much land as could be sown with a jarib of seed-corn, and then appears to have been loosely used for a bigha. In course of time it occurs as a measure of land of various extent. and as the chain or rope for measuring. In the N. W. P. the measurements were made by a chain, and the jarib is = to 5 chains of 11 yards each, or to 60 gaz or 20 gathas or knots. A square of one jarib is a bigha. Before the new system of survey, it was usual to measure lands paying revenue with a jarib of 18 knots only, two being coiled round the measurer, but free lands were measured with

the entire rope of 20 knots. In Sindh a jurth is a measure of a 150 square feet. In Telegu, it is applied to garden land or its produce. The standard bigha of the revenue surveyors of the N. W. P. is = to 3,025 sq. yds. or 🖁 of an acre. In Bengal the bigha contained only 1,600 sq. yds. or a little less than \ of an acre. In Benares at the time of the settlement, it was determined at 3,136 sq. yds. In other perganahs it was equal to 2,025 to 3,600 or 3,925 sq. yds. A kachha bigha is in some places a third, in others only a fourth of a full bigha. Akbai's bigha of 3,600 Ilahi gaz was considered = to 3,025 sq. yds. of the bigha of Hindustán. In Cuttack the bigha is now considered to be an English acre. The Maratha bígha is called 20 pánds or 400 sq. káthis or rods of (each) 5 cubits and 5 handbreadths. The Guzerát bigha contains only 2842 sq. yds. Mr. Elliot specifies six variations' found in the Upper Provinces. Sec Wilson's Gloss. Bigha and Jarib.

chose the measurement of sixty square, but adopted the  $\mathit{Rihi}$  gaz. The  $\mathit{Tanáb}$  (tent rope) was in Hindustán a measure of hempen rope twisted which became shorter or longer according to the dryness or moisture of the atmosphere. It would be left in the dew and thus fraudfully moistened. Oftentimes it would be employed in the early morning when it had got damp and had shrunk, and by the end of the day it had become dry and had lengthened. In the former case, the husbandmen suffered loss, in the latter the royal revenues were diminished. In the 19th year of the Divine era, the jarib was made of bamboos joined by iron rings. Thus it is subject to no variation, and the relief to the public was felt everywhere while the hand of dishonest greed was shortened.

## AIN X.

## The Bigha

Is a name applied to the jarib. It is a quantity of land 60 gaz long by 60 broad. Should there be any diminution in length or breadth or excess in either, it is brought into square measure and made to consist of 3600 square gaz. They divide the bigha into 20 parts, each of which is called biswah, and this is divided again into 20 parts each of which is termed biswánsah. In measuring they reduce no further. No revenue is required from 9 biswánsah, but ten they account as one biswah. Some, however, subdivide the biswansah into 20 parts, each of which they called t iswánsah, which they again divide into 20 parts, calling each tapwánsah. This again they partition in 20 portions, and name them severally answansah. A bigha as measured by the tanáb of hemp, was two biswah and 12 biswansah smaller in extent than the bigha measured by the tanáb of bamboo. This makes a difference of 10 bigha in a hundred. Although the tanáb of hemp was of 60 gaz, yet in the twisting it shrunk to 56. The Iláhi gaz was longer than the Iskandari by one biswah, 16 biswánsah, 13 taswánsah, 8 tapwánsah, and 4 answánsah. The difference between the two reduced the bigha by 14 biswah, 20 biswánsah, 13 taswánsah, 8 tapwánsah, and 4 answansah. In one hundred bighas the variation in the two measures amounted to 22 bighas, 3 biswah and 7 biswansah.

## AIN XI.

Land and its classification, and the proportionate dues of Sovereignty.

When His Majesty had determined the gaz, the tanúb, and the bígha,

The text has an error of 60 for 600. gaz = 2,600 sq. gaz = 0.538 or

somewhat more than half an acre. U. T. p. 88.

in his profound sagacity he classified the lands and fixed a different revenue to be paid by each.

Polaj is land which is annually cultivated for each crop in succession and is never allowed to lie fallow.

Parauti is land left out of cultivation for a time that it may recover its strongth.

Chachar is land that has lain fallow for three or four years.

Banjar is land uncultivated for five years and more.

Of the two first kinds of land, there are three classes, good, middling and bad. They add together the produce of each sort, and a third of this represents the medium produce, one-third part of which is exacted as the royal dues. The revenue levied by Sher Khán, which at the present day is represented in all provinces as the lowest rate of assessment, generally obtained, and for the convenience of the cultivators and the soldiery, the value was taken in ready money.

<sup>&</sup>lt;sup>1</sup> I have copied the form of the 4 following tables from Gladwin. Abul Fazl makes the calculation for the 4th and 5th columns for wheat only. For vetches and pulse he omits the 4th column and omits the 4th and 5th of all the remainder.

The fractions below a quarter of a seer are discarded in calculating the proportion fixed for reyenue: the thirds are not always mathematically exact, and fractions are sometimes raised to a unit or altogether omitted.

The revenue from musk melons, ajwain (Ligusticum ajowan), onions and other greens not counted as produce, was ordered to be paid in ready money at the rates hereinafter mentioned.

Polaj Land.
The Autumn Harvest, called in Hindi Sáwani.

As a consideration for watching the crops a quarter of a seer (per maund) is allowed in some places and in others more, as will be shown.

The revenue from indigo, poppy, pún, turmeric, pignut¹ (trapa bispinosa), hemp, kachálu (arum colocasia) pumpkin, hinna (Lawsonia inermis) cucumbers, búdrang (a species of cucumber) the egg-plant (solanum melongena), radishes, carrots, karelú (momordica charantia) kakúra,² tendas,³ and musk-melons, not counted as produce, was ordered to be paid in ready money at the rates hereafter mentioned.

1 This is the Singarah or Singharah. In the month of November, the nutripens and such of the fruit as remains ungathered, falls off and sinks to the bottom of the pond. When the water dries up in May or June, these nuts or bulbs are found to have thrown out a number of shoots. They are then carefully collected and placed in a small hole in the deepest portion of the tank and covered with water. In the rains when the ponds begin to fill, the bulbs are taken up, each shoot is broken off, enveloped in a ball of clay to sink it and thrown into the water at

different distances. They at once take root and grow rapidly until in a short time the surface of the water is covered with leaves. The fruit forms in October. The produce of a standard bigha is about 2½ mans which at the selling price of 10 sers for the rupee, represent a total value of Rs. 10. It is much more extensively consumed by the Hindus than the Mahomedans. Carnegie's Kachhari Technicalities.

- <sup>2</sup> Momordica Muricata.
- Also called lendu: resinous fruit of the tree Diospyros glutinosa.

Parauti land when cultivated, pays the same revenue as polaj.

His Majesty in his wisdom thus regulated the revenues in the above-He reduced the duty on manufactures mentioned favourable manner. from ten to five per cent. and two per cent. was divided between the patwari and the kánungo. The former is a writer employed on the part of the cultivator. He keeps an account of receipts and disbursements, and no The latter is the refuge of the husbandman. There village is without one. is one in every district. At the present time the share of the kanungo (one per cent.) is remitted and the three classes of them are paid by the State accordding to their rank. The salary of the first is fifty rupees: of the second, thirty; of the third, twenty; and they have an assignment for personal support equivalent thereto. It was the rule that the commissaries of the shikkdar, karkun, and Amin should receive daily 58 dams as a perquisite, provided that in spring they did not measure less than 200, nor in autumn less than 250 bighas. His Majesty whose heart is capacious as the ocean, abolished this custom and allowed only one dim for each bigha.

Many imposts, equal in amount to the income of Hindustan were remitted by His Majesty as a thank-offering to the Almighty. Among these were the following:

The capitation tax.

The port duties.

Tax<sup>8</sup> per head on gathering at places of worship.

A tax on each head of oxen.

A tax on each tree.

Presents.

Distraints.

A tax on the various classes of artificers.

Dárogha's fees.

Taḥsildár's fees.

Treasurer's fees.

Complimentary offerings on receiving a lease and the like.

Lodging charges.

Money bags.

Testing and exchanging money.

Market duties.

<sup>1</sup> The registrar of the collections under a Zamindar. The Amin was an officer employed either in the revenue department to take charge of an estate and collect the revenues on account of government, or to investigate and report their amount: or in the judicial department, as a judge and arbitrator in civil causes. Wilson's Gloss.

<sup>2</sup> The word is kar in the text, and is probably from the Sansk. **T** an impost, fee or coss.

Sale of cattle; also on hemp, blankets, oil, raw hides, weighing, scaling; likewise butcher's dues, tanning, playing at dice, passports, turbans, hearth-money, fees on the purchase and sale of a house, on salt made from nitrous earth, on permission to reap the harvest, felt, manufacture of lime, spirituous liquors, brokerage, catching fish, the product of the tree Al (Morinda citrifolia); in fine all those imposts which the natives of Hindustán include under the term Sair Jihát, were remitted.

## AIN XII.

#### Chachar land.

When either from excessive rain or through an inundation, the land falls out of cultivation, the husbandmen are, at first, in considerable distress. In the first year, therefore, but two fifths of the produce is taken: in the second three-fifths; in the third, four-fifths and in the fifth, the ordinary revenue. According to differences of situation, the revenue is paid either in money or in kind. In the third year the charges of 5 per cent. and one dâm for each bighat are added.

# AIN XIII,

## Banjar land.

When through excessive inundations production has seriously diminished, the revenue is collected in the following proportions:

• Spring Harvest.

Proportion of revenue from one Bigha of Banjar land for five years.

|           |        |     |    | 1st  | year | 2nd | year | 3rd | year | 1th | year | 5th | year  |

- in the text as doubtful, they are عناوري and : the latter word means simply a tax: there is doubtless an omission: the former I cannot trace.
- <sup>2</sup> The word is pag, contraction of pagri, a turban. It was a kind of poll tax levied on every turban.
  - From which a dye is extracted.
  - 4 See p. 58.
  - \* There is probably an error in the

text as the fourth year is omitted. Gladwin has "the third and fourth years four-fifths each"

take the between و فير و أخير to be an error, as by retaining it the percentage would rise to 15 or at least to 10½. Five per cent. was levied on manufactures; it may therefore have been an extra charge on land though I do not see its reason or its justice. Gladwin translates as I have done.

Proportion of Revenue, &c. - Continued.

In the 4th year the charges of 5 per cent. and one dám for each bigha were collected and this is still in force.

In Banjar land for the 1st year, one or two sers are taken from each bigha; in the 2nd year, 5 sers; in the 3rd year, a sixth of the produce; in the 4th year, a fourth share together with one ddm: in other years a third suffices. This varies somewhat during inundations. In all cases the husbandman may pay in money or kind as is most convenient. Banjar land at the foot of the hills and land subject to inundations in the districts of

<sup>1</sup> For these names, see p. 64.

Sanball and Bahráich, do not remain as banjar, for so much new soil is brought down with the overflow that it is richer and more productive than polaj. His Majesty, however, in his large munificence places it in the same class. It is in the option of the cultivator to pay in ready money or by kankút³ or bhaoli.

## AIN XIV.

## The Nineteen Years Rates.8

Intelligent people have from time to time set themselves to record the prices current of the Empire, and after careful inquiry the valuation of grain was accepted on this basis.

The revenue rates for a bigha of polaj land were fixed as has been stated. From the 6th year of the Divine Era which runs with the Novilunar year 968 (A. D., 1560-1) and concluding with the 24th year of this reign, the statistics were collected and have been tabulated for reference after the most diligent investigation. The figures are entered under the heading of each year.

<sup>&</sup>lt;sup>1</sup> Or Sanbhal. See Vol. I, Geograph. Index.

<sup>&</sup>lt;sup>2</sup> Sec p. 44.

Nineteen years correspond with a

cycle of the moon duringwhich period the seasons are supposed to undergo a complete revolution. Gladwin, p. 292. Vol. I.

2 See Vol. I, p. 23. There were three Sovereigns of Gujarát of the name of Muzaffar: the 1st reigned A. H. 799, (A. D. 1896): the collected a force, defeated abbar's general and reasoned the throne. His second reign was brief and the kingdom became a province of the Empire. Málwah was united to Gujarát under Bahádra a king of the latter dynast, A. H. 937, (A. D. 1850). I take these details from Mr. Oliver's note on the coins of the Mulammadan kings of Gujarát. In the list of coins there are two off copper of Muzaffar Shát II, of 169 and 160 grains respectively, and three of silver of Muhammad Sháth III, of 73 and 175 grains. The latter, No. XXXI of the Catalogue, is remarkable as having been struck during the second brief accession of this monarch to power. See also History of Gujarát, Bayley, Index, Muzaffar.

#### AIN 15.

#### The Ten Years' Settlement.

From the beginning of this immortal reign, persons of intelligence and void of rapacity, together with zealous men of experience, have been annually engaged in noting the current prices and reporting them to His Majesty, and taking the gross produce and estimating its value, they determined the rates of collection, but this mode was attended with consider-When Khwajah Abdul Majid Asaf Khanl was able inconvenience. raised to the dignity of Prime Minister, the total revenue was taken at an estimation,2 and the assignments were increased as the caprice of the moment suggested. And because at that time the extent of the empire was small, and there was a constant increase of dignities among the servants of the State, the variations were contingent on the extent of corruption and self-interest. When this great office devolved on Muzaffar Khán8 and Rajah Todar Mull, in the 15th year of the reign, a re-distribution of the imperial assessment was made through the kanningos, and estimating the produce of the lands, they made a fresh settlement. Ten kanunges were appointed who collected the accounts from the provincial kanungos and lodged them in the imperial exchequer. Although this settlement was somewhat less than the preceding one, nevertheless there had been formerly a wide discrepancy between the estimate and the receipts.

When through the prudent management of the Sovereign the empire was enlarged in extent, it became difficult to ascertain each year the prices current and much inconvenience was caused by the delay. On the one hand the husbandman complained of extensive exactions, and on the other the holder of assigned lands was aggrieved on account of the revenue balances. His Majesty devised a remedy for these evils and in the discernment of his world-adorning mind fixed a settlement for ten years: the people were thus made contented and their gratitude was abundantly manifested. From the beginning of the 15th year of the Divine era to the 24th, an aggregate of the rates of collection was formed and a tenth of the total was fixed as the annual assessment; but from the 20th to the 24th year the collections were accurately determined and the five former ones accepted on the authority of persons of probity. The best crops were taken into account in each year and the year of the most abundant harvest accepted, as the table shows.

<sup>&</sup>lt;sup>1</sup> See Vol. I, p. 366, and Index.

See Vol. I, p. 349.

The Súbah of Allahabad comprises nine sarkárs (districts) and possesses fifteen separate revenue codes.<sup>1</sup>

1. The Sarkár of Allahabad includes fifteen mahals and has three revenue codes.

The suburban district of Allahabad comprises three mahals, viz., the suburbs of Allahabad, Kantat, and a tract on the extreme limits of the súbah of Agra,<sup>2</sup> and possesses one revenue code.

Jalúlúbád has three mahals and a revenue code.

Bhadói, seven mahals, viz., Bhadói, Sikandarpúr, Sarúon, Sangror, Mah, Kowái, Hádiúbús<sup>3</sup>—and a revenue code.

- 2. The Sarkár of Benáres has eight mahals and a revenue code. The detail is as follows—the suburban district of Benares, the township of Benares, Pandarhá, Kaswár, Harhawá, Byálisi.
  - 3. The Sarkár of Jaunpur has 41 mahals and two codes.

The suburban district of Jaunpur, 39 mahals, one code, viz.:-

Aldemao, Angali, Bheteri, Bhadáon, Belheti, Jaunpur, Suburban Jaunpur, Chandipúr Badhar, Chándah, Chiriyá Kót, Chakésar, Kharíd, Kháspúr Túndah, Khánpúr, Deogáon, Rári, Sanjhóli, Sikandarpúr, Sagdi, Sarharpúr, Shádi-ábád, Zufarábád, Karyát Mattu, Karyát Dostpúr, Karyát-Mendhah, Karyát Swetah, Kólah, Chéswah, Chósi, Kódiya, Gopálpúr, Kirakat, Mandiáho, Muḥammad-ábád, Majhórá, Mau, Nizámábád, Naigún, Nathapúr.

- 4. The Sarkár of Chanádah, 14 mahals and one revenue code, viz.
- <sup>1</sup> The Dastur w'l A'mal is a body of instructions and tables for the use of native revenue officers under the Mahomedan Government. Although professing to be copied from the original of Akbar, no two copies agree, owing, as Mr. Elliot conjectures, to their having been made up, in various degrees of completeness, from another account left by the Kanungos, 'he A'mal-dastur, in which orders superseding those of the Dastur w't Amal wore registered. Wilson's Gloss.
- <sup>2</sup> There is probably an error here as a note to the text suggests.—The MSS. all differ in the names of the various parganahs of this district.
- In Tieffenthaler's Geographie de l'Indoustan (Bernoulli, Descript de l'In-

- dc, Vol. I) the above names with one exception are mentioned with the addition of *Kheragarh*. A note in the text of Abul Fazl supplies this omission.
- <sup>4</sup> This makes but six, which is the number given by Tieffenthaler whose names, however, vary somewhat from the text.
- This is the name in the note to the text and I have given it, as it accords with Tieffenthaler: the text itself has Talhani.
- of I am extremely doubtful as to the orthography of these names—the MSS. confessedly vary and many of these places have doubtless ceased to exist. The importance of their true spelling and pronunciation scarcely justifies the labour of an extensive research.

the suburban district of Chanádah, Ahérwárah, Bhóli, Baḍhól, Ṭánḍah, Dhós, Rághúpúr¹—the villages on the western bank of the river, Majhwárah, Maháech, Mahwári, Mahói, Silpúr, Naran.

- 5. The Sarkár of Gházípúr, 18 mahals, one code, viz., the suburban district of Gházípúr, Baliá, Pachótar, Balhábás, Bhariábád, Bhaláej, Chausá Dehbá, Sayyidpúr Namdí, Zahúrábád, Karyát Pali, Kópa Chhét, Gandhá, Karandah, Lakhner, Madan Benáras, Muḥammadábád, Parhárbári.
- 6. The Sarkúr of Karrah, 12 mahals, one code, viz., the township of Karrah, its suburban district, Aichhi, Atharban, Ayásá, Rári, Karári, Kótla, Kaunra commonly called Kósón, Fatehpúr Hanswah, Hatgúch, Hanswah.
- 7. The Sarkúr of Korarah, 8 mahals, 3 codes, viz., thus detailed. The suburban district of Korarah has one code and 2 mahals, viz., itself and Ghátampúr; Kótiá, 3 mahals, Kótiá, Gonér, Keranpúr Kinár,² and one code; Jájmau, 3 mahals, viz. Jájmau, Muḥsinpúr, Majháon, and one code.
- 8. The Sarkár of Kálinjar, 10 mahals, one code, viz., Kálinjar with its suburbs, Aguási, Ajígarh, Sendha, Samóni, Shádipúr, Rasan, Kharélah, Mahóbá, Yodhá.
- 9. The Sarkar of Mánikpúr, 14 mahals, 2 codes. The suburbs of Mánikpúr have 10 mahals and one code, viz., Mánikpúr together with its suburban district, Arwal<sup>3</sup> Bhalól, Salón, Julálpúr Balkhar, Karyát Karárah, Karyát Pacgáh, Khatót, Nasírábád.

Rác Barcli, etc. 4 mahals, one codo, viz. Rác Barcli, Talhandi, Jács, Dalman.

<sup>1</sup> A note to the text gives Rálhupár as the present name of this mahal—the other names have nearly all variants in the MSS., no doubt due as much to dialectic variations in pronunciation as to errors of copyists. Tieffenthaler adds to the above, the fortress of Tschinar-

- ghar (Chanár) built of stone, on an eminence on the western bank of the Ganges.
- . Thus in all MSS. but Elliot has Keratpur Kananda.
- This is the variant in a note and accords with the spelling at p. 428 of text.
  - \* Tieff. has "surnommé Halaca."

The Súbah of Oudh comprises five sarkárs and possesses twelve codes.

1. The Sarkár of Oudh, 21 mahals, 3 codes. The suburban district has 19 mahals and one code. Two parganahs are comprised in Khairábád. They are as follows:

Oudh with its suburban district; Anbódha, Anhónah, Pachhamráth, Bilehri, Baśodhí, Thánah Bhadáon, Bakthá, Daryábád, Rulauli, Selak, Sultánpúr, Sátanpúr, Supahah, Sarwápáli, Satrakah, Gawárchah, Manglasi Naipúr.

Ibrahimábád and Kishni are each a parganah with one code.

2. The Sarkár of Bharáitch has 11 mahals, one code. The suburban district of Bharáitch, &c. 8 mahals, one code. Bharáitch with its suburbs 6 mahals, Bahrah, Husúmpúr, Wankdún, Rajhat, Sanjhauli, Fakhrpúr, Fort Nawágarh.

Firúzábád, &c., two parganahs, one code, viz., Firúzábád, Sultánpúr. Kharosna, one mahal, one code.

- 3. The Sarkúr of Khairábád, 2 mahals, 3 codes. Khairábád, &c., 12 parganahs, one code, viz., suburbs of Khairábád, Basírá, Baswah, Basrah, Chhitápúr, Khairigarh, Sadrpúr, Kheri, Kharkhelá, and Laharpúr, two mahals; Machharhattah, and Hargaráon, two mahals. Páli &c. has 8 mahals, one code, viz., Páli, Barúránjnah, Báwan, Sándi, Sirah, Gopamau, Khánkatmau, Nímkhá; Bharwárah, &c. two mahals, included in Oudh, viz., Bharwárah and Pílá,—and one code.
- 4. The Sarkúr of Gorakhpúr, 24 parganahs, one code. The suburban district of Gorakhpur with the town, 2 mahals, Atrauli, Anhólá; Banáekpúr &c. 4 mahals, Búnbhanpárah, Bhanwápúrá, Telpúr, Chilupúra, Daryápára, Dewápárá and Kótlah, 2 mahals, Rohli; Rámgarh and Góri, 2 mahals, Rasúlpúr and Ghósi 2 mahals; Kathlú, Khalápárá, Mahóli, Mandwah, Mandlah; Manghar and Ratanpúr, 2 mahals; Maharanthoi.2
- 5. The Sarkár of Lucknow has 55 mahals, 2 codes. The suburban district of Lucknow, &c., 47 parganalis, one code. Abéthi, Isauli, Asíyún, Asoná, Unchah Gáon, Balkar Bijlour, Bári, Bharimau Pangwán, Bethóli, Panhan, Parsandán, Pátan, Báráshákor, Jhalóter, Dewi, Deorakh, Dadrah, Ranbirpúr, Rámkót, Sandilah, Saípúr, Sarósi, Saháli, Sídhor, Sidhúpúr, Sandi, Sarón, Futehpúr, Fort of Ambhati, Kursi, Kákóri, Khanjrah, Ghátam-

Dangdoun. Tieffenth.—A variant in the text has Damakdun; almost every name has an alternative spelling.

<sup>2</sup> This name is neither in Bernoulli nor

in Elliot and is not mentioned in the account of Oudh. It has several variants.

A note suggests this to be Bijnour.

púr, Karanda, Kónbhi, Lucknow with its suburbs, Lashkar, Malíhabád, Mohán, Moráon, Madiáon, Mahónah, Manawi, Makráed, Hadha, Inhár.

Onám &c., 8 parganahs, one code, viz., Onám, Bilgráon, Bangurmau, Hardoi, Sátanpúr, Fatehpur Chaurási, Kachhándu, Maláwah.

Spring Harvest of the Súbah of Oudh.

<sup>&</sup>lt;sup>1</sup> The text has Lashkar only—Tieffenthaler, Lashkarpiar. When there are several variants in the notes, I have ventured to select those that accord

with other accounts, though differing from the selected names of the text.

<sup>3</sup> Tieff. "Bakraed autrement Bári."

Autumn Harvest of the Súbah of Oudh.

Baran, &c., 8 Parganahs, 1 code. Baran, Siyánah, Jéwar, Dankor, Adh, Pothh, Senthhah, Sikandarábád.

Mérath, &c., 7 Parganahs, 1 code. Mérath, Húpúr, Barnáwah, Jalálábád, Sarwárah, Garh Muktésar, Patnáwar.<sup>1</sup>

Jhajhar, &c., 4 Parganahs, 1 codo. Jhajhar, Dádri Táha, Mándóthi, Béri Dóbaldhan.

Rohtak, 1 Parganah, 1 code.

Palól. ditto. ditto.

2. Sarkár of Badáon, 16 Parganahs, 1 code. Ajáon, Anólah, Badáon and suburbs, Bareli, Barsar, Pónd, Telhi, Sahsáon, Sonási Mandéhah, Saníyá, Kánt, Kot Sálbáhan, Gólah.

- 3. Sarkár of Hisár Fírozah, 18 mahals, 4 codes. Suburbs of Hisár Fírozah, &c., 7 parganahs, 1 code. Suburbs and city of Hánsi, Barwálah, Barwá, Toshám and Agróhah, 2 mahals, Fatchábúd. Gohánah, &c., 4 parganahs, 1 code. Gohánah, Ahróni, Bhattú and 16 villages. Sirsá, 1 parganah, 1 code. Muhim, &c., 6 parganahs, 1 code. Muhim, Rohtak, Jind, Khándah, Tohánah, Athkérah.
- 4. Sarkár of Rewari, 11 mahals, 4 codes. Rewari, &c., 8 parganahs. 1 code. Rewari, Bâwal, Kot Kásim Ali, Pátodhi, Bhóharah, Ghelót, Ralái Jatái, Nimránah. Táoru, 1 parganah, 1 code. Suhnah, 1 parganah, 1 code. Kohánah, 1 parganah, 1 code.
- 5. Sarkár of Saháranpúr, 36 mahals, 4 codes. Deoband, &c., 26 mahals, 1 code. Deoband, Saháranpúr, Bhatkhanjáwar, Manglór, Núnáth Rámpúr, Sarót, Púrchhapár, Jórási, Sikri Bhákarhari, Sarsáwah, Chartháwal, Rurki, Baghra, Thánah Bhewan, Muzuffarábád, Racpártátár, Ambeth, Nakór and Toghlakpúr, 2 mahals, Bhógpúr, Bhattah, Thánah Bhím, Sanbalrá, Khódi and Gangwah, 2 mahals, Lakhnauti Keránah, &c, 2 parganahs, 1 code. Keránah, Bódóli.

Sardhanah, &c., 7 parganah, 1 code. Sardhanah, Bhónah, Súranpalri, Badhánah, Jóti, Khatóli and Baghra, 2 mahals. Indri. 1 mahal, 1 code.

- 6. Sarkar of Sirhind, 2 mahals, 4 codes. Suburbs of, Sirhind, &c., 13 parganahs. Suburbs of Sirhind, Itápar, Páél, Benér, Jahat, Dhótah, Dòrálah, Deoránah, Khorám, Masénkan, villages of Ráe Samú, Anbálah and Kéthal. Thánésar, &c., 8 parganahs. Thánésar, Sádhúrah, Sháhábád, Khizrábád, Muştafa-ábád, Bhódar, Sultánpár, Póndri. Thárah, &c., 2 parganahs. Thárah, Ludhiánah. Samánah, &c., 9 parganahs. Samánah, Sunnám, Mansúrpúr, Málnér, Hápari, Póndri, Fatehpúr and Bhatandah, Máchhipúr.
- 8. Sarkár of Sanbal, (Sambhal) 47 mahals, 3 codes. City of Sanbal, &c., 23 parganahs. City of Sanbal, suburbs of Sanbal, Sarsi, Naróli, Manjhólah, Jadwár, Gonór, Neodhanah, Deorah, Dabhársi, Dhakah, Rajabpúr, Amróhah, Ujhári, Kachh, Aqzampúr, Islímpur Dargá, Islámpur Bharú, Afghánpúr, Chopálah, Kandarki, Bachharáon, Gandór. Chándpúr, &c., 16 parganahs. Chándpúr, Sherkol, Bíjnaur, Mandáwar, Kératpúr, Jalálábád, Sahanspúr, Nahtór, Nadínah, Akbarábád, Islímábád, Seohárá and Jhálú, 2 mahals. Lakhnór, &c., 11 parganahs. Lakhnór, Sháhi, Kábar and Kánkhari 2 mahals. Hatamnah, Rájpúr, Dódélah, Léswah, Sarsáwah, Basárá, Paróhi., 4

Sarkár of Kumáon. (The names of its parganahs are not entered in the MSS.)

<sup>&</sup>lt;sup>1</sup> Sanbalhera. Elliot.

<sup>&</sup>lt;sup>2</sup> So the text and Tieff. but Elliot. Naghinah.

<sup>&</sup>lt;sup>8</sup> Elliot, Islámabad—the difference in

pronunciation is accounted for by the Imálah or pronouncing Fatha like Kasra—us kilíb for kiláb; en nes for an Nás.

<sup>\*</sup> Elliot and Tieff. Beroi and Barohi.

Spring Harvest of the Subah of Delhi.

The Subah of Lahore contains 8 populated areas (Tieff. pagi et oppida).

1. The area of Lúhore, &c. has 20 mahals, 1 code. Area of Lúhore, &c. 4 mahals; metropolitan area, Bári Doáb; Barhiásat; lands of Panj Bari Sháhpúr: lands of Kálapand, Rachnán Doáb.

Panjáb, 16 mahals: Tappah<sup>3</sup> Bhélúwál of the Bari Doáb, Tappah Bharli, Tappah Phulwári, Panjgarámi, Sandhwál, Sáhú Mali, Sidhpúr, Mankatwálah, Gházipúr, Chandanwarak, Amráki Bhatah, Parsarór, Rachnáu, Sídhpúr Panchnagar, Garbandwál.

- 2. Sarkár of Jálandhar, 30 mahals. 1 code. Jálandhar, Sultánpúr, Shaikhpúr, Mélsi, Lóhi Dhéri, Nakódar, Talón, Muhammadpúr, Miáni Núriya, Kharkharáon, Rahímábád, Jalálábád, Hádiábád, Bójvárah, Harhánah, and Akbarábád, 2 mahals, Balót, Bhonká, Híjípúr, Pati Dhínát, Dárdak Sáhimalót, Andwarah, Dadiál, Kard Jálar? Sarkar(?), Déswahah, Chaurási, Naunankal, Nóbi.
- 3. Sarkár of Batálah, &c. 14 mahals, 1 code. Battálah, Kánuwáhan, Kalánór, Jamári, Hanwád and Bába, 2 mahals, Thandót, Dábháwálah, Khókhówál, Paniyál, Bhalót, Kátwahá and Béthán, 2 mahals, Salímábád separate from Battálah.
- 4. Pati Haibatpúr, &c., 6 mahals, 1 codes Haibatpúr, Hoshiár Karnálah, Fírozpúr, Kaşhr, Muḥammadót, Deosah.?
- 5. Sarkár of Parsarór, &c. 7 muhals, 1 code. Parsarór, Mékri, 6 Mahas-rór, Pati Zafarwál, Pati Bármak, Hamínagar.
- 6. Sarkár of Rohtás, &c., 9 mahals, 1 code. Rohtás, Kari, Kariáli, Bahni, Andarhal, Lósdah, Sardahi, Malótrai Kedári, Nandanpár.
- 7. Sarkár of Siálkót, &c., 11 mahals, 1 code. Siálkót, Mánkót, Wan, Sódrah, Narót, Rónhá, Jimah Chatah, Marát, Mankoknor<sup>7</sup> Sialkot?
- <sup>1</sup> The term savid is usually applied to the towns and villages of Arabian Irák, as those in Khurasán, are called rusták, and in Arabia Felix makhálif.
- <sup>2</sup> This name does not occur in the account of Lahore later on. The variants are Barhidt, Barhidt, Barsahát, Barsahasát. It is scarcely necessary to note that the words Bóri and Rachna in connection with Doáb are formed by the crusis of Beás and Rávi, in the former case, and Rávi and Chenáb in the latter.
- \* Tuppah denotes a small tract or division of country smaller than a parganah but comprising one or more villages. In some parts of the North-
- West, it denotes a tract in which there is one principal town or a large village with lands and villages dependent on them: or a cluster of villages acknowledging the supremacy of one amongst them and forming a sort of corporate body, although not otherwise identical. Wilson's Gloss.
  - 4 In the account of Lahore. Sandhwan.
  - In Tieffenthaler this is placed in the Rachna Doáb.
  - This and the following name in the account of Lahore Mankri and Mahror.
  - <sup>7</sup> Uncertain for want of discritical points.

8. Sarkár of Hazárah, &c., 16 mahals, 1 code. Hazárah, Chandanwat of the Chenáu Doáb, Bhérah, Khókharwál, Khusháb, Kal Bhélak, Khár Darwázah, Táral, Shór, Shamshábád, separate from Bhérah, Shórpúr separate from Chandanwat, Shakarpúr separate from Shór.

Note.—I cannot understand nor explain the notation in Muzaffaris and am not sure if I have interpreted it correctly.

The term Dastur w'l Amal has been translated by me, at p. 89, et seq, "revenue code" according to the definition in Wilson's Glossary, but dastur alone, without the sequent words in construction, he defines to be a subdivision of a sarkur or aggregate of several adjacent parganahs, a serve in which it is now obsolete. I have since noticed in Sir H. Elliot's Glossary that he considers dastur as "perhaps" an abbreviation of Dastur w'l Amal (the code of instructions for Revenue Officers) and under 'Sirkur', he explains it as a "district" into which parganites are aggregated, and his maps of the N. W. P. attempt to restore the sarkurs and dasturs established in Akbar's time. This meaning seems here the most appropriate and must supersede the definition I had given before the opportunity of consulting his valuable work was afforded me. The fiscal areas are thus designated. Each subah is divided into a certain number of sarkurs, and each sarkur into parganahs or mahals (used as equivalent expressions). The term parganah is employed in the Imperial Gazeteer as a fiscal division and the territorial unit and centre of local history, coinciding generally with the dominions of a native

Rája under the Moghal dynasty whose revenue divisions preserved the limits of their petty States. The words used before Akbar's time to denote tracts of country larger than the parganah were مُولِيت Shakk, خطة Khittah, عرصة Arsalı, كالأبت Diyár, عرصة Viláyet, and اقطاع الجمعة. Thus, says Elliot, in the early historical writers before the close of the 14th century, we find Shakk i Sámánah, Khittah i Awadh, Arsah i Gorakpur, Diyar i Lakhnauti, Viláyat i Mián Doab, and Iktá i Karra.

# ACCOUNT OF THE TWELVE SUBAIIS.

In the fortieth! year of the Divine Era His Majesty's dominions consisted of one hundred and five Sarkárs (division of a Súbah) subdivided into two thousand seven hundred and thirty-seven townships. When the ten years' settlement of the revenue was made (which amounted to an annual rental of three Arbs, sixty-two krórs, ninety-seven lakks, fifty-five thousand two hundred and forty-six dáms and twelve lakks of betel leaves), Ilis Majesty apportioned the Empire into twelve divisions, to each of which he gave the name of Súbah and distinguished them by the appellation of the tract of country or its capital city. These were Allahabad, Agra, Oudh, Ajmér, Ahmadábád, Behár, Bengal, Dehli, Kábul, Láhor, Multán, Málwah: and when Berár, Kháudesh and Ahmadnagar were conquered, their number was fixed at fifteen. A brief description of each is here set down, and an account of their rulers together with the periods in which they flourished, duly recorded.

# THE SUBAH OF BENGAL.

Since the conceptions of sovereign rule embrace the universe, I propose to begin with Bengal which is at one extremity of Hindustán and to proceed to Zabulistán<sup>3</sup> and I hope that Turán and Irán and other countries may be added to the count. The country lying to the east will be first described, followed by the north, the south, and the west.

This Súbah is situated in the second climate.4 Its length from

- 1594-5.
- <sup>2</sup> One numbered thousand make 1 Lakh.

  " " Lakhs " 1 Krór.

  One hundrd Krór " 1 Arab.

  The total revenue is therefore Rupees 90,743,881-2-5.
- Kábul and the adjacent territory as far as Ghazna and even beyond come under this appellation which is derived by Yákut, (Muajamu'l Buldán) from Zábul grandfather of Rustam.
- <sup>4</sup> This term, literally a slope or inclination, was used in the mathematical geography of the Greeks with reference to the inclination of various parts of the earth's surface to the plane of the equator. Before the globular figure of the earth was known, it was supposed that there was a general slope of its surface from S. to N. and this was called  $\kappa \lambda i \mu \alpha$ . But as the science of mathematical geography advanced, the word was applied to belts

Chittagong to  $Garhi^1$  is four hundred  $kós^2$ . Its breadth from the northern range of mountains to the southern frontier of the  $Sark\acute{a}r$  of  $Mad\acute{a}ran$ ; is two hundred kos, and when the country of Orissa was added to this  $S\acute{a}bah$ , the additional length was forty-three kos and the breadth twenty-three. It is bounded on the east by the sea, on the north and south by mountains and on the west by the  $S\acute{a}bah$  of Bohár. The tract of country on the east called  $Bh\acute{a}ti^3$ , is

of the earth's surface, divided by lines parallel to the equator, those lines being determined by the different lengths, at different places, of the shadow cast by a gnomon of the same altitude, at noon of This division into the same day. climates was applied only to the N. hemisphere as the geographers had no practical knowledge of the earth S. of the equator. There were 19 climates as given by Ptolemy (Geogr. i, 23). term was afterwards applied to the average temperature of each of those regions and hence our modern use of the word, (Dict. of Antiq. 2nd ed. art Climates.) The Arabs adopted this system but restricted the number to seven. They considered three-fourths of the globe to be submerged and one-fourth above water. Of this latter 11 was habitable and the remainder waste or desert. The habitable portion was 33,150,000 square miles in extent, each mile being 4000 cubits, each cubit 24 digits. It was situated between the Equator and the N. pole and was divided into 7 climates. Their position and the limits of the divisions will be found in Yakút. M. B. Vol. I, p. 25 sq. and in DeSlane's translation of Ibn Khaldún, pp. 93-168 et sq. Vol. I. An account of the corresponding geographical system of the Hindus may be seen in Wilford's Essay on the Sacred Isles of the West. Asiat. Research, Vol. VIII and in Albirúni's India, Caps. 21-24.

¹ This is Teliagarhi, a pass in the Santhál Parganahs, Bengal, lying between

the Rajmahal hills on the S. and the Ganges on the N. Formerly of strategic importance as commanding the military approaches to Bengal Proper. ruins of a large fort still exist, through which the E. I. Railway passes. It seems never to have been completed and was constructed in the last century by the Teli zamindár who was forcibly converted by the Muhammadans. Henco the name of the fort and the parganah in which it is situated. Imp. Gazetteer. I retain the ordinary spelling of Chittagong. Chatgáon or Chaturgrama, i. e., four villages, denotes its origin. Wilford has another derivation and identifies it with the Pentapolis of Ptolemy. (Asiatic Research, XIV, p. 444.)

<sup>2</sup> The linear measures are variable all over India but the kós is for convenience generally taken at two English miles. The basis of all linear systems is the same, viz., the cubit or human forearm. Proceeding upwards four háths or cubits = a danda or staff: and 2000 dandas a kos which by this calculation should be 4000 yards English or nearly 24 miles. I refor the reader to the Useful Tables, p. 87, for a fuller account of these measures. Also to Elliot. Races, N. W. P. II, 194.

The name given by the Muhammadan historians to the coast-strip of the Sundarbans from Hijili to the Meghna Lat. 20° 30′ to 22° 30′ N., long. 88° to 91° 14′ E. The name means "low lands overflowed by the tide" and is still applied to the Sundarban tracts of Khulna and Bákarganj Districts. I. G.

reckoned a part of this province. It is ruled by I'sa Afghán¹ and the Khutbah is read and the coin struck in the name of his present Majesty. In this country the mango trees grow to the height of a man or not so high and produce abundant fruit. Adjoining it, is an extensive tract of country inhabited by the Tipperah tribes. The name of the ruler is Bijay Mánik. Whosoever obtains the chieftainship, bears the title of Mánik after his name, and the nobles that of Naráin. He has a force of two hundred thousand footmen and a thousand elephants. are scarce. To the north is a country called Kúch. Its chief commands a thousand horse and a hundred thousand foot. Kimrúp commonly called also Kionru and Kámtá, is subject to him. The inhabitants are as a race good looking and addicted to the practice of magic. Strange stories are told regarding them. It is said that they build houses, of which the pillars, walls and roofs are made of men. Some of these they compel by the power of sorcery, and criminals deserving of death are also thus made use of. Whoever voluntarily surrenders himself for this purpose, escapes retribution for a year. Various conveniences are reserved for him. In due time, men armed with swords cut them down, and from their movements or immobility or other aspects, they have cognizance of scarcity or plenty or duration of years or the longevity of the ruler or defeat of enemies.2 They also cut open a prognant woman who has gone her full term of months and taking out the child, divine somewhat as to the future. There grows a wonderful tree whose branches when cut, exude a sweet liquid which quenches the drought of those a-thirst. They have also a mango tree3 that has no trunk; it trails like a climbing vine, over a tree and produces fruit. There is likewise

<sup>2</sup> See Vol. I, p. 342. The name also occurs in the Ridzu's Salatin, p. 5, MS. where this general is said to have conquered some of the Eastern provinces and united them to Bengal, reading the khuthah and minting the coin under the authority of Akbar.

<sup>2</sup> The author of the Siyar ul Mutaakhkhiria in the introduction to his work, in his account of Bengal quotes this narrative of the magical practices in Kámrúp, and gravely adds that he has learnt from the authorities of the place itself, their absolute fulsehood.

\* I am indebted to Dr. King of the

Royal Botanical Gardens, Calcutta, for a view of the specimen of this plant, the Willighbeia edulis. It is known to natives of Bengal, Assam and the Chittagong Hill tracts, he says, as the Loti A'm (Loti, perhaps a corruption of lata, a creeper) but botanically is far removed from the true mange. The fruit is said to be pleasant to taste. The leaf of the dried specimen is very similar to the ordinary mango leaf: the fruit is about 11 inches long and 21 broad as it appears in its desiccated state. I am assured by a native friend that he has seen the plant growing in the neighbourhood of Calcutta.

a flower which after it has been gathered for two months, does not wither nor lose its colour or smell. Of this they make necklaces.

Bordering on this country are the dominions of the Rájah of Ashám (Assam) whose great pomp and state are subjects of general report. When he dies, his principal attendants of both sexes voluntarily bury themselves alive in his grave. Neighbouring this is Lower Tibet and to its left is Khata.<sup>2</sup> This is also called Maháchín which the vulgar pronounce Máchín. From Khán Báligh<sup>8</sup> its capital, to the ocean, a forty days' journey, they have cut a canal both sides of which are embanked with stone

<sup>1</sup> Mr. Mann, Conservator, of forests, Shillong, informs me that many kinds of flowers are worn, but the only one that he has seen worn dry, and which to some extent retains its smell and colour, is the Tulsi, (Ocymum Sanctum).

<sup>2</sup> China for nearly 1000 years, writes Yule (Marco Polo, 2nd ed. Introd. p. 11) has been known to Asia under the name of Khitai, Khata or Cathay and is still called Khitai by the Russians. "Tho pair of names Khitai and Machin is analogous to the other pair, Seres and Sinai. Seres was the name of the great nation in the far East as known by land, Sinai as known by sea : and they wert often supposed to be diverse just as Cathay and China were afterwards.' D'Herbelot gives the name of Khathai or Khatha to northern China whose ruler the Khákán, according to Eastern romanco or tradition, joined his forces to those of Afrásiáb, king of Tartary against Kai Khusru king of Persia. The monarchs of this country in the time of Chingiz Khán, bore the title of Altoun Khan, and in the time of Tamarlane and his successors, that of Daiman Khán. The latter is a western corruption of Tai-mim-great brilliancy, Mim being the dynastic title taken by the Chinese conqueror who expelled the Mongols and was proclaimed Emperor in 1368. In the time of Chengiz, China was divided into Northern which comprized one-third, and Southern which

included the remaining two-thirds. The former was under a Tartar chief, the latter ruled by a Chinese Emperor. paying tribute to the Tartar, who might be thus said to be monarch of the whole of China or Khathai which embodies that meaning. See D'Herbelot Vol. II, art. Khathai and IV, p. 17 et seq.-Japhet is credited by Orientals with the paternity of Chin who received the celestial empire as his inheritance and begot Machin, his first-born. For Sinai and Scriké see Ptolemy's India. by McCrindle. The Chalae Scythae are placed by Ptolemy to the north of his A-khassa regio, identified by Cunningham with Ladák, and therefore west of Tibet. The name has perhaps survived with oriental geography.

 De Guignes (Hist. des Hnns. gives this name to Pekin called also Taton the grand court or Khan Baligh. the court of the Khan. The extent and opulence of this city and the splendour in which Kublai Khan lived will be found in the reference, but several towns have received this name which as it signifies the royal residence is transferable to any that the monarch may honour with his presence. It is the Cambalu of Western geographers and historians and placed by them in Northern China or Grand Tartary, while the Orientals locate it in China Proper. These conflicting locations are due to ignorance of the meaning of the name.

and mortar. Alexander of Greece advanced to that country by this route. Another road is also mentioned which can be traversed in four days and four nights.

To the south-east of Bengal is a considerable tract called Arakan which possesses the port of Chittagong. Elephants abound, but horses are scarce and of small size. Camels are high priced: cows and buffaloes there are none, but there is an animal which has somewhat of the characteristics of both, piebald and particoloured, whose milk the people drink. Their religion is said to be different to that of the Hindus and Muḥammadans. Sisters may marry their own twin brothers, and they refrain only from marriages between a son and his mother. The ascetics, who are their repositaries of learning, they style Wali whose teaching they implicitly follow. It is the custom when the chief holds a court, for the wives of the military to be present, the men themselves not attending to make their obeisance. The complexion of the people is dark and the men have little or no beard.

Near to this tribe is *Pegu* which is also called *Chin*. In some ancient accounts it is set down as the capital city of *Chin*. There is a large military force of elephants and infantry, and white elephants are to be

Karakorum was the first Khán Báligh of the Mongols. Besides Pekin, a city called Kai-pim-fou, built by Kublai Khan in 1256 severty leagues north of Pekin, bore this title. The bewilderment of a student of Chinese history in the multitude of almost similar names, applied to different places, by successive dynastic races, eager to abolish the traces of its predecessor, is amusingly illustrated in D'Herbelot, Vol. IV, p. 24 et seq. and Yule's Marco Polo, Vol. I, pp. 309-324 seq.

<sup>1</sup> In B. C. 329 Alexander crossed the Oxns in passit of Bessus and after put-ing him to death, he passed the Jaxartes (Sir Daria) and defeated several Seythian tribes north of that rivor. This was the northernmost point that he reached. After founding Alexandria Eschata, the modern Khojend on the Jaxartes, he re-crossed the Oxus. In the following year he completed the conquest of Sogdiana, and marched

south to Bactria and in the spring of B. C. 327, passed the Indus at Attok.

yhigh connected with the following word شتر would read "asses and camels" as Gladwin has taken it. The reading of the text appears to me more probable. In the names of places I have followed as far as possible the spelling of the Imperial Gazetteer.

<sup>8</sup> The demestic animals of the Arakan Hill Tracts according to the Imp. Gaz. are the gayal, buffalo, ox, goat, pig, dog. "The Gayal (Bos Frontalis) has interbred with the common Indian cattle; these hybrids are brought down by the Bútiahs to the annual fair in the Darrang District: though they thrive in Shillong they soon die if kept in the plains. The Gayal is plentiful along the spurs of the Bhután hills, amongst the Dufflas, Lushais, and along the hilly tract well into Chittagong." Sport in British Burmah by Lieut.-Col. Pollock.

found. On one side of it is Arakan. There are mines of rubies, diamonds, gold, silver, copper, naptha and sulphur, and over these mines there is continual contention between this country and the Maghs as well as the tribes of Tipperah.

The original name of Bengal was Bang. Its former rulers raised mounds measuring ten yards in height and twenty in breadth throughout the province which were called Al.<sup>2</sup> From this suffix, the name Bengal took its rise and currency. The summer heats are temperate and the cold season very short. The rains begin when the sun is midway in Taurus, (May) and continue for somewhat more than six months, the plains being under water and the mounds alone visible. For a long time past, at the end of the rains, the air had been felt to be pestilential and seriously affected animal life, but under the auspices of his present Majesty, this calamity has ceased.

Its rivers are countless and the first of them in this province is the Ganges: its source cannot be traced. The Hindu sages say that it flows down from the hair of Mahadeva's head. Rising in the mountains towards the north, it passes through the province of Delhi, and imperial Agra, and Allahabad and Behár into the province of Bengal, and near Kázihattah³ in the Sarkar of Bárbašábád, it divides into two streams. One of these, flowing eastwards, falls into the sea at the port of Chittagong. At the parting of the waters, it takes the name of Padmáwati and pursues a southern course. It is divided into three streams; one, the Sarsuti; the second the Jamna (Jamuna) and the third the Ganges, called collectively in the Hindi language Tribeni, and held in high veneration. The third stream after spreading into a thousand channels, joins the sea at Sátgáon. The Sarsuti and

- 1 All the MS. and the Khulásat-utTamáríkh read خشکي. The author of
  the Siyar has a shrowder conjecture
  ( الخنگ ) which I have adopted. Arakan is the silver country (Argyra) of
  Ptolemy, though according to McCrindle no silver is known to exist in that
  region.
- <sup>2</sup> Sansk. **Titl** a mound of earth or ridge for crossing ditches, dividing fields and the like.
  - Anglice, Cossimbazar.
- \* Usually Saraswati, though the spelling in the text has ancient authority. Imp. Gaz. This name according to

- McCrindlo has been frequently given be rivers (being a compound of saras, 'flowing water,' and the affix vati) and applied among others to the river of Arakhosia, probably the Helmand.
- sansk. चिवेषो three braids of hair. Wilford says (Asiatic Research. Vol. XIV, p. 396) that the waters of these three rivers do not mix. The waters of the Jumna are blue, those of the Sarasvati white and the Ganges is of a muddy yellowish colour.
- <sup>6</sup> See Statistical Account of Bongal, Vol. III, pp. 307-310 and 1mp. Gaz.

the Jamua unite with it. In praise of this stream the Hindu sages have written volumes. From its source to its mouth it is considered sacred but some spots have a peculiar sanctity. Its water is carried as an offering of price to far distant places. Believing it to be a wave of the primeval river, they hold its worship to be an adoration of the supreme being, but this is no part of the ancient tradition. Its sweetness, lightness and wholesomeness attest its essential virtues. Added to this, it may be kept in a vessel for years without undergoing change.

Another river is the Brahmaputra. It flows from Khati<sup>2</sup> to Kúch and thence through the Sarkár of Bázohá and fertilising the country, falls into the sea.

And again there is the sea which is here a gulf of the great ocean, extending on one side as far as Başrah and on the other to the Egyptian Kulzum<sup>3</sup> and thence it washes both Persia and Ethiopia where are Dahlak<sup>4</sup> and Súákin, and is called (the Gulf of) Omán and the Persian Sea.

The principal cultivation is rie; of which there are numerous kinds. If a single grain of each kind were collected, they would fill a large vase. It is sown and reaped three times a year on the same piece of land with little injury to the crop. As fast as the water rises, the stalks grow, so that the ear is never immersed, inasmuch as those experienced in such matters have taken the measure of a single night's growth at sixty cubits. The people are submissive and pay their rents duly. The demands of each

- 1 "This superstition is not to be found in the earliest books of Sanskrit literature, composed at a time when the primitive Aryan race had not yet penetrated into the great plain of Eastern Hindustan. The legend first appears in the two epic poems of the Mahabhárata and Rámáyana" I. G.
- <sup>2</sup> Its rise is supposed to be from the S. E. base of the sacred Kailás hill, on the opposite side of the water-parting in which the Satlej and the Indus also take their rise. Its course, confluents and history may be read in the I. G. and Bernoulli, Vol. III, p. 111.
- This is the ancient Clysma, the site of the modern Suez, in the neighbourhood of which the Tel Kulzúm still retains the name which has been given to the Red Sea. It is derived from the

- quadriteral root of the Arabic verb 'to swallow,' which that sea is said to deserve from its numerous victims.— Yakút Mu'jam úl Buldán.
- \* This is the well-known island Dahlak el Kabír, opposite Massonah. Yákut says that it was used by the Bani Umayya as a place to which subjects under their displeasure were deported. This passage recalls a similar one in Albirúni's India, 1, p. 270. Sachau's transl.
- <sup>5</sup> The long stemmed rice, according to the 1. G. is extensively cultivated in the swamps. The seed is sown when the marshes are dry or nearly so, and when the rains set in the plant shoots up with the rise of the water and can be grown in water to a depth of from 18 to 20 feet, but even this is not in one night. Gladwin has six for sixty.

year are paid by instalments in eight months, they themselves bringing mohurs and rupees to the appointed place for the receipt of revenue, as the division of grain between the government and the husbandman is not here customary. The harvests are always abundant, measurement is not insisted upon, and the revenue demands are determined by estimate of the crop. His Majesty in his goodness has confirmed this custom. Their staple food is rice and fish; wheat, barley and the like not being esteemed wholesome. Men and women for the most part go naked wearing only a cloth about the loins. The chief public transactions fall to the lot of the women. Their how is are made of bamboos, some of which are so constructed that the cost of a single one will be five thousand rupees or more and they last a long time. Travelling is by boat, especially in the rains, and they make them of different kinds for purposes of war, carriage or swift sailing. For a siege they are so adapted that when run ashore, they overtop the fort and facilitate its capture. For land travel they employ the Sukhásan. This is a crescent-shaped litter covered with camlet or scarlet cloth and the like, the two sides of which have fastenings2 of various metals and a pole supporting it is attached by means of iron hooks. It is conveniently adapted for sitting in, lying at full length or sleeping during travel. As a protection against sun and rain they provide a commodious covering which is removable at pleasure. Some enjoy the luxury of riding on elephants but they rarely take to horseback. The mats made here often resemble woven silk. Tria3 indr genera cunnelprum veniunt, quos Saudalos, Bádámos et Káfúros nuncupant. Priores, partibus genitalibus radicaliter exsectis, Atlises etiam nominant. Bádámis pars solum penis relinquitur. Káfuros adhuc teneros ætatis, testes vel compressi conficiuntur vel exsecuntur: tamen notatum est, castrationem, que pervicaciam cateris omnibus animalibus tollit, hominibus solis excitare. Salt is in great demand and is brought from long distances. Diamonds, emeralds, pearls, cornelians and agates are imported. Flowers and fruit are in plenty. The betel-nut is of a kind that stains of a red colour the lips of those who chew it.

Januatáhád is an ancient city: for a time, it was the capital of Bengal and was widely known as Lakhnanti and for a while as Gaur. His Majesty

The author of the Aráish-i-Mahfil who copies his account from the Khulaşat-ul-Tawarikh disputes this statement. (p. 111.) 8 I have imitated the example of Gladwin in veiling the following passage under the mask of a learned language and with a slight alteration have borrowed his words.

<sup>&</sup>lt;sup>2</sup> The text is here doubtful as to the true reading.

the late Emperor Humáyún distinguished it by this title of Jannatábád.¹ It has a fine fort and to the eastward of it is a lake called Chhatiápatió² in which are many islands. Were the dam that confines it to break, the city would be under water. About a kós to the north of the fort, is a large building and a reservoir, monuments of great antiquity. From time immemorial, its water has been considered to be of a poisonous character. The place was called Piyásbári,³ and criminals condemned to death, were there confined who in a short time perished from the effects of this brackish water. At present in the blessed reign of His Majesty, this practice has been discontinued.

Maḥmɨdábád.—The marshes around the fort have added to its impregnability. The ruler of this district, at the time of its conquest by Sher Khán, let some of his elephants loose in its forests from which time they have abounded. Long pepper grows in this tract.

The Sarkár of Khalifatábád is well wooded and holds wild elephants. The Sarkár of Bagláb extends along the sea shore. The fort is surrounded by woods. On the first day of the new moon the sea steadily rises until the fourteeuth, and from the fifteenth till the end of the month as gradually falls. In the 29th year of the Divine Era, a terrible inundation occurred at three o'clock in the afternoon, which swept over the whole Sarkár. The Rájah held an entertainment at the time. He at once embarked on board a boat, while his son Parmánand Ráe with some others climbed to the top of a temple and a merchant took refuge in a high loft. For four hours and a half the sea raged amid thunder and a hurricane of wind. Houses and boats were engulfed but no damage occurred to the temple or the loft. Nearly two hundred thousand living creatures perished in this flood.

In the Sarkár of Ghoragh it,6 silk is produced and a kind of sackcloth. Numbers of canachs are here and hill ponies in plenty are procurable.

- <sup>1</sup> This is confirmed by the Tabakát Akbari. Elliot's Hist of India, Vol. V, p. 201. In Bernoulli's 3rd Vol. the name is said erroneously to be given by Akbar. The history of Gaur will be found in the Imp. Gaz.
- <sup>2</sup> Called Chhatalbhatah by the author of the Aráish-i-Maḥfil.
- \* 'The abode of thirst.' So the I. G.; the text has Biarbari a variant Piázbári.
  - This is the Piper longum, a native

- of Java, Malibar and Bengal. The fruit is gathered while green and dried in the sun.
- 5 In the Siyar al Mutaakhirin, Huqla and said to be called so from the wellknown grass of that name (Typha elephantina) which here abounds.
- In the Riázñ's Salátín, this name is coupled with Rangpur, and poules are said to be brought hither from Bhután. Jute is one of the staple crops.

There are many kinds of indigenous fruits, especially one called *Latkan*. It is the size of a walnut with the taste of a pomogranate and contains three seeds.

The Sarkár of Bárbakábád produces a fine cloth called Gangajal (Ganges water), and a great abundance of oranges.

In the Sarkúr of Bázohá are extensive forests which furnish long and thick timbers of which masts are made. There are also iron mines.

The Sarkár of Sonárgáon<sup>2</sup> produces a species of muslin very fine and in great quantity. In the township of Kiyára<sup>3</sup> Sundar is a large reservoir which gives a peculiar whiteness to the cloths that are washed in it.

In the Sarkar of Sylhet there are nine are ranges of hills. It furnishes many ennucles.

There is a fruit called Súntarah<sup>5</sup> in colour like an orange but large and very sweet. The China root<sup>6</sup> is produced in plenty. In ancient times

- Avariant has Lankan. Dr. King of the Royal Botanical Gardens, Calcutta, considers this to be a species of Elwocarpus. They are now a days, he says, indiscriminately called Jalpai by the natives. The fruits of all the species are a good deal alike, varying in size from an olive to a walnut, having an external fleshy pulp more or less palatable (in some species of fair flavour) and containing a stone. The latter is usually found to be divided into 3 cells, one of which contains a mature seed, the seeds in the other two being abortive. The taste of the pulp of the E. serratus and E. lanccofolius (both natives of Rangpur) is a good deal like that of the pomegranate.
- <sup>2</sup> This was the ancient Muhammadan capital of Eastern Bengal but is now an insignificant village called Painám in tho Dacca District. I. G.
- A variant is Katárah which Gladwin adopts.
- In the south of the district, says the Gazetteer, eight low ranges of hills run out into the plain, being spurs of the Tipperah mountains. The highest is

- about 1000 feet above sea level. There is also a small detached group, the Ita hills, in the centre of the district.
- 5 Commonly Sangtarah. The name is supposed to be a corruption of Cintra. but its mention by Baber in his Memoirs seems subversive of this derivation, for though the fruit is said to have been an eastern importation into Portugal, it is improbable that the foreign name could have been current in India at so early a date. Humayun praises it highly saying that no one cares for any other fruit who has this. He states that it is found only at Senargam (so Erskine spells the name, doubtless Sonárgáon) in Bengal and in the greatest perfection only at one place. A note to the Memoirs (p. 329) says that the description of the fruit by Baber suits more the Citrus decumana than any other, but Roxburgh states that this shaddock is found (or was in his day) only in the Botanic Gardens in Calcutta and its Bongali name Batavi nimbu, the Batavia lime, denotes its being an exotic.
- The root of a species of Smilax of a pale reddish colour with no smell and

it had not been discovered until some scientific travellers from European Turkey introduced it to universal notice. Aloes-wood is abundant in these mountains. At the end of the rains they fell the trees to the ground, and after a certain time they give them various names according to their greenness or maturity.

The Bhangráj¹ is a bird of a black colour, with red eyes and a long tail. Two of the feathers extend to a length of a gaz. They are snared and tamed. It catches the note of any animal that it hears, and eats flesh. The Shérganj is of the same kind but its beak and legs are red; in imitating sounds, it matches the other and pursues sparrows and the like and eats them.

Châtgáon (Chittagong) is a large city situated by the sea and belted by woods. It is considered an excellent port and is the resort of Christian and other merchants.

In the Sarkár of Sharífábád is a beautiful species of cattle, white in colour, and of a fine build: like camels they are laden kneeling down and carry fifteen man weight. It is noted for the Barbary goat and for fighting cocks.

In the Sarkár of Sátgáon,<sup>2</sup> there are two ports at a distance of half a kos from each other; the one is Sátgáon, the other Hugli: the latter the chief; both are in the possession of the Europeans. Fine pomegranates grow here.

In the Sarkár of Mædáran is a place called Harpah in which there is a diamond mine producing chiefly very small stones.

very little taste. The Smilax glabra or lanceofolia, not distinguishable, according to Roxburgh. by the eye from the drag known as China root. It is a native of Sylhet and the adjacent Garrow country.

<sup>1</sup> The Edolius paradiseus or large racket-tailed Drongo. Plumage uniformly black with a steel-blue gloss. Length to end of ordinary tail 14 inches; wing 6½; tail to middle 6½; outer tail feather 12 to 13 inches more; the shaft having the terminal end for about 3½ inches barbed externally, but towards the tip only on the inner side, and turning inwards so that the under-side becomes uppermost. It will eat raw meat, lizards, and almost

any kind of food offered to it. It imitates all sorts of sounds, as of dogs, cats, poultry. Bhimráj or Bhring-ráj, king of the bees, is its common name. It is found in the dense forests of India from the Himalayas to the Eastern Ghats as far S. as N. L. 15°. Jerdon.

Its decay commenced in the latter part of the 16th century owing to the silting up of the channel of the Saraswati. In 1632, Hagli being made a royal port, all the public offices were withdrawn from Sátgáon which soon sunk into ruin. Stat. Acct. of Bengal, 111, 307—310.

#### Orissa.

This was formerly a separate State. The climate is extremely healthy. His Majesty apportioned it into five Sarkárs, viz., Jalesar, Bhadrak, Katak (Cuttack,) Kalang Dandpát and Raja Mahandrah. These five are now included in the province of Bengal. it contains one hundred and twenty-nine masonry forts. Its ruler is entitled Gajpati.2 The rainy season extends over eight months; there are three cold months and one month only that is hot. The staple cultivation is rice and the food of the inhabitants consists of rice, fish, the egg-plant<sup>3</sup> and vegetables. When the rice is cooked, they steep it in cold water and cat it on the second day. The men are effeminate, anointing their bodies with sandal oil and wearing golden ornaments. The women cover only the lower part of the body and many make themselves coverings of the leaves of trees.4 The walls of their huts are of reeds and their temples are of stone and of great height. Elephants abound. The inhabitants of Bengal do not understand the language of this country. A woman may have more than one husband. They' write on palm leaves, with an iron pen, holding it with the cleuched fist, and pen and ink are rarely employed. The litters called Sukhásan are much in use: cloths are manufactured and the province furnishes ennucles; fruits and flowers are in great plenty, especially the gul i nasrin6 which is very delicate and sweet-scented: its outer petals are white, the inner yellow. The keorah grows in great abundance and there are various kinds of betel-leaf. Money transactions are in kanris which is a small white shell generally divided down the middle; it is found on the sea shore. Four kauris make a ganda, five gandas, a búdi, four búdis, a pan, sixteen or according to some twenty pan, a kháwan, and ten kháwan, a rupce.

Kalak (Cuttack.) The city has a stone fort situated at the bifurcation of the two rivers, the Mahánadi, held in high veneration by the Hindus, and

- <sup>1</sup> In the I. G. Jaleswar, popularly Jellasore, an old border town bocceen Bengal and Orissa on the Calcutta high road. The name was also applied to an ancient Mulammadan circle or Sarkár which comprised the present Midnapur District, including Hijli.
- Lord or rider of the elephant. The snit of cards used by 'Akbar (Vol. I. p. 316) under the name of Gajpati; symbolised the power and reputation of Orissa in the possession of these animals

- <sup>8</sup> Solanum melongena.
- For the leaf-wearing tribes of Orissa, the Juangs or Patwas, see Hunter's Orissa, II. 116.
- <sup>5</sup> The Brahmanical archives of the temple of Jagannath consist of bundles of palm leaves, neatly cut and written over with a sharp iron pen without ink. I. G.
- In Hindi, Scoti the Rosa glandulifera.
  Roxb.
  - <sup>1</sup> Pandanus odoratissimus, Roxb.

the Ganjúri.1 It is the residence of the governor and contains some fine buildings. For five or six kos round the fort during the rains, the country is under water. Rajah Makand Deo2 built a palace here nine stories in height; the first story was taken up for the elephants and the stables: the second was occupied by the artillery and the guards and quarters for attendants; the third by the patrol and gatekeepers; the fourth by the workshops: the fifth, by the kitchen: the sixth contained the public reception rooms: the seventh, the private apartments; the eighth, the women's apartments, and the ninth, the sleeping chamber of the governor. To the south is a very ancient temple. Overlooking this, in the city of Purushottama<sup>3</sup> (Púri) on the sea shore stands the shrine of Jagannáth. Near to it are the images of Krishna and of his brother and sister,4 made of sandal-wood. It is said that over four thousand years ago Rájah Indradagan (Indradyumna) ruler of the Nilkar (Nilgiri) hill sent a learned Brábman to select a suitable spot for the building of a city. He wandered much in search of his object and found a fitting site which he preferred to all other places. On a sudden he beheld a crow plunge into the water and after bathing itself, pay its devotions to the sea. He was astonished at this action and as he understood the language of animals, he inquired of the crow the reason of its proceeding. He received this answer. "I was once of the number of the deotas and through the curse of an ascetic was transformed into this shape. A spiritual guide of high illumination assums that the Supreme Creator has a special regard for this spot and whosoever dwells here and applies his soul to the worship of God, quickly attains his desire. For some years past I have supplicated for my deliverance in this manner and the time is now at hand when my prayer will be answered. Since thou art essentially meritorious, watch in expectation and comprehend the wonders of this land." The Brahman in a short time witnessed with his own eyes the things he had heard. He apprised the Rájah of these occurrences, who

<sup>&</sup>lt;sup>1</sup> The I. (4. has Katjuri. This latter is one of the deltaie tributaries of the Mahánadi dividing into two branches, one of which retains its own name while the other takes that of Koyákhai and supplies the Púri district.

A. D. 1550: in this reign the sovereignty
of Orissa was overthrown by the King
of Bengal. The titular Rája under
Akbar, Ramchandra Deo, took pos-

session in 1580. U. T., p. 114 and Orissa, H. 189.

<sup>8 &#</sup>x27;The best of mon' an epithet of Vishnu.

<sup>\*</sup> Balabhadra and Subhadra. The images are rude logs coarsely fashioned in the shape of a human bust, and are actually in the sanctuary itself. For a description of the temple and other local shrines, I refer the reader to the I. G. "Orissa."

built a large city and appointed a special place of worship. The Rájah, one night, after having administered justice, was reposing on the couch of divine praise when it was thus revealed to him. "On a certain day, watch in expectation upon the sea shore. A piece of wood of fifty-two fingers in length and a cubit and a half in breadth will approach: this is the special image of the deity: take it and placing it in thy house, guard it for seven days and whatever shape it then assumes, place it in the temple and enshrine it." After waking, the thing happened in the same wise, and by a divine inspiration, he named it Jagannáth and decked it with gold and jewels. It became a place of devotion to high and low and many miracles are reported regarding it. Kálá Pahár the General of Sulaymán Karáni, on his conquest of the country, flung the image into the fire and burnt it and afterwards cast it into the sea. But it is now restored and these popular fables are related of it.

The three images are washed six times every day and freshly clothed. Fifty or sixty priests wearing the Brahmanical thread, stand to do them service and each time large dishes of food are brought out and offered to the images, so that twenty thousand people partake of the leavings.<sup>3</sup> They construct a car of sixteen wheels which in Hindi, they call Rath, upon which the images are mounted, and they believe that whosoever draws it, is absolved from sin and is visited by no temporal distress. Near Jagannath is a temple dedicated to the Sun.<sup>4</sup> Its cost was defrayed by twelve years revenue of the province. Eventhose whose judgment is critical and who are difficult to please stand astonished at its sight. The height of the wall is 150 cubits<sup>5</sup> high and 19 thick. It has three portals. The castern has carved upon it the figures of two finely designed elephants, each of them

288, quotes these measurements from Gladwin, but changing "cubits" into "hands" and adding in a note. "Gladwin says cubits but the word in the original is dast." It would have been more satisfactory had this distinguished writer told us what he understood by 'hand.' The Persian dast is equivalent to the Hindustani háth, namely, the length from the point of the elbow to the tip of the middle finger, and this is a cubit. Whether Abúl Fazl's measurements are right or not is another matter but Gladwin has rightly interpreted his meaning.

<sup>&</sup>lt;sup>1</sup> The legend will be found related at length in "Orissa," Vol. I, p. 89.

<sup>&</sup>lt;sup>2</sup> The Riázu's Sulátín confirms this variant which the text has relegated to a note. In "Orissa" Vol. I, p. 35, the burning and miraculous recovery of the image are described.

الوش of the text should be اولش

<sup>•</sup> The temple of Kanárak which formed a landmark along the coast, and still sighted by ships in their passage up the Bay: said to be the most exquisite memorial of sun worship in existence. Orissa, I, 188.

the course of the Páglá. Sulaimán Sháh Karáni, the last but one of the Afghán kings of Bengal, moved the seat of government of Tándá in 1564, A. D. eleven years before the final depopulation of Gaur. It was a favourito residence of the Mughal governors of Bengal until the middle of the following century. In 1660 the rebel Shujáa' Sháh was defeated in its vicinity. After this date, it is not mentioned in history and was deserted in favour of Rájmahal and Dacca. In noticing variants in the spelling of the above list, I shall refer to Tieffenthaler under T. to Gladwin under G. and a variant of the text in the text notes as var.

- <sup>2</sup> G. thál. T. bhál.
- <sup>2</sup> T. Adjepál.
- · Var. agreeing with G.

- 4 G. Dahdah.
- 5 Var. and G. Durgáchi.
- T. and var. Salímábád.
- 7 T. and var. Sanila.
- instead of wickless are repeated in the following page. The term was applied in old revenue accounts to small and scattered estates not included in the accounts of the district in which they are situated, and of which the assessments were paid direct to the Government officers: subsequently it denoted a revenue payor, paying through the intervention of another, except in Cuttack where it implied the reverse, or the heads of villages paying the revenue immediately to the Collector. Wilson's Gloss,

Castos various

<sup>&</sup>lt;sup>2</sup> G. and var. Serpúr Morchah.

<sup>8</sup> G. and var. Chhap. T. Ját.

G. and var. Palásghati

Var. Chandar Yáḥar: the last word is evidently corrupt.

Applied in Bengal to lands of which

the revenue is paid in money in opposition to khamár lands of which revenue was paid in kind: also to a settlement direct with the cultivators,—Wilson's Gloss.

<sup>7</sup> G. and var. Sabarchál.

The Monghir plate, dated 23 or 123 Samvat refers to the Bhupála dynasty and not to the Vikramáditya era as was supposed by Wilkins. The Vaidya Rajas of Bengal are thus given.

1063. Sukh Sen.

1027.

1066. Belál Sen who built the town of Gaur.

1166. Lakshman Sen.

1123. Máhava Sen.

1133. Kesava Sen.

1151. Sura Sen.

1154. Náráyana. Nonjeb, last Rájá of Abul Fazl's list. Laxmana.

1200 Laxmaniya.

1 These were:

A. H. A. D.

600 1203 Md. Bakhtiyar Khiliji, governor of Berár under Kutb.

602 1205 Md. Sherán Izzu'ddin.

605 1208 Ali Merdán Alaúddin.

| 609 | 1212 | Husámu'ddín, | Ghiyásúd- |
|-----|------|--------------|-----------|
|     |      | dín          | •         |

624 1226-27 Nasru'ddin-b-Shamsu'ddin.

627 1229 Maḥmúd-b-Shamsu'ddin became Emperor of Hindustan.

634 1237 Toghan Khan, governor under Sultana Rizia.

641 1243 Tiji or Táji.

642 1244 Timúr Khán Kerán.

644 1246 Saifu'ddín.

651 1253 Ikhtiyáru'ddín Malik Usbeg.

656 1257 Jelálu'ddín Kháni.

o 657 1258 Táju'ddín Arslán.

659 1260 Md. Tatár Khán.

676 1277 Muizzu'ddin Tughral.

681 1282 Naṣru'ddín Baghra considered by some lst Sovereign of Bengal.

725 1325 Kádir Khán, viceroy of Md. Sháh. Fakhr'uddín Sikandar followed and assumed independence in 1340, but this does not tally with the period of years given by Abul Fazl. I add the dates to Abul Fazl's list from the U. T. II, p. 148.

| А. Н.       | A. D.  |                                     |                 |       | Years.   | Months.   |

981 1573 Dáud, his brother, (defeated by Akbar's forces)

Fifty princes ruled during about 357 years and one hundred and eleven kept alive the torch of sovereignty throughout the period, approximately, of 4,813 years and passed into the sleep of dissolution.

The first Rája, (Bhagrat) came to Delhi by reason of his friendship for Rájá Jarjódhan, and fell manfully fighting in the wars of the Mahá-

the MSS. but corrected by a note.

Nasrat accords with the U. T.

In the Tárikh-i-Firishta. Bhangerah, i. e., opium eater.

<sup>&</sup>lt;sup>2</sup> The text has 2 but in a note 32 is recorded as the proper number and tallies with the U.T.

<sup>\*</sup> Nasib, in the text according to all

<sup>•</sup> The calculations of the U.T. show a difference of 13 in excess in both numbers.

bhárat, 4,096 years previous to the present time. When the cup of life of Rájá Naujah overflowed, the sovereignty fell to Lakhmaniya son of Ráe Lakhman. Nadiyá was at that time the capital of Bengal and the seat of various learning. Nowadays its prosperity has somewhat abated but the traces of its crudition are still evident. The astrologors predicted the overthrow of his kingdom and the establishment of another faith and they discovered in Muhammad Baktiyár Khilji the individual by whom these two events would be accomplished. Although the Rájá regarding these as idle tales refused to credit them, many of his subjects sought refuge in distant provinces. At the time when Kutbu'ddin Aibak held India for Shahábu'ddín, the Khilji took possassion of Behár by force of arms, and when he marched upon Bengal, the Rája, escaped in a boat. Muhammad Bahktiyar, entered Bengal and having amassed enormous plunder, he destroyed the city of Nadiyá and transferred the capital to Lakhnauti. From that time Bengal has been subject to the kings of Delhi.

During the reign of Sultan Tughlak, Kadar Khan was viceroy in Malik Fakhru'ddin his sword-bearer through greed of power, disloyally determined upon the death of his master and plotting in secret, slew him and with pretentions allegations fraudfully possessed himself of the government and refused allegiance to the sovereigns of Delhi. Malik Ali Mubarak, who had been one of the principal adherents of Kadar Khán, assumed the title of Aláu'ddín and rose against Fakhru'ddín, and taking him alive in action, put him to death. Káji Iliyás Alái, one of the nobles of Bengal, entering into a confederacy with some others, slew him and took the title of Shamsu'ddin. He is also called Bhangarah. Sultan Firoz set out from Delhi to chastise him and a severe struggle ensued, but as the rainy season was approaching, he concluded a hasty treaty and returned. When Shamsu'ddin died, the chiefs of the army raised his cldest son to the throne under the title of Sikaudar Shah. Sultán Fíroz again marched into Bengal but, retreated after arranging terms of peace, On Sikandar's death his son was elected to succeed him and was proclaimed under the title of Ghiyásu'ddín. Khwájah Háfiz of Shíráz sent him an ode in which occurs the following verse:1

> And now shall India's purroquets on sugar revel all, In this sweet Persian lyric that is borne to far Bengal.

A native of Bengal by name Kánsi fraudfully dispossesed Shamsu'ddín who was his grandson. When he died, his son embraced Islám and

whom Timur later deprived of his kingdom. The verse is certainly against the supposition.

Rosenzweig-Schwannau in his trans lation of Háfiz identifies the Ghiyásu'ddin of this poem, as prince of Herat-

took the name of Sultán Jalálu'ddín. It was the custom in that country for seven thousand footmen called  $Páyiks^1$  to patrol round the palace. One evening a cunuch conspiring with those guards slew Fath Sháh and assumed the title of Bárbak Sháh.

Firoz Sháh was also slain by these guards and his son Mahmúd was raised to the sovereignty. An Abyssinian slave named Muzaffar with the assistance of the same guards put him to death and mounted the throne. Aláu'ddín, an attendant of Muzaffar, in turn, in conspiracy with these guards despatched his master and established himself in power. through the caprice of fortune, these low footsoldiers for a considerable time played an important part in the 3tate. Alau'ddin placed the administration of justice on a better footing and disbanded the Páyiks. Nașrat Shah is said to have followed the example of his father in his justice in and liberality and treated his brothers with consideration. Sulțan Ibrahim (Lodi) met his death in the engagement with Sulțan Bábar his brother and the chiefs of the army took refuge with this monarch and lived in security. Humayún appointed Jahángir Kuli Beg to the governorship of the province. When Sher Khan a second time rose to power, he beguiled Jahangir under pretext of an amicable settlement and put him to death. During the reign of Salim Khán (at Delhi) Muhammad Khán his kinsman, united loyalty to his lord with justice to his subjects. When he fell in action against Mamréz Khán, his son Khizr Khán succeeded him and assumed the title of Bahádur Sháh. Mamréz Khán entered the field against him but perished in battle. of the nobles of Salim Khán, slew Jaláln'ddín and assumed the government. His younger brother Sulaimán, although of a tyrannous disposition, reigned for some time, after which his sons Báyazíd and Dáúd through misconduct dishonoured the royal privileges of the mint and the pulpit. Thus concludes my abstract.

Praise be to God, that this prosperous country receives an additional splendour through the justice of imperial majesty.

#### The Súbah of Behår.

It is situated in the second climate. Its length from Gadhi to Rhotás is 120 Kos; its breadth from Tirhut to the northern mountains, 110 kos. On its eastern boundary is Bengal; to the west lie Allahabad and Oudh. On the north and south it is bounded by hills of considerable elevation.

ا Hindi. पारिक Pers. پيک a messenger, guard, running footman.

At Pánipat, April 21st, A. D., 1526.

Its chief rivers are the Ganges and the Son. Whatever of wood or leather and the like falls into the Son, becomes petrified. The head springs of these three rivers, the Son, the Narbada and the Johila, bubble up from a single reed-bed in the neighbourhood of Gadha. The Son is pleasant to the taste, wholesome and cool; flowing in a northerly direction, it joins the Ganges near Maner. The Ghandak flows from the north and unites with the Ganges near Hájipúr. Such as drink of it suffer from a swelling in the throat, which gradually increases, especially in young children, to the size of a cocoanut.

The Sálgirám is a small black stone which the Hindús account among divine objects and pay it great veneration. If round and small and unctuous, they hold it in the highest regard and according to the variety of its

1 This passage has baffled the editor, who anable to make sense of any of the variants, regards it as corrupt. A reference to the Siyaru'l Mutaakhkhirin and the Khulásat u't Tawarikh clears the difficulty. In both of these works the passage is identical and is as follows:

هر سه از یك بونهٔ انی نزد گده جوش بوند and establishes the accuracy of the readings, if not of the fact. Tieffeuthaler confirms it. In his account of B(har he writes: "Suivant un livre qui contient la description de l'Inde, c'est dans le Gondvane, que le Narbada, le Soane et le Djuhala jaillissent d'un buisson de bambous, comme d'une sourco. un ingenieur Anglais qui depuis Elahbad a pénétré jusqu'à la source, les trois rivieres susdites sourdent d'un etang, long de 8 aunes, et large de 6, qui est entouré d'un mur de brique. Cet etang se trouve au milieu d'un village appelé Amar cantak; il est dominé par un hameau assis sur le sommet d'un colline haut de 50 aunes; des Brahmes en sont les habitants: il est distant de 20 milles de Rettenpour, grande ville située au Nord, et de 30 de Mandela a' l'Est.

Le Narbada, apres sa sortie de l'etang, parcourt l'espace d'un mille et domi vers l'Est: ensuite se précipitant d'une colline avec violence d'une hauteur de 26 aunes, il coule rapidement vers le village de Capaldara. La fleuve, au sortie de l'etang, a une anne en largeur.

Le Soane n'est visible qu'a la Listauce d'un demi mille de l'étang. Ensuite après un cours de 5 milles, il se perd dans le sable, mais acquerant de nouveau un plus grand volume, il devient une fleuve considerable, et poursuit son course vers Rotás.

Le Djuhala commence sculement a se montrer lorsqu' il est déjá eloigné de 3 milles de l'etang. Lá il descend de la colline en un mince filet d'eau, qui par l'espace de 12 milles échappe aux yeux; ¿pres quoi il devient une petite rivière et continue de rouler ses eaux en médiocre quantité."

- <sup>2</sup> The junction is thus indicated in the Bengal Atlas of 1772. It is now about 10 miles higher up.
- No doubt from the same causes which affect Alpine streams. It is snowfed, but soon acquires the character of a deltaic river.
- A species of black quartzose found in the Gandhak containing the impression of one or more ammonites conceived by the Hindus to represent Vishnu. This river is also known as the Sálgirám.

form, different names and properties are ascribed to it. The generality have a single perforation, others more and some are without any. They contain gold ore. Some say that a worm is bred within which eats its way through; others maintain that it works its way in from the outside. The Hindus have written a considerable work on the qualities of this stone. According to the Brahminical creed, every idol that is broken loses its claim to veneration, but with these, it is not so. They are found in the Son for a distance of 40 kos between its northenmost extremity and the south of the hills.

The Karamnasa flowing from the south unites with the Ganges near Chausá. Its waters are regarded with aversion. The Punpun flows also from the south and joins the Ganges near Patna. The smaller rivers of this Subah cannot be recorded. The summer months are intensely hot, while the winter is temperate. Warm garments are not worn for more than two months. The rains continue during six months and throughout the year the country is green and fertile. No severe winds blow nor clouds of dust prevail. Agriculture flourishes in a high degree, especially the cultivation of rice which, for its quality and quantity is rarely to be equalled. Kisária is the name of a pulse, resembling peas, caten by the poor, but is unwholesome. Sugarcane is abundant and of excellent quality. Betel-leaf, especially the kind called Makhi,3 is delicate and beautiful in colour, thin in texture, fragrant and pleasant to the taste. Fruits and flowers are in great plenty. At Maner, a flower grows named Maikand, somewhat like the flower of the Dhátúra, very fragrant and found nowhere else. Milk is rich in quality and cheap. The custom of dividing the crops is not here prevalent. The husbandman pays his rents

1 No person of any caste will drink its waters. The reason of its impurity is said to be that a Brahman having been mardered by a Raja of the Solar line, a saint purified him of his sins by collecting water from all the streams of the world and washing him in their waters which were collected in the spring from which the Karamnásá now issues I. G. See Baber's account of this river in his Memoirs, p. 408. When he crossed it, the Hindus accompanying him embarked in a boat and passed by the Gangos to avoid it. Its name signifies 'the ruin of religious merit.'

- 2 Lathyrus sativus.
- 3 Gladwin "Mughee." Though a in the text, the Kin constantly profers this Turanian form, both initial and terminal to the Iráni . Not mentioned in his description of the Betel at p. 72, Vol. I.
- 4 Dr. King of the Royal Rotanical Gardens, Calcutta, suggests that this may be the Jasminum pubescens. The flower resembles a miniature Dhatura flower and is very fragrant.

in person and on the first occasion presents himself in his best attire. The houses for the most part are roofed with tiles. Good elephants are procurable in plenty and boats likewise. Horses and camels are scarce. Parrots abound and a fine species of goat of the Barbary breed which they castrate: from their extreme fatness they are unable to walk and are carried on litters. The fighting cocks are famous. Game is abundant. Gilded glass is manufactured here.

In the Sarkár of Behár, near the village of Rájgar is a quarry of stone resembling marble, of which ornaments are made. Good paper is here manufactured. Gayá the place of Hindu pilgrimage, is in this province: it is also called Brahma Gayá being dedicated to Brahma. Precious stones from foreign ports are brought here and a constant traffic carried on.

In the Surkár of Monghyr (Mungír) a strong stone wall has been built extending from the Ganges to the hills,<sup>2</sup> which they consider as demarcating the boundary of Bengal.

In the Sarkár of Hajipúr the fruits Kathal<sup>3</sup> and Barhal grow in abundance. The former attain such a size that a man can with difficulty carry one.

In the Sarkár of Champáran the seed of the vetch Másh<sup>4</sup> is cast on unploughed soil where it grows without labour or tilling. Long pepper grows wild in its forests.

Tirhut has from immemorial time, been a seat of Hindu learning. Its climate is excellent. Milk curds, keep for a year without alteration. If those who sell milk adulterate it with water, some mysterious accident befals them. The buffaloes are so savage that they will attack a tiger. There are many lakes and in one of them the water never decreases, and its depth is unfathomable. Groves of orange trees extend to a distance of thirty kós, delighting the eye. In the rainy season gazelle and deer and tiger frequent together the cultivated spots and are hunted by the inhabitants. Many of these with broken limbs are loosed in an enclosure, and they take them at their leisure.

Rohtás is a stronghold on the summit of a lofty mountain, difficult of access. It has a circumference of 14 kús and the land is cultivated. It contains many springs, and wherever the soil is excavated to the depth of

<sup>&</sup>lt;sup>1</sup> This industry together with that of cloth, formerly its principal manufactures have now nearly died out. I. G.

<sup>&</sup>lt;sup>2</sup> To the south-west, according to Tieffenthaler, to close the entrance into Bengal.

<sup>&</sup>lt;sup>3</sup> Known as the Jack fruit (Artocarpus integrifolia, Roxb). The Barhal according to the dictionary is a small round fruit, also an Artocarpus, doubtfully distinguished as "lacucha."

<sup>4</sup> Phaseolus radiatus.

three or four yards, water is visible. In the rainy season many lakes are formed, and more than two hundred waterfalls gladden the eye and ear. The climate is remarkably healthy.

This Súbah contains seven Sarkárs subdivided into 199 Pargannahs. The gross revenue is 22 krors, 19 lakhs, 19,404½ dáms. (Rs. 55,47,985-1-3.) Of these Parganahs, 138, pay revenue in cash from crops charged at special rates. The extent of measured land is 24 lakhs, 44,120 bíghas, yielding a revenue of  $17^2$  krors, 26 lakhs, 81,774 dáms (Rs. 43,17044) in cash. The remaining 61 Parganahs are rated at 4 krors, 22 lakhs, 37,630½ dáms. (Rs. 12,30940-12-5), out of which 22 lakhs, 72,147 dáms are Suyūrghál, (Rs. 56,803-8-10). The province furnishes 11,415 Cavalry, 449,350 Infantry and 100 boats.

#### Sarkár of Behár.

Containing 46 Mahals, 952,598 Bighas. Revenue, 80,196,390 dáms in each from special crops, and from land paying the general bigáh rate. Sugúrahál, 2,270,147 dáms. Castes various. Cavalry 2,115. Infantry 67,350.

The terms withough originally applied to lands sequestrated by the state, was used of rent free lands subjected to assessment in Bengal, to lands which had been resumed from Jagír grants by Jafar Khán: in the northwest, to money rents on the more valuable crops, such as sugar, tobacco, and cotton where rent in kind was the rule. Abúl Fazl omploys it loosely elsewhere for the revenue collection or assessment

of a village. According to Carnegy the word is not in general use in Oudh.

by the reading of the S. ul. M., the writer of which has, however, misunderstood the reference by Abul Fazl to paryanahs in the figures 138 and 61, and confused the sense of the passage.

<sup>8</sup> See p. 46, note.

#### The Súbah of Iláhábád. (Allahabad.)

It is situated in the second climate. Its length from Sinjhauli in the Jannpúr district to the southern hills is 160 kos; its breadth from Chausa ferry to Chátampúr 122 kos. On the East is Behár. To the North, Oudh. Bándhús lies to the South and Agra to the West.

Its principal rivers are the Ganges and the Junua, and there are other smaller streams such as the Arand, 10 Ken, Sarú (Sarjú), Barna, &c.

- In the maps Ládwárí.
- Note Naranga.
- 8 var. Malhani, T. Malhi.
- <sup>4</sup> T. Hátí, G. Halce, var. Hápí and Háwí.
  - <sup>5</sup> In the maps, Bárahgáon.
  - In the maps, Dinárah.

- 7 In the maps, Saras.
- 8 No doubt the Káimur range, outlying the Vindhyan plateau.
  - Banda.
- and in Tisff. Rend. "uno petite rivière qui coule a pon de distance de Corra."

Its climate is healthy. It produces a variety of fruits, flowers and garden herbs, and it has always an abundant supply of melons and grapes. Agriculture is in a flourishing state. Jowári and Lahdarah, however, do not grow and Moth is scarce. Cloths, such as Jhóli, and Mihrkal and the like are beautifully woven, especially at Benáres, Jalálábád and Mau At Jaunpúr, Zafarwál and other places woollen carpets are manufactured. A variety of game is also to be found.

Illahabád anciently called Priyág was distinguished by His Imperial Majesty by the former name. A stone fort was completed and many handsome edifices erected. The Hindús regard it as the King of shrines. Near it, the Ganges, the Jumna and the Saraswati meet, though the latter is not visible. Near the village of Kantat considerable captures of elephants are made. What is most strange is that when Jupiter enters the constellation Leo, a small hill appears from out of the Ganges and remains there during the space of one month upon which the people offer divino worship.

Búránasi, universally known as Benares, is a large city situated between the two rivers, the Barna and the Asi.<sup>3</sup> In ancient books, it is styled Kási. It is built in the shape of a bow of which the Ganges forms the string. In former flays there was here an idol temple, round which procession was made after the manner of the kaūbah and similar ceremonials of the pilgrims conducted. From time immemorial, it has been the chief seat of learning in Hindustán. Crowds of people flock to it from the most distant parts for the purpose of instruction to which they apply themselves with the most devoted assiduity. Some particulars of its history shall be related in what follows.

In A. H. 410 Sultán Mahmúd of Chazní marched hither, and some disruption of the old faith was effected. In A. H. 416, he again invaded the country. He first invested Gwalior but raised the siege under a treaty of peace. He then resolved to take the fort of Külinjar. The governor sent him 300 elephants with his respectful submission and proffered some eulogistic verses. Mahmúd was so much pleased that he

has a course of 100 miles. The Asi Nala will be found in James Prinsop's map of the city of Benares. From the joint names of the two which bound the city, N. and S. the Bráhmans derive Varanasi, the Sanskrit form of Benares. Cunningham, Ancient Geog. of India, p. 437.

<sup>&</sup>lt;sup>1</sup> This is now one of the principal crops.

<sup>&</sup>lt;sup>2</sup> See 1st Vol. pp. 94, 95.

<sup>&</sup>lt;sup>3</sup> The Asi is a more brook and the city is situated on the left bank of the Canges, between the Barná Nadi on the N. E. and the Asi Nala on the S. W. The former rises to the N. of Allahabad and

bestowed on him the governorship of the fort together with the charge of fourteen other places.

Jaunpúr is a large city. Sultán Fíroz (Tughlak) king of Delhi laid its foundations and named it after his cousin Fakhrúddín Jaunah. Its longitude is 190° 6"; its latitude 26° 15".

Chanádah (Chanár) is a stone fort on the summit of a hill, scarce equalled for its loftiness and strength. The river Ganges flows at its foot.

In its vicinity, there is a tribe of men who go naked, living in the wilds, and subsist by their bows and arrows and the game they kill. Elephants are also found in the forests.

Kálinjar is a stone fortress situated upon a heaven-reaching hill. No one can trace its origin. It contains many idol temples and an idol is there, called Káli Bhairon, 18 cubits high, of which marvellous tales are related. Springs rise within the fort and there are many tanks. Adjoining it is a dense forest in which wild elephants, and kestrels and hawks and other animals are trapped. Ebony is here found and many kinds of fruits grow spontaneously. There is also an iron mine. In the neighbourhood, within eight kos, the peasants find small diamonds.

It is said that Rájá Kírat Singh the governor of the fort possessed six precious treasures, a learned Bráhman of saintly lifô, a youth of great beauty and amiable disposition, a parrot that answered any questions put to it and some say, remembered everything that it heard, a musician named Bakshú unequalled in the knowledge and practice of his art, and two handmaidens lovely to behold and skilled in song. Sultán Báhadur Gujrátí having formed a friendship with the Rájá asked him for one of these. The Rájah generously and with a provident wisdom sent him Bakshú. Next Sher Khán of the House of Súr requested the gift of the two wonderful songstresses, and when his messenger returned without them, he invested the fort. Works were erected and the besieged were reduced to great straits. In despair, the Rájá, after the manner of the

- According to Tieffenthaler, it was named after a woman called Djona whose husband was a herdsman, and who founded the city 700 years ago and became its eponymous heroine.
- <sup>2</sup> Its elevation is 1230 feet above sea level. I preserve the epithet. Ferishta ascribes the fort to Kedár Rájá, a contemporary of Muhammad, but local legend connects it with Chandra Brim,
- ancestor of the great Chandel family of Rajputs, who removed hither after their defeat by Prithi Ráj the Chaulán ruler of Delhi. I. G.
- <sup>3</sup> Probably **274**, a name of Siva, but one of his inferior manifestations.
- \* This classification of game does not betray either the sportsman or the naturalist.

Hindus who hold their honour dear, burnt his women, for in the slumbering of his reason, he had set his affections upon the things of this fleeting life, and so giving his body to ashes, according to the desire of his enemies, he became soiled with the dust of dissolution. As to Sher Khán, who had conceived this wicked design, he fell at the powder magazine when the fire opened on the fort and the harvest of his life was consumed.

In the village of Modha high and low are distinguished for their comeliness.

This Súbah contains ten Sarkárs, and 177 Parganahs. Revenue 21 krors, 24 lakhs and 27,819 dáms (Rs. 53,10,695-7-9,) and 12 lakhs of betel leaves. Of these Parganahs 131 pay revenue from crops charged at special rates. Measured land 39,68,018 bighas, 3 biswas, yielding a revenue of 20 krors, 29 lakhs 71,224 dáms (Rs. 50,74,280-9). The remaining 46 Parganahs pay the general bigah rate. They are rated at 94 lakhs, 56,595 dáms (Rs. 2,36,424-14). Of this, 1 kror, 11 lakhs, 65,417 dáms (Rs. 279,135-6-6,) are Suyúrghál. The province furnishes 11,375 Cavalry, 237,870 Infantry and 323 elephants.

Note.—In the names of the parganahs under the following Sarkárs, I have altered the spelling where the variants allow, in accordance with Elliot's lists, as his personal acquaintance with their true pronunciation is probably more correct than those of my previous lists which were adapted as far as possible to reconcile the geadings of Gladwin and Tieffenthaler. The discrepancies are slight and will not interfere with their recognition.

<sup>1</sup> This took place in 1554. During the siege a live shell rebounded from the walls into the battery where Sher Shah stood and set fire to the gunpow-

der. He was brought out severely burnt and died next day, having previously ordered an assault which was at once made with success. I. G.

<sup>&</sup>lt;sup>1</sup> Changed by Sháh Jahán to Iláhábád as the termination bás savoured too much of Hinduism. Elliot's Glossary II. 104. but Mr. Beames considers that bád was the original Muhammadan termination, changed by the lower orders to bás, as they continue to call it to this day.

<sup>&</sup>lt;sup>2</sup> The Bhars were a powerful tribe during the period of Buddhist ascendancy. In Southern and Eastern Oudh there are many relics of their wealth and power in the shape of tanks, wells, embankments and deserted sites of brick built forts and towns. I. G.

<sup>•</sup> Three names follow without diacritical points, illegible in the MSS. Tieff. gives "Sobehe, Anélá, Bando, Barbar.

A note to the text suggests, Gaharwal, one of the 36 royal tribes of Rájpúts.

This is doubtful and the variants are لهرست - هرايت - نهراست

A note states that in the maps there is no hill. Alwand is the name of a well-known mountain in Hamadán, 80 leagues from Ispahan, often employed in Persian imagery as a synonym for loftiness.

<sup>&</sup>lt;sup>2</sup> These according to the I. G.(Bahraich) were the descendants of the early Mussulman settlers and invaders. For their descent and history, see Elliot I, 7. For Bachgoti, see Elliot (Baces of the N.W.P.) who says that all Chauhans are Bachgotis, being of the gotra of Bach but Sherring proves this to be an error, instancing the gotras of Vatsa and Kyasp. Hindu Tribes, I, p. 164.

<sup>\$</sup> A note suggests "Konbhi" or "Gautami," but Kurmi is a well known agriculturist caste in Eastern and Central Hindustan, being the same essentially as the Kunbhis of the west and south.

<sup>•</sup> A clan of Rájpúts of the Chandarbans, once a powerful clan in the Lower Doab. See Elliot, p. 118, I, and Sherring, I, 202.

The S-ul-M A Decayed town in Fatehpur district; formerly the capital of this Sarkur under the Mughals: it still retains traces of its former importance. A few words follow this name which are either omitted or illegible in the other MSS. Literally they run thus: "And thore is a village called Númi which produces flowers and colour." Perhaps, a dye. For the Dikhit tribe of Rajputs. See Elliot, I, 83.

The text has 55 and at p. 349

The latter is correct. "In 1376, the fief of Karra, Mahoba and Dálaman were united under one governor called Malik u's Shark. Akbar removed the seat of government to Allahabad, which henceforth superseded Karra in importance" I. G. Karrah is now a ruined town on the right bank of the Ganges, 40 miles N.-W. of Allahabád. It was the scene of the famous meeting between Muizu'ddin and his father in 1286 which forms the subject of Mir Khusra's well-known Persian Epic, the Kiránu's Saadain.

#### Its rulers.

Sultánu's Shark reigned, 16 years.

Mubárak Sháh

1 year and a fraction.

Sultán Ibrahim

40 years .

Sultán Mahmúd

21 years and a few months.

Maḥmúd<sup>4</sup> Shah

5 months.

Husain

19 years.

These six princes held sway for 97 years and a few months.

This province was formerly administered by the sovereigns of Delhi. When the imperial authority devolved on Sultan Mahmud-b-Sultan Muhammad-b-Firuz Shah, he bestowed the title of Sultan us Shark upon

It cannot be far, as Elliot at p. 107, says that the distinction between Haveli and Baldah Karra has been lost as separate Parganahs, both being in Parganah Karra.

Elliot makes the "Kharris" a division of Gaur Káyaths.

<sup>&</sup>lt;sup>2</sup> Mr. Beames in a note to Elliot's Gloss., p. 83, II, distinguishes between *Haveli* and *Baldah*, the former alluding to the district close to the Capital and the latter to that at a distance. It would have been more satisfactory had he determined the limits of the distance.

<sup>\*</sup> T. Kurson, G. Kursoon.

A note corrects the name as Muhammad Shah.

Malik Sarwar a eunuch who had received from his predecessor the dignity of  $Kh\acute{a}n$ -i- $Jah\acute{a}n$ , and sent him to this province.\footnote{1} He gave lustre to his reign by his judgment, elemency, justice and valour and thus garnered a provision for his life's last journey. When the cup of his days was full, the son whom he had adopted, named Mubárak Karanful, by the assistance of the chief men of the State, raised himself to power and had the khutbah read and the coin struck in his own name. When the news of this event reached Mallú  $(Kh\acute{a}n^2)$  he collected troops and marched from Delhi to oppose him and encamped in readiness for battle on the banks of the Ganges,\footnote{3} but nothing decisive having been effected, both armies returned home.

When this prince died, his younger brother Ibrahim was raised to the throne. By his knowledge of men and capacity for affairs he administered the kingdom with justice and made the chastisement of the unruly a source of prosperity to his government. Wisdom was eagerly sought and the prospects of the intelligent in every profession were advanced. Kázi Shahábu'ddin, arsage of Hindustan flourished about this time. He was born at Delhi and in that city acquired a comprehensive knowledge of the inductive sciences and traditional lore, and at the time of the arrival of Timur, he set out for Jaunpúr in the company of his master Mauláná

1 In the account of the rulers of Málwah later on, Malik Surwar is said to have been appointed to Jaunpúr by Muhammad son of Fíroz Sháh, father of Mahmúd. The latter's accession dates from 1393, whereas Malik Sarwar was sent to Jaunpúr in 1388.

<sup>2</sup> This is a capital instance of the abruptness and obscurity of Abul Fazl. Without a knowledge of contemporary history (and in this case, of details which the author had no warrant to anticipate in his readers) this passage would not be rightly understood. The S. ul. M. has furnished me with the completion of the name and information as to its bearer. He was one of the chief nobles of the court of Mubarak's father.

At Kanauj in 1401. The dates of the various authorities do not agree. The I. G. makes the length of the first reign 13 years instead of 16: Tieffenthaler only 6 between A. H. 796 and 802. (A. D. 1393 -99.)

According to the Useful Tables the line runs thus:

A. H. A. D.

800 1397. Khoja Jehan, Subahdar of Kananj, Oudh, Kora, and Jaunpur assumed independence.

803. 1400. Mubárik Sháh his adopted son.

804. 1401. Shems ud din Ibrahim Sháh Sharki.

845. 1441. Mahmud Sháh-b-Ibrahim.

856. 1451. Husen Sháh-b-Mahmud-b-IbrahimSháh.

883. 1478. took refuge in the court of Δla ud din of Bengal where he died in 905 A. H.

4 Known as Malik u'l Ulamá.

Khwajagi who was the successor of Nasiru'ddin Chiraghi of Delhi and there continued his progress and became the envy of his time. Shah Madar, however, who is esteemed one of the saints of Hindustan and the chief of his contemporary series of divines, through the disagreement that ever exists between philosophers who regard the material world, and masters of the spiritual life, entertained no esteem for the Kazi.

When the days of Ibrahim came to a close, his cidest son Bikhan<sup>3</sup> Khán, under the name of Sultan Mahmud, assumed the sovereignty. As his deeds were not approved, the sentence of deposition was issued against him and his brother Husain<sup>3</sup> raised to power. He made rectitude his rule of conduct and his chief object the conciliation of all hearts. Fortune favoured his desires and the world praised him but intoxicated by the maddening fumes of worldly success, he became arrogant. He was involved in war with Sultán Bahlol and was defeated. Sultán Bahlol left his son Bárbak at Jaunpúr and entrusted him with the government. On the death of Sultán Bahlol the throne of Delhi devolved on Sultán Sikandar. Sultán Husain with the connivance of Bárbak collected troops, made several attempts against Delhi, but with him the Sharki dynasty closed.<sup>6</sup>

### The Súbah of Oudh.

It is situated in the second climate. Its length from the Sarkár of Gorakhpúr to Kanauj is 135 kos. Its breadth from the northern mountains to Sidhpúr<sup>7</sup> on the frontier of the Subah of Allahabad is 115 kos. To the east is Behar; to the north, the mountains; to the south, Manikpúr, and

- <sup>2</sup> A short biographical notice of him will be found at conclusion of Ferishta's history.
  - So the text. The Sul. M. "Bhikan."
- There was an interval of 5 months during wich Muhammad son of Mahmúd lived through his brief day of power which he stained with cruelty. He was assassinated, on account of his brutal treatment of his brothers.
- \* The text has an evident error of ديني for دنيي: see p. 5 Vol I. (Prefaco to text) for the peculiar orthography of the Ain.
  - 5 In 1478.
- <sup>6</sup> Jaunpúr continued to be governed by the Lodi dynasty till the defeat and death of Ibrahim grandson of Bahlol and

last of the line, at Panipat by Bábar in 1526. A local kingdom was for a short time established under Bahadur Khán governor of Jaunpur who asserted his independence. It was recovered by Humayún, passed again into the hands of Sher Khán and his son Salím. Humayun on his reconquest of Hindustán died before he could master his eastern possessions. Jaunpur continued under the Afgháns until Akbar in the 4th year of his reign, took possession of it through Ali Kúli Khán and incorporated it with his dominions. In 1575 tho Viceregal Court was removed to Allahabad and Jaunpur was governed thenceforth by a Nizam.

7 This name is not traceable.

to the west, Kanauj. Its climate is good. Summer and winter are nearly temperate. Its principal streams are the Sarú (Sarjú), the Ghaghar (Gogra) the Sai and the Godi (Gumti). In the first montioned, divers aquatic animals and forms of strange appearance show themselves. Agriculture is in a flourishing state, especially rice of the kinds called Sukhdás, Madkhar, and Thanwah, which for whiteness, delicacy, fragrance and wholesomeness are scarcely to be matched. They sow their rice three months earlier than in other parts of Hindustan. When the drought begins, the Sai and the Gogra rise high in flood and before the beginning of the rains, the land is inundated, and as the waters rise, the stalks of rice shoot up and proportionately lengthen: the crop, however, is destroyed if the floods are in full force before the rice is in ear. Flowers, fruit and game are abundant. Wild buffaloes are numerous. When the plains are inundated the animals take to the high ground where the people find sport in hunting Some of the animals remain all day in the water and only at night approach the dry ground and breathe in freedom. Awadha is one of the largest cities of India. In is situated in longitude 118°, 6', and latitude 27°, 22'. It ancient times its populous site covered an extent of 148 kos in length and 36 in breadth, and it is esteemed one of the holiest places of antiquity. Around the environs of the city, they sift the earth and gold is obtained. It was the residence of Ramachandra<sup>3</sup> who in the Treta<sup>4</sup> age combined in his own person both the spiritual supremacy and the kingly office.

At the distance of one kos from the city, the Gogra, after its junction with the Sai, flows belows the fort. Near the city stand two considerable tombs of six and seven yards in length respectively. The vulgar believe them to be the resting-places of Seth and the prophet Job, and extraordinary tales are related of them. Some say that at Rattanpár is the tomb of Kabir, the assertor of the unity of God. The portals of spiritual discernment were partly opened to him and he discarded the effete

- 1 Usnally "Jhanwán."
- <sup>2</sup> Ajodhya.
- The 7th avatár, who in this capital of the solar dynasty founded on the chariot wheel of Brahma, consummated the glories of sixty generations of solar princes and as the incarnate Rámá, is the hero of the famous epic that bears his name.
- A misprint in the text of ترتبا for

<sup>5</sup> For an account of this Vishnuvito reformer I refer to the I. G. (2nd ed. VI, p. 218). His dootrines were preached between A. D. 1380 and 1420 and attempted the union of Hindu and Muhammadan in the worship of one God whether invoked as Ali or Rámá. On his docease both these sects claimed the body and while they contested it, Kabír suddenly stood in their midst and commanding them to look under the shroud-

doctrines of his own time. Numerous verses in the Hindi language are still extant of him containing important theological truths. Bahraich is a large town on the banks of the river Sarju. Its environs are delightful with numerous gardens. Sólár Masaúd¹ and Rajab Sálár are both buried here. The common people of the Muhammadan faith greatly reverence this spot and pilgrims visit it from distant parts, forming themselves in bands and bearing gilded banners. The first mentioned was connected by blood with Mahmúd Ghazní, and sold his life bravely in battle and left an unperishable name. The second was the father of Sultán Fíróz king of Delhi and won renown by the rectitude of his life.

In the vicinity of the town, there is a village called  $D\acute{o}k\acute{o}n$  which for a long time possessed a mint for copper coinage.

From the northern mountains quantities of goods are carried on the backs of men, of stout ponies and of goats, such as gold, copper, lead, musk, tails<sup>2</sup> of the kutás cow, honey, chák (an acid composed of orange juice and lemon boiled together), pomegranate seeds, ginger, long pepper, majith<sup>3</sup> root, borax, zedoary, wax, woollen stuffs, wooden ware, nawks, falcons, black falcons, merlins, and other articles. In exchange they carry back white and coloured tloths, amber, salt, assafeetida, ornaments, glass and earthen ware.

Nimkhár is a fort of considerable note and a shrine of great resort. The river Godi (Gumti) flows near it, and around are numerous temples. There is a tank called Brahmáwartkund in which the water boils and with such a swirl, that a man cannot sink therein, and it ejects whatever

vanished. A heap of beautiful flowers was there discovered, which, divided among the rival worshippers, were buried or burnt according to their respective rites. Pilgrims from upper India to this day beg a spoonful of rice water from the Kabír Monastery at Puri in Bengal.

- <sup>2</sup> Under the orders of Mahmúd of Ghazní, he penctrated the country in A. D. 1033, but was eventually defeated at Bahraich and fell fighting, sanguine purpuratum, as Tieffenthaler writes, crowned with the double glories of the here and the martyr.
- <sup>2</sup> It would seem from a passage of Ferishta mentioning an inroad of Tibetans into Kashmír in the reign
- of Ibrahím, son of Názuk Sháh (p. 359, II) that the yák is meant. The Kashmíris retaliated by pursuing the marauders, and exacting as compensation 500 horses, 1000 pieces of pattú, 200 sheep and 50 kutús cows (كُو قطاس Later on, it is mentioned by Abul Fazl among the fauna of India and described as little differing from the common cow except in the tail which is a distinguishing peculiarity, and the origin of its name, kutús.
- <sup>8</sup> Rubia Munjista, Roxb. a native of Nepal and other mountainous countries N.-E. of Bengal. Its root yields a red dye.
- Tieffenthaler asserts that it derives its name from Brahma who is supposed

is thrown into it. In the neighbourhood is also a deep hollow, the springhead of a small stream one yard in breadth and four digits deep that flows into the Gumti. The Bráhmans tell strange tales of it and pay it worship. Its sand shapes itself into the form of Mahúdeo which quickly disappears again and of whatever is thrown in, as rice and the like, no trace remains.

There is likewise a place called *Charámiti*, whence, during the *Holi* festival, flames spontaneously issue forth with astonishing effect.

Lucknow is a large city on the banks of the Gumti, delightful in its surroundings. Shaikh Mina whom the people consider a saint, lies buried here.

Súrajkand is a place of worship frequented by various classes of people from the most distant places.

Kheri is a town on the banks of the river Sai upon which the people go in boats to spear fish.

Bilgrám is a small town the air of which is healthy and its inhabitants are generally distinguished for their quick wit and their love of singing. There is a well here which adds to the intelligence and comeliness of whomsoever drinks of it for forty days.

This Súbah is divided into five Sarkúrs and thirty-eight parganas. The measured lands are 1 kror, 1 lakh, 71,180 bíghas. Its revenue, 20 krors, 17 lakhs, 58,172 dáms, (Rs. 5,043,954-4), of which 85 lakhs, 21,658 dáms (Rs. 213,041-7,) are Suyúrghál. The provincial force consists of 7,640 Cavalry, 168,250, Infantry and 59 Elephants.

The Súbah of Agra, the Royal Residence.

It is situated in the second climate. Its length from Ghátampúr on the Allahabad side to Palwal on that of Delhi is 175 kos. In breadth it extends from Kanauj to Chandéri iu Málwah. On the east lies Ghátampúr; to the north, the Ganges; to the south Chandéri, and to the west, Palwal. It possesses many rivers, of which the principal are the Jumna and the Chambal. The former flows down from the northern mountains, the latter rises at Hásilpúr in Málwah and unites with the Jumna at Kálpi. Ranges of hills lie scattered to the south. The excellence of its climate is almost unrivalled. Agriculture is in perfection. Fruits and flowers of all kinds abound. Sweet-scented oil, and betol-leaf of the first quality are here obtained, and its melons and grapes rival those of Persia and Transoxiana. Agra is a large city and possesses a healthy climate. The river Jumna flows through it for five kos, and on either bank are delightful villas and

<sup>&</sup>lt;sup>1</sup> In the I. G. Kachandan.

In the I. G. Malihábád, also in T and G.

<sup>\*</sup> Here a word illegible, Barkalá is an inferior class of Rájpúts found in West-

ern and Central parganahs of Buland-

T. called also Bári.

Doubtful in text whether initial letter a 5 or . G. Henhár.

pleasant stretches of meadow. It is filled with people from all countries and is the emporium of the traffic of the world. His Majesty has built a fort of red stone, the like of which travellers have never recorded. It contains more than five hundred buildings of masonry after the beautiful designs of Bengal and Gujerat which masterly sculptors and cunning artists of form have fashioned as architectural models. At the eastern gate are two elephants of stone with their riders graven with exquisite skill. In former times Agra was a village dependent on Biánah. Sultan Sikandar Lodhi made it his capital, but his present Majesty embellished it and thus a matchless city has arisen. On the opposite side of the river is the Chár Bágh, a memorial of Bábar. It was the birth-place of the writer of this work, and the last resting-place of his grandfather and his elder brother. Shaikh Alá u'ddin Majzúb, Rafiiu'ddin Safaw: and many other saintly personages also repose there.

Near the city on the banks of the river Jumna is a village called Rangtah, a much frequented place of Hindu worship.

Fatehpúr was a village formerly one of the dependencies of Biúnah, and then called Sikri, situated twelve kos distaut from Agra. After the accession of his Majesty, it rose to be a city of the first importance. A masonry fort was erected and two elephants carved in stone at its gate inspire astonishment. Several noble buildings also rose to completion and although the royal palace and the residences of many of the nobility are upon the summit of the hill, the plains likewise are studded with numerous mansions and gardens. By the command of his Majesty a mosque, a college and a religious house were also built upon the hill, the like of which few travellers can name. In the neighbourhood is a tank, twelve kos in circumference and on its embankment his Majesty constructed a spacious courtyard, a minúr, and a place for the game of Chaugán; elephant fights were also exhibited. In the vicinity is a quarry of red stone

- 1 I am inclined to doubt the correctness of the juxtaposition of out with and would refer the former to the preceding sentence, and place the stop after it. The S. ul. M. bears out this view.
- <sup>2</sup> I follow here the spelling of this name in the first volume.
- The old Agra of the Lodhi dynasty lay on the left bank of the river where traces of its foundations still

- exist. The modern city is on the right bank and is the work of Akbar. The fort was built in A. D. 1566.
- 4 Later called Hasht Bihisht, or Nurafshin Gardens, and now called the Rim Bagh.
- b His grandfather Shaikh Khizr died on his journey to Siwistán, and his father Mubárak, at Lahore in 1593. See Preface to text, Biog. of Abul Fazl. pp. i, ii, xi.

whence columns and slabs of any dimensions can be excavated. In these two cities under his Majesty's patronage carpets and fine stuffs are woven and numerous handicraftsmen have full occupation. Biánah in former times was a large city. It possesses a fort containing many buildings and cellars, and people at the present day still find therein weapons of war and copper utensils. There is also a lofty tower. Fine mangoes grow here, some of them more than two pounds in weight. Sugar of extreme whiteness is also manufactured. Here too is a well, with the water of which mixed with white sugar, they make cakes weighing two pounds more or less which they call kandaurah (with no other water will they solidify) and these are taken to the most distant, parts as a rarity. Indigo of finest quality is here to be obtained, selling at ten to twelve rupees per man weight. Excellent hinna is also to be found, and here are the tombs of many eminent personages.

Todah Bhim is a place at a distance of three kos, from which is a pit full of water, the depth of which none has sounded. Mings of copper and turquoise are said to exist, but the expense of working them exceeds their income.

Mathura (Muttra) is a city on the banks of the Jumna: it contains some fine temples, and is one of the most famous of Hindú shrines. Kálpi is a town on the banks of the Jumna. It is the resting-place of many saintly personages. Excellent sugarcandy is here manufactured. In the time of the Sharki princos, it was tributary to Delhi. When Kádir Khán affecting the airs of sovereignty proclaimed his independence, Sultán Hoshang marched from Málwah and having chastised him, reinstated him in the government. Sultán Mulmúd of the Sharki dynasty, however, seized it in turn from Nasír Khán the son of Kádir Khán.

Kanauj was in ancient times the capital of Hindustan.

Gwalior is a famous fortress and an elephant carved in stone at its gate fills the beholder with astonishment. It contains some stately edifices of its former rulers. Its climate is good. It has always been noted for its exquisite singers and lovely women: here is an iron mine.

Alwar (Ulwar) produces glass and woollen carpets.

Peráth<sup>2</sup> possesses a copper mine, so profitable that from a man weight of ore, they obtain 35 sers of metal. A silver mine is also said to exist but it does not pay to work it.

<sup>1</sup> According to the S. ul M. the famous Tánsen was one of these. See Vol. I. pp. 611 of the Kin.

<sup>3</sup> G. Beerat. T. Beráth. S. ul M. يبرانه a dependency of the government of Narnol, according to Tieffenthaler.

Near the hill of *Nárnol* is a well at which the Hindús worship and when the *tithi* of *Amáwas* falls on a Friday, it overflows at sunrise and water can be drawn without the aid of a rope.

At Singhánah, Udaipúr, and Kótpútli are mines of copper. In the town of Kánóri are many cold and hot springs.

The Súbah contains thirteen Sarkárs, two hundred and three Parganahs (fiscal subdivisions). The measured lands are 2 krors, 78 lakhs, 62,189 bíghas, 18 biswas. The revenue is 54 krors, 62 lakhs, 50,304 dáms. (Rs. 13,656,257-9-6). Of this, 1 kror, 21 lakhs, 5,703½ dáms (Rs. 302,642-9.) are Suyúrghál. The provincial force consists of 50,681 cavalry, 577,570 Infantry, and 221 clephants.

### Sarkár of Agra.

Containing 33 Mahals, 91,007,324 Bighas. Revenue 191,819,265 Dáms in money. Suyúrghál 14,566,818 Dáms. Castes various. Cavalry 15,560. Infantry 100,800.

<sup>&</sup>lt;sup>2</sup> Mentioned in Elliot as in ancient times a well-known lawless plundering race, driven out of the Etawah tract by the Senghers and Chauháns. According to Sherring (III. 90) they are an inde-

genous tribe converted to Islam, but retaining a good many Hindu customs; now an agricultural people divided into 12 claus.

#### Tho Súbah of Málwah.

It is situated in the second climate. Its length from the extreme point of Garha (Mándla) to Bánswárah is 245 kos. Its breadth from Chandérí to Nadarbár is 230 kos. To the east lies Rándhú; to the north Narwar; to the south Baglánah; to the west Gújarát and Ajmer. There are mountains to the south. Its principal rivers are the Narbadah, the Siprá, the Káli Sind, the Bétwa, and the Kódí. At every two or three kos clear and limpid streams are met on whose banks the willow grows wild, and the hyacinth and fragrant flowers of many hues, amid the abundant shado of trees. Lakes and green meads are frequent and stately palaces and fair country homes breathe tales of fairyland. The climate is so temperate that in winter there is little need of warm clothing nor in summer of the cooling properties of saltpetre. The elevation of this province is somewhat above that of other areas of the country and every part of it is cultivable. Both harvests are excellent, and especially wheat, poppy, sugarcane, mangoes, melons and grapes. In Hásilpúr the vine bears twice in the year, and betel leaves are of fine quality. Cloth of the best

<sup>&</sup>lt;sup>1</sup> Sometimes in the text Nazarbár, Bayley in his History of Gujarát has Nandarbár. It is nearly due E. of Surat.

<sup>&</sup>lt;sup>2</sup> The text has Betamah with a variant Ním which Gladwin adopts. T.

reads Beths on Baghanti. The text also has the d of Narbadah reduplicated. I follow the I. G.

T. reads Chambal. G. Lowdy. I do not trace it in the I. G. Perhaps Loni.

texture is here woven. High and low give opium to their children up to the age of three years. The peasants and even grain dealers are never without arms. Usian is a large city on the banks of the Sipra. It is regarded as a place of great sanctity and wonderful to relate, at times the river flows in waves of milk. The people prepare vessels and make use of it, and such an occurrence brings good fortune to the reigning monarch.

In the 43rd year of the Divine Era when the writer of this work was proceeding to the Deccan by command of his Majesty, a week before his arrival at *Ujjain*, on the 16th of the Divine month of *Farwardin* (March) four *gharis* of the night having clapsed, this flow occurred, and and all conditions of people, Musalman and Hindu alike talked of it.<sup>1</sup>

In the neighbourhood are 360 places of religious worship for Bráhmans and other Hindús. Close to this city is a place called Káliyádah, an extremely agreeable residence where there is a reservoir continually overflowing yet ever full. Around it are some graceful summer dwellings, the monuments of a past age.

Garha<sup>2</sup> is a separate state, abounding with forests in which are numerous wild elephants. The cultivators pay the revenue in mohurs and elephants. Its produce is sufficient to supply fully both Gujarát and the Decean.

Chanderí was one of the largest of ancient cities and possesses a stone fort. It contains 14,000 stone houses, 384 markets, 360 spacious caravanserais and 12,000 mosques.

Timún is a village on the river Betha (Betwá) in which mermen are seen. There is also a large temple in which if a drum is beaten, no sound is heard without.

In the Sarkár of Bijágarh there are heads of wild elephants. Mandh is a large city; the circumference of its fort is 12 kos, and in it there is an octagonal tower. For some period it was the seat of government and stately edifices still recall their ancient lords. Here are the tombs of the

<sup>2</sup> Another reading adopted by Gladwin is "partook of it." Gladwin while rejecting this fable, suggests a sudden impregnation of the river with chalk and happily quotes Pope's Windsor Forest regarding one of our own rivers, "And chalky Wey that rolls, a milky wave." It might be argued that the people of Ujjain must have distiguished chalky water from milk, but the incapacity in

this respect of Londoners of the present day triumphantly answers the objection.

<sup>9</sup> It was the ancient capital of the Gond Dynasty of Garha Mándla and its ruined keep known as the Madan Mahal still crowns the granite range along the foot of which the town stretches for about 2 miles. I. G.

Khilji Sultáns. A remarkable fact is that in summer time water trickles from the domed roof of the mausoleum of Sultán Hoshang and the simple-minded have long regarded it as a prodigy, but the more acute of understanding can satisfactorily account for it. Here the tamarind grows as large as a cocoanut and its kernel is extremely white.

Learned Hindús assert that a stone is met with in this country which when touched by any malleable metal turns it into gold, and they call it Páras. They relate that before the time of Bikramájít, there reigned a just prince named Rájá Jai Sing Deva who passed his life in deeds of beneficence. Such a stone was discovered in that age, and became the source of vast wealth. The sickle of a straw-cutter by its action was changed into gold. The man, not understanding the cause, thought that some damage had occurred to it. He took it to a blacksmith by name Mándan to have it remedied, who divining its properties, took possession of it, and amassing immense wealth, garnered a store of delights. But his natural beneficence suggested to him that such a priceless tressure was more fitted for the reigning prince, and going to court he presented it. The Rájá made it the occasion of many good deeds, and by means of the riches he acquired, completed this fort in twelve years, and at the request of the blacksmith, the greater number of the stones with which it was built, were shaped like an anvil. One day he held a festival on the banks of the Narbadah, and promised to bestow, a considerable fortune on his Bráhman priest. As he had somewhat withdrawn his heart from worldly goods, he presented him with this stone. The Brahman from ignorance and meanness of soul, became indignant and threw the precious treasure into the river to his subsequent and eternal regret. Its depth there prevented his recovering it, and to this day that part of the river has never been fathomed.

Dhár is a town which was the capital of Rájá Bhoja and many ancient princes. The vine here bears twice in the year when the sun first enters Pisces (February) and Leo (July), but the former of these two vintages is the sweeter.

In the Sarkár of Hindiah are numerous wild elephants.

In Nazarbári good grapes and melons are obtainable.

This Súbah contains 12 Sarkúrs, subdivided into 301 Parganahs. The measured land is 42 lakhs, 66,221 Bíghas, 6 Biswas. The gross revenue is 24 krors, 6 lakhs, 95,052 Dáms. (Rs. 6,017,376-4-15). Of this Wakhs,<sup>2</sup>

<sup>&</sup>lt;sup>2</sup> In the demarcation of the province above, this word is written Nadarbar.

50,433 Dáms (Rs. 28,760-13) are Suyúrghál. The Provincial force consists of 29,668 cavalry, 470,361 Infantry and 90 Elephants.

### Sarkár of Ujjain.

Containing 10 Mahals. 925,622 Bíghas. Revenue 43,827,960 Dúms in money. Suyúrghál, 281,816 Dáms. Castes various. Cavalry 3,250. Infantry 11,170.

<sup>&</sup>lt;sup>1</sup> This line is supposed to have been furnished from Jain authorities; it agrees nearly with appendix to Agni Purána, (Wilford). I have appended to the list the date of each prince, taken from the U. T. from which the above is quoted, for reference and comparison.

\* Under power of a curse, in consequence of a crime, he was changed into an ass resuming his human form only at night. Hemrat, notwithstanding, gave him his daughter in marriage and she gave birth to Vikramaditya. Tieff. Wilford plausibly identifies this Vikramaditya with the Persian Yezdejird son of Bahrám Gor, and adapts in consequence a suitable chronology.

<sup>2</sup> See Wilford's Essay on Vicramaditya an Salivahana, As. Res. IX. 117.

This and the following name are relegated to footnotes in the text, the variants chosen, however, do not accord with other authorities.

<sup>1</sup> The text differing from all other authorities, has Gang.

Wilford asserts on the authority of the appendix to the Agni-purana that Chitra-cita in Bundelkhand is the name of the metropolis of these princes metamorphosed into a king. The three names after Kanaksen, he says, should be properly, Rama Chandra who did not reign, Chaitrapala who was elected after the death of Jayananda, and Maha Chandrapala or Mahendrapala (p. 140) and should follow and not precede Raja Bhoja, (p. 166), in accordance with the Agni and Bhavishya-purana lists. His reason for the transposition must be taken on trust.

A. D. Shujáat Khán, known as Sajáwal<sup>1</sup> Khán, "Báz Bahádur. 12 0 0

In 1534 Malwah incorporated with Gujerát kingdom; in 1568 annexed

It is said that two thousand, three hundred and fifty-five years, five months and twenty-seven days prior to this, the 40th year of the Divine Era<sup>2</sup>, an ascetic named Mahábáh, kindled the first flame in a fire-temple, and devoting himself to the worship of God, resolutely set himself to the consuming of his rebellious passions. Seekers after eternal welfare gathered round him, zealous in a life of mortification. About this time the Buddhists began to take alarm and appealed to the temporal sovereign, asserting that in this fire-temple, many living things were consumed in flaming fire, and that it was advisable that Brahmanical rites should be set aside, and that he should secure the preservation of life. It is said that their prayer was heard, and the prohibition against the said people was enforced. These men of mortified appetites resolved on redress, and sought by prayer a deliverer who should overthrow Buddhism and restore their own faith. The Supreme Justice brought forth from this fire-temple, now long grown cold, a human form, resplendent with divine majesty, and bearing in its

Var. Shujáwal. Perhaps Shuján'dil. A note in Bernoulli suggests that Tieffenthaler has drawn on a history of Málwah by Nizámi A. H. 910. (A. D. 1504-5,) for this list of princes. Its identity with that of Abul Fazl, and the fact of his having largely used the Ain for his geographical description of Hindústán, furnishes another and surer inference.

as a province of Akbar's empire.

2 This would be B. C. 761, but the U. T. antedates the appearance of Dhanji or Arjun by nearly a century, (B. C. 840) and places the time of Mahamah (sic.) the founder of the fire-temple "in early ages." The chronology is, of course, like the account, legendary. The rise of addhism occurred in the 6th century, B. C. long before which the Vedic religion was in operation, in which Agni the god of fire was the object of almost as many hymns as Indra himself,

the Aqueous Vapour and bountiful giver of rain. The temporal sovereign to whom the Buddhists appealed, accords with Asoka's support of them. His age is about 257 B. C., and Arjun appears subrequently, but as this hero, with his five brothers, was miraculously born in the "Mahábhárata the main story of which is assigned conjecturally to about 1200 B. C., his re-appearance may as miraculously and conveniently be effected at any later time. It is more probable, however, that the story has reference to some local religious factions which must have existed at many places and times in India of which tradition, as in the case of the Brahman Kumárila, and the persecution of the Buddhists by his royal disciple Sudhanwan in the 8th century, has exaggerated the extent and importance.

hand a flashing sword. In a short space, he enthroned himself on the summit of power, and renewed the Brahmanical observance. He assumed the name of *Dhanji* and coming from the Deccan, established his seat of government at Malwah and attained to an advanced age.

When Putráj, the fifth in descent from him, died without issue, the nobles elected Aditya Ponwár his successor, and this was the origin of the sovereignty of this house. On the death of Hemarth in battle, Gandharb, the chosen, was raised to the throne. The Hindús believe that he is the same as Hemarth whom the Supreme Ruler introduced among the celestials in the form of a Gandharb¹ and then clothed in human shape. Thus he became universally known by this name and prospered the world by his justice and munificence. A son was born to him named Bikramájít who kept aflame the lamp of his ancestors and made extensive conquests. The Hindús to this day keep the beginning of his reign as an era and relate wonderful accounts of him. Indeed he possessed a knowledge of talismans and incantations and gained the credulity of the simple. Chandrapál obtained in turn the supreme power and conquered all Hindústán. Bijainand was a prince devoted to the chase. Near a plant of the Munja² he suddenly came upon a new-born infant. He brought-him up as his own

A class of demigods who inhabit the heaven of lndra and form the celestial choir at the banquets of the deities. He appears also in the lists as Gandha-pála, fostered by an ass, Gandha-rúpa or Harshamégha, epithets of the same animal. According to Wilford the Pandits who assisted Abul Fazl disfigured the chronology of the supplement to the Agni-purana. Of Salivahana and Nara-Vahana they made two distinct persons as well as of Bahrám with the title of Gor in Persian and Himár, or the Ass in Arabic. Thus they introduced Himár or Hemarth and Gor or Gandharb and told Abul Faz! that the former having been killed in battle, his soul passed into the body of Gandharb. The accession of Vikramaditya son of Bahrám Gor is placed in the supplement to the A.-purana and in the Satrujaya-mahátmya, A. D. 437. In the appendix to the A. P., the accession of Aditya is placed A. D. 185, but

in the Cumáricác'hana, A. D. 191: the différence is 6 years which added to 437 or rather 436, will place the same event in 442, the date of the Western Chronologers. As. Res. IX, 163—75.

2 Saccharum munja, a rush or grass from the fibres of which a string is prepared of which the Brahmanical girdle is properly formed. Munja wrote a geographical description of the world or of India which still exists under the name of Munja-prati-desa-ryavasthá or state of various countries. afterwards corrected and improved by Rájá Bhoja, and still exists in Gujerát. Munja transferred the capital from Ujjain to Sónitpura in the Deccan called after him Munja-pattana on the Godaveri. Sónitpura (city of blogd) was thus called because Munja was defeated here with great slaughter and lost his life. Wilford.

son and called him by the name of Munja. When his own inevitable time approached, his son Bhója was of tender age. He therefore appointed Munja his successor, who ended his life in the wars of the Deccan.

Bhója succeeded to the throne in 541st1 year of the era of Bikramájít and added largely to his dominions, administering the empire with justice and liberality. He held wisdom in honour, the learned were treated with distinction, and seekers after knowledge were encouraged by his support. Five hundred sages, the most erudite of the age, shone as the gathered wisdom of his court and were entertained in a manner becoming their dignity and merit.2 The foremost of these was Barruj, a second was Dhanpál, who have composed works of great interest and left them to intelligent seekers of truth, as a precious possession. At the birth of Bhója, either through a grave miscalculation of the astrologers or some inadvertence on the part of those who cast his horoscope, the learned in the stars in consultation announced a nativity of sinister aspect. They prognosticated hazard to the lives of such as sympathised with him, and these to save their own, cast this nursling of fortune in the dust of destitution and exposed him in an inhospitable land. He was there nourished without the intervention of human aid. The sage Barruj, who at that time was not accounted among the learned, having recast his horoscope after profound investigation, foretold the good tidings of a nativity linked to a long life and a glorious reign. This paper he threw in the way of the Rájá, whose heart on reading it, was agitated with the impulse of paternal love. He convened an assembly of the astrologers, and when the nativity was scrutinised, and it was ascertained where the error lay, he went in person and restored Bhója to favour and opened the eyes of his understanding to the strangeness of fortune. They relate that when the child was eight years old, the short-sighted policy of Munja impelled him to desperate measures and he contemplated putting the innocent boy to

¹ Wilford says that this is inpossible as it would place Bhoja's accession in the year 982 which he considers to be more probably the date of his death, his accession occurring about the year 918 of Christ. This must be Tod's third Rája of the name. I refer the reader to Wilford's Essay where he may lose himself at leisure in the wilderness of conjectural chronology and encounter the numerous phantom Vikramadityas,

Bhojas and Salivahanas that will confront him at every step.

<sup>8</sup> Dr. Hall shows (Journ. B. A. S. 1862 Vásavadatta, Prof.) that there is little foundation for this prince's fame as a patron of letters. Elphinst. India, 231, noto. The names of the two pandits as given by Wilford are Dhanwanti and Bararuchi, and the number five hundred is reduced to nine.

He entrusted him to some of his trusty followers to make away with him secretly, but these ministers of death spared him, and concealing him, invented a plausible tale. On his taking leave, he gave them a letter telling them to read it to the Rájá in case he should inquire regarding him. Its purport ran as follows:--" How doth darkness of soul in a man cast him out of the light of wisdom, and in unholy machinations stain his hands in the blood of the innocent! No monarch in his senses thinks to carry with him to the grave his kingdom and treasures, but thou by slaying me seemest to imagine that his treasures perpetually endure and that he himself is beyond the reach of harm." The Rájá on hearing this letter, was aroused from his day-dream of fancied security and brooded in remorse over his crime. His agents, when they witnessed the evidences of his sincerity revealed to him what had occurred. He gave thanks to God, welcomed Bhoja with much affection and appointed him his successor. When his son Jayachand's reign was ended, none of the Ponwar caste was found worthy to succeed. Jitpal of the Tonwar caste, who was one of the principal landowners was elected to the throne, and thus by the vicissitudes of fortune the sovereignty passed into this family. When Kunwarpal died, the royal authority passed into the hands of the Chauhans. During the reign of Maldeva, Shaikh Sháh came from Ghazni and acquired possession of Málwah and lived to an advanced age. death his son Alá u'd dín was a minor, and his chief minister Dharm Ráj Súd occupied the throne. As soon as Alá u'd dín came of age, he rose in arms to assert his rights and put to death the disloyal usurper. Jitpal Chauhán, a descendant of Mánik Deva<sup>2</sup> Chauhán, who was in the service of Kamal u'd din, under the impulse of malice and in pride of wealth compassed the destruction of his master and in the hope of gain, acquired for himself eternal perdition. Under the rule of Tipparsén,3 an intriguing Afghán, getting together some desperate characters as his

<sup>&</sup>lt;sup>1</sup> Jayananda according to Wilford, who gives the next name as Chaitra or Jytepál and identifies or confounds him with Chandrapála, who, he considers, is erroneously placed before Bhója in Δbul Fazl'ε list. He accounts him one of the many Vikramadityas among whom the here of the era is not easily recognized.

<sup>&</sup>lt;sup>2</sup> Manikya Rai, is recorded in the U. T. as the 13th in the list of the Chauhan dynasty at Ajmer and Delhi and afterwards at Kotah and Bundi. He flourish-

ed A. D. 695, and founded Sambhar hence title of Sámbri Ráo; slain by Moslem invaders under Abul Kás. The Chauháns were one of the four Agnicola tribes, Chauháns, Parihárs, Solánki and Pramára, said to have been produced by a convocation of the gods on Mount Abú. Tod.

The name is misprinted in the text through the misplacing of the discritical points.

abettors, laying an ambush for the Rájá, slew him while hunting, and assumed the sovereignty with the title of Jalál u'd dín. Tipparsén had married his son Kharaksén into the family of the Rájé of Kámrúp.¹ The Rájá, for his eminent services, appointed this adopted son his heir, and when the Rájá died, Kharaksén ascended the throne and to avenge his wrongs marched an army against Málwah and Aálam Sháh was killed in battle.

In the reign of Sakat Sing a prince named Bahádur Sháh advanced from the Deccan and having put the Rájá to death, marched against Delhi and was taken prisoner while fighting against Sultán Shaháb u'd dín.

From the time of Sultán Ghiyás u'd dín Balban (A. D. 1265) to that of Sultán Muhammad son of Fíroz Sháh (A. D. 1387) no serious weakness in the imperial authority betrayed itself, but on his death the empire of Delhi became a prey to distractions. Diláwar Khán Ghori who had been appointed by him to the government of Málwah, assumed independence. The Sultán bestowed the government of four provinces upon four individuals who had been faithful to him in his adversity. To Zafar Khán³ he gave Gujerát; Khizr Khán was appointed to Multán; Khwájah Sarwar to Jaunpúr and Diláwar Khán to Málwah. After his death, the time being favourable, each³ of the four assumed independence.

Alp Khán the son of Diláwar Khán was elected to the succession under the title of Hoshang. It is said that his father was poisoned by his order whereby he has gained everlasting abhorrence. Sultán Muzaffar of Gujerát marched against him and took him prisoner and left his own brother Naşír Khán in command of the province. But as he was tyrannous in conduct and ignored the interests of his subjects, Músa, cousin of Hoshang, was raised to the throne. Sultán Muzaffar released Hoshang

- ¹ The text has Kámrú.
- <sup>2</sup> Zafar Khán took the title of Muzaffar Sháh. According to some historians both he and Diláwar owed their appointments to Fíroz Sháh. Khizr Khán was continued in his government of Multan and Dipálpúr by Timúr and acted as the viceroy of that conqueror. Within two years of the death of Mahmúd the last of the house of Toghlak he advanced to Delhi at the head of 60,000 horse and established the dynasty of the Sayyids in
- 1414. Malik Rájá of Khándesh asserted his independence at this time
- There is an evident omission in the text of a qualifying word before the numeral, and the sentence is improperly assigned to the next paragraph. The S. ul. M. supplies Ja. The text is so obscure and confused that nothing but a knowledge of the history of the times can guide a reader to the meaning of the incoherent narrative. Gladwin is completely astray.

from confinement and despatched him to Málwah in company with his own son Ahmad Khán, and in a short time he was restored to power. On the death of Muzaffar, he perfidiously marched against Gujerát, but meeting with no success, returned. On several subsequent occasions he attacked Sultán Ahmad of Gujerát but was shamefully defeated.

On one occasion cunningly disguised as a merchant, he set out for Jájnagar.<sup>1</sup> The ruler of that country accompanied by a small retinue visited the caravan. Hoshang took him prisoner and hastened back. While journeying together, Hoshang told him that he had been induced to undertake this expedition in order to procure a supply of elephants and added that if his people attempted a rescue, the prince's life should pay the penalty. The prince therefore sending for a number of valuable elephants, presented them to him and was set at liberty.

Hoshang was engaged in wars with Mubárak Sháh son of Khizr Khán viceroy<sup>8</sup> of Delhi, with Sultán Ibrahím of the Jaunpúr dynasty, and with

1 Jájpúr on the Baitaráni river in Orissa, capital of the province under the Lion Dynasty, the Gajpati or Lords of Elephants. This story occurs in the Tab. Akbari, p. 537, and in Ferishta, Vol. II, p. 236. (Briggs, 1V, 178). Ferishta's account is that in A. H. 825 (1421-2), Hoshang with a 1,000 picked cavalry disguised as a merchant set out for Jájingar, one month's journey from Málwah and took with him a number of cream-coloured horses, much sought after by the ruler of Orissa and stuffs of various kinds, his object being to exchange these for elephants the better to meet Sulțán Ahmad of Gujerát in the field. On his arrival near Jájuagar he sent to inform the Rájah of the presence of his caravan and the prince arrived with a number of elephants to barter for the horses, or ready to pay in coin, as the need arose. The horses were caparisoned and the stuffs laid out for inspection, when a storm of rain came on and the lightning frightening the elephants, they trampled on the goods and caused great Hoshang tore his hair and swore that life was no longer worth hav-

ing and at a signal, his men mounted and attacked the Rájá's guard, and put them to flight. Capturing the Rája, Hoshang discovered himself and excused his action on the ground of the destruction of his property, He then stated his object. The Rájah admired his audacity and 75 elephants purchased his own release. Hoshang carried him as far as the frontier and set him at liberty. On the Rája's return to his own capital, he sent Hoshang a further present of a few more of his finest elephants in testimony of his gallantry. Hoshang returned to Mando which Sultan Ahmad was beseiging and cluding an engagement entered it by the Tárápúr gate **F**orishta relates a similar expedition undertaken by Sultán Shams u'd din Bhankarah of Bengal to Jájnagar about A. H. 754 (A. D. 1353) to obtain elephants (p. 296, Vol. II) which proves the reputation of that province for the superior breed or number of these animals ..

<sup>9</sup> He never assumed the royal title but styled himself viceroy, of Timúr in whose name the coin was minted and the Khutbah read.

Sultán Ahmad of the Deccan. On his death, the nobles, in accordance with his bequest, raised his son Nasír<sup>8</sup> Khán to the throne under the title of Muhammad Sháh. Mahmud Khán, cousin of Sultán Hoshang, basely bribed his cup bearer and that venal wretch poisoned the Sultan's wine. The generals of the army kept his death secret hoping to place his son Masaud Khan upon the throne and they sent to confer with Mahmud Khán. He replied that worldly affairs had no longer any interest for him but that if his presence in council were necessary, they must come to him. They foolishly went to his house and were placed in confinement, and by the aid of some disloyal mercenary partisans, he seized upon the sovereignty of Málwah and was proclaimed under the title of Sultan Mahmud (Khilji). Upon such a wretch, in its wondrous vicissitudes thus did Fortune smile and the awe he inspired secured him the tranquil possession of power. waged wars with Sultan Muhammad son of Mubarak Shah, king of Delhi, with Sultán Ahmad, king of Gujerát, with Sultán Husain Sharki of Jáunpúr, and with Ráná Kombha4 of Mewár.

Khwájah Jamál u'd dín Astarábádi<sup>5</sup> was sent to him as ambassador by Abú Saíd Mírza with costly gifts which greatly redounded to his glory. Mahmúd II (1512 A. D.) through his ungenerous treatment of his adopt-

- <sup>1</sup> Ahmad Shah Wali of the Bahmani dynasty (1422-35).
- <sup>2</sup> Var. IIusain Khán which name Gladwin adopts. Ferishta calls him Ghizni Khán.
- <sup>8</sup> He proved notwithstanding, the ablest and most chivalrous of all the Málwah princes. This indignation is somewhat misplaced. Considering the usual road to an Eastern throne, this is innocence.
- 4 In the U. T. Kumbo, Tod. Kumbho. Gladwin Gownho.
- 4 This ambassador arrived with presents from Mirza Sultán Said 3rd in descent from Tamerlane who reigned over Transoxiana and held his court at Bokhárá—grandfather of Báber. He returned with presents of elophants, singing and dancing girls, Arab horses and an ode in the vernacular composed by Maḥmúd himself which Abu Said valued above

all the other gifts. Ferishta II, 254. When Abú Said was killed in Irák he left 11 sons, viz., Ahmad, Mahmud, Muhammad, Sháhrukh, Ulugh, Omar Shaikh, Abu Bakr, Murád, Khalíl, Omar. and Mirza. Four of these became sovereigns in their father's life-time, Ulugh Beg in Cabul, Ahmad in Samarkand, Mahmud in Kunduz and Badakshan, and Omár Shaikh in Farghánah. Yúnas Khán king of Moghulistán, gave each of these (except Ulugh Beg) a daughter in marriage. In A. H. 888 (1483-4) Kutlugh Nigar Khanam, the daughter of Yunas bore a son to Omar Shaikh whom he called Báber. The genealogy from Timur is as follows :--

Amír Timúr Mirán Sháh Mirza | Sultán Muhammad Mirza | Sultán Abú Sạíd Mirza. ed followers! fell into misfortune but was again reinstated in power by the aid of Sultán Muzasfar Sháh (II) of Gujerát (A. D. 1511—26). Through his reckless bravery in battle he was taken prisoner by the Ráná (Sanga)<sup>2</sup> who treated him with generosity and restored him to his kingdom. He was again captured in action against Sultán Bahádur of Gujerát and conveyed to the fortress of Chánpánér. He was killed (A. D. 1526) on his way thither and Málwah was incorporated with Gujerát until it was conquered by Humayún. When this monarch returned to Agra, one of the relations of Sultán Mahmúd, by name Mallú, seized on the government of Málwah under the title of Kádir Khán.

During the supremacy of the usurper Sher Khán the control of the province was invested in Shujáat Khán, who rebelled under the reign of Salím Khán and assumed independence under Mubáriz Khán.

- 1 S. ul M. گريدگان. The reference is to his dismissal of his Hindu minister Mední Ráe and the Rájpút troops to whom he owed his kingdom when deserted by his nobles at the beginning of his reign. The loyalty of Modni Ráe, though proved under the greatest trials, did not disarm the king's suspicions and he fled to the Court of Gujerát in 1547.
- <sup>2</sup> Rana Sanga (also Singrám or Sinka) (A. D. 1508—1529) under whom Mewár reached its highest prosperity, successfully resisted Bábar at Biána in 1526.
- \* See Vol. I, p. 321. Sher Sháh was succeeded by his second son Jalál Khán, as Islám Sháh corrupted into Salím Sháh A. H. 952 (May 25th, 1545). On his death in A. H. 955 (1548-9) he was succeeded by his son prince Firoz, then 12 years of age who was placed on the throne by the chiefs of the house of Súc at Gwalior. He had not reigned 3 days when Mubáriz Kháu son of Nizám Khán and nephew of Sher Sháh and brother-in-law of Salim Shah, assassinated his sister's son Firoz, and assumed the sovereignty under the title of Muhammad Shah Aadil. The common people dropping the alif and adding a ya

called him Adili. Ferishta (Vol. I, p. 233,) adds "and Adili from his want of capacity betook himself to the society of low and base companions and roferred to them the highest affairs of State." At page 460 of Elphinstone's India (Murray, 1866, ed. Cowell) is a foot to the name of "Adali" which runs thus. ["His ignorance and absurdity obtained for him the name of Adali ("the foolish"). Sir H. Elliot's Hist., i, 302)-Ep.] The responsibility for this meaning apparently rests with Dorn for in Vol. V of Dowson's Elliot, p. 45, is the following footnote. "The Makhzan i Afgháni says, this name was changed to 'Adali' which Dorn says عدل signifies foolish." Though the root bears the meaning of 'deviation from the right way' this is by no means synonymous with feebleness of mind and 'Adali,' as an epithet, does not mean "foolish." I suspect Dorn's error is based on Ferishta's words which I have underlined and which he has severed from their connection with what follows and referred them to the name. Ferishta adds that the Afghan wits called him 'Andhli' for his ill-regulated On his death, his eldest son Báyizíd succeeded under the title of Báz Bahádur until the star of his Majesty's fortune arose in the ascendant and this fertile province was added to the imperial dominious.

May the robe of this daily-widening empire be bordered with perpetuity, and its inhabitants enjoy to their hearts' fill a prosperity that shall never decay.

#### Subáh of Dándés.

This flourishing country was called Khándes, but after the capture of the fortress of Asír¹ and when this province fell under the government of prince Dányál, it was known as Dándés.² It is situated in the second climate. Its length from Bórgáon³ which adjoins Hindiah to Lalang⁴ which is on the borders of the territory of Ahmadnagar is 75 kos. Its breadth from Jámód adjoining Berár to Pál which borders Málwah is 50, and in some parts only 25 kos. On its east is Berár; to the north, Málwah: to the south, Gálnah (Jálna): to the west, the southern chain of the mountains of Málwah. The rivers are numerous, the principal being the Táli⁵ which

conduct, " Andhli being in the Hindi language 'blindness.'" Accurate scholarship is not looked for in a jest and the similarity of sound will suffice for a pun, but it may be remarked that 'andhli' is not admissible for "blindness" which should be andhla-pan or perhaps 'andhlái.' Since writing the above, Dr. Rost has traced for me the work in which Dorn has committed himself to this interpretation of Adili. It occurs in his translation of Neamat Ullah. (History of Afghans, Vol. I, 171) "but, in despite of his usurped title, he was commonly called Adili (the Foolish)." A note refers the reader to Briggs' Ferishta. Vol. II, p. 144, which is, as I suspected, the passage quoted and underlined by me above. Briggs represents his original with freedom, but in the main, as far as I have seen, with truth. In this instance his paraphrase has misled Dorn into an inference, probably not intended. but if intended, certainly incorrect.

- <sup>1</sup> It was ceded to Akbar towards the close of A. H. 1008 (1600 A. D.) by Bahádur Khán Fárúki the last of that dynasty. See A. A., Vol. I, xxiii and p. 336.
- <sup>2</sup> A combination of Dányál and Khándes, as Khándes was named after Nasir u'l dín son of Malik Raja the first of the Fárúki dynasty.
- <sup>3</sup> T. and G. Pourgaon, Poorgong. S. ul. M. Púrgáon.
- <sup>4</sup> Var. T. and G. Talang. T. has also Lelang.
- \* Var. Tabi, Mali. T. passes by the name altogether, while G. has it, but strangely omits the Tapti. I find no mention of the Tali in the I. G. The Tapti rises in a sacred reservoir in the town of Multai. (lat. 21° 46′ 26″ N., long. 78° 18′ 5″ E.). The Púrna, according to the I. G. is one of its tributaries. The text has here Púrná but later on Púrná.

rises between Berár and Gondhwánah, the Tapti which has its source from the same quarter and which is also called the Púrna, and the Girni near Cháprah. The climate is pleasant and the winter temperate.

Jowári is chiefly cultivated of which, in some places, there are three crops in a year, and its stalk is so delicate and pleasant to the taste that it is regarded in the light of a fruit. The rice is of fine quality, fruits grow plentifully and betel leaves are in abundance. Good cloth stuffs are woven here: those called Siri Şúf¹ and Bhíraun come from Dharangúon.

A'sir² is the residence of the governor. It is a fortress on a lefty hill. Three other forts encompass it which for strength and leftiness are scarcely to be equalled. A large and flourishing city is at its foot. Burhánpúr is a large city three kos distant from the Tapti. It lies in latitude 21° 40′,8 and is embellished with many gardens and the sandal-wood also grows here. It is inhabited by people of all countries and handicraftsmen play a thriving trade. In the summer, clouds of dust fly which in the rains turn to mud.

Aúdilúbád is a fine town. Near it is a lake, a noted place of worship, and the crime of Rájá Jasrat was expiated at this shrine. It is full all the year round and it irrigates a large area of cultivation.

- <sup>1</sup> See A. A., Vol. I, p. 94.
- 3 It was captured by stratagem from its eponymous hero Asa Ahir by Nasir Khán Fárúki according to Tieffenthaler, but the I. G. gives the date about 1370, in the reign of Malik Rájá. The story of Asa Ahír is told by Ferishta. The fortress is situated on a spur of the Satpura range, height 850 feet from the base and 2,500 above sea level. three forts are probably the outworks embracing inferior spurs of the hill and commanding the approaches. thaler says "elle est defendue par un triple mur, muni par intervalles, de tours condes; il faut franchir ces trois remparts pours arriver au sommet."
- Properly 21° 18' 35" N., long. 76° 16' 26" E. It was founded by Naşîr Khán Fárúki of Khándesh and called by him after Shaikh Burhán u'd dín of Daulatábád. I. G.
  - 4 That this name is an error for Dasa-

ratha, I am convinced by the S. ul. M. which although it retains "Jasrat" adds the information that he was the father of Ráma Chandra, known as Ráma. Professor Cowell of Cambridge has placed me under obligations for the following note: "Daśaratha's crime was committed in his youth whon he unwittingly killed the hermit's son in the forests by the banks of the river Saravá in Oudh. The story is told in Rámáyan, Bk. II, Sec. 63 (see Griffith's translation. Vol. II, p. 243). He was cursed by the bereaved father and fated to be similarly agonised for the loss of his son in after years. I suppose these universally known legends are localised in different spots of India, like King Arthur's exploits in Cornwall, Wales and Scotland. The shrine of local colebrity in Khandesh no doubt claimed the glory of having been Dasaratha's resort after his crime in order to expiate his guilt."

Chángdeol is a village near which the Tapli and the Párná unite, and the confluence is accounted a place of great sanctity. It is called Chikar<sup>3</sup> Tirth. Adjacent to it is an image of Mahádeo. They relate that a blind man carried about him an image of Mahádeo which he worshipped daily. He lost the image at this spot. For a time he was sore distressed but forming a similar image of sand, he placed it on a little eminence and adored it in a like spirit. By a miracle of divine will, it became stone and exists to this day. Near it a spring rises which is held to be the Ganges. An ascetic by the power of the Almighty was in the habit of going to the Ganges daily from this spot. One night the river appeared to him in a dream, and said, "Undertake these fatigues no longer; I myself will rise up in thy cell." Accordingly in the morning it began to well forth and is flowing at the present time.

Jámód is a rich parganah. In its neighbourhood is a fort on a high hill called Pipaldol. Dámarni³ is a prosperous town. Near it is a tank in which a hot spring perpetually rises and which is an object of worship.

Chóprah is a large flourishing town, near which is a shrine called Rámésar at the confluence of the Girni and the Tapti. Pilgrims from the most distant parts frequent it. Adjacent to it is the fort of Malkúmad.

Thálner was for a time the capital of the Fáráki princes. The fort though situated on the plain is nevertheless of great strength.

This Súbah contains 32 parganahs. Scarce any land is out of cultivation and many of the villages more resemble towns. The peasentry are docile and industrious. The provincial force is formed of Kúlis, Bhils and Gonds. Some of these can tame lions, so that they will obey their commands, and strange tales are told of them.

Its revenue is 12,647,062, Berári tankahs as will appear in the statement. After the conquest of Asír, this revenue was increased by 50 per

<sup>&</sup>lt;sup>2</sup> Var. Cháckdeo. T. Tschanckdéou G. Changdavy.

<sup>&</sup>lt;sup>2</sup> Var. Chikil. T. Tscheklitiret. Gladwin. Jigger teerut, which he renders "the liver of adored places!" a derivation more curious than tonable. 'Chikil' signifies mud, mire or slime. Chikar is no doubt Chikar which has the same meaning, and the place of pilgrimage

may be called after the marshy character of the spot. Though not as holy as the Narbada, the Tapti neverthless has no fewer than 108 ttrths or shrines of pilgrimage on its banks.

Var. Amarti, Amérni, Amérti, Damarni.

- <sup>11</sup> These sums give a total of 14,578,863 instead of 18,970,593. Gladwin's figures yield 15,546,863. The deficiency is probably due to errors of copylsts or to emissions of income from other sources.

Ashwatthámál and established as a shrine. It is related that Malik Ráji from whom Bahódurs is the ninth in descent, under stress of misfortune came from Bidar<sup>3</sup> to these parts and established himself in the village of Karóndá, a dependency of Thálnér, but being molested by the natives, he repaired to Delhi and took service under Sultán Firóz. The king admired his skill as a huntsman, and his reward being left to his own choice, he received a grant of that villageb and by judicious policy acquired possession of other estates and reclaimed much waste land. In the year 784 A. H. (A. D. 1382), he made Thálnér his seat of government, assumed the title of Aádil Sháh and reigned for 17 years. He was succeeded by his son Ghizni<sup>6</sup> Khán under the title of Naşír Sháh, after which this province became known as Khándés. He reigned 40 years, 6 months, and 26 days. On his death his son Mírán Sháh administered the state. some he is called Aádil Sháh. He occupied the throne 3 years, 8 months and 23 days. He was followed by his son Mubárik Sháh Chankandi<sup>7</sup> Sultan during 17 years, 6 months and 29 days. His son Aádil Sháh Ayná<sup>8</sup> whose name was Ahsan Khán, had a prosperous reign of 46 years, 8 months and 2 days. He removed to Burhánpúr and made himself master of Asir,9 Sultán Ahmad of Gujerát, the founder of Ahmedábad, gave him his daughter in marriage. At his death, his brother Daud Sháh reigned for 7 years, 1 month and 17 days. Aádil Sháh (II) son of Hasan<sup>10</sup> took refuge in Gujerát, Sultán Máhmúd Bígarah<sup>11</sup> Ráji gave him in marriage Kihl2 the daughter of Sultan Muzassar, (his son)

- <sup>1</sup> See under Súbah of Ajmer, in the description of Márwár.
- <sup>2</sup> Bahádur Khán Fárúki, 1596 A. D. . last of the dynasty.
  - 8 G. and S. ul M. Bandar.
- \* G. Kecrandecy. S. ul M. Girdpadai. According to T., his father was Khán Jahán one of the ministers in the court Alá u'd dín Khilji and of Muhammad Tughlak. He claimed descent from the Caliph Omar called by Mahammad "a. Fárúk" or 'he discriminator, on the day that he publicly professed his conversion, because on that day "Islám was made manifest and tfuth distinguished from falschood." For an account of this, see as Suyuti's Hist. of the Caliphs, my translation, p. 118.
- T. states that he was given "les cautons de Thanessor et de Cacrond."
- G. Gharib, which name is also a variant of the text.
  - 'S ul M. Charkhandi,
- 8 Var. Ayá, Abá, Anyá. G. Jya. S. ul M. 1'sá.
- T. says that he fortified the place with another wall.
- <sup>10</sup> This is probably the correct name and not Ahsan as above.
- 11 For derivation of this name, see Vol. I., 506, n. His twisted moustache was in shape like the horns of a cow, Bigarah signifying a cow in the Guzeráti language.
- <sup>12</sup> S. ul M. <sup>قیم</sup>, Rukayyah a more likely name.

and accompanying him to Khándés, restored him to his kingdom and returned to his own. He reigned 13 years. He left two sons, Mirán Muhammad Shah and Muharik Shah. Sultan Bahadur of Gujarat being on terms of friendly alliance with the first-named! made him his heir, and guardian to his nephew Mahmud and his own brother Mubarik. Miran Shah, from a sense of their deserts, and with political sagueity did them no injury and contenting himself with the kingdom Khandes, restored Maḥmud to the sovereignty of Gujerat. He reigned 16 years, 2 months and 3 days. When the measure of his days was full, the nobles raised his son Ráji to the throne. Mirán Mubárik wrested it from him and reigned in succession to his brother, administering the government for 31 years, 6 months and 5 days. He was succeeded by his son Mirán Muhammad who reigned 9 years, 9 months and 15 days. When he died, his younger brother Rája Alí Khán² was elected and assumed the title of Aádil Sháh. His administration was conducted with ability and he was killed in the wars of the Deccan fighting on the side of his Majesty's victorious troops. He was buried at Burhánpúr, after a successful reign of 21 years, 3 months and 20 days. At his death the succession devolved on Khizr Khán, his son, who took the name of Bahádur Sháh. But the star of his destiny was obscured and in the 45th year of the Divine era, he was deprived of his kingdom as has been recorded in its proper place.

1 His sister being mother of Mirán Sháh.

\* He married a sister of Abul Fazl. See Vol. I, p. xxxiv, and p. 335. The bline of these princes according to the U. T. is as follows. (Compare Elphinst. India, app. p. 770).

A. D.

i370. Matik Réja Fárúķi, receives Jágír of Talner from Firoz.

1300. Malik Nasir or Nasir Khán Fárúķi, builds Burhánpúr.

1443. Miran Adil Khán Fárúki, expels Deceanies from Khándesh.

 1441. Miran Mubarik Khán Fárúķi; peaceful reign. 1457. Miran Ghani or Adil Khán Fárúķi I; tributary to Guzerát.

1503. Daoud Khán Fárúķi, tributary to Malwa.

1510. Azim Humayun or Adil Khán F.
11, grandson of Guzerát king.

1520. Miran Muhammad Khán F., succeeds to Guzerát throne.

1535. Miran Mubárik Khán F., brother; war with Moghals

1566. Miran Mhd. Khan F., attack from Decean.

1576. Rája Ally Khán F. acknowledges Akbar's supremacy.

1596. Bahádur Khán F. defies Akbar; is imprisoned at Gwalior,

#### Súbah of Berár.

Its original name was Wúrdátat, from Warda, the river of that name and tay, a bank. It is situated in the second climate. Its length from Baţûlah¹ to Biragarh is 200 kos, its breadth from Bidar to Hindiah 180 kos. On the east lies Biragarh adjoining Bastar; to the north is Hindiah; to the south Telingánah; on the west Mahkarábád. It is a tract—situated between two hill-ranges having a southerly direction. One of these is called Bandah³ upon which are the forts of Gáwilgarh, Narnálat and Mélgarh. The other is Sahia, whereon rise the forts of Máhór and Rámgarh.

The climate and cultivation of this province are remarkably good. There are many rivers, the principal of which is called *Gang Gautami* called also the *Godaveri*.

As the Ganges of Hindustán is chiefly connected with the worship of Mahádeo, so is this river with (the Rishi) Gautama. Wonderful tales are related regarding it and it is held in great sanctity. It rises near Trimbak's in the Sahia range and passing through the country of Ahmadnagar, enters Berár and flows into Telingánah. When Jupiter enters the sign Leo, pilgrims lock from all parts to worship. The Táli' and Tapti are also venerated. Another river the Párná rises near Déwalgáon, and again the Wardá issues forth ten kos higher up than the source of the Táli. The Napta<sup>3</sup> (?) also rises near Déwalgáon.

In this country the term for a Chaudhri is Desmukh, for a Kánúngo<sup>9</sup> Dés Pándiah; the Mukaddam is called Paţil and the Patwár, Kalkarni.

- 1 Var. Patiálah. G. Putaleh, T. Paniála. S. ul M. Sálah.
- <sup>2</sup> As this province corresponds geographically with the accient *Tri-Kalinga*, Gen. Cunningham thinks Telinganah to be probably, a slight contraction of Tri-Kalinga See Anc. Geo. Ind., p. 519.
- 3 Another name presumably for the branch of the Satpura mountains on which Gawilgarh stands.
  - 1 Var. Sahá, Sahsia, Sahsá.
- 5 In the Nasik District, about 50 miles from the Indian Ocean. At this spot is an artificial reservoir, reached by a flight of 90 steps, into which the water trickles drop by drop from the lips of a carthen image shrouded by a canopy of stone. Its peculiar sacredness is said

- to have been rovealed by Ráma himself t the sage Gautama. I. G.
- Once in every 12 years, a great bathing festival called Pushkaram, is held on the banks of the Godaveri, alternately with the other eleven sacred rivers of India. The most frequented spots are the source at Trimbuk, Bhadráchalam on the left bank about 100 miles above Rájámahendri, this latter itself, and the village of Kotipáli. Ibid.
  - 7 Var. Páli, Páti.
  - <sup>8</sup> The text marks the name as doubtful. S. ul M. Bíná.
  - <sup>9</sup> See Vol. II, pp. 45-47. Chaudhri is the head man of a caste, guild or trade, or of a village.

Elichpúr is a large city and the capital. A flower violet in colour is found here and is very fragrant. It is called Bhúpan champah, and grows close to the ground.

At the distance of 7 kos is Gáwil, a fortress of almost matchless strength. In it is a spring at which they water weapons of steel.

Panár is a strong fort on an eminence which two streams surround on three sides.

Khérlah is a strong fort on a plain. In the middle of it is a small hill which is a place of worship. Four kos from this is a well, into which if the bone of any animal be thrown it petrifics,2 like a cowrie-shell only smaller. To the east of this resides a Zamindár named Chátwá3 who is master of 2,000 cavalry, 50,000 foot and more than 100 elephants. Another such Zamindúr is named Dádhi Ráo who possesses 200 cavalry, and 5,000 foot. To the north is Núhar Ráo a chief whose force consists of 200 horse and 5,000 foot. Formerly in this neighbourhood, was a Zamindár named Hatiá, but now his possessions are under other subjection and the whole race are Gonds. Wild elephants are found in this country. The chiefs were always tributary to the kings of Málwah: the first, to the governor of Garh, and the others to the government of Hindiah. Narnálah is a strong fortress on a hill, containing many buildings. Bíja Ráo is a Zamindár in the neighbourhood who has a force of 200 cavalry and 5,000 foot. Another is Dúngar Khán with 50 horse and 3,000 foot: both of the Gond tribe. Near Bálapúr are two streams, about the borders of which are found various kinds of pretty stones, which are cut and kept as curiosities. Six kos distant was the head-quarters of Prince Sultán Murád which grew into a fine city under the name of Shahpúr.

Near Melgarh is a spring which petrifies wood and other substances that are thrown into it.

Kallam, 5 is an ancient city of considerable importance; it is noted for

l At p. 91, Vol. I. the name is Bhún Champá, and is said to have a peach coloured blossom. The S. ul M. calls it Brún Champah and adds "it grows also in Bongal; it shoots from the ground with leaves like the ginger-plant and till the rainy season it continues in growth and is green. In the winter it withers away and disappears altogether." The word is properly Bhúm Champak. "The ground Champak," and is the Kompfe-

ria Rotunda.

- 2 The S. nl M. has a shell— (instead of a stone—of the toxt) and adds "like a courie and is of that kind," apparently the true reading.
- 3 A noto says, historically Játibá or Játwá.
  - 4 See Vol. I, pp. 309, 335, 357.
- In the I. G. Kalamb in Wun District. Lat 20° 26′ N., long 78° 22′ 30″ E.

its buffaloes. In the vicinity is a Zamindár named Babjeo of the Gond tribe, more generally known as Chándá: a force of 1,000 horse and 40,000 foot is under his command. Birágarh which has a diamond mine and where figured cloths and other stuffs are woven, is under his authority It is but a short time since that, he wrested it from another chief. Wild elephants abound.

About Básim is an indigenous race for the most part proud and refractory called Hatkars: their force consists of 1,000 cavalry and 5,000 infantry. Banjárah is another Zamíndárí, with 100 horse and 1,000 foot. At the present time it is under the authority of a woman. Both tribes are Rájpúts.

Máhor (Mahur, I. G.) is a fort of considerable strength situated on a hill. Adjacent is a temple dedicated to Durgá, known in this country as Jagadathá. Here the buffaloes are of a fine breed and yield half a man and more of milk. The Zamíndár is a Rájpút named Indrujeo and is entitled Ráná. He commands 100 horse and 1,000 foot.

Mánikárug is a remarkable fort on a hill surrounded by extensive forests. It is near Chandá, but up to the present is independent territory.

Jétanpúr is a village in the Sarkár of Páthri, where there is a thriving trade in jewels and other articles of value.

Telingánah was subject to Kuth u'l Mulh but for some time past has been under the authority of the fuler of Berár.

In Indore and Narmal there exist mines of steel and other metals. Shapely stone utensils are also carven here. The breed of buffaloes is fine and, strangely enough, the domestic cocks are observed to have bores and blood of a black colour. A Zamindár called Chaninéri, is Desmukh, a man of most distinguished character and who has a force of 300 horse. Rámghar is a strong fort on a hill, enclosed by forests. Wild elephants are numerous. It has not as yet been annexed to the empire.

Lunár is a division of Mahkar, and a place of great sanctity. The Brahmans call it Bishan Gayá. There are three Gayás, where the per-

I Warangal was the ancient capital of this kingdom founded by the Narapati Andhras which was also considered to include the coast territory from the mouth of the Ganges to that of the Kistná known as Kalinga. No accurate historical record of it occurs before the invasion of Alá u'd dín in 1303. It con-

tinued with some interruptions under Hindu rule till its remains were incorporated in the dominions of Kuli Kuth Shah the founder of the Kuth Shahi dynasty, in 1512 with Gelconda as its capital. It was conquered by Aurungzob in 1688. I. G.

<sup>8</sup> Var. Jayabéri.

tormance of good works can be applied as a means of deliverance to the souls of deceased ancestors; namely, Gaya in Behar which is dedicated to Brahma, Gaya, near Bijapur dedicated to Rudra, and this one. Here is also a reservoir, having a spring in it of great depth, and measuring a kos in length and in breadth, and surrounded by lofty hills. The water is brackish, but when taken from the centre or at its sides, it is sweet. It contains the essential materials for the manufacture of glass and soap and saltpetre is here produced and yields a considerable revenue.

On the summit of a hill is a spring at the mouth of which is carved the figure of a bull. The water never flows from this spring to the other, but when the 30th lunar day<sup>2</sup> falls on a Monday, its stream flows into the large reservoir. In the neighbourhood is a Zamindár called Wáilah of the Rájpút tribe, commanding 200 horse and 2,000 foot. Another is called Sarkath, also a Rájpút, and possesses 100 horse and 1,000 foot.

Batialak is a fort of considerable strength on a hill, of which Patál Nagari is a dependency. In the sides of the hill twenty-four temples have been cut, each containing remarkable idels. The Zamindár is Médní Ráo, a Rájpút, with 200 horse and 1,000 foot. Another is Kámjeo, a Rájpút having under him 100 horse and 1,000 foot.

This Súbah contains 16 sarkárs and 142 perganahs. From an early period the revenues were taken by a valuation of crops, and since the tankah of this country is equal to 8 of Delhi, the gross revenue was  $3\frac{1}{2}$  krors of tankahs or 56 krors of dims\* (Rs. 14,000,000). Some of the Deceani princes increased the revenue to 37,525,350 tankahs. In the time of Sultan Murád a further addition of 2,637,454 Berári tankahs was made. The total amounted to 40,162,704 Berári tankahs. The original amount and the additional increase were thus tabulated, the whole reaching the amount of 642,603,272 Delhi dáms.

- <sup>1</sup> The 'Howler' an epithet of Siva or his inferior manifestation as a roaring tompest.
  - <sup>2</sup> Amáwas, see p. 17 of this volume.
- 4 This makes 16 dáms to the tankah. In the revenue statement of Khándesh, the tankah is reckened at 24 dáms. That of Gujerát = 10 af a dám or 100 to the rupee of 40 dáms. Bayley Hist, of Gujerát, p. 6. If Prince Murád's increase be added to that of the Deceani princes, the total gives 40,162,801 tunkahs. This sum multiplied by 16 results in 642,604.

864 dams. As 40 Akbari dams are equivalent to a rupee, the above total represents 16,065,121 rupees. Under Akbar, according to the I. G. the land tax of Berar was Rs. 17,376,117. Under Shah Jehan, Rs. 13,750,000, and under Aurangzeb, 15,350,625, but the latter amount, taken by Mr. E. Thomas from Manucci, is given by Tieffenthaler from the same authority as 10,987,500. See his dissertation on the apparent inaccuracies of calculation in the registers of the empire and their cause. Vol. I, p. 65.

Eight perganahs of the Sarkár of Kallam (Kalamb) were annexed to Chándá, the revenue of which is not included, nor those of 22 parganahs of the Sarkar of Kherlah, held by Chátwá and some few other Lamíndárs.

Sarkár of Gáwil.

Containing 46 parganals. Revenue 134,666,140 dams. Suyurghal 12,874,048 dams.

This province was dependent on the ruler of the Deccan. During the reign of Sultán Maḥmúd, five Sardárs rebelled and kept him under restraint, and the sovereignty was assumed by Fath u'l lah who had held the office of Imád u'l Mulk.<sup>4</sup> He ruled but four years. At his death, his son Alá u'd dín, took the same title and reigned 40 years. His son Daryá Khán succeeded, and enjoyed the government for 15 years. After him, his son, Burhán a minor, was raised to the throne, but the nobles perfidiously usurped the administration, till Murtaza Nizám u'l Mulk conquered and annexed the country to Ahmadnagar.

### Súbah of Gujárat (Guzerát).

It is situated in the second climate. Its length from Burhangur to

- 1 Var. T. and G. Daffa.
- 2 Var. Daháwar.
- G. Sownlapara. T. Salvar Bara.
- Imád u'l Mulk one of the oldest of the Bahmani ministers had been appointed to the government of Berár by Muhammad Shah II of the Bahmani dynasty (A. D. 1463-1482) under the advice of his prime minister Mahmud Gawan, to whom this dynasty owed its splendour, and which perished at his death. Mahmúd II (A. D. 1482-1518) for a period of 37 years was content with the nominal sovereignty leaving the real power in the hands of K'asim Barid and his son Amír, the founder of the Barid Sháhi dynasty of Ahmedábád. The Bahmani kingdom was now broken up into five independent sovereignties, viz., the Barid Sháhi, the Aádil Sháhi of Bíjápúr, the Nizám Sháhi of Ahmadnagar, the Kutb Sháhi of Golconda and the Imád Sháhi of Berár. Imád u'l Mulk, in the general anarchy seized the government which had been entrusted to him and declared his independence in A. D. 1484. The

succession is thus given in the U.T.

A. D.

1184. Fath u'l lah Bahmani, governor of Berár, became independent.

— Alá n'd dín, Imád Sháh, fixed his capital at Gáwel.

1528. Darya Imád Sháh, married his daughter to Hasan Nizám Sháh.

—. Burhán Imád Sháh, deposed by his ministers.

1568. Tufal, whose usurpation opposed from Ahmadnagar and family of Imád Sháh and Tufál extinguished. In the appendix to Elphinstone's Hist. of India, (Edit. Cowell 1866) the dates are as follows:—

|                   |     | A. D. |
|-------------------|-----|-------|
| Fatah Ullah,      |     | 1484  |
| Alá u'd dín,      | ••• | 1504  |
| Derya (about),    | ••• | 1529  |
| Burhán (perhaps), |     | 1560  |

During the minority of Burhán, his prime minister, Tufál usurped the government and the State merged in that of Ahmadnagar in A. D. 1572 A. H. Jagat is 302 kos; its breadth from Jálór to the post of Daman 260 kos, and from Edar<sup>3</sup> to Kambháyat (Cambay) 70 kos. On the cast lies Khándés; to the north Jálóz and Edar; to the south, the port of Daman and Kambhayat, and on the west, Jagat which is on the seashore. Mountains rise towards the south. Is is watered by noble rivers. Besides the ocean, there are the Sábarmatti (Savarnamati), the Bútrak, the Mahendri, the Narbadah, the Tapti, the Saraswati, and two springs called Gangah and Jamnah. The climate is temperate and turning the sandy character of the soil prevents it from turning into mud in the rainy season. The staple crops are Jouari, and Bajrah, which form the principal food of the people. The spring harvest is inconsiderable. Wheat and some food grains are imported from Málwah and Ajmer, and rice from the Decean. Assessment is chiefly by valuation of crops, survey being seldom resorted to. The prickly pear is planted round fields and about gardens and makes a goodly fence, for this reason the country is difficult to traverse. From the numerous groves of mango and other trees it may be said to resemble a garden. \* From Pattan<sup>6</sup> to Barodah which is a distance of a 100 kos, groves of mango yield ripe and sweet fruit. Some kinds are sweet even when unripe. Fine figs grow here and musk-melons are delicious in flavour both in summer and winter, and are abundant during two months in both seasons. The grapes are only moderate in quantity: flowers and fruit in great plenty. From the thick growth of forest sport is not satisfactory. Leopards7 abound in the wilds.

The roofs of houses are usually of tiles and the walls of burnt brick and lime. Some prudently prepare the foundations of stone, and of considerable breadth, while the walls have hollow spaces between, to which they have secret access. The usual vehicles are two-wheeled drawn by two

swati, one of the oldest and most renowned towns of Gujarát.

The term is is employed in A'in 27 and 28 Vol. I, (Book II) for leopards generally including the hunting leopard, (F. Jubata), being used indifferently with the common name for the latter, chitá. The F. Jubata is said to be a native only of the Deccan, but as Akbar hunted and caught leopards in the neighbourhood of Agra, and trained them to take deer, it would seem that the ordinary panther (F. Pardus) is capable of such training.

oxen. Painters, scal-engravers and other handicraftsmen are countless. They inlay mother-o'-pearl with great skill and make beautiful boxes and inkstands. Stuffs worked with gold thread and of the kinds Chirah, Fóṭah,¹ Jámahwár, Khirá, and velvets and brocades are here skilfully manufactured. Imitations of stuffs from Turkey, Europe, and Persia are also produced. They make likewise excellent swords and daggers of the kinds Jamilhur² and Khapwah, and bows and arrows. There is a brisk trade in jewelry and silver is imported from Turkey and Iráķ.

At first Pailan³ was the capital of the province, next Champánér and at the present day, Ahmadábád. The latter is a noble city in a high state of prosperity, situated on the banks¹ of the Sábarmatti. It lies in latitude 25°.⁴ For the pleasantness of its climate and its display of the choicest productions of the whole globe it is almost unrivalled. It has two forts, outside of which are 360 quarters of a special kind which they call Porah,⁵ in each of which all the requisites of a city are to be found. At the present time only 84 of these are flourishing. The city contains 1,000 stone mosques, each having two minarets and rare inscriptions. In the Rasálábád Porah is the tomb of Sháh Aálam Bokhári.⁶ Batwah¹ is a

- See p. 49, (note 2) Vol. II, Book III, and pp. 93—95 of Vol. I, B. I. Chirch is a parti-coloured cloth used for turbans. Jámawár, is a kind of flowered woollen stuff, well known, Khárú an undulated silk cloth.
  - <sup>2</sup> See p. 110, Vol. I, Book I.
- <sup>9</sup> Of successive dynastics of Rájpút kings from 746 to 1191 A. D. Champúner was taken by Mahmúd (Bigárah) of Ahmadábád after a siege, it is said, of 12 years and was made his capital and continued to be that of the Gujerát kings till about 1560 A. D. J. G.
- Lat. 23° 1′ 45″ N., long. 72° 38′ 30″ E. The Emperor Aurangzeb had a different opinion of its climate and called it among other abusive epithets, Jahannumábád or the Abode of Hell. See Bayley, p. 91-
- <sup>5</sup> A quarter or ward of a town, having its own gateway. The I. G. has pol and describes it as a block of houses varying in size from small courts of 5 or 10, to large quarters of the city containing as

- many as 10,000 inhabitants. The larger blocks are generally crossed by one main streel with a gate at each end and subdivided into smaller blocks each with its separate gate branching off from the chief thoroughfare.
- See Vol. I, p. 547 and Bayley's Hist, of Gujarat.
- 7 The text has Fatwah, the variant Batwah being relegated to the notes, but the best authorities concur in the latter reading. For Kuth-i-Aidam, see Bayley, p. 128, and Briggs' cities of Gujarashtra. p. 292. Regarding the lithoxyle over the tomb, Briggs writes that one of the legends given him concerning it is that Kuth-i-Aálam on a journey to his masjid tripped against a stone and picking it np, said, "Can this be stone, wood or iron?" and the combination ensued. A visitor who had preceded Briggs on a visit to this place wrote to him as follows: "The size mentioned by Abul Fazl is correct. The stone is not now on the sepulchre

village 3 kos from Aḥmadábád where are the tombs of Kutb-i-Aálam father of Sháh Aálam, and of other eminent personages. In the vicinity are fine gardens. Over the tomb is suspended a covering of about the measure of a cubit, partly of wood, partly of stone and a part also of iron, regarding which they relate wonderful stories. At a distance of three kos is the village of Sarkhech (Sarkhej) where repose Shaikh Aḥmad Khatṭú,¹ Salṭán Aḥmad after whom Aḥmadábád is named, and many other princes. Indigo of good quality is here grown and exported to Turkey and other countries.

Twelve kos from Ahmadábád is Mahmúdábád a city founded by Sultan Mahmúd in which are beautiful buildings extending to an area of 4 kos square. The whole is surrounded by a wall and at every half kos is a pleasure house and a preserve in which deer and other kinds of game are at large.

The chief of Edar is a Zamíndár named Nováin Dás, and of such austere life that he first feeds his cattle with corn and then picks up the grains from their dung and makes this his food, a sustenance held in much esteem by the Bráhmans. He is regarded as the head of the Ráthór tribe and has a following of 500 horse and 10,000 foot.

The ports of Ghogah<sup>3</sup> and Kambháyat (Cambay) are included in this Sarkár. The latter is a large city where merchants of divers kinds reside and wherein are fine buildings and much merchandise. Vessels sail from and trade to Ghogah. The cargoes<sup>3</sup> are put into small ships called Tówari which transport them to Kambháyat.

but deposited in the chief Said's house. Great reverence is paid to it and on such occasions as visitors desire to see it, it is produced under a covering of brocade. It appears to be petrified wood, the bark'y part gives it the appearance of iron oxydised; that portion where it has been chipped by the hand of Akbar when he visited Batwa (according to the Abbot of the community) shows the fibre or vein of the wood; and upon the opposite side, where it seems to have been ground crosswise, it hears the appearance of stone."

<sup>2</sup> See Vol. I, p. 507 and Bayley's Hist. of Gujarát, pp. 90 and 130. A description of these mausoloums will be found in Messrs. Hope and Fergusson's "Archtecture of Ahmedábád." London Murray. 1866. Khattu is one of the towns in the Sarkár of Nágór. Cf. Briggs' cities of Gujarashtra, p. 275.

- <sup>2</sup> Commonly Gogo in Káthiáwár on the Gulf of Cambay in lat. 21° 39′ 30″ N., long. 72° 21′ E. For its history, see Briggs, "Cities of Gujarashtra," p. 281
- A misspelling in a word of the true reading has misled the Editor who has amended conjecturally an incorrect variant. The MS. [ â ] is correct if a dál be substituted for the ultimate wáo in

In Kari are fine oxen, a pair being worth 300 rupees, and according to their shapeliness, strength and speed fetching even a larger price.

Jhálwárah<sup>1</sup> was formerly a separate principality containing 1200 villages. Its length is 70 kos and its breadth 40. It furnished 10,000 horse and the same number of infantry. Now it posses es but 2,000 horse and 3,000 foot. Its ruler was subject to the king of Gujarát. It formed four divisious, the inhabitants mostly of the Jhálah tribe of Rájpúts. At the present day it is accounted a Parganah of Ahmadábád, and its villages and districts are summarized in the following table.

Great Jhálwárah contains Bírámgáon<sup>2</sup> residence of the chief, Halód, Badhwán, Kóha, Darang Darah,<sup>3</sup> Bijaná, Pátri which has a salt-pit, Sahálá. Barodah, Jhinjhúwárá, Sanján,<sup>4</sup> Dhúlhar, Mandal.

Parganahs of Machhúkhantú contain Morbi, Rúmpúr, Tankárá, Khanjariá, Malía<sup>7</sup>, Kazór, in the vicinity of which pearls are found, Dhansar, Amról.

Parganahs of Jámbúji contain Jámbú. Límri, Siáni.

Parganahs of Jombasi, ehief seat of the Parmár<sup>10</sup> tribe contain Mórbi. with 36 villages and Chótilá with 55<sup>11</sup> villages. Now Morbi with 7 districts is included in Sorath.

Pattan has two forts, one of stone and one of brick. It lies in long 117° 10′, lat. 23° 30′. 12 It produces fine oxen that will travel 50 kos in half a day. Good cotton cloths are here woven and are taken to distant parts as gifts of value.

Sidhpúr13 is a town on the Sarsuti and a great place of pilgrimage.

Barnagar is a large and ancient city and containing 3000 pagodas, near each of which is a tank; it is chiefly inhabited by Brahmans.

Chámpánér is a finely situated fort on a crag of great height;16 the

- <sup>2</sup> From the number and antiquity of the Towers of Silence at Broach, the Pársis are supposed to have settled there in the 11th century. I. G.
- Pist., where the Parsis first landed in India, known to the Portugnese and long after their time as St. John. I. G. The text has a fiter which is liable to misinterpretation. Bassein is undoubtedly meant as all these places
- are in or about the Thana Dist. My view is confirmed by Gladwin and Trieff. Bayley (p. 18) makes Basé synonymous with Bassein.
- 4 Var. Bhakórá. Bhakór. In 1820, according to the I. G. there were 5 seaports, viz., Degam, Tankári Ghandhar, Dehej, and Broach. Bayley gives Bhakorah as a village on the frontier of Gujarát.
- <sup>4</sup> The old name for Káthiawár, or Suráshtra, known to the Greeks and Roman under the name of Σχυραρτρήνη, and Prakritised in that of Scrath which is to this day the name of a large district 100 miles in length in the south-west. T. G. See also Anc. Geog. Ind., p. 324.

length from the port of Ghogah (Gogo) to that of Arámráel is 125 kos; its breadth from Sardhár to the seaport of Diu, 72 kos. On the east it is bounded by Ahmadábád; on the north by the State of Kachh (Cutch); on the south and west by the (Indian) Ocean. Its climate is healthy, its fruits and flowers numerous and grapes and melons grow here. This territory is divided into 9 districts each inhabited by a different tribe, as follows:—

Parganahs of new Sorath.

Júnahgarh with suburban district, Sultánpúr, Barwa, I Hánsáwar, Chaura Rámpúr, Kandólná, Hast Jati, Und, Baysará, Mahandrdá, Bhántrór, and others.

Parganahs of old Sórath, called Nághar.8

Pattan Somnáth, Aunah, Delwárah, Manglór, Korinár, Múl Mahádeo, Chórwár, Diu, &c.

Parganahs of Gohelwárah.

Láthi, Lúliyánah, 9 Bhímpúr, 10 Jasdhón, 11 Mándwi, Biráí, 12 Sehor.

Parganahs of Wálák.13

Mohwah, Talájá, Pálitánah, &c.

Parganahs of Bádhélah.

Jagat (called Dwárká), Arámrác, Dhárhi.14

Parganahs of Barrá. (Berda?)

Barrá, Gúmli,15 &c.

Parganahs of the Baghélahlo tribe.

Sordhár, Gondhal (Gondal I. G.), Ráyet, Dhának, &c.

Parganahs of the Wúji in the uncultivated tracts. Jhánjhmér.

- <sup>1</sup> T. Rámrá. Bayley places it 10 kos from Jagat under the name of Arámah with several variant spellings, p. 196. I find no mention of Sardhár in the maps nor in Bayley. If the Dhár frontier is meant it must have been much more extended than it is at present.
  - \* Var. Sarwa.
  - Var. kandolhá.
  - 4 Var. Jagi, Cháni.

- 16 A note suggests, Sankúdhár. Perhaps Dhari.
- <sup>16</sup> So the text, following, as a note says, the maps, but MSS have Búmli. I. G. Ghumli.
- 16 Tho I. G. (I. 550) calls this clan Wághélá a tribe of Rájpúts, a remnant of the Solánki race who fled from Anhilwárah when that kingdom was destroyed by by Alá u'd dín in A. D. 1297.

### Parganahs of the Timbél tribe.

Not assigned in any of the MSS.

The first district known as New Sorath had remained unexplored on account of the impenetrable nature of the forests and the intricate windings of the mountains. A recluse by chance found his wav into it and through him a knowledge of it was gained. Here is the celebrated stone fortress of Júnahgarh which Sultán Máhmúd, I, captured by force of arms and at the foot of it built another fort of stone. At a distance of 8 kos is the fort of Osam? on the summit of a hill; it has now fallen into decay, but is worthy of restoration. There is also another stronghold on the summit of the hill of Girnál in which are many springs, a place of worship of the Jains. Adjacent is the port of Kondi Koliyát, which derives its name from two villages at a distance of one hos from it. In the rear of Júnahgarh is an island called Siálkokah 4 kos in length by 4 in breadth, adjacent to which is a forest, 3 kos square, where wild fruits grow and where there is a settlement of Kolis. This tract is called Gir. Near the village of Túnkágósha,6 the river Bhádar falls into ocean. Its fish are so delicate that they melt when exposed to the sun. Good, camels are here obtainable and a breed of horses somewhat larger than the  $G\acute{u}t$  (Gúnth).

In the second district is Pattan, a city on the seashore possessing a stone fort. This they call Pattan Somnáth. It is both a capacious harbour and a town having nine! stone towers on the plain, within an area of

- <sup>a</sup> Bigarah of Gujarát. One derivation of this name is its supposed meaning of two forts' (garh) because Mahmúd's army conquered on one day Chámpáner and Júnahgarh, Vol. I, p. 506, n. According to T. Júnahgarh signifies the ancient fort, because it was long concealed in the dense forest and discovered by a wood cutter. The legend runs that 1500 years elapsed from its discovery to the time of Mándalik from whom Mahmúd wrested the fortress. See Bayley's Hift, of Gujarát, pp. 161—182, for the derivation of the name.
- Var. and G. Adham. T. has both names. The I. G. gives the name to a hill near Girnál.
  - · Var. and G. Kondi or Gondilakiyát.
  - <sup>4</sup> T. Sialgoga.
- <sup>a</sup> T. calls this forest Navanagor; Bernonlli suggests that it belongs to Navanagar. The latter is a State on the S.

shore of the Gulf of Cutch.

- \*A note says Tunkragosá, in the maps. There are two rivers of the name of Bhádar; one rises in the Mándav hills and flowing S. W. falls into the sea at Nawi-Bandar afters a course of 115 miles. Another from the same hills, flowing E. falls into the Gulf of Cambay. The Kólis (or Coolies of Rennel and Coulis of M. Anquetil) are a predatory tribe and their distribution is not confined to a single province. They were spread over the country between Cambay and Ahmadúbád and the well-wooded country afforded thom a refuge from attack.
  - \* See Vol. I, p 133.
- <sup>1</sup> Gladwin has turned these words into a name which mistranslation I notice as it has been adopted by Count von Noer in his monograph on Akbar, p. 98. (Mrs. Beveridge's Transl.) The Diwsn of Junegarh, Haridás Viharidás, has cour-

three kos on the sea shore. Good swords are made here, there being a well in the vicinity the water of which gives them a keen edge.

The ports of Manglor,<sup>2</sup> Div Purbandar, Kórinár, Ahmadpúr and Muzaffarábád are about this coast. A spring of the Sarsuti (Saraswati<sup>3</sup>) rises near Somnáth. The Brahminical shrines are numerous, but among these Somnáth, Paránchi, and Korinár are accounted among the most sacred. Between the rivers Haran and Sarsuti about 4,000 years ago, 560,000,000 of the Yadu race while engaged in sport and merriment, fell to fighting and all of them perished in that field of death, and wonderful are the legends that they relate.<sup>4</sup> Two and a half kos from Pattan Somnáth is Bhál ka Tírath<sup>5</sup> (or the shrine of the Arrow). In this place an arrow struck Sri Kishn and buried itself under a pipal tree on the banks of the Sarsuti. This they call Pipal sir, and both these spots are held in great veneration. An extraordinary event occurs at the town of Múl Mahádeo where there is a temple dedicated to Siva. Every year on a certain day before the rainy season, a bird called Mukh<sup>6</sup> appears. It is somewhat smaller than pigeon, with a coarser beak and pied in colour. It alights

teonsly given me the benefit of his local knowledge. The new temple and the rains of the old are within the fort which was inhabited chiefly by the attendants of the shrine, the population living in the environs forming the town. Pattan is said to have had three walls and hence named Trigadhi. The length of the present walls covers nearly two miles. The fort had or has 10 towers or bastions of which 8 are existing and two are in ruins.

- <sup>2</sup> The I. G. gives Mangrol. The text. nnites Diu and Purbandar (elsewhere Porbandar) in one name, as Somnáth is called Deo Pattan, but it is probable that the port of Diu was intended by Abul Fazi.
- This river rises in Mount Abu and enters the Lunn of Cutch, though a part of its course near Sidhpur and Patan towns, is said to be subterraneau. If the sacred fiver of the Paujab that rises in the Sirmur hills be intended, this stream after its junction with the Ghaggar, is said in ancient times to have flowed through Rajputana into the Indus.

- Its reputation as the Arethusa of the Hindus, will account for its appearance wherever the sanctity of a shrine requires it.
- \* Wonderful, indeed, if they can beat this.
- Apparently the Bhát Kund of the I. G. Yudhisthira after the slaughter of the 56 tribes of the Yada race on the field of Kurukshetra and the death of Duryodhana, in grief at the loss of so many kinsmen, placed Parikshita on the throne of Indraprastha, and retired with Krishna and Baldeo to Dwarka. They were attacked by the Bhils and Krishna was slain. Baldeo founded the city of Patalibotra or Patas.
- Or Makh. In a work called Hakikati-Hindustán, the word is Sahh or Sukh. It has Beekh, but much of this narrative he has misunderstood. The name however, is of minor importance; the loss of the species must to the naturalist, be a regret, to the meteorological Department, a calamity. See Bayley, p. 197, who records this event and places it in the village of Madhópúr.

on the temple, disports itself for a while, and then rolls over and dies. On this day, the people of the city assemble and burn various kinds of perfume and from the proportions of black and white in the plumage of the bird, they calculate the extent of the coming rainfall, the black portending rain, the white, drought. In this tract, there are three crops of jowar annually. At Unah there are two reservoirs, one of which is called Januah, the other Ganyah. The water bubbles up and forms a stream and the fish of these two springs have three eyes, the third eye being in the forchead.

Between Manglor and Chordwar is a tract into which the sea enters. On a certain day of the year the water is sweet. It is related that in ancient times a certain person was in need of Ganges water. A recluse made a sign to the expanse and sweet water came forth. Ever since, upon that day this wonder is repeated to the astonishment of all.

In both of these districts the *Chelot* tribe of Rajputs prevail and the ruling power in this country is in their hands. At the present time the force (of the first district) consists of 1,000 horse and 2,000 foot. There is also a settlement of Ahirs called *Balbriyas*. The force (of the second district) is 2,000 horse and 3,000 foot.

In the third district at the foot of the Satránjak (Satranjaya) hill,<sup>2</sup> is a large fort and on its summit, the fort of Pálithának. Though in ruins, it deserves restoration. It is in great veneration with the Jains.<sup>3</sup> The port of Chogah (Gogo) is a dependency of this district. The island of Biram (Perim) was formerly the residence of the governor; it is 9 kos square and is a low rocky island in the midst of the sea. The Zamindár is of the Gohel' tribe. This district possesses 2,000 horse and 4,000 foot.

In the fourth district, are the ports of Mohnahb and Tabájá, inhabited by the Wali clan. The local force gonsists of 300 and 500 foot.

- I The name of one of the old territorial prants or district into which Kathiawar was divided, was called Bábriawar a hilly tract on the S. S.
- 2 The hill is sacred to Adimith the delified priest of the Jains. The description of Palitana in the I. G. taken from Mr. Burgess' "Notes of a visit to Satrunjaya Hill," gives an interesting sketch of this temple hill. Perim (the Baiones of the Periplus) is in the Gulf of Cambay, Spailes S. of Gogo.
  - 8 Gladwin has misunderstood this

- passage and misled Genl. Cunningham into reading this and the preceding word into the name of a town, Maabidcheen.
- 4 The Gobels came from the north in the 13th century, and retreating before the tide of Mahammadan conquest conquered for themselves new seats in the decadence of Anhilwara. They are now in E. Káthiawár.
- I. G. Mowa, S. E. of Kathiawár. Lat. 21° 3′ N., long. 71° 43′ E. Talájá, Lat. 21° 21′ 15″ N., long. 72° 4′ 30″ E. The I. G. montions the Wálás as one of

In the fifth district is Jagat, called also Dwárká. Sri Krishn came hither from Mathura (Muttra) and here died. It is a great Brahminical place of worship. The island of Sankúdhárl 4 kos requare is reckoned within this district. Near Árámráe is an island 70 kos in length and breadth. An area of half a kos of this land is for the most part stony and if an excavation is made salt-water pours in on all sides. Matik Ayáz, Kháş Khel, of Sultán Maḥmúd I of Gujerát, had, one-fourth of it dug up. The port of Aramráe is superior to most of its class. The inhabitants are of the Báḍhêl tribe. It musters 1,000 horse and 2,000 foot.

In the sixth district Barra, the country is so hilly, the forests so impenetrable and the defiles so extensive that it is impassable for troops. The Jaitwah clan inhabit it. It furnishes 1,000 horse and 2,000 foot.

In the seventh district are the Baghélahs. It furnishes 200 horse and the same number of foot. The Káthis are numerous in this tract; they are of the Ahir cast and are skilful in the management of horses. The military force is 6,000 cavalry and 6,000 infantry. They are said by some to be of Arabian origin. Cunning but hospitable, they will eat of the food of people of every caste, and are a handsome race. When any Jaghirdar comes amongst them they make it a condition that there shall be no account taken of the incontinence of any of their people. In the vicinity of the Káthis on the banks of the river Dóndi, there is a sept of Ahirs

four old races now existing as proprietors of the soil; the other three being the Jaitwas, Churásamas, and the Solankis.

- 1 Now called Beyt, in the Gulf of Cutch.
- see Bayley's Hist. of Gujarát, p. 233 et seq. Khás Khel represents the position of a royal equerry comband with high command. Ferishta calls him the مخاص or confidential attendant of Mahmúd. He was the premier nobio (Amír u'l Umará) and commander in chief of the army, fought and defeated the Portuguese fleet, at Chaul and sank the admiral's flagship valued at a krór of rupees. (A. H. 913—A. D. 1507)' Vol. II., p. 204. The family title of the
- Gáckwár is at tho present time "Sena Khás Khel Shamshèr Bahádur."
- <sup>3</sup> I have no doubt that this is Bardá (or Jaitwár) of the I. G.; a division of Káthia-wár lying between 21° 11′ and 21° 57′ N. lat., and 69° 30′ and 70° 7′ E. long., bounded N. and N.-E. by Hallár: E. by Sorath, and S.-W. by Arabian Sea. The Barda hills are from 12 to 18 miles distant from the coast and formed a favourite refuge for outlaws.
- 4 The name of Kathiawar, formerly given to a tract to the E. of the centre of the peninsula; from having been overrun by the Kathis who entered from Cutch in the 13th and 14th centuries, it was extended to the whole country by the Mahrattas who had come into contact with them in their foruys.

called *Poréchas.* Their force is 3,000 horse and the same number of foot. They are perpetually at feud with the *Jáms.* 2

In the eighth district Jhánjhmér is a maritime port. The Wáji tribe prevail. There are 200 horse and 2,000 foot.

In the ninth district is the Cháran tribe. Mahadeva formed a man from the sweat of his brow and gave him the charge of his own bull. He spoke in rhythmic sentences and sang the divine praises and revealed the past and the future. His descendants are known by his name. They chiefly recite panegyries and genealogies and in battle chant deeds of valour and animate the warriors and some of them reveal future events. There are few of the nobles of Hindustán who have not some of these in their retinue. This district furnishes 500 horse and 4,000 foot. The tribe called Bhát resemble this caste in their panegyries, their powers, their battle-chants, and genealogical recitations, and although in some of these respects they surpass them yet the Chárans are better swordsmen. Some pretend that the Chárans were called into life by the mere volition of the divinity, and the Bháts from Mahádeva.

Between Jhálwárah in the Sarkár of Ahmadábód, and Pattan and Sórath is a low-lying tract, 90 kos in length by 7 to 30 in breadth, called the Ran<sup>7</sup> (the Runn). Before the rainy season, the sea rises and covers this area and falls as the rains cease. A considerable part dries up and is covered with salt, the duties of which are collected in the parganah of Jhálwárah. Ahmadábád lies to the east of this tract. On the west is a

<sup>1</sup> Var. Porejah. Porbachha.

<sup>&</sup>lt;sup>2</sup> The Jároja Rájpúts, to which branch the Rao of Cutch belongs, are descended from the Súmma (Sama!) tribe and came originally from the north. They are said to have emigrated from Sind about the 15th century under the leadership of Jám Lákha, son of Jára from whom the tribe derive their name. Till 1540 the Jams ruled over Cutch in three About that year Khengár succeeded in making himself head of the tribe and master of the province. His uncle Jám Ráwal fled to Káthiawár and founded the present reigning house of Nawanagar, the rulers of which are still called Jams. See Jam under the account of Sind.

<sup>3</sup> Var. Wachi.

<sup>4</sup> According to the S. ul M. "of the bull he rode."

<sup>5</sup> The text has a misprint of age for

<sup>6</sup> The S. ul M. "from the sweat of the forehead of Mahádeva."

<sup>7</sup> The word in Hindi signifies a waste or wildorness. There are two, the northern or larger Runn, 160 by 80 miles has an area of about 7,000 square miles. The eastern or smaller Runn, 70 miles, from E. to W. covers an area of 2,000 square miles. Except a stray bird, a hord of wild asses, or an occasional caravan, no sign of life breaks the desert loneliness. I. G.

large separate territory called Kachchh (Cutch) 250 kos in length by 100 kos in breadth. Sind lies to the west of Cutch. The physical aspect of the country is barren and sandy. There is an excellent breed of horses believed to be of Arabian race, and there are good camels and goats. The chief of this country is of the Yadul race and his tribe is now known as Járéjas. The military force of this clan is 10,000 cavalry and 50,000 infantry. The men are handsome, tall in stature and wear long beards. The residence of the chief is Bhuj, which has two strong forts Jhárah and Kantkót. On the Gujarát side towards the south is a Zamindár of note whom they call  $J\acute{a}n$ , a relative of the ruler of the above-mentioned state. Sixty years ago, Jám Ráwal, after a war of two months, was driven out of the country, and settled in Sorath between the territories of the Jaitwah, Badhel, Charan, and Tumbel tribes. He possessed himself of other parts and founded the city of Nawanagar and his country received the name of Little Cutch. Sattarsál the present Rájah, is his grandson. There are many towns and the agricultural area is extensive. The residence of the chief is at Nawanagar and his force consists of 7,000 cavalry and 8,000 infantry. The camels and goats are of good breeds. For a considerable period the prime ministers of these two states have been of the Muḥammadau religion.

In the vicinity of Mórá and Mangréj is a state called Pal<sup>2</sup> through which runs the river Mahendri towards the Gujarát side. It has a separate

<sup>1</sup> The lunar race established by the Scythian Budh, expanded into fiftysix branches and filled nearly the whole of northern India. Yadu 4th in descent from Budh gave his name to the royal line which closed in Krishna and Balráma. While the solar race was confined to a narrow strip of land between the mountains and the Ganges, the Yadus had spread over the whole country. Yadu, says Elliot, (Races of the N.-W. P., Vol. I, 128) is the patronymic of all the descendants of Buddha, the ancestor of the Lunar race, of which the Bhatti and the Járéja are now the most conspictous, but the title of Jadon is now exclusively applied to that tribe which appears never to have strayed

far from the limits of the ancient Suraseni, and we consequently find them i large numbers in that neighbourhood. The tract south of the Cham hal called after them Yaduvati is in the possession of the Gwalior Mahrattas and the state of Kirauli on the Chambal is now their chief independent possession.

<sup>2</sup> Pák in the text, with the emendation Pál by the Editor. There are two of the name, one within Máhi Kánta on its N. E. frontier. The other one of the petty states in Hallár, Kathiawár. The former must here be meant, as Dángarpúr lies in lat. 23° 52′ N., long. 73° 49′ E. It is now a separate native state. The early history of the ruling family ruler who resides at Düngarpür. On the Málwah side is Bánswálah (Bánswára) and that too has a separate chief. Each of them has a force of 5,000 horse and 10,000 foot, and both are of the Sesódiah clan. The rulers were of the Ráná's family, but for some time past it has been otherwise.

Adjoining the Sarkár of Pattan is a state, the chief town of which is Siróhi and which possesses a force of 2,000 horse and 5,000 foot. On the summit of a hill is the strong fortress of Abúgarh (Mount Abu) about which are 12 flourishing villages. Pasturage is plentiful.

There is also a territory having Nazarbár¹ on the east, Mandú on the north, Nadót on the south and Chámpuner on the west. Its length is 60 kos, and its breadth 40. The chief is a Chauhán and his residence is the town of Ali Mohán. Wild elephants are numerous. The force consists of 600 horse and 15,000 foot.

Between Surat and Nazarbár is a mountainous but flourishing tract called Baglánah, the chief of which is a Rathor, commanding 3,000 cavalry and 10,000 infantry. Fine peaches, apples, grapes, pineapples, pomegranates, and oranges grow here. It possesses seven remarkable forts, among which are Mulér<sup>2</sup> and Salér.

Between the Sarkúrs of Nádót (Nandód), and Nazarbár is a hilly district 60 kos in length by 40 in breadth, which the Gohel tribe of Rájpúts inhabit. At the present day a Bráhmar, named Tewári has the management of affairs, the titular Rajah being of no account. He resides at Rújpíplah³ or Khúlú, and has a force of 3,000 horse and 7,000 foot. The

is not known with certainty; they paid tribute to the Mughal Empire and did military service, and on the fall of the Empire became tributary to the Mahrattas. I. G. The name Ptil says Bayley, seems to have been given to a congeries of petty hill states of which the rulers were Hindús. They appear to have included Dungárpúr, Bijanagar an! others.

1 See demarcations of Súbah of Málwah and the list of Sarkárs of that province. Nádot, is no doubt Nandod of the I. G. capital of the Rájpípla State. Let. 21° 54′ N., long. 73° 34′ E. These points of the compass would be true to a spectator boking towards Mandu with

Nádót in his rear. Nadarbar would then lie E. and Chámpáner W. In Bayley's map, Allee (sic) and Mohun are two distinct towns but adjacent. The izáfats of the text imply an impossible location and must be omitted.

2 Both these lie in the Navasari (Nosari) district of the Baroda territory, the latter in the S. E. corner. Muler is Mulher in I. G. and Mooleir in Bayley. Sengarh and Rupgarh are two other forts. The former 43 miles E. of Surat, and Rupgarh 10 miles S. of Songarh. The hills must refer to the Rajpipla range, shere being no other in the whole territory.

8 Rájpipla is now a native state within the Agency of Rewa Káutha, lying water of this tract is very unwholesome. Rice and honey of the finest are here produced.

This Súbah embraces 9 Sarkárs and 198 parganahs, of which 13 are ports. The revenue is 43 krors, 68 lakhs, 22,301 dáms (Rs. 10,920,557-8-0) and one lakh, 62,0284 Mahmúdis¹ as port dues.

The measured land (except Sorath which is paid in money by estimate) is 1 kror, 69 lakhs, 36,377 bighas, 3 biswas, out of which 4 lakhs, 20,274 dáms are Suyúrghál. The local force is 12,440 cavalry, and 61,100 infantry.

| 1583.   | Gujarát becomes a province of Akbar's Empire.       |      |         |

The Hindú chronicles record that in the year 802 of Bikramájit, corresponding with A. H. 1543 Saráj³ kindled the torch of independence and Gujarát became a separate state. Rájá Sri Bhor Deva ruler of Kanauj put to death one of his dependants, named Sámat Singh for his evil disposition, disloyalty and disorderly conduct, and seized his possessions. His wife was pregnant at the time, and urged by distress, she fled to Gujarát and in an uninhabited waste gave birth to an infant. It happened that a Jain⁴ dovotee named Saila Deva passing

<sup>1</sup> The dates and remarks in brackets are from the U.T.

<sup>&</sup>lt;sup>2</sup> 802 of the era of Vikramaditya is 745 A. D. = A. H. 128—9. The S. ul M. has 812. To correspond with A. H. 154, the S. date should be 826.

<sup>8</sup> Var. Pithráj. Manráj. Bansráj.

<sup>4</sup> Var. Ujjais, but as Anhilwarah Pattan has no fewer than 108 Jain temples, one-eighth of its present population being Jains and extensive Jain libraries of palm leaf MSS., it is probable

that way took compassion on the child and committed it to the charge of one of his disciples who took it to Rádhanpúr, and brought it up with tender solicitude. When he grew to manhood, associating with wicked reprobates. he fell to outrage and highway robbery and a gang of freebooters was formed. He plundered the Jujarat treasure on its way to Kanauj, and through the good fortune that attended him, he was joined by a grain merchant! called Chámpá. Wisdom guided his sword and from works of evil he inclined to deeds of good till in the fiftieth year of his age, he acquired the sovercignty of the state, and founded Pattan. It is said that he long deliberated regarding the site of his capital and was diligent in search of a suitable place. A cowherd called Auhil informed him that he knew an excellent site which he would show on condition that the king would call the city after his name. His offer being accepted, he directed them to a wooded spot where a hare, he narrated, had grappled with a dog and by sheer strength of limb had got away. The Rájá founded the city there and named it Anhilpur. Astrologers have predicted that after the lapse of 2,500 years, 7 months, 9 days, and 44 gharis, it shall be in rains. Through the corruption of language and syllabic change it came to be called Nahrwalah, but as in the tongue of that country 'chosen' is rendered 'Pattan,' it became universally distinguished by that name.

Rájá Sámant Singh gave his daughter in marriage to Sri Dandak Solanki, a descendant of the Delhi princes. She died when on the point of giving birth, but a son was by a surgical operation taken from her womb. The moon at the time was in the sixteenth mansion termed by the Hindús Múl, and hence he was named Múlráj. Rájá Sámant Singh adopted him as his own son and watched over his education. When he grew up, he entered into a conspiracy with some evil-disposed persons. The Rájá in a fit of drunkenness abdicated in his favour, but on becoming soher recalled his promise which so infuriated this miscreant that he slew his benefactor and assumed the severeignty. During the reign of Rájá Chámand

that the true reading is Jain and the U. T. and Gladwin, following a corrupt variant of the A. A. are in error in adopting Ujjain.

1 A trade in favour, apparently, with Gujarát kings. One was the intimate friend and counsellor of Sultán Muhammad. See Bayley, pp. 132 and 188.

<sup>2</sup> Variously taken as the 17th, 19th and 24th lunar asterism, containing 11 stars, apparently those in the tail of Scorpio and said to be unlucky. In the dissertation on Astronomy that follows in a subsequent book, Múl is counted as the 19th mansion. A. II. 416 or 1064 of the era of Bikramájít, Sultán Mahmúd of Ghazni conquered this country, but on leaving, he found no fitter person on whom he might confer the government than a descendant of the royal line, and having arranged for the annual payment of a tribute, he returned by way of Sind. What is remarkable is that at the desire of this prince he carried with him captive another scion of the same family. After a time, either through fear or foresight, the captive's restoration was solicited by the same prince who went out to meet him as he approached his territory in order that intriguers might not secure his favour. On the day that they were to meet, the Rájá fell asleep for a short space under a tree, when an animal of prey tore out an eye. At that time a blind man being incapacitated from reigning, the ungrateful soldiers substituted the captive prince in his place and placed the Rájá in confinement.

Kumarpal Solanki through fear of his life lived in retirement, but when the measure of Jai Singh's days became full, he came forth from the wastes of disappointed ambition and seated himself on the throne and considerably enlarged his dominions. Ajaipal wickedly poisoned his sovereign and for a fleeting gratification has acquired eternal abhorrence.

Lakhmúl having no issue, the worthiest representative of the Baghélah tribe was chosen as sovereign.

During the reign of Karan, the troops of Sultán Alá n'd dín overran Gujarát. Karan, defeated in the field, fled to the Deccan. Although previous to this time Muizz u'd dín Sám³ and Kuṭb u'd dín Eibak had made expeditions into the country, it was not until the reign of Alá u'd dín that it was formally annexed to Delhi.

In the reign of Muḥammad, son of Firúz Sháh, Nizám Mustakhráj, called also Rásti Khán, was appointed to the government of Gujarát, but

1 1064 A. B. is equivalent to A. D. 1007 and A. H. 416 to A. D. 1025. It was in Sopt. 1024 A. D. that Muhmúd set out from Ghazni in his expedition against Somnáth, which Forishta says occupied 2½ years, but from his own dates, and the time needed for his expedition against the Jats, could not have been more than one and a hulf.

2 The story is told differently in Elphinstone's Hist. of India, p. 338 (cd. 1866) on the authority of D'Herbelot and Bird's translation of the Mirat i Ahmadi. The ruler selected is said to have been a descendant of Dábishlim well known in connection with the fables of Pilpay. Ferishta calls both the princes by this name. The story is related at greater length from the Mirat i Ahmadi in Bayley's Hist. of Gujarát, pp. 29-34 and its probability defended in a discursive note.

- 3 Otherwise Shahab u'd din Ghori.
- 4 Malik Mufarrah Sultání, who afterwards obtained the title of Farhat u'l Mulk Résti Khán. Zafar Khán was ap-

his injustice becoming oppressive, he was removed and the viceroyalty was conferred on Zafar Khán son of Wajih u'l Mulk Tánk. The former governor disloyally rebelling, was killed in the field. The events of this time may be gathered from the history of the Delhi sovereigns. His son Tátár Khán was a man of base character and in whom wickedness was ingrained. At this period after the death of Sultan Muhammad when the throne of Delhi devolved on Sultan Mahmud, considerable anarchy prevailed. Zafar Khán withdrew from affairs and Tátár Khán assumed royal state and marched against Delhi, but was poisoned at the instigation of his father! who coming forth from his retirement had the Khutbah read and the coin struck in his own name, and was proclaimed under the title of Sultan Muzaffar. Gujarat thus became an independent kingdom and the government of the province was established in the Tank family. The father of Zafar, Wajin u'l Mulk had been a Brahman and was converted to Islam. Ahmad the son of Tátár Khán conspired against the life of his grandfather and took possession of the throne thus garnering eternal perdition. Ahmadábád was founded by him. With deep design and meditated hypocrisy he withdrew himself from all worldly pageautries till at a festival when all suspicion was laid asleep in the midst of universal enjoyment, he put to death twelve of his uncles. Subsequently he applied himself with earnestness to the duties of his government and was filled with continual remorse, and to his last breath set himself to a just and capable administration of the state.

When Dáúd Khán³ was deposed on account of his incapacity, Fath Khán son of Muḥammad Sháh was raised to the thrope and was proclaimed as Sultán Maḥmúd (I). He distinguished himself by his recognition of

pointed to succeed him on the 2nd Rabia I, 793 A. H. (21st Feb. 1391) Bayley Hist. of Guj., p. 58. Wajih u'l Mulk was a Hindu called Sadháran, converted to Islam and belonged, says the Miret. Sikandari, to the Tánk caste, an outcast branch of the Khatris. One of them was expelled for his use of strong drinks and the name is said in Hindi to signify an outcast. The derivation is asserted to rest on some form of the Sanskrit राजा.

ley's note. Ibid., p. 67. Baber calls the race Tang. Memoirs, Erskine, p. 311.

<sup>1 &#</sup>x27;It is commonly believed' says the Mirat i Sikandari that Tátár Khán placed his father in confinement and seated himself on the throne under title of Mhd. Sháh, whence the reprisal. *Ibid.*, p. 81—82.

<sup>&</sup>lt;sup>8</sup> A. D. 1407,

<sup>&</sup>lt;sup>8</sup> He reigned only 7 days. See Bayley's Hist. of Guj., pp. 161-2.

merit1 and by his justice, and girt himself with the fence of munificence and liberality. Malik Shaban who held the title of Imad u'l Mulk was of the utmost service to him.3 In the beginning of his reign some of the wealthy favourites conspired against the life of their lord and in the first instance plotted the overthrow of this judicious and sincere counsellor. Like intriguers as they were, they conveyed false allegations to the king. and as the worldly-minded are suspicious of each other, he imprisoned this peerless denizen of the world of faith and purposed putting him to death. He was on the point of being condemned when Malik Abdu'llah the superintendent of the elephants who had the royal ear, revealed the innocence of his faithful minister and tile designs of the conspirators. The king skilfully contrived his escape and, the veil of their pretence being rent asunder, the miscreants took to arms. The royal guard and the slaves together with the officers in charge of the elephants made a stand against them, and the elephants themselves proved of service in chastising the rebels. Disgracefully routed, these disloyal subjects met with just retribution. At Mahmud's death, his son Muzaffar Sháh, with the assistance of the nobles, ascended the throne and assumed the title of Sultán Muzaffar (II). His reign was beneficent. Shah Ismail of the Sufi'dynasty of Persia sent him as presents the choicest goods of Irak<sup>3</sup> and he in turn courteously reciprocated his acknowledgments. On his decease, his son succeeded him under the title of Sultan Sikandar. In a short time he was wickedly done to death by Imád u'l Mulk who raised his brother Nasír Khán to the The nobles plotted to displace him. The king appealed for succour to His Majesty Baber and engaged to surrender to him the port of Dib (Diu) with its dependencies and several krórs of tankahs, if he would advance in aid with his victorious troops. On account of his former ungrateful conduct, his offer was refused.4 At this juncture, Báhadur the son of Sultán

<sup>1</sup> And likewise by his enormous appetite. His daily allowance of food was one man Gujarát weight (equal to 15 Bahloli sers). He put aside 5 sers of boiled rice and before going to sleep, placed half on one side of his couch and half on the other, so that on whichever side he awoke, he might find something to eat. This was followed in the morning by a cup of honey, a cup of butter and 100 to 150 plantains. After this, Abul Fazl's appetite sinks into insignificance. His allowance was 22 sers daily.

<sup>2</sup> The whole account will be found in Bayley under this monarch's reign. The reader is referred to that work for details of this historical synopsis.

<sup>8</sup> A turquoise cup of great value, a chest full of jowels, many valuable tissues and 30 Persian horses. Bayley, p. 244.

<sup>\*</sup> Ferishta says (Bayley, p. 319) that this letter never reached Baber, the Rajah of Dungarpur having intercepted

Muzaffar came from Delhi at the invitation of the Bábriyas¹ and the nobles joined his standard. During his father's reign he was unable to remain at court through the envy borne towards him by his brother (Sikandar) He, therefore, betook himself to Sultán Ibrahim Lodi at Delhi and was received with favour. The nobles of Taunpúr invited him to be their king, and his intentions were inclined that way, when at this time his partisans wrote to him from Gujarát and entreated his acceptance of the throne. He willingly set out for the capital and being successful, he made his administration prosperous by his justice and liberality. Carried away by the intoxication of worldly success, he imprudently engaged in a war with Humayún, and being defeated, sullenly withdrew in discomfiture.

At his death, Mirán Muhammad ruler of Khándesh, his nephew, whom during his lifetime he had constituted his heir, was in his absence proclaimed in the khutbah by the nobles, but died shortly before reaching Gujarát. Mahmúd, grandson of Sultán Muzaffar, who was then in confinement, succeeded him. A miscreant called Burhán with some of his adherents put him to death<sup>8</sup> and under pretence of establishing a rightful

1 See p. 247, n. 1 and Bayloy, p. 35, n.; and for his adventures after leaving Gujarát, p. 321 et seq.

2 Baber says of him that he acted rightly in enforcing the law of retaliation by putting to death [mád u'l Mulk who had strangled his brother Sikandar, but besides this, he slow a number of his father's Amirs and gave proof of a blood-thirsty and ungovernable nature.

3 Bayley, p. 440, ct seq. Burhán who had been a low favourite of the king, poisoned and stabbed his master and sallied forth from the palace in the pomp of royalty when he was met and slain by Shirwán Khán Bhatti, adopted son of Afzal one of the murdered nobles. Ferishta's account is that on the death of the king becoming known, Itimád Khán with Changiz Khan, Ulug Khán, Habshi and others, came out to oppose him. Burhán was farown at the first charge and killed by Shirwán Khán. His feet were tied to a rope and he was dragged

through the city. The Mirat-i-Sikandari gives the name of Razi n'l Mulk to one of the nobles who was sent to bring the new king, Ahmad, to the capital, but Ferishta expressly states that this descendant of Ahmad Shah was named Razi u'l Mulk and was raised to the throne as Ahmad Sháh II. He continues, that disgusted with his nominal sovereignty, after a 5 years' tutelage he took refuge with Mirán Mubárak Sháh one of the principal nobles on whose death in the field, an accommodation was again effected with Itimád Khán, but having expressed himself too openly as desirous of the death of that minister, he himself was found dead the next day, near the river opposite the house of Wajih u'l Mulk and it was given out that, caught in a love intrigue in that nobleman's house, he had been unwittingly slain. The Mirat-i-Sikandari tells the story more in detail. On his death, Itimád Khán produced a boy (not named succession, massacred twelve of the nobles. Itimád Khán prudently absented himself on the occasion, and next morning collecting his followers, attacked him and put him to the death he deserved. He then set up one Razí u'l Mulk by name a descendant of Sultán Ahmad, I, under the title of Sultán Ahmad (II) as a nominal sovereign and took the government into his own hands. But when the boy grew to manhood, he altered his purpose and carrying him to the house of one of his adherents, he slew him and then leading some unknown minor by the hand, swore upon oath that he was the son of the last Sultán Mahmád (II). By fraudful allegations, he bestowed on him the sovereign authority and giving him the title of Sultán Muzaffar, he himself assumed the reins of power, until his present Majesty threw the shadow of justice over the province and annexed this prosperous country to the imperial dominions.

May it ever be adorned with perpetuity and high and low enjoy unfading blessings.

### Súbah of Ajmer (Ajmere).

It is situated in the second climate. Its length from the village of Bhakarl and dependencies of Ambér to Bikaner and Jaisalmír is 168 kos. Its breadth from the extreme limits of the Sarkár of Ajmer to Bánswárah is 150 kos. To the east lies Agra: to the north the dependencies of Delhi: to the south Gujarát: to the west Dipálpúr and Multán. The soil is sandy, and water obtainable only at great depth, whence the crops are dependent on rain. The winter is temperate, but the summer intensely hot. The spring harvest is inconsiderable. Jowári, Lahdarah and Moth are the most abundant crops. A seventh or an eighth of the produce is paid as revenue, and very little in money. The people dwell in tent-shaped bamboo huts.

in Ferishta nor, I think, in the Miraty whom he swore to be the son of Mahmúd Sháh, II, his mother's pregnancy not having been discovered till the 5th month when too late to check it. For Mahmúd had unnaturally interdicted the fortility of his wives to avoid a disputed throne. The nobles accepted or feared to oppose the pretension, and the boy was placed under the control of Itimad Khán. The subsequent history may be read in Ferishta, or in Brigg's free but generally faithful rendering, but the events of his worthless life

—it cannot be called a reign—are lost in the contests of the nobles for their share of short-lived power till the incorporation of the kingdom with the empire on the 24th Rajab A. II. 890 (Nov. 20th 1572). Bayley's translation concludes with the death of Maḥmúd Sháh IV, but his original continues the history of Gujarát to 1001 A. II. (1592-3) and the death by his own hand of the last of its sovereigns.

1 Var. Phakar, Bikhar. Bahkar. T. Bhakór. G. Bekhur.

To the south are the (Aravalli) mountains of which the passes are difficult to traverse.

This Súbah is formed of Mewár, Marwár and Hqdauti.¹ The former possesses 10,000 (troops) and the whole of the Sarkár of Chítór is dependent on it. Its length is 40 kos by 30 in breadth. It has three famous fortresses, Chítór the residence of the governor, Kombhalmér² and Mándal. In the village of Chádar,³ one of the dependencies of Chainpúr is a zinc mine. In Chainpúr and other dependencies of Mándal are copper mines, which are extremely profitable.

The chief of the state was formerly called Ráwal, but for a long time past has been known as Rana. He is of the Ghelot clan and pretends a descent from Noshirwan the Just.<sup>5</sup> An ancestor of this family through the vicissitudes of fortune came to Berár and was distinguished as the chief of Narnálah.6 About eight hundred years previous to the present time, Narnálah was taken by an enemy and many were slain. One Bápa, a child, was carried by his mother from this scene of desolation to Mewar, and found refuge with Rájah Mandalíkh a Bhil. When he grew up to man's estate he followed the pursuit of a shepherd and was devoted to hunting in which his daring was so conspicuous that he became in favour with the Rájá and a trusted minister of state. On the death of the Rájá, his four nephows disputed the succession, but they eventually decided to resign their pretensions in favour of Bápa and to acknowledge his authority. Bápa, however, declined their offer. It happened one day that the finger of one the these four brothers began to bleed, and he drew with the blood the ceremonial mark of installation on the forehead of Bápá, and the others also concurred in accepting his elevation. He then assumed the sovereignty. To this day the custom continues of making

<sup>1</sup> Harowtee or Háráote, a tract formed of the territory of Kotah and Buudi, and named after a dominant tribe of Rájpúts.

<sup>2</sup> I. G. Komulmair is a pass that runs through a series of rugged ravines in the Aravalli range and defended by a fortress. In art. Udaipúr, it is spol-Kumalmer.

<sup>3</sup> Var. Cháwar, Chaura, Jáwará. G. Chowra. In the I. G. (under Udaipúr) Jáwar, 24 miles S. of Udaipúr, is said to have possessed zinc mines now unworked.

<sup>4</sup> The foundation of the Ghelot dynasty. in Rájputána was effected by Bappa Rawal who is said to have established himself in Chitor and Mewár in 728 A. D. I. G.

b It is asserted that a daughter of Noshirwán, whose queen was a daughter of Maurice of Constantinople married into the Udaipúr royal family.

<sup>6</sup> Var. Parnálah. Barnálah. T. writes the former. G. the latter.

<sup>7</sup> Rao Mandalik says Bayley (Hist. Gujarát) is the title assumed by all the chiefs of Girnár, p. 183.

with human blood this sign of investiture on any Rúna who succeeds to the throne. The ungrateful monarch put the four brothers to death. On a former occasion while passing through the wilds, mistaking one Haranj, a hermit, for a wild animal, he fitted an arrow to his bow. The hermit intuitively prescient of this action through his purity of heart, made himself known, and the Rájá repentantly excused himself and humbly visited him with assiduity. The hermit one day predicted his elevation, and marvellous tales are told regarding him. Having made his head quarters at Sesodá, the tribe is called Sesodiah and as a Bráhman, at the beginning of their history nurtured their house, they are accounted as belonging to this caste.

When Ráwal Rattan Si<sup>3</sup> died, a relative named Arsi was raised to the throne and entitled Ráná from whom the present Rána Umrá is tenth in descent, thus; Hamír, Kaitá, Lákha, Mokal, Kombhár, Ráemal, Sángá, Udai Singh, Partáb, Umrá.

Ancient chroniclers record that Sultan Ala ud' din Khilji king of Delhi had heard that Rawal Rattan Si prince of Mewar possessed a most beautiful wife. He sent to demand her and was refused, upon which he led an army to enforce compliance and laid siege to Chitor. After a long persistence in beleaguering the place in vain, he had recourse to artifice and proposed terms of peace and friendship. The Rájá readily acquiesced and invited him to an entertainment. The Sultan entered the fort with his chosen followers and the meeting took place amid festivity and mirth, and finding his opportunity he seized the Rájá and carried him off. It is said that the Sultán's retinue consisted of a hundred men and 300 picked soldiers dressed as attendants. Before the Rájá's troops could assemble he was hurried away to the camp amidst the wailing of his people. king kept the Rájá in close confinement with a view to extort compliance with his desire. The faithful ministers of the Rájá implored the king not to injure him and promised to deliver up to him not only the object of his love but other suitable partners for his harem. They also sent a forged letter purporting to come from the virtuous queen and lulled his suspicions to sleep. The king was delighted and not only refrained from personal violence but treated the Rájá with cordiality. It is related that 700 of the choicest troops dressed as women were placed in litters and set out for the king's camp and it was given out that the Ráni with a large number of her attendants was on the way to the royal pavi-

love for the beautiful Padmávati is the subject of the Hindi poem of that name.

p. 191. Ratna Sinha, whose romantic

lion. When they approached the camp, word was sent that the Ráni wished to have an interview with the Raja previous to entering the king's quarters. Lapped in his illusive dream of security the king granted the interview, during which the soldiers seizing the opportunity, threw off their disguise and bore off their prince. Time after time the Rájpúts stood to face their pursuers fighting manfully and many were slain before the Rájá had gone far. At length the Chauháns, Gauri and Bádal made a stand fighting to the death enabling the Ráwal to reach Chitor in safety amidst universal acclamation. The king having endured great hardships during the siege and finding it to no purpose, returned to Delhi. After an interval, he set his heart again on the same project but returned discomfited. The Rawal wearied with these assaults, conceived that an interview with the king might result in an alliance and that he would thus escape this state of continual strife. Guided by a traitor he met the king at a place 7 kos from Chitor where he was basely slain. His relative Arsi, after this fatal event, was raised to the throne. The Sultan returned to the seige of Chitor and captured it. The Raja was slain fighting and all the women voluntarily perished by fire.

Hamír his son betook himself to the adjacent mountains. Sultán Muhammad Khúni<sup>1</sup> made over the government of Chítor to Maldeva Chauhán ruler of Jálor. As this prince was unable to bring the province into order, he summoned Hamír, made him his son-in-law, and through his means restored its prosperity. At his death, Hamír made away with his sons and raised the standard of independence.<sup>2</sup>

The present local militia consists of 16,000 cavalry and 40,000 infantry, but Mewár formerly controlled much more extensive territories, so much so that Rájah Sanka (Sanga) possessed a force of 180,000 cavalry and a numerous infantry.

Márwár is 100 kos in length by 60 in breadth, and it comprises the Sarkárs of Ajmer, Jodhpúr, Siróhi, Nágór, and Bikanér. It has long been head quarters of the Ráthor tribe. When Muizz u'd dín Sám³ had terminated his campaign zgainst Pithúrá (Prithwi Rájá, A. D. 1191—93),

1 "The murderer," the special title to fame of Muhammad Tuglak but this monopoly of the epithet is scarely fair to many other members of the royal houses of Delhi.

<sup>2</sup> As Abul Fazl has not thought it necessary to vive the list of the Mewár Ránas, I imitate his reserve. The lists of Wilson and Tod are summarised in the XXVIII Table of the U.T. p. 109. The dynasty of Bápá dates from A.D. 727 and Jewan Singh the last of his race was living in 1828.

Shaháb u'd dín Abúl Muzaffar Muhammad b. Sám al Ghori (A. D. 1192—1206) the first of the Ghori dynasty in India. he resolved to turn his arms against Jaichard king of Kanauj. The Rajah in his flight was drowned in the Ganges. His descendants fell into obscurity. His brother's son Siha, who resided in Shumsabad was slain with a large number of troops. His three sons Sútik, Ashwatthama3 and Ai's set out for Gujarát, and on their way rested at Pális near Sojhat. In this city dwelt a number of Brahmans who were much molested by the Minah tribe, some of whom at this period made a raid on the town. exiles came out, attacked them valorously, and put them to flight. Brahmans gave them great honour and treated them with every consideration and thus alleviated in some degree their distress of heart. As they acquired the means of worldly success they grew bolder and seized Khérb from the Gohel tribe and thus advanced their condition. Sutik independently wrested Edar from the Minahs, and Aj setting out for Baglanah, took that district by force from the Kolis. From that time their descendants have inhabited the country. The descendants of Ashwatthamá who remained in Marwar gradually gained credit till eventually Maldeva his sixteenth descendant waxed so powerful, that Sher Khan nearly lost his life in his campaign against him.6

This territory contains many forts, but the most important are Ajmér, Jodhpúr, Bíkáner, Jaisalmir, Amarkót, Abúgarh and Jálor.

 $H\acute{a}d\acute{a}\acute{u}ti^{7}$  is called also the  $Sark\acute{a}r$  of Nágór. It is inhabited by the Hádá (Hara) tribe.

This Súbah comprises 7 Sarkárs and 197 parganahs. The measured land is 2 Krors 14 lakhs, 35,941 bíghas, 7 biswas. The revenue in money

- 1 Other accounts assert that he was slain by an arrow from the bow of Kutbúddin the favorite general of Muhammad Ghori, and the founder of the Dynasty
  of the Slave Kings. It is historical that his body was found and recognised by his false teeth, "a circumstance," says Elphinstone in the solitary instance of humour in his solemn history, "which throws grave light on the state of manners." One result of this defeat was the retreat of the greater part of the Rahtor clan from Kanauj to Márwár.

Súbah of Dehli, (Delkí).

It is in the third climate. Its length from Palwal<sup>2</sup> to Lúdhianah on the banks of the Sallej is 165 kis. Its breadth from the Sarkir of Rewari to the Kumáon hills is 140 kis, and again from Hisár to Khizrábád is 130 kis. On the cast lies<sup>3</sup> the capital, Agra: on the north-cast it marches with Khitrábád in the Sábah of Oudh: to the north are mountains: on the south the Sábahs of Agra and Ajmer: on the west is Ludhiánah. The chief rivers are the Ganges and the Jumna, and both these take their rise in this Sábah. There are besides numerous other streams, amongst them the Ghaghar. The mountains principally to the north. The climate is nearly temperate. Much of the land is subject to inundation and in some places there are three harvests. The fruits of Irán, Turán and Hindustán are here grown and abundant flowers of various kinds. Lofty buildings of stone and brick delight the eye and gladden the heart, and it is scarce equalled for the choice productions of every clime.

Delhi is one of the greatest cities of antiquity. It was first called Indrapat\* and is situated in long.<sup>5</sup> 111, 38, lat. 28° 15. Although some

- In the maps Balmer (note) and Elliot. Races of the N. W. P. I. 37.
- A town of undoubted antiquity, supposed to figure in the earliest Aryan traditions under the name of Apelava, part of the Pándava kingdom of Ludraprástha.
- \* The word 'Kháwar' like 'Bákhtar' is often misapplied and the two are interchangeably and incorrectly used for E. and W. alke. Abul Fazl, however, invariably uses "Bakhtar" for W. and Kháwar for E, though with a southing tendency, as may be seen from his deli-

natations of other provinces. Here Agra is certainly E. of Delhi in longitude, but it is also almost south of it. See Cunningham's explanation of the anomalous use of 'Kháwar' and 'Dakkhin', in his Anc. Goog. of India, p. 94.

- Var. Indraparast.
- Properly Lat. 28° 38′ 58′ N., long. 77″ 16′ 30″ E. Though the true orthography of this name is Debli or Dilli, I shall continue to write as it is usually written and pronounced. A variant in the name of this Súbah, in one of the MSS. is Shahjehanábáð.

consider it as in the second climate, making the southern mountainous system begin from this region they are certainly mistaken as the latitude shows. Sultáns Kutbu'ddín (1,206-10), and Shamsu'ddín (Altmish, 1210-35) resided in the citadel of Rajah Pithúra (Prithwi). Sultan Chiyásúddín Balban erected another fort, intending it as a (royal) cemetery. He also built a handsome edifice in which if any criminal took sanctuary, he was absolved from retribution. Muizz ú'd din Kai Kubád (1286-9) founded another city on the banks of the Jumma called Kélúkhari. Amir Khusrau in his poem the "Kiránu's Sadain1" eulogises this city and its palace. It is now the last resting-place of Humáyún where a new and splendid monument has been erected. Sultan Alá n'd din (1295-1316) founded another city and fort called Siri. Tughlak ibid is a memorial of Tughlak Shih (1321-24). His son Muhammad (1324-51) founded another city and raised a lofty pile with a thousand columns of marble and constructed other noble edifices. Sultún Firóz (1351-88) gavo his own name to a large town which he founded and by a cutting from the Junna brought its waters to flow by. He likewise built another palace at a distance of 3 kós from Fírózábád, named Jahánnumá (the world-view). Three subterranean passages were made wide enough to admit of his passing along in mounted procession with the ladies of his harem; that towards the river, 5 jaribs in length; the second towards the Jahánnumá, 2 kós, and the third to old Delhi, 3 kás. Humáyún restored the citadel of Indravat and named it Dinpanáh Yasylum of the faith). Shér Khán destroyed the Delhi of Alá u'd dín and built a separate town. Although the monuments of these cities are themselves eloquent and teach us the highest moral lessons, yet even is this latest Delhi now for the most part in ruins. The cemeteries are, however, populous. Khwájah Kuṭb u'd dín U'shi lies here, and Shaikh Nizám n'd din Aulía, and Shaikh Nasír n'd din Mahmúd, tho Lamp of Delhi, and Malik Yársi-Pírán, and Shaikh Saláh, and Malik Kabir-i-Aulia, and Maulana Muhammad, and Haji Abdu't Wahhab and Shaikh Abdu'llah Kuraishi, and Shaikh Shams Turk-i-Biyahini, and Shaikh Shamsi-Autád and Amír Khusrau3 with many other servants of God in-

<sup>1</sup> An excellent analysis of this well known poem by E. B. Cowell will be found in the Journ. As. Soc. Bengul, 1860, p. 225.

It is supposed to have occupied the ground between Humáyán's tomb and the Ridge. I. G. The architecture of Delhi has been treated with appro-

ciation and judgment by Fergusson in his Hist. of Ind. and Eastern Arch. Tughlukábád stood to the S. of Delhi between the Kuth Minár and the Jumna.

Of these personages the last is sufficiently famous to dispense with a reference, the rest need not be pursued into the holy obscurity of their lives. That

structed in Divine knowledge who in this spot repose in their last sleep. Here too lie Sultán Shaháb u'd dín Ghóri, and Sultán Shams u'd dín, and Násir u'd dín Gházi, and Ghiyás ú'd dín, and Alá u'd dín and Kutb u'd dín, and Tughluk, and Muhammad Aádil, and Firoz and Bahlól, and Sikandar Lodi. Many now living, likewise, have 'aid out pleasant spots and groves for their final resting-place—to the introspective a source of blissful ecstasy, to the wise an incentive to watchfulness.

In the hill of *Islámábád* is a very deep spring called *Prabhás¹ Kand* from which warm water continually hubbles up, and which is a great place of worship.

Biswamitra Rikhesar<sup>2</sup> made a deep excavation of three bighas of this hill and devoted it to purposes of worship, and to this day it testifies to the antiquity of this construction.

Badáon is conspicuous amongst ancient cities and a great many holy religious are there buried.

A part of the northern mountains of this Súbah is called Kumáon. Here are mines of gold, silver, lead, iron, copper, orpiment and borax. Here also are found the musk-deer and the Kutás cow, as well as silkworms, hawks, falcons and game of various kinds, and honey in abundance and the species of horse called Gut. (Gunt.)

they were born in one place and died in another and were considered learned doctors is the usual extent of information to be gained after a laborious search very inadequately repaid by the result. The second and third and last on the list will be, found in Ferishta's Vitae et acta sanctorum at the close of his work.

¹ This is the name of another celebrated place of pilgrinnage near Dwarka. It was here that occurred the destruction of the Yadu race alluded to by Abul Fazl under 'Somnath,' when dissension excited by liquor brought about the fray where they all perished. By sending the ¹ to Prabhása, Krishna purposely prevented the Yáduvas from obtaining "Mukti" or final liberation which would have been the consequence of dying at Dwarká. Death at Prabhása conferred only Indra's heaven. Vishna

P. Wilson, 609. Prabhás is one of the 8 semi-divive beings called Vasus. These in the Mahábhárata are named Dhara, Dhruva, Soma, Aha, Anila, Anala, Pratyusha and Prabhása.

<sup>&</sup>lt;sup>2</sup> Visyamitr is the name of a celebra-'ed Kshatriya deriving his lineage from an ancestor of Kusik of the lunar race: ko was king of Kanya-Kubjá or Kananj. His famous quarrel with the rival sage Vasishtha to perform the great tribal sacrifice, runs through the Rig Veda and he succeeded in raising himself to the rank of a Bráhman by long and painful austerities. According to the Ramayan he became the companion and counsellor of the young Ramachandra. He was the father of Sakuntala by the nymph Menaká whom the gods, jealous of his increasing power, sent to seduce him from his passionless life.

see p. 172, note 2,

There is game in plenty in the Sarkár of Sambal (Sambhal), where the rhinoceros is found. It is an animal like a small elephant, without a trunk, and having a horn on its snout with which it attacks animals. From its skin, shields are made and from the horn, finger-guards for bowstrings string and the like. In the city of Sambal is a temple called Hari Mandal\* (the temple of Vishnu) belonging to a Bráhman, from among whose descendants the tenth avatár will appear in this spot. Hánsi is an ancient city, the resting-place of Jamál the successor of Shaikh Faríd-i-Shakarganj.

Near the town of Sahnah is a hot spring on the summit of a hill, the peculiarity of which is undoubtedly due to a sulphur mine.

Hisár (Hissár) was founded by Sultan Firóz who brought the waters of the Jumna to it by means of a cutting. A holy devotee predicted his accession to the throne and at his request the canal was made. Strange to say, it enters a pool named Bhadrá near the town of Sirsá, and there loses itself. Wonderful stories are related regarding it. There are few rivers in this district, and wells have to be dug a considerable depth.

Sahrind (Sirhind) is a city of note. Here are the gardens of Hájiz Rakhnah, the delight of all beholders.

Thenésur is accounted one of the most sacred places of pilgrimage. The Saraswati flows near it for which the Hindus have great veneration. Near it is a lake called Kurukshetra, which pilgrims from distant parts come to visit and where they bathe, and bestow charitable offerings.

- 1 On Baber's 5th invasion of India in 1525, he hunted the rhinoceros at Poshawar and killed two on the 15th Dec. as he notes in his memoirs. In 1519 he mentions having started many of these animals to the west of the Indus where none now exist.
  - <sup>2</sup> See p. 16: note.
  - See Vol. I. 325, 539.
- \* Genl. Cunningham says (p. 145) that the name of Sarhind or 'frontier of Hind' was popularly given to the city at an early period when it was the boundary town between the Hindus and later Muhammedan kingdoms of Ghazni and Lahore, but the name is probably much older as the astronomer Varáha Mihira mentions the Sairindhas immediately after the Kulútas or people of Kullu and

just before Brahmapura which was the capital of the hill country N. of Haridwer

It is an oblong sheet of water, 3,546 feet in length by 1,900. During eclipses of the moon, the waters of all other tanks are believed to visit this, so that the bather is blessed by the concentrated virtues of all other ablations. The town has rapidly declined in prosperity and is fast falling in rains. The sanitary arrangements enforced during the pilgrimage have checked their popularity and perhaps diminished their morit. The right ankle of Durga is said to have fallen here on her being cut to pieces and her limbs scattered over the earth by Vishnu. This lake and the visit of other pools at the time of This was the scene of the war of the Mahábhárat which took place in the latter end of the Dwápar Yug.

In the city of Has/inapúr reigned Rájá Bharata who by his justice and consideration for his people gathered a fitting reward of happiness, and his virtues and good deeds confirmed for a long period the succession in his family, and fortune favoured son after son. The eighth in lineal descent from him was Rújá Kur from whom Kuru-Kshetra received its appellation. After six intermediate progenitors, an heir was born named Vichitravirya, 1 who had two sons, one of whom was Dhritarúshtra. the father of 101 children, the eldest of whom was Rájá Duryodhana, and they are called the Kauravas. The other was Pandu. Although the first mentioned was the elder son yet on account of his blindness, the succession fell to his brother who obtained the sovereignty. His sons are called the Pándavas. There were five, namely, Yudishtira, Bhímsena, Arjuna, Nakula and Sahadeva. On Pandu's death the kingdom reverted to Dhritarashtra, but although the nominal sovereignty was his, the real power was possessed by Duryodhana, Since to crush their enemies is the way of the princes of the earth, Duryodhana was ever in fear of the Pandavas and sought their destruction. When Dhritarashtra observed the growing feud, he resolved to establish his nephews in the city of Váranávatra, and sent skilled artisans with instructions to build their residences. The workmen at the instigation of Duryodhana constructed a secret chamber of lac and pitch, in order that at a fitting opportunity the Pandavas might be destroyed in a flaming conflagration. But whom the Lord defends by his protection, what avails against him the striving of the impotent? When the Pandavas accepting their exile, settled in this spot, they became aware of the design. chance a woman with five sons dwelt hard by. The Pandavas set the house on fire and set out for the wilds with their mother, while their neighbours were consumed in the flames.

Duryodhana believing that the Pandavas were destroyed, held a festival of rejoicing. The Pandavas after many adventures came forth from the wilds to the inhabited country and settled in the city of Rampilá. In a short time, the fame of their valour, skill and open-handed munificence filled the world, but none knew their name or lineage, till Duryodhana himself awaking from his dream of security suspected that the burning of the Pandavas was a fable. After prosecuting inquiries, his suspicions

Dwaipáyana raised up three children to him, viz., Dhritarashtra, Pándu and Vidura, Vishnu Purána.

an eclipse, are mentioned by Albírúni in his India.

He died childless, but at the request of his mother Satya-vati, the Rishi

were confirmed, upon which he had recourse to entreaty, and recalled them with protestations of friendship, hoping thus to secure his aim. He bestowed Delhi (Indraprastha) upon them with half his kingdom and retained Hastinapur with the other half. Yudishthira by his prudence and good fortune aided by the divine favour rose to greatness and his administration advanced his power. The Kauravas flocked to his service, and in a short space he acquired universal sway. The other brothers likewise reduced many princes to their obedience. Duryodhana was beside himself at the sight of their sovereign splendour, and the pangs of envy drove him more distraught. With deceptive intent, he held a festival and invited the Pándavas and proposed a game of chaupar, playing himself, with cogged dice. By this means he won all they possessed. The last stake was made on the condition that if the Pandavas won, they should recover all that they had lost, but if otherwise, they were to quit the royal dominions and wander in the wilds for twelve years in the garb of mendicants after which they might return to civilised life for a year, and so conduct themselves that none should know them. If this last, particular were infringed, they would have to pass a similar period of twelve years in the forests. Unsuspecting foul play, their uprightness brought them to ruin. Elated by the success of his device, Duryodhana was lulled into the slumber of a false security while the Pandavas under the divine direction accomplished their part of the agreement. Duryod'ana now began to treat them with severity. Much altercation followed till the Pandavas consented to accept five villages if peacefully surrendered to them. Duryodhana in his pride refused and rose in arms. The scene of the conflict was in the vicinity of Kuru-kshetra. But as the end of the fraudful is disaster, Duryodhana, and his companions were totally destroyed and Yudishthira was victorious after eighteen days of successive engagements.

Towards the close of the *Dwapur Yug*, 135 years before the beginning of the *Kali Yug*, and 4,831 years anterior to this the 40th of the Divine Era, this event rose into fame and was left to posterity as a record of portentous warning.

It is said that in this mighty war, the army of the Kauravas consisted of 11 achhauhini, and that of the Pandavas of 7. An achhauhini consists of 21,870 men mounted on elephants, the same number in chariots, and 65,610<sup>2</sup> cavalry; and 109,350 infantry. Marvellous to relate but 11<sup>3</sup> individuals

<sup>&</sup>lt;sup>2</sup> See p. 15 where it is stated that from the era of Rája Yudhishthira to the 40th of Akbar's reign (A. H. 1003, commencing 5th Dec. 1594 and ending 25th November, 1595 A. D.) there had

clapsed 4,696 years, making the commencement of the Kali Yug\*3,101 B. C. To this period an addition of 135 brings the figure to 4,831.

<sup>\*</sup> Var. 12.

of both armies survived this war. Four of the army of Duryodhana, escaping with their lives took refuge with Yudhishtira, viz., Kripácháraya Bràhman who had been preceptor to both families and was renowned for wisdom and valour; Ashwatthámán who was celebrated for the same qualities; Kritvarmán Yadu, a brave champion; and Saniaya who, together with his reputation for wisdom, acquired renown as the charioteer of Dhritaráshtra. On the side of the Pandavas, eight survived, viz., the 5 brothers; Satyaki Yadu famous for his bravery and sagacity; Yuyutsa brother of Duryodhana by another mother, and Krishna. After this Yudishtira reigned supreme for 36 years, and his happy destiny and virtuous disposition discovering to him the vanity of mundane things, he sought retirement and resolutely forsook a world that oppresses the weak. Together with his brothren he chose the path of renunciation and played the last stake of his life.

This great war has been related in the Mahábhárata with numerous episodes in a hundred thousand couplets, and has been translated into Persian by command of His Majesty under the title of Razmidmah (History of the War). It is set forth in eighteen Parbh or books. first part is an account of the Kauravas and Pandavas and a list of contents. The second; Yudishtira sends his brethren to conquest—his supreme monarchy—the gambling feast held by the Kauravas, &c. Third, the departure of the Pandavas into the solitude of their exile and other events. Fourth, the coming of the Pandavas from the wilds to the city of Viráta and remaining unknown. Fifth, the Pandavas discover themselves; the mediation of Krishna and his rejection; the gathering at Kuru-kshetra and disposition of the armies. Sixth, the opening of the combat, the wounding of Bhishma, the slaughter of many of the sons of Dhritaráshtra, and the events of the ten days' engagement. Seventh, the council of war held by Duryodhana; the appointment of Dona's to the general command, his death and other events during five days. Eighth, description of the two days' battle; Duryodhana names Karna to the command, his exploits—the flight of Yudishtira before him—the death of Karna at the hand of Arjuna on the second day. Ninth, Shalya is appointed general on account of his heroism—his death—Duryodhana conceals himself in a tank—his end and that of many champions. Tenth, the conclusion of the war, the coming of Kritvarmáz, Ashwatthámán, and Kripacháraya to Duryodhana on the field of battle while still breathing and his advice of a night attack &c.

<sup>&</sup>lt;sup>1</sup> Var. 7. •The text has chosen the wrong variant in taking 11 for 12.

The founder according to tradition, of Dankaur in Balandshahar Dist I. G.

Eleventh, the lamentations of the women on both sides-Gándhári mother of Duryodhana curses Krishna. Twelfth, account of Yudishtira after the victory—his desire to resign his kingdom. Byás and Krishna comfort him Bhishma delivers many admirable and instructive by their counsel. maxims setting forth the duties of sovereign administration. the advice tendered by Bhishma. In my judgment, the 12th and 13th books should be comprised in one as they both contain the counsels of Bhishma, and the 9th divided into two, the one dealing with the episode of Shalya and the other with the death of Yudishtira. Fourteenth, the great horse-sacrifice (ashwa-medh). Fifteenth, the retirement to a hermitage of Dhritrarástra, Gándhári, and Kunti mother of Yudishtira. Sixteenth, the destruction of the Yadu tribe. Seventeenth, Rája Yudishtira retires with his brothren who all perish in a snow-drift. Eighteenth, Yudishtira in his own body mounts to the upper world; the dissolution of the mortal remains of his brethren. The conclusion called Harbans, contains the history of the Yadus.

In this work, although there are numerous extravagant tales and fictions of the imagination, yet it affords many instructive moral observations, and is an ample record of felicitous experience.

This Súbah contains 8 Sarkárs subdivided into 232 parganahs—the measured land consists of 2 krórs, 5 lakhs and 46,816 Bíghas 16 Biswas. The revenue is 60 krórs, 16 lakks 15,555 Dáms (Rs. 15,040,388-14) of which 3 krórs, 30 lakhs, 75,739 are Suyúrghal (Rs. 8,26,893-77). The local force is 31,490 Cavalry, 242,310 Infantry.

Tu ran, battle. See Elliot's Races, N.-W. P., I, p. 4. The Gujars, and Rangars of Delhi are notorious as being among the few rural populations that rose against us in the Mutiny, p. 180.

<sup>1</sup> This mound stands to this day considerably above the surrounding level and consists entirely of ancient remains crumbling to decay. It is a town of undoubted artiquity and supposed to figure in the earliest Aryan traditions under the name of Apelava, part of the Pandava Kingdom of Indraprasthra, I. G.

village called Ddhinah in the parganah af Sahnah near the confines of Jársah parganah, but no river is mentioned.

Claim descent from a Jádon Rájpút. Elliot. I. 99.

\*T. and G. have Serót and Seroot respectively. The I. G. mentions one in Rae Bareli the other in Fyzabad Dist. the latter was a flourishing weaving town and an imámbárah was built at a cost of £400 by a voluntary contribution of \(\frac{1}{4}\) of a pice for each piece of cloth from each weaver. The King of Oudh hearing of this, commended their liberality and piety and as an encouragement,

<sup>\*</sup> A note states that the maps mark a

graciously desired its continuance, as a contribution to his private purse. It is not reported how the weavers received the royal message.

<sup>2</sup> Sir H. Elliot has an interesting discussion on the Gaur Tagas, an important tribe of Brahmincal descent in the N.-W. of India extending over a great part of upper Rohilkhand, the upper Doah and the Delhi territory. Mr. Beames supplements his conclusions with a note which embodies without accepting the learned but unsafe deductious of General Cunningham. Tod's Rajasthán furnishes additional matter if not imformation, regarding the obscurity of their origin. Sherring's Hindu Tribes and Castes should be consulted in clucidation of the doubtful readings of the text, a note on each of which would be impracticable.

¹ Govardhan (nourisher of kine) name of a hill in Brindában, said to have been lifted up and supported by Krishna upon one finger for 7 days to shelter the cowherds from a storm of rain sent by Indra to test Krishna's divinity. Hence he is called Govardhan dhar and Giri dhar the bill-supporter. A variant of Atkhérah is Ankharah. G. and T. Augharah.

- A Jat clan.
- At p. 105, Bhattú. These discrepancies cannot always be noted and must be compared by reference to both lists, See Elliot's Races N-W. P. Vol. II, p. 133.
- \* This and the Sheoram are two of the chief Jat clans of the Delhi territory.

¹ This number does not accord withf
the totals. It would be as unprofitable
as it is hopoless to attempt to digest or
reconcile the order, number and length
of these reigns among various authorities, when dates are unknown or conjectural, the names of the princes disputed and their existence mythical.
After this, the minute exactness of their
duration of reigns would be ridiculous
enough even were not the totals short
of the number that heads the list, by
about 60 years. Tieffenthaler begins

the series from Yudishthira, differing as widely from Wilford and Tod, as they do from each other, and follows with another series from "quelques ecrits persans" at variance with what has preceded, and continuing with a further list of princes "rapportés encore différement" from a Persian history. The unravelling of this tangle will afford abundant occupation to those interested in these dotails. It suspect that they are not many.

' II.
Seven princes reigned 951 years and 7 months.

<sup>&</sup>lt;sup>1</sup> All the MSS, concur in this glaring error, an evident slip of a copyist of 14 for 4. He was raised to the throne on the 7th Maharram A. H. 717 (22nd March 1317) and was killed 5th Rabíi I, A. H. 721 (5th April 1321.)

<sup>&</sup>lt;sup>2</sup> Var. 8.

Thus in all MSS., but Ferishta discovers the method of computation by dating this reign from the abdication of

his father Firóz Sháh in his favour on the 6th Shabán 789 A. H. (21st Angust 1387) to his death on the 17th Rabii I 796 (20th January 1393) disregarding the two intermediate reigns.

I take the dates from the U. T. but discrepancies arise from disputed successions, and the state of anarchy which often existed in the intervals of these reigns.

Ys. M. D.

960 1552 Sultán Múbáriz Khán Adali. 961 1553 Ibrahim. some months. 962 I554 Sikandar, ditto. Humáyún, 1 3 0 ...

In the year 429 of the era of Bikramájít (A. D. 372) Anangpál<sup>1</sup> of the Tonwar tribe reigned with justice and founded Delhi. In the year 848 of the same luni-solar era (A. D. 791) in the vicinity of that renowned city, a hotly contested battle was fought between Prithiráj Tonwar and Bíldeva Chauhan, and the sovereignty was transferred to this latter tribe. During the reign of Rájá Pithaura (Prithwi Rájá) Sultán Muizzu'ddín Sám made several incursions into Hindustán without any material success. Hindu chronicles narrate that the Rájá engaged and defeated the Sultán<sup>2</sup> in seven pitched battles. In the year 588 A. H. (A. D. 1192,) an eighth engagement took place near Thánésar and the Rájá was taken prisoner. One hundred renowned champions (it is related) were among his special retainers. They were severally called Sámant3 and their extraordinary exploits cannot be expressed in language nor reconciled to experience or reason. It is said that at this battle none of these champions was present, and that the Rájá kept to his palace in selfish indulgence, passing his time in unseemly pleasure, heedless of the administration of the state and of the welfare of his troops.

The story runs that Rájá Jaichand Rathór, who held the supremacy of Hindustán was at this time ruling at Kanauj, and the other Rájás to some extent acknowledged his authority and he himself was so liberal-minded that many natives of Irán and Turán were engaged in his service. He announced his intention of celebrating the great sacrifice symbolic of

Another name for Raya-Séna. Wilford says that he was called Anangpála or befriended by love probably for his success in his amours, which he displayed by carrying off his brother's wife. Teiffenthaler calls him Rasena and credits him with the building of Delhi, which is confirmed by the Agnipurána. Wilford's criticism of these dates and his emendations (Vol. IX. As. Res. p. 169) are based on the incorrect statement that Abul Kazl makes the lat year of Vikramaditya to correspond with the lat of the Hijra. His conclusions are consequently entirely wrong.

- The text should have بسلطان instead of سلطان as in the S. ul M.
- I learn from Professor Cowell that the primary meaning attached to this torm in the St. Petersburg Dict. is 'neighbour,' and the second signification, 'vassal,' in which sense it often occurs in Sanskrit poetry. Monier Williams defines it as "a neighbouring king—a feudatory or tributary prince" and adds a third meaning 'a leader, general, champion' which applies to the text.

paramount supremacy and set about its preparations. One of its conditions is that all menial service should be performed by princes alone, and that even the duties of the royal scullery and the kindling of fires are directly a part of their office. He likewise promised to bestow his beautiful daughter on the bravest of the assembled chivalry. Rájá Pithaura had resolved to attend the festival, but a chance speech of some courtier that while the Chauhan sovereignty existed, the great sacrifice could not legitimately be performed by the Rathor chief, inflamed his ancestral pride and he held back. Rájá Jaichand proposed to lead an army against him, but his conusellors representing the duration of the war and the approach of the appointed assembly, dissuaded him from the enterprise. To carry out the integrity of the festival, a statue of Rájá Pithaura was made in gold and placed in the office of porter at the royal gates. Roused to indignation at this news, Rájá Pithaura set out in disguise accompanied by 500 picked warriors and suddenly appeared at the gathering and carrying off the image, he put a great number to the sword and hastily returned. The daughter of Jaichand, who was betrothed to another prince, hearing of this adventurous deed, fell in love with Pithaura and refused her suitor. Her father, wroth at her conduct, expelled her from her chamber in the palace and assigned her a separate dwelling. Pithaura, distracted at the news. returned with a determination to esponse her, and it was arranged that Chándá a bard, a rival in skill of Babylonian minstrelsy, should proceed to the court of Jaichand on the pretence of chanting his praises, while the Rájá himself with a body of chosen followers should accompany him as attendants. Love transformed the intention into act, and by this ingenious device and the spell of valour, he carried off his heart's desire, and after prodigies of bravery and heroism reached his own kingdom. The hundred Samants (above mentioned) accompanied him under various disguises. One after the other they covered his retreat and defeated their pursuers. Gobind Rác Gehlót made the first stand and bravely fighting, fell. Seven thousand of the enemy sank engulfed in death before him. Next Narsingh Deva, Chándá, Pundír, and Sárdhól³ Solanki, and Pálhan Deva Kachhwáhah with his two brothers, during the first day's action, after performing feats of astonishing heroism sold their lives dearly, and all these heroes perished in the retreat.

i The words in the text ایریست are meaningless, and the variants are not clearer, but to one MS. that reads بابری a marginal note explains it with the synonym بابلی Babylonian, a well-

known proverbial expression for fascination and enchaptment. I am not, however, satisfied with the gloss but cannot amend it.

Var. Sádhól.

The Raja, with the bard Chanda and two of his brothers, brought his bride to Delhi amid the admiration of a wondering world.

Unfortunately the prince was all engressed by his affection for his beautiful wife and neglected all other affairs. After a year had thus passed, Sultán Shahábu'ddin by reasor of the above events, formed an alliance with Rájá Jaichand, and assembling an army, invaded the country and captured many places. But no one dared even to represent, not to say, remedy this state of affairs. At last, the principal nobles meeting together, introduced Chándá through the seven gates of the palace, who entering the women's apartments, by his representations somewhat disturbed the Rájá's mind. But in the pride of his former victories, he marched to battle with but a small army. As his brave champions were now no more, his kingdom fallen from its ancient renown, and Jaichand his former ally, reversing his past policy, in league with the enemy, the Rájá in this contest was taken prisoner and carried by the Sultán to Ghazni. Chándá in his fidelity and loyalty hastened to Ghazni, entered the Sultan's service and gained his favour. By his aldress, he discovered the Raja and conforted him in his prison. He proposed that he should praise his dexterity with the bow to the Sultan who would desire to witness it, and that then he might use his opportunity. The proposal was carried out and the Rájá pierced the Sultán with an arrow. His retainers fell upon the Rájá and Chándá and cut them to pieces.

The Persian historians give a different account and state that the Rájá was killed in battle.

Fate discloses many such events from its treasure-honse of wonders. But where—and blessed is he—who will take warning thereby and act on the lesson?

When the Chauhan dynasty fell, the choicest portion of Hindustan passed into the hands of Sultan Muizzu'ddin Ghori. Leaving Malik Kutbu'ddin (Eibak) who was one of his slaves, at the village Guhrám, he himself returned to Ghazni, laying waste the hilly country on his northern march. Kutbu'ddin in the same year possessed himself of Delhi and many other places and followed up his successes with remarkable ability. On the death of Muizzu'ddin, Ghiyaşu'ddin Maḥmud son of Ghiyaşu'ddin Muḥammad sent from Firozkoh (his capital) the umbrella and insignia of royalty to Malik Kutbu'ddin. Kutbu'ddin was

<sup>&</sup>lt;sup>1</sup> See list of towns in Sirhind Division, p. 296. Ferishta writes کهرام and places

enthroned at Lahore and exalted his reputation by his justice, munificence and valour. He lost his life while playing at changán.

The nobles raised his son Arám Sháh to the throne, but a strong faction set up Malik Altmish, who had been a purchased slave, and was the sonin-law and adopted heir of Kutbu'ddin. Aram Shah was defeated and retired into obscurity, and Altmish assumed the title of Shamsu'ddin. It is said that his father was chief of some of the Turkish tribes. brethren and cousins distracted by envy, sold, like Joseph, this nursling of intelligence, into slavery. Through the vicissitudes of fortune, he had various changes of masters until a merchant brought him to Ghazni. Sultán Muizzu'ddín Sám proposed to purchase him, but his owner chaffered for his value and placed an exorbitant price on him. The Sultan enraged, forbade any one to purchase him. Kutbu'ddin on his return to Ghazni after the conquest of Gujarát, having obtained permission, bought him for a large sum and adopted him as a son. Khwájah Kutbu'ddín Ushi² was his contemporary and edified the world by his outward demeanour and the sanctity of his interior life. When Altmish died, his son (Ruknu'ddín Fíróz Sháh) succeeded him who regarded wealth as a means of self-indulgence and thought little of winning the affections of his people. He made over the control of affairs to his mother Shah Turkan. The nobles withdrawing their allegiance raised Razíah the daughter of Sultán Shamsu'ddin to the throne. The Sultan himself had previously made her

¹ He fell with his horse while playing at polo, the modern term for an ancient game, and the penmel of his saddle entered his chest and killed him. A. H. 607, (1210 A. D.) Ferishta. The Katab Minar, a mosque at Delhi still preserve his name, if not his memory! The old changán or polo grounds still exist, says Canningham, (Ladák, p. 311) in every large town in the Panjab hills; in Biláspur, Nadon, Kangra, Haripur and Chamba where the goal stones are still standing. The game is repeatedly mentioned by Baber, but became obsolete gradually after his time.

<sup>2</sup> Ush is in Transoxiana and was his birthplace. He is also known as Káki from the miraculous production of bread cakes of the kind called in the vornacular kák supplied by the prophet Khizr for the needs of his family whose sustenanco his meditations gave him no leisure or occasion to provide. These cakes were in Ferishta's day still baked and offered at his shrine. His mother was a woman of great and austere virtue. and his future sanctity was predicted by Khizr by whose personal apparition he was twice honoured. He was offered by Altmish the office of Shaikh u'l Islâm which he declined. His intercourse with that monarch and the eminent saints of his day may be gathered from Ferishta's monograph of his life at the close of his history. He died on the 14th Rabai I, A. II. 634, (A. D. 1236). A sketch of his life is given in Dorn's History of the Afghans, Book III, p. 2, and his death placed in A. H. 603,

his heir. Some of his courtiers asked him the reason of his doing so while he had sons still living. He replied that his sons, addicted to drinking were unfitted for the dignity. During the reign of Muizu'ddin Bahrám Sháh, the Mughal troops devastated Lahore. A disloyal faction imprisoned the king and put him to death. In the reign of Sultán Aláu'ddín Masaúd Sháh occurred an eruption of the Mughals into Bengal, entering by way of China or Tibet, but his troops defeated them. Another body advanced from Turkishtán to Uch. The Sultán set out to engage them, but on reaching the banks of the Biáh, intelligence reached him that the enemy had retreated. He returned to Dolhi and there affected the company of low and base flatterers and ended his days in prison.

Násiru'ddin Mahmúd ruled with capacity and munificence. In his time also, the Mughals entered the Panjáb but retreated on hearing of his approach.

The "Tabakát i Násiri" takes its name from him. He had many excellent qualities. Ghiyaşu'ddin Balban who had been the slave and son-in-law of his father, he raised to the rank of chief minister and gave him the title of Ulugh! Khán. This minister tilled his high office worthily and sought the divine favour in watchfulness over his people.

Násiru'ddín dying without children, the faithful minister was raised to the sovereignty. Clemency and solid gravity of character added fresh lustre to his dignity, and far from spending his precious hours in unworthy pursuits, he gladdened his kingdom by his appreciation of merit, his knowledge of men and his devotion to God. Those of ill repute and the wicked were banished into obscurity, and the good happily prospered under his encouragement. He conferred the government of the Panjáb, on his eldest son Muḥammad, commonly known as Khán i Shahid, through whose valour and vigilance the province rested in security. Mír Khusrau and Mír Hasan were in his suite. He was returning from a visit to his father

- A general history of Persia and India, down to the time of Sultán Nasíru'ddin of Delhi, A. D. 1252. The author was Abu Omar Manháj al Jorjáni.
- as it is sometimes written is a Tartar word and signifies 'great,' and used often as a proper name as in the case of Ulugh Beg grandson of Timúr.
- Or the martyred prince. See his death in Elphinstone, after his defeat of

the Mughals under Tímúr Khán, and in Forishta under Ghiyásu'ddin Balban where Abul Fazi's assertion of the prince's unpreparedness is not confirmed. It was in the pursuit of the flying Mughals that he was surprised by an ambush while he halted by the banks of a stream to drink and to return thanks to God for his victory. Mír Khusran alludes to his escape in his well-known poem, the Khizr Kháni.

unprepared for hostilities, when he encountered some Mughal troops between Dipalpur and Lahor and lost his life in the action. Mir Khusran was taken prisoner but contrived to escape. The province of Bengal had been bestowed by Ghiyáşu'ddin on his youngest son Bughra Khán.

On the death of Ghiyáşu'ddín, the nobles despatched Kai Khusrau the son of Khán i Shahíd, who had been nominated heir, to (his father's government of) Multán, and bestowed the title of Sultán Muizzu'ddín Kaikubád on the son of Bughra Khán who thus acquired the sovereignty His father in Bengal, assuming the title of Násiru'ddín marched to Delhi whence Kaikubád advanced with a force to encounter The armies met on the banks of the Sarjú (Gogra) near the town of Ajodhya, and through the conspiracy of disloyal and evil counsellors, the father after the interview returned to Bengal and the supreme sovereignty rested with the son. It is strange that Amír Khusrau should have chosen such a subject as this interview for encomium in his poem the Kirán u's Sadain. The fortunes of this thankless unfilial son through his insobriety fell into decay. A faction set up his son, under the title of Shamsn'ddin to remedy the disorder, and the body of the wretched Kaikubád was flung into the waters of the Jumna. Shamsu'ddín was set aside and the sovereignty, by assent of the ministers, conferred on the Khiljis.

Jalálu'ddín who was paymaster of the Imperial forces, ascended the throne and by his simplicity of character lent no favour to the designs of the factious. His nephew Malik Aláu'ddín who had been brought up under his care, went from Karrah to the Deccan and having amassed great booty was inflated by its possession and proved rebellious. The Sultán by the persuasion of intriguers advanced from Delhi to Karrah, where the traitor slew him and assumed the title of Sultán Aláu'ddín. Thus by a marvel of Fate did the empire devolve on this miscreant, yet he accomplished some excellent reforms. On several occasions he encountered and defeated the Mughals. Mír Khusrau dedicated to him his Khamsahl and the story of Dewal<sup>2</sup> Ráni to his son Khizr Khán. Unfortunately he aban-

the son of the Emperor Alla, written in an elegant poem by the noble Chusero." The story will be found in Briggs, Vol. I, pp. 327-366. Kaunla Devi her mother, the wife of Karan Ráo of Nahrwála had been taken captico in the wars against that prince (1297) and placed in the royal harem. In 1306 an expedition

<sup>&</sup>lt;sup>2</sup> Known as Dewildé to western literature. Moore in a note to the preface of Lalla Rookh alludes to this poem on the authority of Ferishta as "the history of the loves of Dewildé and Chizer

doned his usual prudence and fell under the influence of a cunuch (Káfúr) on whom he conferred the conduct of the administration. Through the suggestions of that wretch, his three sons Khizr Khán, Shádi Khán and Mubárak Khán were imprisoned, and on his own death, by the same instrumentality the youngest son was raised to the throne under the title of Shahábu'ddín. He destroyed the sight of two of his brothers, but Mubárak Khán providentially escaped. A few days later the wretch (Káfúr) was himself assassinated and Mubárak Khán who was in prison became chief minister.

Subsequently he deposed his younger brother, and assumed the title of Sultan Kuthu'ddin. He reduced Gujarat and the Deccan. his incapacity and licentions disposition he chose a favourite of the lower orders named Hasan for the comeliness of his person, and bestowed on him the title of Khusrau Khau. Although the faithful ministers of the Crown represented the man's unworthiness and infamy, the king regarded their honest advice as the suggestions of envy, till Khusrau Khán, plotting secretly, dared to assassinate his master and assumed the sovereignty under the title of Nasirn'ddin. He put to death the surviving members of the family of Aláu'ddín and perpetrated the greatest cruelties. Malik Gházi who was one of Aláu'ddin's chief nobles, defeated and slew him and with the concurrence of the nobles, ascended the throne with the title of Sultán -Ghiyaşu'ddin Tughlak Shah. After settling the affairs of Bengal, he returned to Delhi. His son Muhammad Khan erected a pavilion at the distance of 3 kós from Delhi, in the space of three days and with much entreaty invited the king to enter it. The roof of the building fell in and the king perished in the ruins. Although (Ziáu'ddín) Barni¹ endeavours

proceeding to the Decean under Káfúr, Kannla Devi represented to the king that she had borne two daughters to her former husband, that one had died, but the other Dewal Devi was still alive and she desired to recover her. Passing through Málwah, Káfúr demanded her of Karan Rae without success. Shankan Deva Ráe, prince of Deogarh had long sought to obtain her hand, but the proud Rajput had hitherto refused his daughter to the upstart Mahratta. The desire to gain his aid is, the war against the king's troops secured his consent and he des-

patched her under an escort which fell in secidentally with a body of Muhammadan troops near the caves of Ellora. An engagement resulted in the capture of the princess and her despatch to her mother at Delhi. Her beauty won the heart of Khizr Khán the king's son and the rough course of their love with its hapless termination is celebrated in the Khizr Kháni. When they first met these precocious lovers were respectively ten and eight years of age.

¹ The well-known author of the Tarikh i Firoz Sháhi. to substantiate the innocence of Muhammad Khán, the haste with which the pavilion was erected, and the engerness to entertain the king therein, have all the appearance of guilty design.

When Sultán Muḥammad died, Fíróz the son of (Sálár) Rajab his paternal uncle was, according to the will of Muḥammad, raised to the throne. He ruled with capacity and prudence and left many useful works as memorials of his reign. At his death anarchy to some extent prevailed in the empire. A faction set up his grandson (Ghiyáṣa'ddín) Tughlak Sháh (II) but in a short space he was sent to his last sleep by the hands of traitors and Abu Bakrl another grandson succeeded him.

In the reign of Sultán Maḥmúd, the direction of affairs devolved on Mallú Khán who received the title of Ikbál Khán, but his inexpacity and ill-fortune were unequal to the burden of state guidance. Internal disorders arose. A grandson of Firóz Sháh was acknowledged by some, under the title of Naṣrat Sháh and increased the anarchy. Constant struggles took place in the vicinity of Delhi till in the year 801 Å. H. (A. D. 1398) Timúr invaded the country. Sultán Maḥmúd fled to Gujarát and every competitor for power was crushed.

When Timúr was on his return march, he left Khizr Khán, whom he had met during this invasion, in the government of Multán and Dípálpúr. For two months Delhi was a waste. Naṣrat Sháh who had fled into the Doáb, took possession of the throne. Iṣbál Khán then marched on Delhi and seized it and the other fled to Mewát. Maḥmúd Khán now came from Gujarát and Iṣbál Khán feigned acceptance of his service. One night the Sultán, in desperation of his affairs departed alone to the court of Sultán Ibrahím of the Sharṣi dynasty (of Jannpúr) but met with no encouragement nor assistance. He was compelled therefore to return and Iṣbál Khán now opposed him but without success, and subsequently was taken prisoner in an action against Khizr Khán, and was slain. Sultán Maḥmúd now took possession of Delhi, and was for some time occupied in hostilities, till he was carried off by an illness, and the Khilji dynasty terminated with him.

For a short period allegiance was paid to Daulat Khan (Lodi) Khásah Khail, till Khizi Khán marched from Multán and took possession of Delhi. Malik Mardán Daulat Khán, one of the nobles of the Court of Sultán Firóz, had adopted Sulaimán the father of Khizi Khán as his son who subsequently, in default of recognised heirs, succeeded to his govern-

ment. Khizr Khán in gratitude (to Timúr) did not assume the regal title but styled his Court "The Sublime Standards," and adorned the Khutbah with the name of that illustrious monarch and afterwards with that of Mírzá Sháh Rukh, but it concluded with a prayer for himself. His son Mubárak Sháh succeeded him ir accordance with his will. Sultán Ibrahim Sharki and Hoshang (of Málwah) being engaged in hostilities, Mubárak intended an attack on Kálpi and the adjacent territories, but he was perfidiously set upon by a band of traitors and slain. Muhammad Sháh, who according to some was the son of Farid the son of Khizr Khán, while another account makes him the son of Mubárak, was raised to the Sultán Aláu'ddín (his son and successor) possessed no share of rectitude and abandoned himself to licentious gratification. Bahlól (Lodi) now aspired to greatness. He was the nephew of Sultan Shah Lodi of the Sháhú Khél\* tribe (of Afgháns). His father Bahrám in the time of Sultan Mahmud, came with five sons from the borders of Balot to Multán and subsisted with some difficulty by traffic. Sultán Sháh obtained service under Khizr Khán. He received the title of Islám Khán, and the revenues of Sirhird were assigned to him. Bahlol, the son of his nephow on his brother's side was prospering ill in Sirhind, but was received into favour by him and adopted as a son. Bahlól was born in Multán and during the month in which his birth was expected, a beam of the house fell and killed his mother. He was extracted by the Cæsarean operation

- ¹ The obscurity of this sentence in the original lies in the elliptical style of Abul Fazl. The sense I have given is in accordance with the facts of Ferishta who says that Malik Marwán Daulát had adopted Sulaimán, and being himself appointed to the government of Multán, was succeeded at his death by his own son Malik Shaikh. The latter dying, made way for Sulaimán who was in turn succeeded by his son Khizr Khán. Ferishta makes the name Marwán and not Mardán.
- <sup>2</sup> The MSS. omit the negative, but the text supplies it. Ferishta is clear on the point. "He did not take the name of king nor assume any regal epithet." The title in the text is not mentioned by him, which, however, is somewhat analogous to the Ottoman style of the 'Babi

- Aali' or Sublime Porte, though in the latter it is absolute, and in the former vicarious.
- He had laid the foundations of the city of Mubárakábád on the Jumna and was in the habit of visiting it to inspect the progress of the buildings. It was in one of these that he was assassinated at the instigation of the Wazir Sarwar ul Mulk on the 9th Rajab 837 (A. D. 1433). Ferishta.
  - <sup>4</sup> See Vol. I, p. 502.
- which would alter the character of his mercantile speculations and substitute opulonce for distress.
- His eldest son, the others were Malik Kálá, Malik Fíróz, Malik Muhammad and Malik Khwájah. Forishta.

and his destiny proved fortunate. Although he allowed his sovereign (Aláu'ddín) who lived in retirement (at Badáon) to retain nominal power, he boldly assumed the supreme authority. His reign showed some capacity and his conduct was marked by intelligence and recognition of merit. He was carried off by an illness in his 80th year. It is said that he once happened to meet with a darvesh, having at the time with him but a trifling sum of money. The spiritually enlightened recluse called out. "Who will buy the kingdom of Delhi for such a sum of money?" His companions laughed in mockery at the man, but Bahlól frankly gave him all he had, and paid him reverence and eventually fulfilled the prediction.2 He carried on wars with the Sharki kings which continued with varying successes, until he took Jaunpur and this dynasty was overthrown. left his son, Bárbak at Jaunpúr and returned to Delhi. As he was returning to Delhi from an expedition against Gwalior he died near the town of Saketh.3 His son Nizám Khán with the concurrence of the nobles, assumed the sovereignty and was styled Sultán Sikandar. He ruled with sagacity and appreciation of character and transferred the capital to Agra In the year A. H. 911 (A. D. 1505), a great earthquake occurred and many lofty buildings were levelled. Sikandar was of comely person and mild disposition and popular from his liberality and open-handedness.

On his death, his son Sultán Ibrahím ascended the throne of Delhi and his authority was recognised as far as the confines of Jaunpúr, the nobles conferring upon Jalál Khán another son of Sikandar's, the sovereignty of Jaunpúr. Dissensions followed between the brothers, and Jalál Khán abandoned his government and took refuge with the governor of Gwalior but meeting with no success, fled to the court of Sultán Maḥmúd of Málwah, and succeeding as little there, he set out for Gondwánah. There the royal partisans seized him and carried him to the king by whom he was put to death. During his reign various chiefs revolted, such as Daryá Khán Loháni viceroy of Behár, and his son Bahádur Khán had the Khutbah read and the coin minted in his own name. Daulat Khán Lodi fled to Kabul and sought protection at the court of Baber, whom he led to the conquest of Hindustán while affairs resulted in a prosperous issue.

- Removing the name of Aláu'ddin from the Khutbah, and assuming the insignia of royalty. Ferishta
  - This story is also told in Ferishta.
- "Near Bhadáwali, one of the dependencies of Saket," Ferishta; but Abul Fazl places Bhadauli in the Sarkár of Sahár in the Agra Súbah. It was on his

return from Etawah that he was soized with illness. Suketa or Saketa according to the I. G. is one of the classical names borne by Ajodhya, the ancient capital of Oudh. Abul Fazl places Saketh in the Sarkar of Kanauj.

<sup>4</sup> He was captured by a body of Gonds. Ferishta.

## Súbah of Láhor.

It is situated in the third climate. Its length from the river Satlaj (Sutlej) to the Sind river is 180 kós. Its breadth from Bhimbar to Chankhandi one of the dependencies of Satyarah, 86 kós. It is bounded on the east by Sirhind; on the north by Kashmír; on the south by Bikunér and Ajmer; on the west by Multán. It has six principal rivers which all flow from the northern mountains.

- (1.) The Sutlej the ancient name of which is Shattudar<sup>2</sup> and whose source is in the Káhlór hills. Itúpar, Máchhíwárah and Lúdhiánah are situated on its banks, and it receives the Biáh at the Banh<sup>3</sup> ferry.
- (2.) The Bùth (Beás) was anciently called Bipásha, (Sansk. Vipasa Gr. Hyphasis). Its source is named Biahkund in the Kullu mountains in the vicinity of which the town of Sultanpur<sup>\*</sup> stands above the river.
- (3.) The Ravi, the ancient *l'rawati*, rises in the Bhadrál<sup>6</sup> hills. Lahor the capital, is situated on its banks.
- (4.) The Chenáb, anciently Chandarbhágá. From the summit of the Khatwár<sup>7</sup> range isspe two sweet water streams, the one called Chandar, the
- A Satgarha is situated 13 miles east of Gugaira on one of the projecting points of the high bank which marks the limits of the windings of the Ravi on the east. The name means 'seven eastles' but these no longer exist. There is an old brick fort and several isolated mounds which mark the site of an ancient city. Cunningham, p. 212.
- <sup>2</sup> Zaραδος (various reading Zaραδρης) of Ptolemy: the Sydras or better reading, Hesidrus of Pliny. It rises like the Indus on the slopes of the Kailas mountains, the Siva's paradise of ancient Sanskrit literature, with peaks 22,000 feet high. The twin lakes of Manasarowar and Rakas-tal, united with each other, are its direct source. See 1. G.
- In the maps, according to the text note, Baupúr. The junction is at the south boundary of the Kaparthala state.
- <sup>4</sup> It is in Kullu proper on the right bank of the Ceas in lat. 31° 58′ N., and long 77°7′ E, at an elevation of 4,092 feet above sea level. It is perched on a

- natural eminence, once surrounded by a wall. Only two gateways remain of the ancient fortifications. 1. G.
  - 5 Hydraotes of Arrian.
- 6 Var. Bhadrá It rises in the northern half of the Bangáhal valley in Kangra dist.
- Var. Khatwarah. Another variant is Kishtwarah and undoubtedly the true reading. The I. G. places Kistawar in the Kashmir state, lat. 33° 18′ 30′′ N., tong 75° 48' E. near the left bank of the Chenab which here forces its way through a gorge with precipitous cliffs 1000 feet high. The course of this river and details of its volume will be found in Goul. Cunningham's Ladak and in Drew's 'Jummoo and Kashmir' where the history of Kishtwar is briefly sketched. Káshtavára is said by Cunningham to signify 'abounding in wood.' The Chenáb is called Sandabad by Ptolemy but the Greek historians of Alexander named it Akesines because its propor name was of ill omen, from its

other Bhágá which unite near Khatwir and are known by the above name whence they flow by Buhlilpúr, Súdharah and Hazárah.

- (5.) The Bihat, anciently called Bidasta, has its rise in a lake in the parganah of Vér in Kashmír, flows through Srinagar and enters Hindustán. Bhérah lies on its (left) bank.
- (6.) The source of the Sindh (Indus) is placed by some between Kashmír and Káshghar, while others locate it in China. It flows along the borders of the Sawád territory by Atak Benares<sup>3</sup> and Uhanpárah into Balúchistán.

His Majesty has given the name of Béth Jálandhar to the valley between the Biáh and the Satlaj; of Bári, to that between the Biáh and the Rávi; of Rechna to that between the Rávi and the Chenáb; of Jenhat to the valley of the Chenáb and the Bihat, and Sindh Ságar to that of the

similarity thinks Bishop Thirlwall to Αλεξανδρουφαγος 'devourer of Alexander.' Ladak, pp. 118, 352. The derivation of Chenáb from Chin-úb is obvious, and is supposed to have been given from the notion of its rise in Chinese territory, a supposition within approximate rauge of fact.

- <sup>1</sup> For the taxation fixed by Akbar on the districts bordering on the Jhelum, see Vol. 1, p. 346, under Bihat. Bidasta and Bihat are corruptions of the Sansk. Vitasta, the Hydaspes of Horace, and the more correct Bidaspes of Ptolemy. The pool of Vira Nág was walled round by Jahangír, but the true source of the river is more to the S -W. in N. lat. 33° 30' and E. long. 75° 25' Cunningham's Ladák, p. 112.
- <sup>2</sup> In Sháhpúr dist. lat. 32° 29' N., long. 72° 57' E. The old town was destroyed by hill tribes, the new was founded about 1540, and was the centre of a mahal under Akbar. The ruins of the original city known as Johnáthuagar are identified by Genl. Cunningham with the capital of Sopheites, contemporary of Alexander the Great.
- It is so called by the Mahammadan historians in contradistinction to Katak Benares in Orissa at the opposite extremity of the empire 1. G. On his return from Kábul, on the 14th Safar 989 A. H. (20th March 1581), Akbar crossed the Indus at Attock and ordered the building of the fort, of mortar and stone in order to control that part of the country and called it Atak which signifies in the vernacular 'hindrance' or 'prohibition,' it being forbidden to the Hindús to cross the Indus. Ferishta. The Swat territory is here meant, the river of that name, the Suastos of the Greeks (Sansk. Suvastu) rising on the east slopes of the mountains which divide Panjakora from the Swat country, receives the drainage of the Swat valley and entering the Peshawar dist, north of Michni, joins the Kábul river at Nisatha. The course of the Indus has there a somewhat parallel direction.
- Var. Jhat and Chhat, (under list of Sarkárs Chenhat) more commonly known as the Jech or Jothná Doáb.

This province is populous, its climate healthy and its agricultural fertility rarely equalled. The irrigation is chiefly from wells. The winter though not as rigorous as in Persia and Turkestán, is more severe than in any other part of India. Through the encouragement given by His Majesty, the choicest productions of Turkestán, Persia and Hindustán are to be found here. Musk-melons are to be had throughout the whole year. They come first in season when the sun is in Taurus and Gemini, (April, May, June,) and a later crop when he is in Cancer and Leo (June, July, August). When the season is over, they are imported from Kashmír and from Kábül, Badakshán and Turkestán. Snow is brought down every year from the northern mountains. The horses resemble the Irúk breed and are of excell'int mettle. In some parts of the country, they employ themselves in washing the soil whence gold, silver, copper,  $rúi,^2$  zinc, brass and lead are obtained. There are skilful handieraftsmen of various kinds.

Láhor is a large city in the Bari Doáh. In size and population it is among the first. In ancient astronomical tables it is recorded as Lohiwar. Its longitude is 109° 22′, lat. 31° 50′. During the present reign the fortifications and citadel have been strongthened with brick masonry and as it was on several occasions the seat of government, many splendid buildings have been erected and delightful gardens have lent it additional beauty. It is the resort of people of all countries whose manufactures present an astonishing display and it is beyond measure remarkable in populousness and extent.

Nagarkót is a city situated on a hill: its fort is called Kángrah. Near the town is the shrine of Mahamáyá\* which is considered as a manifestation

- <sup>1</sup> Tieffenthaler quotes other measurements besides these, giving the reason for the variations in the difference of route, the incapacity of travellers and the universal ignorance of geometry.

\* The Great Illusion, or the illusory nature of worldly objects divinely personified, an spithet of the goddess Durgá. The earlier name of Hardwár, Mayapúr, represents the ancient worship of this supreme energy and 'by her, whose name is Maya,' says the Bhagavata the Lord made the universe. His temple still exists in Hardwar, and is described in Cunningham's Anct. Geog.

of the divinity. Pilgrims from distant parts visit it and obtain their desires. Strange it is that in order that their prayers may be favourably heard, they cut out their tengues, with some it grows again on the spot, with others after one or two days. Although the medical faculty allow the possibility of growth in the tongue, yet in so short space of time it is sufficiently amazing. In the Hindú mythology, Mihamya is said to be the wife of Mahádeva, and the learned of this creed represent by this name the energizing power of the deity. It is said that on beholding the disrespect (shown to her husband, Siva) she cut herself in pieces and her body fell in four places; her head and some of her limbs in the northern mountains of Kashmír near Kamráj, and these relies are called Sháradá: other parts fell near Bijápár in the Decean and are known as Tuljá (Turja) Bhawini. Such portions as reached the eastern quarter near Kamráp are called Kámákhya, and the remnant that kept its place is celebrated as Jálaudhari which is this particular spot.

- 1 The names in the text are incorrectly transliterated.
- 2 The erudition of Professor Cowell has directed me to the source of this legend which may be read with variation of detail in the preface to the Gopatha Bráhmana published in Nos. 215-252 of the Bibl. Ind. pp. 30-35. It occurs in the 2nd Book in the germ which afterwards developed into the Pauranic tale of Daksha's great sacrifice. This mindborn son of Brahma and father of Uma or Durga assisted at a Visrasrig sacrifice celebrated by his father in which discourtesy was shown to S'iva. A quarrel broke out between Daksha and S'iva, resulting in the exclusion of the latter from the great sacrifice to which the whole Hindú pantheon was bid. Uma seated in her blissful mansion on the crest of the Kailása mountain, saw the crowds proceeding to her father's court to which she repaired and learning the exclusion of her husband, upbraided her father for his injustice and refused to retain the body she had inherited from him. Covering herself up with her robe, she

gave up her lit in a trance of meditation. The wrath of S'iva incarnate in a giant form pursued the feasters and created stupendous havoe. Vishuu unable to pacify S'iva and knowing that his fury was kindled by the sight of his dead dife, cut the bedy to pieces bit by bit with his discus and threw it about the earth and thus calmed the frate and oblivious deity who thereupon restored the killed and wounded to life and sound-Daksha's head having been burnt in the melée, it was replaced by that of a goat which happened to be at hand. apparently without remonstrance from the reanimated demigod or even his consciousness of the substitution. The Tantra Chudámani is able fortunately to detail the portions of the body and to identify the places where they fell As these are said to be still held in high veneration, I record them for the instruction of the curious or the devout.

 The crown of the head at Hingulá (Hinglaj).
 The three eyes at Sarkarára.
 The nose at Sugandhá.
 4. In the vicinity torch-like flames issue from the ground in some places, and others resemble the blaze of lamps.<sup>1</sup> There is a concourse of pilgrims and various things are east into the flames with the expectation of obtaining temporal blessings. Over them a domed temple has been erected and an astonishing crowd assembles therein. The vulgar impute to miraculous agency what is simply the effect of a mine of brimstone.

<sup>1</sup> See Hügel's Travels in Kashmir p. 42, for this phenomenon. The text has which is a lamp in the پینه سوز for سرسوز shape of a platter, three feet in height from the base, and about 6 inches diameter at the top; having in the middle a small tube with two holes through which the wick is fed by oil or greaso ( 🚜 ) kept in liquefaction by the flame. This shrine is the famous Jæálámakhi (mouth of Flame) distant two days' journey from Kángra. It is thus described by Tieffenthaler or Bernoulli for him. "Au milieu du temple, qui est enticrement ceint de murailles, est un creux long de 11 anne, de la même largeur et de la même profondeur, d'on s'elancent des flammes. On y jetto du bois de Sandal, du riz, de l'huile, du beurre, du l'esprit de vin, des amandes et d'autres choses que le feu sôuterrain consame et rédait en cendres : les Gentils prennent onsaite ces condres, s'en frottent doucement les yeux et le front et les conservent dans leurs maisons comme des reliques sacrées. De trois autres endroits creusés dans le mur sortent encore des flammes brillantes; le peuple superstitieux se prosternent à la vue de ces slammes et adorent en suppliant la divinité qu'il croit cachée sous la forme du feu. Autre fois il offroit à cette idole qui vomit des flammes, une tote coupée avec une serpe de vendangeur; mais cela se pratique rarement aujourdhui. On monte á ce temIn the middle of Sindh Ságar near Shamsábúd is the cell of Bálnáth Jogi which they call Tilah Bálnáth.¹ Devotees of Hindustán regard it with veneration and Jogis especially make pilgrimage to it. Rock-salt is found in this neighbourhood. There is a mountain 20 kús in length from which they excavate it, and some of the workmen carry it out. Of what is obtained, three-fourths is the share of those that excavate and one-fourth is allotted to the carriers. Merchants purchase it at from half to two dáms a man and transport it to distant countries. The landowner takes 10 dáms for every carrier and the merchant pays a duty of one rupee for every 17 man to the state. From this salt artificers make dishes, dish-covers, plates and lamp-stands.

The five Doûbs of this province are subdivided into 234 parganahs. The measured land is one krór, 61 lakhs, 55,643 Bighas, and 3 Biswas. The gross revenue is 55 krórs, 94 lahhe, 58,423 dáms. (Rs. 1,398,646-9-2). Of this 98 lakhs, 65,594 dáms. (Rs. 246,639-13-7) are Suyúrghál. The local force consists of 54,480 Cavalry and 426,086 Infantry.

### Sarkár of the Bet Jálandhar Doáb.

Containing 60 Mahals, 3,279,302 Bíghas, 17 Biswas. Revenue 124,365,-212 Dáms in money. Suyúrghál 2,651,788 Dáms. Castes, various. Cavalry, 4,155. Infantry 79,536.

plo par un escalier d'environ 100 marches. Du sommet de la montagne coule un ruisseau qui so jette dans un bassin à pen de distance du temple. Le trou par lequel la source s'elance se nomme Goree Debbi, ce qui signifie: la boëte de Gorcenát, parcequil s'asseyoit en cot endroit pour se livrer à la contemplation. La contrée dans laquelle le temple est situé se nomme Radjcober et l'endroit a le nom de Tagrôta." Soe the I. G. under Jalandhar for the Jawála Mukhi legend.

<sup>1</sup> General Cunningham (Ancient Geog. of India, p. 164) says that the Tila range, 30 miles in length, occupies the west bank of the Jhelum from the east bend of the river below Mangala to the bed of the Bunhar river, 12 miles north of Jalálpur. The full name is Goraknáth ka Tila, the more ancient, Bálnath ka Tila,

both derived from the temple on the summit dedicated to the sun as Bálnath, but now devoted to the worship of Goraknath, a form of Siva. The name Bálnath, he considers older than the time of Alexander identical with Plutarch's Hill of the Elephant, but his inferences are more plausible than secure.

\* The spolling of this word has several variants, but its true orthography seems to be \*\*Line "beth." Sandy unproductive soil. The I. G. interprets it equivalent to khádar, low alluvial soil and productive, but its fertility depends on the doposit of silt during inundations, and thus both significations may hold good, General Cunningham derives it from the "babk" (ptth) of the Daitya King Jalandhara who was crushed under Jawala Mukhi by Siva and whose torso

<sup>1</sup> Var. Barkhéri. In maps Tark Pari.

tar" now comprises Harri Khattar and Nála Khattar.

<sup>\*</sup> Ferry receipts.

Var. Karan called Halásah, Salásah, Salamah. For Khatar, see Vol. I, 456.

<sup>&</sup>quot;The text has بأزي marked as doubtful but the variants incorrect and unmeaning as they are, confirm Tieffenthaler's reading of اسب تازي "chevaux de bonne race."

<sup>&</sup>lt;sup>5</sup> Var. Sowái. T. Soi but there can be no doubt the Sohán is meant which rising in the Murree Hills passes, according to the I. G. "near the ruined Ghakkar fortress at Pharwála."

<sup>6</sup> Var. Paru, Bhiro, Text note. "Khá-

Var. Bharchak.

<sup>•</sup> The fort built by Sher Shah as a check on the Gakkhar tribes, now in picturesque ruin. It is situated in the Salt Range on a gorge overlooking the Kuhan Nadi 11 miles north-west of Jhelum town. The walls extend for three miles and encircle the rocks which command the entrance of the pass. Some parts have a thickness of from 30 to 40 feet. One gateway still remains in excellent preservation. I. G.

See Vol. I, p. 484, and under Kábul of this volume.

<sup>&</sup>lt;sup>1</sup> Said by Cunningham, (Anct. Geog., p. 163 and pronounced Girjhak) to be the Hindu name for Jalálpúr, the probable site of the famous city of Bukephala built in memory of Alexander's horse.

The shrine of Panja Sáhib crowns a precipitous hill about one mile east of the town, and at its foot is the holy tank, a small square reservoir, full of fish. Dolapidated brick temples surround the edge and on the west side the water gushes out from beneath a rock made with the representation of a hand, ascribed by the Sikhs to their founder Bábá Nának. The scenery is extremely picturesque; the river Haroh hard by affords excellent fishing, and on its near shore two ancient cypresses are the only epitaph above the tomb of one of Akbar's wives. For Kachakót, see Cunningham, Anct. Geog., p. 116.

<sup>&</sup>lt;sup>2</sup> This well-known village lies on the road between Rawal Pindi and Poshawar which with its ruins, says the I. G., forms part of a group of ancient cities lying round the site of the ancient Taxila. Hwen Thsang the Chinese Buddhist pilgrim of the 7th Century A. D. visited the tank of the Serpent King, Elapatra, identified with, the spring of Bábá Wali (Kandahári) or Panja Sáhib. The fountain is hallowed by legends of Buddhist, Brahman, Moslem and Síkh.

# Súbah of Multán.

It is situated in the first, second and third climates simultaneously. Before Tattah was comprised in this province, its length from Firozpúr

outlying portions beyond the limits of the Punjáb Proper were evidently attached to the Súbahs of Lahor and Multán and to the sarkar of Dipalpur and were denominated—Birún i Panjnad. Their position may be surmised but assurance is perhaps beyond reach. The first two of these three names I cannot satisfactorily trace.

Var. and G. Farík. Var. and T. Karak.

<sup>&</sup>lt;sup>2</sup> The valley of the Jhelum takes the name of *Trimāb* (Three rivers) after its junction with the Chenáb and the Rávi and that of *Panjnad* (Five rivers) after receiving the united waters of the Beás and Sutlej. I. G. This restricted signification cannot here apply. Certain

and Sewistán, was 403 kós and its breadth from Khatpur¹ to Jaisalmír, 108 kós, but since its inclusion, it measures to Khach (Gandává) and Mekrán, 660 kós. On the east, it marches with the Sarkán of Sirhind; on the north with Shór; on the south, with the Súbah of Ajmer, and on the west, with Khach and Mekrán. For facility of reference, the two territories are separately described. Its principal rivers are the six already mentioned. The Bihat (Jhelum) joins the Chenáb near the parganah of Shór and after a course of 27 kós, they unite with the Ravi at Zafarpúr and the three flowing collectively in one stream for 60 kós, enter the Indus near U'ch. Within 12 kos of Fírózpúr, the Biúh joins the Sutlej which then bears several names, viz., Har, Hári, Dand, Núrni, and in the neighbourhood of

1 Khatpúr is placed by Abul Fazl in the Rachna Doáb and by Tieffenthaler as the first stage in a journey from Lahor to Multán. "On passe en venant de Lahore par Kabpur, Gazarsaray, Noschhara, Satghara, Harpam, Maktounpour, Kanpour d'on l'on se rend tout droit a Moultan."

2 The text diffidently forms two names of these four, viz., Harhári, Dandnúrni but the authority of the two best MSS-(relegated to the notes) divides them. One at least of these names, Dand, still lives in the local designation of a former bank of the Sutlej, whose shifting course has modified the aspect of the country. One ancient bed, forming the base of the segment where the Sutlej after its junction with the Beas curves round to the south-west is called the Sukhar Nai (I. G.) which crosses the district east to west and joins the modern channel near the borders of Sirsa. The Danda bank points to a still more ancient course crossing the south-west corner 35 miles east of the present stream, traccable as far as Moodkee and thence at intervals to the Sutlej 15 miles farther north. The old beds of the Rávi and Bećs which formerly united their waters much lower down, at present may be traced through a great part of the Bári Doáb. (I.G.) Tieffenthaler transforms the whole river

system locating the confluence of the Rávi and the Galongara (his local name for the Sutlej augmented by the Beas) within 3 miles of Uch and that of the Chenáb and Rávi at a town namea "Sultanpour," otherwise called "Noschahra," near which the Rávi, joined by the Sutle; and Beas falls into and loses its name in the Chenáb, and this river, now holding the Jhelum, Rávi, Sutlei and Beás, continues to retain its own. See the ancient courses of these rivers in Cunningham's Ancient Goography of India, p. 220, et seq. General Cunningham bases his discussion on Gladwin's translation, viz, 'For the distance of 17 kos from Feerozpoor, the rivers Boyah and Setehij unite: and then again as they pass glong, divide into 4 streams, viz., the Hur, Haray, Dund and the Noorny; and near the city of Multan these 4 branches join again," and says that these beds still exist but their names are lost. Now Abul Fazi does not say that the Sutlej divides into 4 streams, but that it bears several names. I have been careful to be exactly literal in my version. The difficulty lies in the meaning of the words بدآن چار اعیخته unites with those four." Gladwin understands the four which he divides, but there is no other tradition of their uniting near Multan, and the Danda and the Sukhar

Multán, confluent with the former four, their accumulated waters unite. Every river that discharges itself into the Indus takes its name of Sindh. In Tattah, they call it Mihrán.

To the north are the mountains. Its climate is similar to that of Lahor which it resembles in many aspects, but in Multán, the rainfall is less and the heat excessive.

Multán is one of the oldest cities of India: Long. 107° 35'; Lat. 29° 52's. It has a brick fort and a lofty minaret adds to its beauty. Shaikh Bahá-u'ddín Zakaríyá and many other saints here repose.

Bhakkar (Bhukkur) is a notable fortress; in ancient chronicles it is called Mansurah. The six rivers united roll beneath it, one channel

Nai certainly do not, for they strike the river at different points much higher up. Abul Fazl is describing the rivers watering the Multan Subah. He says they are the six previously mentioned, viz. He first speaks of the under Lahor. Jhelum and the Chenáb and follows them to their junction with the Ravi and then to their meeting with the Indus. Here are four. He now turns to the Beas and Sutlej which join near Firozpur and the stream after bearing several names becomes confluent with "those four" near Multán, not, I consider, with the four local names, even were they separate beds, but with the four that complete the six. The doubt arises why he should place the junction near Multán instead of Uch, but this is not surprising to any one accustomed to his obscure and vague style of narrative. Moreover the passage in the text resembles a notice of these six rivers in Baber's Memoirs to which Abal Fazl was much indebted in the preparation of this third book of the Ain. The passage is as follows: I use the trans-"To the north of lation of Erskine. Sehrend, six rivers, the Sind, the Behat, the Chenáb, the Rávi, the Biáh, and the Setlej, take their rise in these moun tains, and all uniting with the Sind in the territory of Multan, take the common name of Sind, which flowing down to the west, passes through the country of Tatta, and disembogues into the sea of Oman." Further the division of the Sutloj into the four local streams does not alter its point of junction with the Chenáb for at p. 222, Cunningham says that Abul Fazl's measurements of distances from the confluence of the Chenáb and Jhelum to that of the Chenáb and Rávi and the Chenáb and Indus agree with the later state of those rivers.

1 The main stream of the Indus. See its course and the names of its channels in Cunningham's Ancient Geography of India, pp. 252, 272, 286, 298, &c. The Indus is called the Mihrán by Ibn Haukal but his information leads him to believe that its source is the Oxus from whence passing Multán and being joined by the Sind! at three marches from that town falls into the sea at Dambal (Dobal). Ousely, p. 155.

<sup>8</sup> Properly 30° 12' N. Long. 71° 30' 45". Tieff. gives the longitude from the Fortunate Islands at 108° but this he considers excessive. Baháu'ddín is mentioned in Vol. I, 399, and Ferishta's monograph of the saint will probably satisfy his modern disciples.

3 After the docline of the Arab power in Sind about A. D. 871, two native kingdoms raised themselves at Multán and Mansúrah. The former comprised passing the southern face of the fort, the other the northern. The rainfall is inconsiderable, the fruits excellent.

Between Siwil and Bhakkar is a vast desert, over which for three months of the hot season the simoom blows.

The river Sind (Indus) inclines every few years alternately to its southern and northern banks and the village cultivation follows its course. For this reason the houses are constructed of wood and grass.

This Súbah comprises three Sarkárs of 88 parganahs, all under assessment for crops paying special rates. The measured land is 3,273,932 bighas, 4 biswas. The gross revenue is 15 krors, 14 lakhs, 3,619 dáms. (Rs. 378,590-8-0), of which 30 lakhs, 59,948 dáms (Rs. 76,498-11-2), are Suyúrghál. The local Militia consists of 18,785 Cavalry and 165,650 Infantry.

#### Sarkár of Multán. Four Doábs.

the upper valley of the Indus as far as Alor; the latter extended from that town to the sea and nearly coincided with the modern provides of Sind. Alor, or Aror, the capital, almost rivalled Multán and had an extensive commerce. I. G. Genl. Cunningham (Ancient Geog.) gives the name of Mansúrah to the town founded, according to Masaúdi, by Jamhúr, the Moslem governor of Sindh, and named after his own father Mansúr, so close to Brahmanábád as to be regarded as the same place. His learned discussion depends too much on analogies of sound in names, to be quite convincing.

See, also, Mansúra in Elliot's Arabs in Sind, p. 50, et seq.

1 Siwi, Sewistán, and Sehwán are constantly confounded or mistaken as Elliot remarks without, however, himself determining the position of the first which is a town or the geographical limits of the second which is a province. Siwi is somewhat south of the direct line between Dera Ghazi Khán and Quetta, now well known as Sibi. Vol. I, p. 362, Séwe.

- <sup>2</sup> A slight notice of the Kharals occurs in the description of the Montgomery District. I. G.
- <sup>2</sup> Of these Cunningham can identify but Uch, Diráwal, Moj and Marot, which he places, east of the Sullej. The limits of the province of Multán in the time of Hwen Thang included the north half of the Bhawalpur territory in addition

to the tract lying between the rivers, the north frontier extending from Derah Dín Panáh on the Indus to Pák Pattan, a distance of 150 miles; on the west, the frontier line of the Indus to Kkánpúr, 160 miles; on the east from Pák Pattan to the old bed of the Ghagar, 80 miles: on the south from Khánpúr to the Ghagar, 220 miles, p. 220.

# Sarkar of Bhakkar (Bukkur).

Containing 12 Mahals, 282,013 Bíghas. Revenue, 18,424,947 Dáms. Suyúrghál, 600,419 Dáms. Cavalry, 4,600. Infantry, 11,100.

Text note suggests Latti as the proper reading. As there are about 300 clans of Sindhis, besides the tribes and castes of Hindustán proper, that may be located in or about this region, their identification is almost as hopeless as their orthography.

Sháh Ilusain, (Arghún), ruler of Sind.

Mirzá Kámrán.

Sher Khán.

Salim Khán.

Sikandar Khán.

At one period the province was subject to the sovereigns of Delhi: at another it was under the control of the rulers of Sind, and for a time was held by the princes of Ghazni. After its conquest by Muizzu'ddin Sam (Ghori), it continued to pay tribute to Delhi. In the year A. H. 847 (A. D. 1443) when Sultán Alán'ddín reigned at Delhi, and constituted authority fell into contempt, every chief in possession of power, set up a pretension to independence. A noisy faction raised Shaikh Yúsuf Kuraishi, a disciple of Shaikh Bahán'ddín Zakariya, to supremacy. Ho was subsequently deposed and proceeded with haste to the court of Sultán Bahlól at Delhi. The sovereignty now devolved upon one of the Laugáh family, who assumed the title of Sultan Mahmud Shah. It is related that this chief had given his daughter in marriage to Shaikh Yusuf, and on the strength of this connection, used frequently to visit her alone, till one night by a successful intrigue he accomplished his design on the throne. During the reign of Sultán Kutbu'ddín, Sultán Mahmúd Khilji advanced from Malwah against Multan but returned without effecting anything. Some maintain that the first of the Langah family who was raised to the throne was Kutbu'ddin. In the reign of Sultan Husain, Bahlol sent (his son) Barbak Sháh with a force to reinstate Shaikh Yúsuf, but they returned unsuccessful. Sultán Husain becoming old and doting, placed his eldest son upon the throne under the title of Firóz Sháh, and withdrew into retirement. His Wazir Imadu'l Mulk, poisoned him in revenge for the murder of his own son and Sultan Husain a second time resumed the sceptre and appointed Maḥunud Khan, son of Sultan Firoz, his heir. On the death of Sultán Husain, after a reign of 30 or 34 years, 1 Sultán Mahmúd ascended the throne. During his roign several incursions were made by the Mughals who, however, retired discomfited. Some malicious intri-

The whole of this narrative in much greater detail will be found in that historian.

<sup>&</sup>lt;sup>1</sup> Ferishta gives his death on the 26th of Safar A. II. 908 (1502) but adds that another account makes it 4 years earlier.

guers through jealousy created a misunderstanding between the Sultán and Jám Bayazíd who had long held the office of prime minister, and misrepresentations cunningly made in a roundabout way, brought them into open conflict. The minister withdrew from Multán to Shór and read the khutbah in the name of Sultán Sikandar Lódi. On the death of Sultán Maḥmúd, his infant son was ruised to the throne as Sultán Husain (II). Mírzá Sháh Husain (Arghún) marched from Tattah and took Multán and entrusted its charge to Langur Khán. Mirzá Kámrán dispossessed him of it and after him Shér Khán, Salím Khán and Sikandar successively held it till the splendour of Humayún's equal administration filled Hindustán with its brightness and secured its peace. At the present day under the just sway of His Majesty his subjects find there an undisturbed repose.

### Sarkár of Tattah.

During a long period this was an independent territory but now forms part of the imperial dominions. Its length from Bhakkar to Kach and Mekrán is 257 kós, its breadth from the town of Budín to Bandar Láhari, 100 kós, and again from the town of Chándo one of the dependencies of Bhakkar, to Bikanér is 60 kós. On the east lies Gujarát: to the north Bhakkar and Sówi: 2 to the south, the ocean, and to the west Kach and Mekrán. It is situated in the second climate and lies in Longitude 102° 30': Lat. 24° 10'. 2

The ancient capital was Bráhmanábád, a large city. Its citadel had 1,400 towers, at an interval of a tanib, and to this day there are many

- <sup>1</sup> See this name in the I. C. (Index), under "Lahari Bandar," and in Cunningham in his account of Sindh. (Ancient Geography).
- 2 The text is, I think, here in error in transforming this name into the Persian 3. with the india, which the construction of the sentence does not properly admit. 1 am in concurrence with Gladwin and Tieffenthaler.
- The town lies in Lat. 24° 44' N. and Long. 68° E.
- Identified by Cunningham with Harmatelia, (a softer pronunciation of Brâhmathala, or Brahmanasthala) of Diodorus and placed on the east branch of the Mihrán or Indus, 47 miles north-

east of Haidarábad, 28 miles east of Hâla and 20 miles west of the eastern channel of the Indus known as Nára. He gives the number of bastions as 140 on the authority of the MSS, but both Gladwin and Blochmann concur in 1,400, and there is no variant reading. conclusion is, that the place known now as Bumbhra ka thûl represents the ruined city of Mansura and the neighbouring mound now called Dilura, Brahmanábad. They certainly attest his industry and research if not his conclusion which the absence of local coins of Hindú origin, though many of Arab governors are found, somewhat impugns.

<sup>5</sup> See p. 61.

traces of its fortifications. Alor' next became the metropolis and at the present day it is Tattah, also called Debal. The mountains to the north form several branches. One of thom trends towards Kanduhár, and another rising from the sea coast extends to the town of Kohbár, called Rámgar, and terminates in Sewistán and is there known as Lakkhi. This tract is inhabited by an important Baloch tribe called Kalmáni, consisting of twenty thousand cavalry. A fine breed of camels is here indigenous. A third range runs from Séhwán to Séwi and is called Khattar where dwells a tribe named Nohmardi that can raise a force of 300 horse and 7,000 foot. Below this tribe, there is another clan of the Baloch known as Nazhari with a force of a thousand men. A good breed of horses comes from this tract. A fourth mountain chain touches Kach (Gandává) on one sida, and on the other the Kalmáni territory, and is called Kárah inhabited by 4,000 Balochis.

In the winter season there is no need of poshtins (fur-lined coats) and

1 The ruins of Alor, or more correctly Aror are situated to the south of a gap in the low range of limestone hills stretching from Bhakar to the south for about 20 miles until it is lost in the broad belt of sand hills bounding the Nára or old bed of the Indus. On the west, Cunningham regards it as the capital of He disputes the Musicani of Cartius. the assertion of Abul Fazl that Debal and Tattah are the same. Sir H. Elliot places Debal at Karáchi. General Cunningham prefers a sito between Karáchi and Tattah and is "almost certain" that it must be the Indian city in which Zobeide in the Arabian Nights found all the people turned to stone. This certitude on such a point is striking and original.

2 The Lakhi rango (the text duplicates the k.) is an offshoot from the Kirthar which separates Sind from Beluchistán. I. G. Kohbár has a variant Korahyár, but I do not truce it; the Maásir 'ul Umara has Kohbár but as its description of Sindh is taken from Abul Fazl, its authority is of no independent value.

3 The Baloch and the Brahui are the two great races of Balochistán, each

subdivided into an iAfinite number of tribes. Of these the Kumberani is said to take precedence of all others. The name in the text is not mentioned in the works 1 have consulted. Sherring mentions Kirmani.

4 No doubt the Kirthar range of the I. G., an off shoot of which, the Lakhi, terminates abruptly a few miles south of Schwán. Nazhari has a variant Țahzari adopted by Gladwin. The plain country to the east of the mountain mass that intervenes between it and Khelát is called Kachhi or Kachh Gandává and Kárah seems to be a spur that strikes thence to the Lakhi chain. North of the Bolán, confused ranges of mountains extend to east with a strike nearly east and west to the Sulaiman range. This tract inhabited by Marris, Bugtis and other Baloch tribes is bounded on the north by the province of Sewistán (I. G.) General Cunningham states that Sehwan is said to be a contraction of Sewistán and rejects it as a modern innovation of the Hindus, but he could scarcely have seen the text of Abul Fazi whose account does not admit of this view.

the summer heats are moderate except in Sewistán. Fruits are of various kinds and mangoes are especially fine. In the desert tracts, a small kind of melon grows wild. Flowers are plentiful and camels are numerous and of a good breed. The means of locomotion is by boats of which there are many kinds, large and small, to the number of 40,000. The wild ass is hunted, and game, such as, hares, the kotah páchahl and wild boars; fishing likewise is much pursued.

The assessment of the country is made on the system of division of crops, a third being taken from the husbandman. Here are salt-pits and iron mines. Shalk rice is abundant and of good quality. Six kós from Tattah is a mine of yellow stone, large and small slabs of which are quarried and used for building. The staple food consists of rice and fish. The latter is smoked and loaded in boats, and exported to the ports and other cities, affording a considerable profit. Fish-oil is also extracted and used in boat building. There is a kind of fish called palwah which comes up into the Indus from the sea, unrivalled for its fine and exquisite flavour. Milk-curds of excellent quality are made and keep for four months.

Near Sehwán is a large lake, two days' journey in length called Manchúr, in which artificial islands have been made by fishermen who dwell on them.

But the greatest of all wonders is the Liver-Eater (Jigar Khwár), an individual who by glances and incantations can abstract a man's liver. Some aver that under certain conditions and at certain times, he renders the person senseless upon whom he looks, and then takes from him what resembles the seed of a pomegranate, which he conceals for a time in the

I Literally 'short leggod.' It is mentioned by Baber in his Memoirs among the fauna of Kábul and India and is thus described in Erskiue's translation. "Its size may be equal to that of the white deer. Its two fore-legs as well as its thighs are short, whence its name. Its horns are branching like those of the gawezin but less. Every year too it casts its horns like the stag. It is a bad runner and therefore never leaves the jungle." These characteristics seem to point to the hog-deer. (Cervus porcinus.)

2 1 believe this to be the proper trans-

lation of علم نخش and not 'corn bearing' as I have construed it at p. 44, (final word of the page). According to the I. G. in Haidarabad District Sind, the Government assessment was formerly levied in kind (khasyi) but on a petition from the Zamindars, the payment has since been made in cash. They are paid by the tenants in kind at the following rates: On land under charkhi (Persian wheel) cultivation, one-third of produce: on sailābi (canal flooding) lands, two-thirds; in the case of the best lands, yielding cotton, tobacco and sugurcane, as a rule in cash.

calf of his leg. During this interval the person whose liver is stolen remains unconscious, and when thus helpless, the other throws the seed on the fire which spreads out like a plate. Of this he partakes with his fellows and the unconscious victim dies. He can convey a knowledge of his art to whomsoever he wills, by giving him a portion of this food to eat and teaching him the incantation. If he is caught in the act and his calf be cut open and the seed extracted and given to his victim, the latter will recover. The followers of this art are mostly women.

They can convey intelligence from long distances in a brief space of time and if they be thrown into the river with a stone tied to them, they will not sink. When it is desired to deprive one of these of this power, they brand both sides of his head and his joints, fill his eyes with salt, suspend him for forty days in a subterraneous chamber, and give him food without salt, and some of them recite incantations over him. During this period he is called *Dhachrah*. Although his power then no longer exists, he is still able to recognize a Liver-Eater, and these pests are captured through his detection. He can also restore people to health by incantation or administering a certain drug. Extraordinary tales are told of these people that are beyond measure astonishing.

This country is the fourth Sarkár of the Súbah of Multán. From the confines of Uch to Tattah towards the north are rocky mountain ranges inhabited by various Baloch tribes, and on the south from Uch to Gujarát are sandhills in which region are the Ahshám bhatti and other numerous claus. From Bhakkar to Nasírpár and Umarkót are the Sodah, Járejah and other tribes. This Súbah contains 5 Sarkárs subdivided into 53 parganahs. The revenue is 6,615,393² dáms. (Rs. 165,383-13-2.)

- I Though there is no variant to this name, I suspect that there has been a transposition of the K and R, and that it is meant for the town of Jarak situated midway between Haidarabad and Tattah.
  - <sup>8</sup> See Elliot, Arabs in Sind, p. 230.
- So I have translated قريات صفكور, the term maskiri, being applied in old revenue accounts to small and scattered

estates not included in the accounts of the districts in which they were situated and of which the assessments were paid direct to Government. The word occurs as Maskúrín in the list of parganahs under the Sarkárs of Tándah and Fathábád, Súbah Orissa. It may also signify the villages dependent on the preceding (mazkúr) Mahal, viz., Rahbán, and thus Gladwin takes it.

A II A TI

Tieffenthaler's list except in the first 3 names is in accordance with these, allowing for his erratic spelling: Elliot's taken from the Tarikh i Ma. imi, changes the third name only. Ferishta gives the 1st and 3rd names Afzáh and Máni; Briggs, Afrá and Bany. Ferishta makes Tamáji son of Mání; Briggs, his brother. Ferishta allots 62 years to the reign of Nizámu'ddin Nandá; Briggs, 32, and his dates are not taken from Ferishta who gives none except to the last 3 on the U. T. list and in accordance with it. I have to note that Ferishta gives the duration of the Samra dynasty, as 100

years and not 500 as Briggs records and the name of the succeeding race, Satmah or Sutmah (ستیکان) and not Soomuna. The title of Jam, Ferishta pronounces a boast of their supposed descent from Jamshid, but commonly given to their head or chief to preserve the tradition of this fabulous lineage. The lineage of the Sumra and Samma dynasties is discussed in Appendix P. of Elliot's Arabs in Sind. The latter name may be traced in the Sambastæ and Sambus of Alexander's historians. Sambus occurs as Sabbas in Plutarch, Saboutas in Ambigarus in Strabo. Justin and Ambiras in Orosius. These variations are not surprising and we have an analogous instance in the name of the famous English Free Lance of the Middle Ages, Sir John Hawkwood, which occurs frequently in the Italian writers of that time under the following disguises; Auguto, Aguto, Acuto, Haukennod, Hau Kennode, Hau Kebbode, Hancutus. Aucobedda, and Falcon del Bosco. Jámshed is formed, according to Elliot's authorities, from Jám 'king' and Shéd 'sun' (p. 195) but he modestly leaves the etymology of Jam undecided.

Years Months D.

Sanjar, commonly called Rádhan (var. and G.

Rádman, ... 8 and some months.

Jám Nizámu'ddín, known as Jám Nandá, (see

Vol. I, p. 362), ... ... 60 and some months. Jám Firóz, his son.

- " Şaláhu'ddín, a relation of Firóz,
- . Firóz, a second time.

In former times, there lived a Rájá named Siharas¹ whose capital was Alór. His sway extended eastwards, as far as Kashmír and towards the west to Mekrán, while the sea confined it on the south and the mountains on the north. An invading army entered the country from Persia, in opposing which the Rájá lost his life. The invaders contenting themselves with devastating part of the territory, returned. Rác Sáhi, the Rájá's son, succeeded his father, by whose enlightened wisdom and the aid of his intelligent minister Rúm, justice was universally administered and the repose of the country secured. A Brahman named Jacks of an obscure station in life, attached himself to the minister's service and by flattery and address made himself of much consequence and was advanced to a post of dignity, and on the death of the minister, was chosen to succeed him. He basely and dishonourably carried on an intrigue with the Rájá's wife, which the Rájá, notwithstanding its disclosure to him by the ministers of State, refused to credit. During the Rájá's illness, the wicked wretch, in collusion with this shameless paramour, sent for the generals of the army separately, on pretence of consulting them and set them apart, and by seductive promises won over the several enemies of each to accomplish their death. When they were put out of the way and the Rájá too had breathed his last, he assumed the sovereignty.

1 Of the Rai dynasty whose capital was Alor. The Tuhfatúl Kirám makes Siharas the son and successor of Rái Dhodij, followed by Rái Sáhasi, the first, second and third of that name. It was under the latter that Chach rose to power. The names are differently given by Postans. The same Persian work distributes 137 years over the reigns of these 3 Ráis. The accession of Chach and the extinction of the Rái dynasty is placed by Elliot in the

year 10 A. H. Arabs in Sind, pp. 169-173. See also Chacknamah. Elliot's Hist. of India. Vol. I. p. 138.

<sup>2</sup> So the text, but a note amends it "Chagh." The orthography is doubtful. Two MSS. in the Bibliotheque Royale have Hoj: Reinaud spells the name Tchotch: Renouard leans to Jaj as he considers it a corruption of Yajnya. Do Sacy favours • Hajáj. Pottinger writes Chach and is followed • by all English authors. Elliot, Arabs in Sind, p. 174.

The pursuers of worldly interests attached themselves to his cause and he took the *Ráni* to wife, thus garnering eternal perdition, but he laboured for the prosperity and increase of his dominions and seized upon *Kuch* (Gandává), and *Mekrán*.

During the Caliphate of Omar (5. u'l) Khattab, Mughírah Abu'l Aás¹ advanced by way of Bahrain to Debal, but the troops there opposed him and he was killed in the engagement. In the Caliphate of Othmán an intelligent explorers was sent to ascertain the condition of Siud, and an army of invasion was under orders. The messenger, however, reported that if a large force were sent, supplies would fail, and a small one would effect nothing and he added many dissuasive representations. The Prince of the Faithful, Ali, despatched troops that occupied the borders of Debal but on hearing of the death of the Caliph they withdrew in haste to Mekrán. Muáwiyah twice despatched an army to Sind and on both occasions many of the troops perished.

Chach died after a prosperous reign of 40 years, and his 'youngest 'son Dáhir succeeded him on the throne. In the caliphate of Walid. b. Abdu'l Malik, when Hajjáj was governor of Irák, he despatched on his own authority Muḥammad Kasim his cousin and son-in-law to Sind who fought Dáhir in several engagements. On Thursday the 10th of Ramazán A. H. 99, (17th April 717) the Rájá was killed in action and the territory of

- <sup>1</sup> See Elliot's Arabs in Sind, p. 3.
- ª Hákim. b. Jabala al Abdi was sent to explore Sejistán and Mekrán and the countries bordering on the Indus valley hy Abdu'llah Amar, a cousin of the Cáliph, who had succeeded Abn Músa Ashari in the government of Basra. His report was as follows: "Water in that country is of a dark colour, flowing only drop by drop, the fruits are sour and unwholesome, rocks abound and the soil is brackish. The thieves are intropid warriors, and the bulk of the population dishonest and treacherous. If the troops sent there are few in number, they will be exterminated, if they are numerous, they will perish of Ibid. pp. 9 and 10. expeditions of Ali and Muawiyah and the progress of the Arab conquests in Sind
- may be read in the succeeding pages. Elliot's conclusion that Debal was taken in A. II. 93 is confirmed by As Suyúti in the biography of Al Walid, b. Abdu'l Malik, in which year Kirakh, or Kiraj as Ibn ul Athir calls it, was also captur-(See my translation of As Snyúti's History of the Caliphs, p. 229.) Elliot thinks this probably situated in, if not named from Kachh. I supposed it to be Karáchi which he identifies with the ancient Krokala of Arrian, but this does not alter its possible metathesis among the Arabs, into Kiraj. The pursuit of these analogies may be interesting but the result is conjecture.
- Described in Elphiustone (Ed. 66) p. 308, and in Brigg's Ferishta, IV, p. 417.

Tattah became subject to the invaders. The two daughters of Rájá Dáhir, who had been made captive were sent with some valuable presents to the Caliph. In respirit of revenge, they descritfully represented to the Caliph that Muhammad Kásim had dishonoured them. He therefore abstained from visiting them, and in a fit of fury gave orders that Kásim should be stuffed into a raw hide and despatched to his presence. The commands of the Caliph reached him when he was about to march against Hari Chand, king of Kanauj, and he obediently submitted to them. When he was thus carried to the court, the Caliph exhibited the spectacle to the two princesses who expressed their gratification in viewing the slayer of their father in this condition. This decision of the Caliph excites astonishment inasmuch as it was pronounced without deliberate investigation. It is the duty of just princes not to be swayed by the representation of any one individual, but to be circumspect in their inquiries, since truth is rare and falsehood prevalent, and more especially in regard to the recipients of their favour, towards whom the world burns with envy without just cause of resentment. Against the outwardly plausible and inwardly vicious they should be particularly on their guard, for many are the wicked and factious who speciously impose by their affected merit and by their misrepresentations bring ruin on the innocent.

After Muḥammad Kásim's death, the sovereignty of this country devolved on the descendants of the Banu Tamím Ansári. They were succeeded by the Súmrah race who established their rule and were followed by the Sammas who asserted their descent from Jamshúd, and each of them assumed the name of Júm. In the reign of Jám Bánhatiyah

1 Several of this tribe were at various periods sent to Sind. Under the Caliphate of Yazid b. Abd u'l Malik, Halál a't Tamími was sent in pursuit of the About 107 A. II. Banu Muhallab. Tamim b. Zaid al Utbi succeeded Junaid in the government of that province and died near Debal. Abbassides Músa b. Kab a't Tamími, drove out Mansúr b. Jamhúr the Umayyad governor. Abdu'r Razzák the first Ghaznevide governor of Sind, about A. H. 417, (1026) found the doscendants of old Arab settlers of the tribes of Thakiff, Tamimi, Asad and

many other families. The length of the Tamimi occupation is unknown or disputed, and the obscurity of the annals of the time precludes the possibility of decision.

2 Máni according to Ferishta who says that the expedition of Firoz Tughlak took place in 763 A. H. (A. D. 1320) and was unsuccessful owing to want of supplies and forage which Máni had cut off by devastating the country. He retired to Gujarát and after the rains and on the approach of winter, the second invasion occurred which led to the submission of Máni.

Sultán Fíróz Sháh on three occasions led an army from Delhi against that prince, and obtained some conspicuous successes. On the third occasion, he took him prisoner and carried him to Delhi, having Sind under charge of his own officials. Subsequently being satisfied with his good will and capacity he reinstated him in his government. On the death of Júm Tughlak, the chamberlain Mubáruk succeeded him through the efforts of a vain and seditious faction, and was followed by Sikandar the son of Júm Fath Khún.

During the reign of Jám Nandú, Sháh Beg Arghún made a descent from Kandahár and took Sówi and leaving the command of it to his brother Sultán Muhammad, returned to Kandahár. The Jám marched a force against Muhammad who was killed in action. Sháh Beg made a second incursion and took possession of Sehwán and a considerable part of Sind and leaving his conquests in charge of his own people, withdrew.

In the reign of Jám Fíróz, a relative of his named Saláhu'ddín rose inrebellion and failing in his attempt, took refuge with Sulfan Mahmud of Gujarát who received him graciously and assisted him with an army; Daryá Khán the prime minister of Jám Fíróz espoused his cause and the kingdom of Sind fell under his power without a blow. Subsequently the said Daryá Khán determined to restore Jám Fíróz who had withdrawn into private life, but who thus recovered his kingdom. Saláhu'ddin a second time advanced from Gujarát with a force furnished by the Sultán and occupied Sind. Fíróz rétired to Kandahár and Sháh Beg supplied him with troops, and an engagement took place near Schwan in which Salahu'ddín and his son were slain. Thus Fíróz was again established in his kingdom. In the year A. II. 9291 (A. D. 1522-3) Sháh Beg took possession of Sind and Jám Fíróz retired to Gujarát, gave his daughter in marriage to Sultan Bahadur and was attached to the Court in the ranks of its nobles. Sind was now subject to Shah Beg. This prince was the son of Mir Zu'n Nún Beg, the commander-in-chief of Sultán Husain Mirzá,2 who received the government of Kandahár. He fell fighting bravely against Shaibak Khán Uzbek who was engaged in hostilities with the sons of Sultán Husain Mirzá. His eldest son succeeded to the government of Kandahár, a prince of distinguished valour and versed in the learning of his age. At his death, his son Shah Husain ascended the throne and wrested Multan from Sultán Mahmúd. After him Mirzá Isá son of Abdu'l Ali Tarkhán8 succeed-

of Baber it had come to bolong to a particular family. The ancient Tarkhán was exempt from all duties and could enter the royal presence without asking

<sup>1</sup> Ferishta says, 927 A. H.

<sup>&</sup>lt;sup>2</sup> See Notec5, p. 220.

<sup>3</sup> Tarkhán was originally a rank among the Mughals and Turks, but in the time

ed, followed by Muhammad Payandah<sup>1</sup> but this prince being subject to fits of mental estrangement, did not personally administer the government. Mirzá Jáni Beg, his son assumed the direction of affairs till His Majesty's victorious troops advanced into the country and reduced it to order, and Mirzá Jáni Beg was enrolled in the ranks of his nobility.

#### Súbah of Kábul.

It is situated in the third and fourth climates, and comprises Kashmir, Pakli, Bimbar, Swit, Bajaur, Kandahár and Zábulistán. Its capital was formerly Ghaznah, but now Kábul.

## Sarkár of Kashmír.

It lies in the third and fourth climates. Its length from Kambar Ver to Kishan Ganga is 120 kós, and its breadth from 10 to 25 kós. On the east are Paristán and the river Chenáb: on the south-east Bánihál and the Jammá mountains: on the north-east, Great Tibet: on the west, Pakli and the Kishen Ganga river: on the south-west, the Gakkhar country: on the north-west, Little Tibet. It is encompassed on all sides by the Himalayan ranges. Twenty-six different roads lead into Hindustán but those by Bhimbhar<sup>2</sup> and Pakli are the best and are generally practicable on horseback. The first mentioned is the nearest and it has several routes of which three are good, viz., (1) Hasti Bhanj³ which was the former route for

leave and was to be pardoned nine times bothe fault what it would. He had perfect liberty of speech and neight say what he pleased before royalty. The name constantly occurs in the early portion of Baber's Memoirs.

I He has omitted the succession of Muhammad Báki son of Isá Tarkhán to whom Ferishta gives a prosperous reign of 18 years. The genealogical tree of Mirzá Jáni Beg and the subsequent history of this family will be found at pp. 361-2, Vol. I of this work. Ferishta altogether omits Muhammad Payandah and gives the succession to Jáni Beg immediately after Muhammad Báki.

2 The spelling is that of the text and varies from the same name given a little above. According to Cunningham, the name of "Bhimbhar" was little used, the common appellation being Chibhán which is found in Sharfu'ddín's History of Timúr under the form of Jibhál.

3 The text has "Hasti Watar," but the present Governor of Jammu, Pandit Radha Kishan Kaul, with whom it has been my good fortune to be placed in communication, and whose courtesy adds a grace to his learning, has proved its innecuracy and has suggested the emendation. The name with its derivation occurs later on and will be noticed in its place. The three different routes into Kashmir are thus described by the Pandit.

The first runs almost in a straight line passing through Nowsherah, Rajori, the Pir Panjál pass and Shupiyon, The the march of troops; (2) Pir Pāujāl,¹ which His Majesty has thrice traversed on his way to the rose garden of Kashmír. If on these hills an ox or a horse be killed, storm clouds and wind arise with a fall of snow and rain; (3) Tangtalah.

The country is enchanting, and might be fittingly called a garden of perpetual spring surrounding a citadel torraced to the skies, and deservedly appropriate to be either the delight of the worldling or the retired abode of the recluse. Its streams are sweet to the taste, its waterfalls music to the ear, and its climate is invigorating. The rain and snowfall are similar to that of Turkestán and Persia and its periodical rains occur at the same season as in Hindustán. The lands are artificially watered<sup>2</sup> or dependent

second deviating from Rajori runs to the Punch river and on to Punch and crossing the Háji Pír, joins the Murree road near Uri. The third, parting from Samani Sarai, passes through Kotli and Sera to Punch and unites with the second. The route by Shupiyon is the Pir Panjál. The second is Tangtalah which name, however, is no longer known and is probably a misscript. The third is believed by the Pandit to be the Hasti Bhanj, for it is the only one by which elephants can travel, and to this day elephants from Jammu must be sent by Kotli to Punch and across Haji Pir to Uri. Cf. Vigne's Kashmir and Ladák, 1. 147 in which 20 passes into Kashmir are mentioned and described.

1 Panchál in most of the MSS. which Cunningham asserts is the pronunciation of the Punjábis, and Pantsál of the Kashmíris, p. 128. The superstition regarding the tempest of wind and snow and rain, appears to be connected with that of the Yedeh or rain-stone frequently alluded to by Baber, the history of which is given by D'Herbelot. It is of Tartar origin and the virtues of the stone are celebrated in Yarkand and attested by authorities who have fever witnessed them. It is said to be found in the head of a horse or a cow, and if steeped in blood of an animal with certain peremonies, a

wind arises followed by snow and rain. See the introduction to Baber's memoirs The word Pir, by Erskine, p. xlvii. according to Drow, (Jummoo, and Kashmir) has come to be used more or less generally in Kashmir for "pass," probably from the "pir" or fakir who often established himself upon it to maintain or acquire the reputation of sanctity. Pir Panjál has come to mean the pass of the Great Range, Panjál being applied to a great mountain ridge. There was once a fakir who lived on it and bore the title of "pir." Bornier who crossed in Aurangzeb's time mentions a hermit on the pass who had lived there since the reign of Jahangir. The creed he professed was not known, but his powers were said to be miraculous and the elements were under his control, rain, hail, storm and wind rising or ceasing at his bolding. He demanded alms in a tone of authority, and forbade any noise being made lest a tempest should be the consequence, an experience which Jahángir incurred to his extreme peril through disobedience of this injunction. Voyages, II, 290.

2 The terms are Abi, Lalmi. The first signifies in the N.-W. P., land watered from pends, tanks, lakes and watercourses, in distinction to that watered from wells, and as being liable

on rain for irrigation. The flowers are enchanting fill the heart with delight. Violets, the red rose and wild narcissus cover the plains. To enumerate its flora would be impessible. Its spring and autumn are extremely beautiful. The houses are all of wood and are of four stories and some of more, but it is not the custom to enclose them. Tulips! are grown on the roofs which presont a lovely sight in the spring time. Cattle and sundry stores are kept in the lower storey, the second contains the family apartments, and in the third and fourth are the household chattels. On account of the abundance of wood and the constant earthquakes, houses of stone and brick are not built, but the ancient temples inspire, astonishment. At the present day many of them are in ruins. Woollen fabrics are made in high perfection, especially shawls which are sent as valuable gifts to every clime. But the bane of this country is its people yet strange to say, notwithstanding its numerous population and the scantiness of the means of subsistence, thieving and begging are rare. Besides plums and mulberries, the fruits are numerous. Mclons, apples, peaches, apricots are excellent. Although grapes are in plenty, the finer qualities are rare and the vines bear on mulberry trees. The mulberry is little eaten, its leaves being reserved for the silkworm. The eggs are brought from Gilqit and Little

to fail in the hot season, is assessed at a The second is a Pushtu word (Raverty) and means growing spontaneously and applied to crops wholly dependent on rain for irrigation or spring crops. The next term Chalkhai in the text I have ventured to amend as , sly S which occurs in a MS. belonging to the Governor of Jamma. Though a variant جلكهاي may stand for Julkháya signifying parched land that has absorbed its moisture, yet the absence of a conjunction between it and Lalmi evidences a disconnection in the جنگلهای Another variant supports this view but the reading of the Jammu MS. is the best and fittingly precedes the sentence that follows.

1 Dr. King takes this to be probably the Fritillaria Imperialis, though there is nothing against the plant being a real tulip. The T. stellata is common in many parts of the N. W. Himalayas, so common as to be a troublosome weed in the fields. The European tulip is only one of a large genus and is not likely to be the plant referred to. Moorcroft says that the roofs are formed of layers of birch bark covered by a coating of earth in which seeds dropped by birds or wafted by the wind have vegetated and they are constantly overrun with grass and flowers.

<sup>2</sup> All travellers from Hwen Thsang downwards concur in this opinion, but Moorcroft almost alone has realised that the vices of the Kashmírian are due to the effects of his political condition rather than his nature, and that the transformation of his character is possible to a botter government and a purer faith. Mendicancy has largely developed since Abul Fazl's day.

Tibet, in the former of which they are procured in greater abundance and are more choice. The food of the people is chiefly rice, wine, fish and various vegetables, and the last mentioned they dry and preserve. Rice is cooked and kept over night to be eaten. Though sháli rice is plentiful, the finest quality is not obtainable. Wheat is small in grain and black in colour, and there is little of it, and little constaned. Grams and barley are nowhere found. They have a species of sheep<sup>3</sup> which they call Hándú delicate and sweet in flavour and wholesome. Apparel is generally of wool, a coat of which will last for some years. The horses are small, strong, and traverse difficult ground. There are neither eleplants nor camels. The cows are black and ill-shaped, but give excellent milk and butter. There are artificers of various kinds who might be deservedly employed in the greatest cities. The bazár system is little in use, as a brisk traffic is carried on at their own places of business. Snakes, scorpions and other venomous reptiles are not found in the cities. There is a mountain called Mahádeva and in any spot whence its summit can

- 1 Gladwin and the S. ul M. have here 'mu'ng,' the pulse, Phaseolus munjo.
  - 2 The chick-pea, Cicer arictinum.
- 8 Here follow two words, اسا 3 "like the Kadi." A marginal gloss to two MSS, defines these words as resembling in size and stature the female Another gloss exof the 'kharmi.' plaining 'kharmi' is unhappily wanting. According to Cunningham (Ladak, p. 210) the Ladáki sheep are of two kinds, the tall black-faced Huniya used chiefly for carrying burdens and the pretty diminutive sheep of Purik used only for food. The common sheep is the Huniya which with the exception of the Purik breed is almost the only kind of sheep to be found throughout Tibet. e It is much larger than any of the It. lian breeds, the height averaging from 27 to 30 inches. Nearly the whole of the traffic is transported on these shoop which are food, clothing, and carriage and are the principal wealth of the country. Drew (Jummoo and Kashmir p. 288) gives the average weight carried

by them at from 24 to 32 lbs. The Parik sheep when full grown is not larger than a south-down lamb of 5 or 6 months, and is said by Moorcroft to equal in the fineness and weight of its fleece and flavour of its mutton any race hitherto discovered. The oxen are tho yák or chauri-tailed bull and the yák cow, Brimo or Dimo, and their produce with the common cattle. The yak is kept chiefly for loads, being generally too intractable for the plough. The cow is kept only for milk. The most valuable hybrids are the Dso bull and Dsomo cow, the produce of the male yak and common cow. Other hybrids are the Drepo or Drelpo, the male produce between the common bull and the Dsomo and the Dreme or female. The Governor of Jammu whose considerable attainments are always at the service of those who seek his aid, informs me that Handu is a pure Kashmiri word and signifies an ordinary domestic ram, generally well fed and taken care of for the purposes of fighting or sacrifice.

be seen, no snake exists, but fleas, lice, ghats and flies are very common. From the general use of pellet-bows which are fitted with bow-strings, sparrows are very scarce. The people take their pleasure in skiffs upon the lakes, and their hawks strike the wild-fowl in mid-air and bring them to the boats, and sometimes they hold them down in the water in their talons, and stand on them, presenting an exciting spectacle.

Stags and partridges likewise afford sport and the leopard too is tracked. The carriage of goods is effected by boat, but men also carry great loads over the most difficult country. Boatmen and carpenters drive a thriving trade. The Bráhman class is very numerous.

Although Kashmír has a dialect of its own, their learned books are in the Sanskrit language. They have a separate character which they use for manuscript work, and they write chiefly on Túz which is the bark of a tree, worked into sheets with some rude art and which keeps for years. All their ancient documents are written on this. Their ink is so prepared as to be indelible by washing. Although, in ancient times, the learning of the Hindús was in vogue, at the present day, various sciences are studied and their knowledge is of a more general character. Their astrological

2 The languages of Kashmir are divided into 13 separate dialects. Of these Dogri and Chibali which do not differ much from Hindustáni and Panjábi aro spoken on the hills and the Punch and Jammu country. Kashmiri is mostly used in Kashmir proper and is cariously and closely related to Sanskrit. dialects are included in the term Pahári: two are Tibetan spoken in Baltistán, Ludakh and Champas) and three or four varieties of the Dard dialects of Aryan origin in the North-West. The thirteen dialects are enumerated and discussed by Drew (Jummoo and Kashmir) and a Language map defines the groups that are mutually incomprehensible, classify. ing the dialects under five languages. Cunningham says that the Devanagari alphabet of India was introduced into Tibet from Kashmír in the first half of the 7th century of our era. Sambhota was the first who taught the Tibetans the use of the Kashmirian characters which remain unchanged to this day. Ladák, p. 5.

8 Tis in the Burhan i Kati is said to be the bark of a tree used to wrap round saddles and bows. According to Dozy, Ibn Baitar makes it synonymous with the white poplar, a meaning, مور رومى confirmed by Hamza Ispaháni who calls it the خدنگ, a name of similar import. Dr. King identifies it with the wellknown birch, Betula Bhojpattra, Wall. Bhojpattra he states is the current vernacular name, but in the N. W Himalayas it is known in various localities as Barj, Burzal, Shág &c. Its bark splits into very thin layers and is largely used even now for writing upon, and many of the oldest Sanskrit MSS, are written on it. It is also used nowadays, to make umbrellas, for wrapping up parcels and to roll up as tubes for fexible hookah-The etymology of Tuz is not stems. cloar.

art and astronomy are after the 'manner of the Hindús. The majority of the narrow-minded conservatives of blind tradition are Sunnis, and there are some Imámis and Núr Bakshis, lall perpetually at strife with each other. These are chiefly from Persia and Turkestán. Their musicians are exceeding many and all equally monotonous, and with each note they seem to dig

¹ As the account of this sect in Ferishta has been almost entirely passed over by Briggs in his translation, the omission may be here made good and will serve the double purpose of supplementing his version and clucidating the present text. With the following note may be compared a monograph on the Roshaniyah sect by Dr. Leyden in the XIth Vol. Asiatic Rosearches.

Mirzá Haidar (Doghlát) in his work the Kitab i Rashidi says that formerly all the inhabitants of Kashmir were of the Hanifi sect. In the time of Fath Sháh, a man named Shamsu'ddin came from Irak and declared himself to be a follower of Mír Muhammad Núr Baksh. He introduced a new form of religion which he called Nurbakshi and promulgated various heretic and impious opinions and circulated among the reprobate a book of theology named Uhútah which accords neither with the Sunni or Shiah belief. And the followers of this sect, like heretics, consider it their duty to revile and abuse the three Caliphs and Ayesha, but unlike the Shiahs, they regard Amír Sayyid Muḥammad Núr Baksh as the Mahdi and Apostle of his time, and they do not believe as the Shiahs do in saints and holy persons, but consider He thus introduced them to be Sunnis. innovations in religious worship as well as in worldly transactions, and styled his creed Núrbakshi. Mirzá Haidar adds, 'I have seen many elders of this sect in Badakshán who have shared in my literary and scientific pursuits. all outwardly observe the various religi-

ous obligations and follow the instructions of the Prophet, and their belief is in conformity with that of the Sunnis. One of the sons of Amír Sayyid Md. Núr Baksh showed me his work. There was a striking passage in it which runs thus: "Kings and the rich and the ignorant are of opinion that worldly power cannot be combined with piety and purity of heart in any one person. This idea is altogether false, for the great prophets and apostles, notwithstanding their divine legation ruled kingdoms and strove likewise for purity of heart, such as Joseph, Solomon, David, Moses and our Prophet." This opinion is opposed to the belief of the Núrbakshi sect but is in accord with that of the Sunnis. I sent the theological work Uhútah which was well known in those days in Kashmir to the learned men of India. Their judgment on it was as follows: 'O God, show unto us the truth in its reality and the false wherein it is void, and show unto us things as they verily are.' After a studious and careful consideration of this work, it appears to us that its author believes in a false religion, has forsaken the divine commands and prohibitions and has excluded himself from the congregation of the In his pretension that God Sunnis. hath commanded him to do away with all differences, firstly, in the developments of the religious teaching of Islam that have arisen among the followers of the Prophet and to restore it to the form it held in his time without addition or diminution, and secondly, in its fundatheir nails into your liver. The most respectable class in this country is that of the Brahmans, who not withstanding their need of freedom from the bonds of tradition and custom, are true worshippers of God.

They do not loosen the tongue of calumny against those not of their faith, nor beg nor importune. They employ themselves in planting fruit trees, and are generally a source of benefit to the people. They abstain

mental principles among the sects and among all peoples with certainty of belief, he is false and inclined to the doctrine of heretics and perverts. It is the religious duty of those who have the power, to destroy this book and efface it from the earth, and to extirpate this religion, root and branch, and to prohibit persons from following it and acting according to its dogmas. And if they persist in their belief and abandon not their false creed, it is necessary for the security of the Muslims from their ill example, to chastise and even slay them. But if they abandon it and repent of their past conduct, they should be directed to follow the teaching of Abu Hanifa to whom our Prophet alluded in his saying, 'Lamp of my followers.' When this declaration reached me, I compelled many men of Kashmir who were much disposed to this heresy, to accept willingly or otherwise the true religion and I put others to death, Some of these men saved themselves by adopting mystic doctrines and called themselves Súfis. In reality they are not sincere Súfis, but are a sprinkling of heretics and atheists who lead men astray, do not know what is lawful or unlawful, consider night watching and abstinence in food, acts of piety and purity, eat whatever is put before them, are avaricious and greedy to an extreme; sedulously employ themselves in the interpretation of dreams, fortune-telling and disclosing events, past and future; prostrate themselves before one another,

and together with such disgraceful acts, observe the forty days of retirement : are averse from the pursuits of the learned, walk proudly in the way of interior holiness, omitting the observance of religious forms and ceremonies, and maintain that the former is independent of the latter. In short, such heretics and atheists are not to be found elsewhere in the world. May God preserve us, and take the people of Islam under His protection, and save them from such calamities and misfortunes in the name of Muhammad and his descendants." Before these people, there lived in Kashmir a sect of Sun-worshippers who were called Shammassin. Their creed was that the sun's light owed its existence to their purity of faith, and that they themselves existed through the light of the sun, and that if they rendered their faith impure, the sun would cease to be. On the other hand if the sun ceased to shine they would not live; thus they owed their existence to the sun and without them it could not endure. When the sun is present, that is in the day-time they are bound to act virtuously, as he sees their actions, but when it is night and the sun neither sees them nor has knowledge of what they do, their moral responsibility for This sect called their deeds ceases. themselves "Shamsu'ddin (Sun of Religion) pretending to receive the delivery of the title from heaven. The Kashmiris abbreviated it into Shammasi."

from flesh-meat and do not marry. There are about two thousand of this class.

The Tolah<sup>1</sup> in this country is 16 máshas, each mashá being equal to 6 surkhs. The gold mohur weighs 16 dánis, each dáni equalling 6 surkhs, being 4 surkhs more than the ordinary mohurs of Delhi. Rop Sásnú<sup>3</sup> is a silver coin of 9 máshas. The panckhu is of copper, equal to the fourth of a dám and is called kasérah. One-fourth of this is the bahgagni, of which again one-fourth is called shakri.

4 kasérahs=1 ráhat.

40 kasérahs=1 sásnú.

 $1\frac{1}{3} s \acute{a} s n \acute{u} = 1 s i k k a h$ .

100 sikkahs = 1 lakh which, according to the imperial estimate, is equal to one thousand dáms.

The whole country is regarded as holy ground by the Hindú sages. Forty-five shrines are dedicated to Mahadeva, sixty-four to Vishnu, three to Brahmá, and twenty-two to Durga. In seven hundred places there 'are graven images of snakes which they worship and regarding which wonderful legends are told.<sup>3</sup>

1 Cf. Vol. I, p. 16, n. 36, and 37.

The Surkh is the common red and black bead, Abrus precatorius, and is equal to a Rati in weight. For Dáni, the S. al M. has Dának الحائق the Arabicised form of Dáng (ادائك) probably the correct reading as it certainly is almost the corresponding weight, 6 surkhs being equal to a másha with the Kashmíris, and 8 in India. But every denomination of weight has local variations. At p. 32, Vol. I, the weights of two current modurs of pure gold are given, viz., Lúl i Juláli = 1 tola 1,3 surkhs = 974 surkhs.

The other = 11 máshas = 88 do. The Kashmíri

mohur = 16 dáni or dánáks 
$$1 D=6 S$$
 = 96 surkhs.

The 96 ratis or surkhs in a tolah exactly represent the 96 carat grains in the gold assay pound.

2 The faultiness of the text has been correted by the learning of the Gover-

nor of Jammu who tells me that "rop" signifies silver, and "sás" a thousand, in Kushmíri. In former times ordinary money transactions were conducted in Kashmir by means of copper coins, for the great majority of payments were made in grain which has always been abundant there, but from its monopoly by the State, difficult to obtain. One copper coin was called a hundred, and two coppers two hundred, and so on. A thousand, represented 10 coppers which was probably the only silver coin of early times. Its value now would be about 21 annas, but as Abul Fazl gives its weight as 9 máshas, its value would then have been about 10 annas. coin is now unknown. The text has panchuhu and bárahkáni.

<sup>3</sup> Serpont-worship, according to Genl. Cunningham, has been the prevailing religion in Kashmir from time immemorial. The reigning sovereign who at the time of Hwen Thsang's arrival in KashSrinagar is the capital and is 4 farsakhs in length. The rivers Bihat, Már, and Lachmahkul¹ flow through it. The last-mentioned runs occasionally dry: the second, at times, becomes so shallow that boats cannot pass. This has been a flourishing city from ancient times² and the home of artificers of various kinds. Beautiful shawls are woven, and they manufacture woollen stuffs³ extremely soft. Durmah, pattú and other woollen materials are prepared but the best are brought from Tibet. Mír Sayyid Ali Hamadáni³ resided for some time in this city, and a monastery founded by him still preserves his memory. To the east is a high hill known as the Koh i Sulaimán, and adjoining the city are two large lakes always full of water, and it is remarkable that their water will not deteriorate in good savour and wholesomeness for any length of time provided that their free exit is undisturbed.

Near the town of Brang is a long defile in which is a pool seven yards square and as deep as a man's stature. It is regarded as a place of great sanctity. Strange to say it is dry during eleven months, but in the Divine month of Urdi-bihisht (April), water bubbles forth from two springs.

mír in A. D. 631, was Durlabha, is said to have been the son of a Nága or Dragon, and the dynasty he founded is called the Nága or Karkola. Ancient Geography of India, p. 92.

I The Jhelum, which nearly intersects the valley is formed, says the I. G., by the junction of three streams, the Arpat, Bring and Sandaram, and receives in its course numerous tributaries. It mentions the Tsont i Kul, or apple-tree canal connecting the Dal or city lake, with the Jhelum which it enters opposite the palace and the Nalli Már which flows into the Sind near Shádipúr connecting the Auchar with the Dal. The Dúdgauga, a stream of good volume joins the river on the left bank at the city of Srinagar.

<sup>2</sup> Srinagari, the old capital, prior to the erection of Pravarasenapura is stated in the Raja Tarangini to have been founded by Asoka, who reigned between B. C. 263—266. It stood on the site of the present Pándrethán, and is said to have

extended along the bank of the river from the foot of the Takt i Sulaimin to Pántasok, a distance of more than three miles.

as at page 110 of the text, with a difference in the final t, translated, Vol. I, p. 95. "Scarlet broad-cloth." In Wilson's Glossary, it is translated woollen or broad-cloth, derived apparently from the English 'scarlet.' For Durmah and Pattú, see Vol. I, p. 95.

• This monastery is built entirely of wood. Pandit Radha Kishan, Governor of Jammu tells me that it is still extant and known as the Khankah i Mualla, on the right bank of the Bihat above Zenn Kadal the fourth bridge of the town of Srinagar. An illustration of it will be found in the title page of Drew's Jammu and Kashmir, where it is called the mosque of Shah Hamadan. His story is given in Vigne II. 82 and in Hügel's Travels, p. 117.

First in one corner of it is a cavity like a mortar called Sendh brári: when this becomes full, the spring rises in another corner called Sat ríshi. From these two sources the pool runs over. Sometimes it boils up for three hours, and at times for only a second. Then it begins to decrease till not a drop remains. At three periods of the day, viz., morning, noon and evening, this rise occurs. Various flowers are thrown in as offerings to either spring, and after the reflux of the water, the flowers of each votary are found in their respective springs.<sup>1</sup>

But this, like the divining cup is a contrivance of the ancients to secure the devotion of the simple.

In this vicinity also is a spring, which during six months is dry. On a stated day, the peasants flock to worship and make appropriatory offerings of a sheep or a goat. Water then flows forth and irrigates the cultivation of five villages. If the flush is in excess, they resort to the same supplications, and the stream subsides of its own accord. There is also another spring called Kokar Nág, the water of which is limpid, cold and wholesome. Should a hungry person drink of it, his hunger will be appeased, and its satisfaction in turn renews appetite. At a little distance, in the midst of a beautiful temple, seven fountains excite the wonderment of the beholder. In the summer time self-immolating ascetics here heap up a large fire around themselves, and with the utmost fortitude suffer themselves to be burnt to ashes. This they consider a means of union with the Deity. There is also a spring which produces touchstone, and to the north of it a lofty hill which contains an iron mine.

The village of Vej Brára, one of the dependencies of Inch is a place of great sanctity. It was formerly a large city<sup>3</sup> and contained wonderful

1 Tieffenthaler ascribes the cause of the phenomenon to the melting of the mountain snows under the influence of the sun which descending along hollows or by subterranean passages reach this cavern and boil up within it. The later challitions he conteives, are due either to the shade of the trees or the declining force of the sun on the snows. Bernier's opinion is somewhat the same. Voyages, II, 293.

2 Vigne (I. 339) on the contrary bears testimony to its being provocative of appetite. The spring, situated about 2½ miles from the iron works at Sof Afan, forms a stream equal in volume to that of Vernag and far superior in the quality of its water.

• The principal ancient cities of Kashmír are the old capital of Srinagari and the new, Pravarasenapúra which was lost in the former name: Khagendrapura and Khanamusha, identified with Kákapur on the left bank of the Bihat, ten miles to the south of the Takht i Sulaimán, and Khunamoh, four miles north-east of Pámpur: Vijipara and Pantasók. The formertwenty-five miles

temples. In the vicinity is an upland meadow called Nandimarg, of which I know not whether most to praise its level sweep of mead, the loveliness of its verdure and flowers, or the bountiful virtues of its streams and its air. In the village of Pampúr one of the dependencies of Víhí, there are fields of saffron to the extent of ten or twelve thousand bighas, a sight that would enchant the most fastidious. At the close of the month of March and during all April, which is the season of cultivation,1 the land is ploughed up and rendered soft, and each portion is prepared with the spade for planting, and the saffron bulbs are hard in the ground. In a month's time they sprout and at the close of September, it is at its full growth, shooting up somewhat over a span. The stalk is white, and when it has sprouted to the height of a finger, it begins to flower one bud after another in succession till there are eight flowers in bloom. It has six lilac-tinted petals. Usually among six2 filaments, three are yellow and three ruddy. The last three yield the saffron. When the flowers are over, leaves appear upon the stalk. Once planted it will flower for six years in succession.

south-east of the capital: the latter three miles from the Takht i Sulaimán; Surapura the modern Sopur, mentioned in the Kashmir chronicles as Kambuva: Kanishkapúra, corrupted to Kámpur: Hushkapura probably Baramula: Jushkapúra now Zukru or Zukur four miles north of the capital: Parihasapura built by Lalitaditya (A. D. 723-760): Sadmapura, now Pampur: and Avanlipura, now only a small village, Wantipur, seventeen miles south-east of the present capital. Cunningham, pp. 95, 103. The text has Panjbrárah, Vigne, and Moorcroft Bij Beara, I follow the spelling Governor of Jammu.

- <sup>1</sup> See Vol. I, p. 84 where the method of cultivation of this plant is explained somewhat differently, and the Wákját i Jahángiri, in Elliot's Hist. India, VI, 375.
- \$ I am indebted to Dr. King for the following note:
- "There are three stamens and three stigmas in each flower. The latter yield the suffron. The style divides at the level of the anthers into three yellow

drooping branches which hang out of the flower and become gradually thickened and tubular upward, stigmas dilated, notched and often split down one side, dark orange coloured. The mode of collection and preparation of saffron varies in different countries, but it consists essentially in removing the stigmas with the upper part of the style from the other parts of the flower and afterwards drying the parts detached. A not uncommon adulteration of saffron is made by intermixing the dyed stamens of the saffron crocus. It takes from 7000 to 8000 flowers to yield 17½ onnces of fresh saffron which by drying is reduced to 31." Medicinal Plants. Bentley and Trimon, IV, 274. In the Wakját i Jehángiri, it is assorted that in an ordinary year, 400 maunds or 3,200 Khurasáni maunds are produced. Half belongs to Government, half to the cultivators and a sér sells for about 10 Rs. A note states that one good grain of saffron contains the stigmata and styles of 9 flowers; hence 4,329 flowers yield one oz. The first year, the yield is small: in the second as 30 to 10. In the third year it reaches its highest point and the bulbs are dug up. If left in the same soil, they gradually deteriorate, but if taken up they may be profitably transplanted.

In the village of Zéwan are a spring and a reservoir which are considered sacred, and it is thought that the saffron seed came from this spring. When the cultivation begins, they worship at this fount and pour cow's milk into it. If as it falls it sinks into the water, it is accounted a good omen and the saffron crop will be plentiful, but if it floats on the surface, it will be otherwise.

In the village of Khriu 360 springs refresh the eye and each of these is accounted a means of divine worship. Near this is an iron mine.

Maru Adwin adjoins Great Tibet where the Handú is found of the best breed and large in size, and carries heavy burdens. Near this is a hill called Chatar Kót on the summit of which snakes are so numerous that no one can approach it. There is also a high hill difficult of ascent, on which is a large lake. It is not every one that can find his way to it, for it often disappears from sight. At the foot of the mountain in different places images of Mahádeva fashioned of a stone like crystal are found and are a source of wonder.

In the neighbourhood of Achh Dal, one of the dependencies of Khattar is a fountain which shoots up to the height of a cubit, and is scarce equalled for its coldness, limpidity and refreshing qualities. The sick that drink of it and persevere in a course of its waters, recover their health.

In the village of Kotihár<sup>2</sup> is a deep spring, surrounded by stone temples. When its water decreases, as image of Mahádeva in sandal-wood appears. The quality of this spring does not alter.

In the vicinity of Wular is a lofty mountain, containing a salt spring. The Kashmír stag<sup>3</sup> is here found in numbers.

Matan's stands upon a hill and once possessed a large temple. There

- 1 I conceive the text would be amended by a different punctuation, viz.,
  د شوار برا بر او حوضي. This retains the reading and the sense, which the text confuses. The name above is Maru Wurdwun according to Vigne.
- Skotihár is a perganah according to Vigne and produces the best silk in Kashmir.
- 8 The Bárá Singha or Kashmír stag. (Cervus Cashmerianus). It is known in Kashmir as the Hanglu, and Vigne describes it as most numerous in Dachhinpárah.
- 4 This name is retained by Hügol (Travels, p. 135), through apparently not familiar to Vigne (1, 381), who gives it the better known appellation of Mar-

is a small pool on the summit, the water of which never decreases. Some suppose this to be the Well of Babylon, but at the present day there is no trace of anything but an ordinary pit.

On the slope of the hill is a spring, at the head of which a reservoir has been constructed, full of fish. The sanctity of the place preserves them from being touched. By the side of it is a cave, the depth of which cannot be ascertained.

In Kháwarpárah is a source, whose waters tumble headlong with a mighty roar.

In the village of Aish<sup>1</sup> is the cell of Bábá Zainu'ddín Ríshi. It is in the side of a hill. It is said that in ancient times the hill held no water, but when he took up his abode there, a spring began to flow. For twelve years he occupied this cell and at length closed its mouth with a large stone and never went forth again, and none has ever found trace of him.

The town of Dachchhinpárah<sup>2</sup> is on the side of a mountain bordering

tand, situated on the highest part of the Karewah or raised plain between Islámábad and the higher mountains. templo is described by Hügel as "Korau Pandau," the beautiful ruins of which are the finest in Kashmír. Vigne inverts the order as Pandu Koru. At 150 yards distance as the Cháh i Bálul or well of Hárút and Márút whoso story does not need repetition. spring referred to in the following paragraph is that of Bawan, one of the holiest in Kashmir, swarming, says Vigue, (I, 359) with Himalayan trout. Hügel gives the legend of the caves one of which he was assured extended 10 kos, and that no one who ever entered, had been known to return. He penetrated to the end of it in a few minutes. Matan is the name of the Karewah at the end of which, according to Moorcroft, the Martand temple stands (II, 255) ascribed like most of the architectural remains to the Pándus.

' The village of Aish Makam or the abode of pleasure, holds in a long building situated conspicuously on the left bank of the Lidar, the shrine of the saint. He directed that a temb should be creeted where his staff should be found, as his body would disappear. It is still missing. See Vigne, II, 6. The text has Ash with a variant Aish.

2 With reference to this name and that of Kháwarpárah Cuuningham instances an effect on the nomenclature of the points of the compass caused by difference of creed. By the Hindú who worships the sun, the cardinal points are named with reference to the East, as para, the 'front' or earth, to which he turns in his daily morning worship; apara, 'behind' or the West, Váma, the 'left' hand or North, and dakshina, the 'right' hand or the South. By the Muhammadan who turns to the West or Mecca, these terms are reversed, and 'Dachin' which still means the 'right' hand in Kashmiri, is now used to denote the North and Kawar on the 'left' to denote the South Thus on the Lidar, there is the subdivision of Dachinpára to the west of the stream, and Kawarpára to the south. On the Behat river also, below Baráhmula, the subdivision of Dachin lies to the north, and that of Great Tibet and is fed by the waters of the above-mentioned spring. Between Great Tibet and the above-mentioned parganah is a cave in which is an image in ice called Amar Nút. It is considered a shrine of great sanctity. When the new moon rises from her throne of rays, a bubble as it were of ice is formed in the cave which daily increases little by little for fifteen days till it is somewhat higher than two yards, of the measure of the yard determined by His Majesty; with the waning moon, the image likewise begins to decrease, till no trace of it remains when the moon disappears. They believe it to be the image of Mihideva and regard it as a means (through supplication) of the fulfilment of their desires. Near the cave is a rill called Amrioti, the clay of which is extremely white. They account it auspicious and smear themselves with it. The snows of this mountainous tract nowhere melt, and from the extreme cold, the straitness of the defiles and the rough inequalities of the road, they are surmounted with great toil.

In the village of Dúkhámún is a spring, and whenever its water boils up and becomes turbid its surface is covered with particles of straw and rubbish, the dust of dissension arises in the country. A quarry of Solomon's stone is in the vicinity of which utensils are fashioned.

About the pargunah of Phúk grow a variety of herbs and plants. Adjoining is a large lake called Dal. One side of it is contiguous to the city and on its surface a number of floating islands<sup>2</sup> are constructed which are cultivated, and fraudulent people will at times cut off a piece and carry it away to a different position. Sultán Zainu'l Aábidín constructed in this lake a causeway (sad) of clay and stone one kós in length from the

Káwar to the south of the stream. This change in the meaning of Dachin from south to north must have taken place before the time of Akbar as Abul Fazl describes Dachinpára as situated at the pool of a mountain on the side of Great Tibet, that is to the north of the Lidar. Ancient Geography, India, p. 94.

The Amarnáth cave is marked in Drew's map, south-east of Baltal and Songmarg, near the sources of the Sind river. Its history and ceremonies are told by Vigne, II, 8. 'The ice bubble was doubtless 'a stalactite. See Moorcroft, II, 252.

Applied indiscriminately to both

agate and onyx. Tieffenthaler describes a stone of their country, as green with white streaks which is worked with diamond powder and made into phials, saucers, hafts of daggers and the like. It is probably a kind of jade.

\*\* Cacumbers and molons are commonly grown on them. Their construction is described by Moorcroft (11, 138) with the thoroughness which characterizes his observations. The causeway is called by Vigno, (11, 99) Sad i Chodri and is carried entirely through the lake to the village of Isha Bryri, four miles on the opposite side. It more resembled a line of rushes than a causeway in his day.

city to this parganah. In the vicinity also is a spring of which the sick drink and are restored to health.

In the village of Thid, is a delightful spot where seven springs unite: around them are stone buildings, memorials of bygone times. There is also a source which in winter is warm and in summer cold.

In the village of Bázwál is a waterfall from the crest of Sháhkót. It is called Shálahmár. Here fish are caught in numbers. A streamlet is caged at two ends and when the water is carried off, the fish between are taken.

In Ishibári<sup>2</sup> is a spring held sacred by the people of Hindustán, called Suryasar, surrounded by stone temples. Shakarnág is a spring which is dry all the year, but should the 9th of any month happen to fall on a Friday, it bubbles up and flows from morn till eve, and people flock to partake of its blessings.

In the village of Rambal<sup>3</sup> are a spring and a pool. Those who have special needs throw in a nut, if it floats, it is an augury of success; if it sinks, it is considered adverse.

In Bánihal is a temple dedicated to Durgah. If any one desires to learn the issue of a strife between himself and his enemy, he fills two vessels with boiled rice, the one representing his own fortunes, the other those of his foe, and places them in the temple and closes the doors. On the following day the devotees present themselves to learn the result. In whose vessel roses and saffron are found, his undertaking will prosper, and that which is full of straws and dirt, portends the ruin of the person it represents. Stranger still, in a dispute where it is difficult to discover the truth, each party is given a fowl or a goat and sent to the temple. They then poison each of these animals and severally rub them with their hands. His animal whose cause is just recovers, and the other dies.

In the Vér tract of country is the source of the Bihat. It is a pool measuring a jarib which tosses in foam with an astonishing roar, and its depth is unfathomable. It goes by the name of Vernág\* and is surrounded by a stone embankment and to its east are temples of stone. In the village of Kambar is a spring called Bawan Sendh<sup>b</sup> which during two

<sup>&</sup>lt;sup>2</sup> Thad, in the text.

In the text Isha balári. I am guided on these names by the Governor of Jamma.

Var. Zambíl, Zímbal, Ratíl.

Ver. is the old name for Shahábád.

A description of this celebrated fountain may be read in Vigne's Kashmir, I, 332, and in Moorcroft, II, 250.

Var. Bhawan Send, Biún Send, Bhu Sendh, Pawan Sendh.

months of the spring-time is in agitation. It is always full and its water never decreases.

In Devsar in the village of Balau is a pool called Balau Nág 20 yards square in which the water is agitated: it is embosomed in delightful verdure and canopied by shady trees. Whoseover is desirous of knowing the prospects of the harvest, or whether his own circumstances are to be prosperous or unfavourable, fills an earthen vessel with rice, writes his name on its rim, and closing its mouth, easts it into the spring. After a time the vessel of its own accord floats on the surface, and he then opens it and if the rice be fragrant and warm, the year will be prosperous and his undertakings successful, but if it be filled with clay or mud and rubbish, the reverse will be the case:

Veshaw<sup>2</sup> is the name of a stream which issues picturesquely from an orifice in a mountain, and at the same place is a declivity down which the waters tumble from a height of 20 yards with a thundering roar. Hindu devotees throw themselves down from its summit and with the utmost fortitude sacrifice their lives, in the belief that it is a means of securing their spiritual welfare.

· Kuthár<sup>8</sup> is a spring which remains dry for eleven years, and when the planet Jupiter enters the sign of Leo, it flows on the following Thursday and during the succeeding seven days is again dry and once more fills on the Thursday next following, and so continues for a year.

In the village of Matathámah is a wood in which is a heronry, the feathers are taken for plumes, and the birds are here regularly fed.

Near Shukroh<sup>6</sup> is a low hill on the summit of which is a fountain which flows throughout the year and is a place of pilgrimage for the devout: The snow does not fall on this spur.

- <sup>1</sup> This is also mentioned by Ferishta.
- <sup>2</sup> Vigue calls the cataract, Arabal or Haribal.
- This appears to be the Kosah Nág of Vigne which he says is pronounced Kausar or Kautsar by the Muhammadans after the fountain in Paradise.
- The text has relegated for a note as doubtful and substituted the conjectural emendation of as conjectural emendation of Pandit Radha Kishan, to whom I am indebted for so much regarding Kashmír, tells me that
- the word is pronounced Oukar or Okar and signifies a heron. See Vigne, I, 306. The heronries are strictly guarded and in the spring when their long feathers fall from their necks, there is a watchman in attendance to pick them up.
- <sup>6</sup> The Bráhmans of Kashmír identify this place which Cunningham supposes to be Zukru or Zukur still a considerable village four miles north of the capital, with Jushkapura founded by the Indo-Scythian prince Jushka, a brother of Kanishka and Hushka, p. 101.

In Nágám is a spring called Nílah Nág,¹ the basin of which measures 40 biyahs. Its waters are exquisitely clear and it is considered a sacred spot, and many voluntarily perish by fire about its border. Strange to relate omens are taken by its means. A nut is divided into four parts and thrown in, and if an odd number floats, the angury is favourable, if otherwise, the roverse. In the same way if milk (thrown in) sinks, it is a good omen, and if not, it is unpropitious. In ancient times a volume, which they call Nilmat, arose from its depths, which contained a detailed description of Kashmír and the history and particulars of its temples. They say that a flourishing city with lofty buildings is underneath its waters, and that in the time of Balu Sháh,² a Bráhman descended into it and returned after three days, bringing back some of its rarities and narrated his experiences.

In the village of Biruvi is a spring and in its water lepers bathe early on the first day of the week and are restored to health. In the vicinity is a plateau, a pasture ground for cattle, the grass of which has peculiar fattening properties.

In the village of *Halthal* of the pargunah of I'tehh is found a quivering tree.<sup>3</sup> If the smallest branch of it be shaken, the whole tree becomes tremulous.

Lir borders on the mountains of Great Tibet. To its north is a lofty mountain which dominates all the surrounding country, and the ascent of which is ardnous. At its foot are two springs, two yards distant from each other, the waters of one being extremely cold and those of the other exceedingly hot. They are considered sacred and the bones of bodies are here reduced to ashes: the bones and ashes of the dead are east into a large lake on the mountain and this ceremony is regarded as a means of union with the Divinity. If the flesh of an animal fall into it, a heavy fall

¹ There are two of this name; one mentioned by Vigne, (II, 170) near Drabogám, the capital of the parganal of Shukre, which is nothing more than a large pend in the forest. He heard nothing of Abul Fazl's legend, on the spot; the other by Moorcroft, (II, 283) who did not actually visit it as it lay out of his route, but describes it as the source of two streams, one taking the direction of the Lala-Koal or Pohru in Kashmír, the other that of Kathao in the Baramula pass.

<sup>&</sup>lt;sup>2</sup> Badu Sháh is Zainn'l Aibidín (Vigue, II. 73).

Por. King informs me that the Aspen (Populus tremula) occurs wild in the N. W. Himalaya. The P. Euphratica of which the leaves are as tremulous as the aspen, is also common in many parts. The former has a more northern range and is found in Siberia and may have been introduced into Kushmir. For the proper names in the tox I follow the guidance of the Governor of Jammu.

of snow and rain ensues. The river called Sind which rises in Tibet, is wholesome to drink, and is so clear that the fish in it are visible. They strike them with iron spears and catch them also in other ways. Shaháb-u'ddinpúr is on the banks of the Bihat, and about it are large plane trees which is a favourite resort. The Sind joins the Bihat at this point.

In Tulmúlá is an area of about 100 bíghas in extent which is flooded during the rains, and remains somewhat moist even after the waters have dried up. The people plunge in sticks of a yard in length, more or less, and work them about, and thrusting their hands into the holes pull out fish of four pounds weight and more, but commonly of small size.

In Satpúr is a pool, the depth of which cannot be fathomed. It is held in great veneration and is a place of worship. Bhutesar is a temple dedicated to Mahádeva. Whoever approaches to pay his devotions, hears the sounds of ceremonial worship and no one can tell whence they proceed.

In Khoiháma which adjoins Little Tibet is a large lake called the Wular twenty-eight kós in circumference. The Bihat flows into it and its course is somewhat lost to the eye. Here Sultán Zainu'l Aábidín built a large palace called Zain Lanka. Boats full of stones and branches of trees are sunk in the lake and pulled up by ropes after the lapse of three or four months, and many fish are taken that have homed there. The capture of water-fowl here affords considerable sport, and in the village of Ajas, stags are chased down to the lake and taken. Near Máchhámú is an island covered with trees which when shaken by the wind, cause the island also to quake.

Saffron is also cultivated in *Paraspúr*. It formerly held a lofty temple which when destroyed by *Sikandar* father of Sultán *Zainu'l Aŭbidín*, a copper tablet was discovered on which was inscribed in *Sanskrit*, that after the lapse of eleven hundred years, one Sikandar, would destroy it and gather for himself exceeding great chastisoment.<sup>3</sup>

- <sup>1</sup> See Vigne, II, 153. The legend of the Lanka islet is given in Muhammad Aázam's Hist of Kashmír translated by me in the A. S. Journal, XLIX, Part I, 1880.
  - <sup>2</sup> Var. Ahsan.
- Cunningham alludes to this at p. 102 and adds, 'The same story is told by Ferishta with the addition of the name of the Rája whom the translator calls Balnát probably a mistake for

Láldit, the contracted form of Lalitaditya among the Kashmiris. As the difference of time between this prince and Sikandar is barely 700 years, it is strange that the tradition should preserve a date so much at variance with the chronology of their own native chronicles.' His inference of the inaccuracy of the translation is correct. Ferishta has distinctly Lalitadit, and not Balnát, and he places the temple at Táraspur, In the Parganah of Kamráj¹ at the village of Trahgám the residence of the Chaks is a fountain of sweet water called Chatarnág and in the middle is a stone building of great age. The fish grow to great size but whosever touches them, is afflicted by some calamity.

Near Kargón is a defile called Sóyam<sup>2</sup> where an area of ten jaríbs of land becomes so hot at the time of the conjunction of Jupiter and Leo that trees are burnt up and a vessel of water if left on the ground will boil. A flourishing little town stands here. From Kamráj is a defile, one end of which touches Káshghar and on the west lies Pakli, where gold is obtained in the following manner. The skins of long-haired goats are spread in the fords of the river, with stones placed round them that the current may not bear them away. They are taken up after three days and left in the sun. When dry, they are shaken, yielding their three tolahs weight of gold dust. Gilgit is the name of another pass which leads to Káshghar. Gold is there obtained by soil washings.

At two days' distance from Háchámún is the river named Padmati which flows from the Dárdu<sup>3</sup> country. Gold is also found in this river.

but P. is the right initial and pronounced by the Kashmíris Poruspúr. (Vigne, II, 148). Parihásapura was built by Rája Lalitaditya who reigned A. D. 723—760. It was, writes Cunningham, situated on the river bank of the Jhelum near the present village of Sumbaj. The names in Briggs are frequently incorrect and his version skips whole passages of his author. See also p. 85, Vol. I.

1 Kamráj and Meráj were two lazge districts into which Kashmír was divided from the earliest times, the former being the north half of the valley below the junction of the Sind with the Jhelum, and the latter the south half, above that junction. Cunningham, p. 94. Vigne calls the village Táragáon (II, 139) the village of the stars. The remains of ancient masonry a fine spring were still to be seen, some of the blocks little inferior in size to those of Martand.

<sup>3</sup> Sulloyum in Vigne, (II, 281,) who states that it lies near the village of

Nichi Hama in the Parganah of Machiapora at the north-west end of the valley, and that 36 years before his visit an intense heat was found to issue from the spot. The phenomenon has several times occurred, a white smoke being occasionally seen to issue from the ground, but without sulphurous smell or fissures in the soil.

\* Fow people can be traced through so long a period in the same place as these whom H. II. Wilson (Moorcroft, II, 266, n.) identifies as the Dáradas of Sanskrit geography, and Daradræ or Daradæ of Strabo. He supposes them to be the Káfirs of the Muhammadans, though now nominally converted to Islam. The auriferons region of the Dáradas is mentioned by Humboldt (Cosmos II. p. 513. E. C. Otté) who places it either in the Thibetian highlands east of the Boor chain, west of Iskardo, or towards the desert of Gobi described also as auriferous by Hewen Thsang.

On its banks is a stone temple called Sárada¹ dedicated to Durgá, and regarded with great veneration. On every eighth tithi of Shuklapachch,² it begins to shake and produces the most extraordinary effect.

The system of revenue collection is by appraisement and division of crops, assessments for crops paying special rates and each transactions not being the custom of the country. Some part of the  $Sain Jihát^3$  cesses, however, are taken in each. Payments in coin and kind were estimated in kharwárs of (Sháli) rice. Although one-third had been for a long time past the nominal share of the State, more than two shares was actually taken but through His Majesty's justice, it has been reduced to one half. According to the assessment of  $Kazi^5$  (Ali) the revenue was fixed at 30 lakhs, 63,050 kharwárs, 41 taraks, each kharwár being 3 man, 8 sérs Akbarsháhi. A weight of two dáms is called a pal, and  $\frac{1}{2}$  and  $\frac{1}{4}$  of this weight are also in use.

Seven and a half pals are considered equivalent to one sér, two sérs are equal to half a man, and four sérs to a tarak, and sixteen laraks to one kharwir. A tarak, according to the royal weights (of Akbar) is eight sérs. Taking the prices current for several years, the Kázi struck an average of

- <sup>1</sup> A name of Durga as well as of Saraswati. See this name in the description of Kángra under Súbah of Lahore.
  - \* See p. 17 of this Volume.
  - <sup>9</sup> See p. 58, n.
- \* The immemorial tradition in Kashmir considered the whole of the land as the property of the ruler. portions of the khálsah lands the sovereigns divested themselves by grants in jught for various periods. The Sikhs made a general resumption, ousted the possessors of grants and reduced thou-In Moorcroft's sands to destitution. time (II, 125) the khálsa lands were let out for cultivation. Those near the city as Sar Kishti, head or upper cultivation, those more remote Pai-Kishti, or foot and lower. When the grain was trodden out, an equal division took place formerly between the farmer and the government, but the latter advanced its demands like it appropriated 7 of the
- Sar-Kishti and 3 of the P. K. crop. The straw fell generously to the share of the cultivator who was also permitted to steal a portion of his own produce by the overseer, -- for a consideration. In the time of Zainu'l Asbidín, the rice crop (the staple) is said to have been 77 lakhs of kharwars. In Moorcroft's day it was 20, at from 2\frac{1}{2} to 6\frac{1}{2} Rs. a kharwar. His weight-measures differ from those of Abul Fazl, a kharwar being 16 taraks, a tarak 6 sérs, a sér 20 pals, a pal 3\f Mahomed Shahi rupees, which (the rupee being 173.3 grains) should make the ser nearly 2 pounds. The actual sér was, however, not above one pound avoirdupois, and a kharwar or ass-load was therefore 96 pounds. A horse-load equalled 22 taraks.
- See pp. 347 and 411 of Vol. I, where further information is given regarding the revenue system, its exactions and the disturbances which led to the Ķázi's murder.

the aggregate, and the kharwár (in kind) was ascertained to be 29 dáms, and the kharwár in money, was fixed according to the former rate of  $13\frac{1}{25}$  dáms. The revenue, therefore, amounted to 7 krórs, 46 lakhs, 70,411 dáms. (Rs. 1,866,760-4-5), out of which 9 lakhs, 1,663 kharwárs and 8 taraks were paid in money, equivalent to 1 krór, 20 lakhs, 22,183 dáms. (Rs. 300,554-9-2.) The revenue fixed by Asaf Khan, was 30 lakhs, 79,443 kharwárs, of which 10 lakhs, 11,330½ kharwárs were in money. The cesses báj and tamghá, were altogether remitted by His Majesty, which produced a reduction of 67,824½ kharwárs, equivalent to 898,400 dáms. (Rs. 22,460.) For the additional relief of the husbandman, five dáms on the price of a kharwár, were thrown in. Although the revenue, in kharwárs, of Asaf Khán was in excess of that of Kázi Ali by 16,392 kharwárs, yet calculated in money the receipts are less, after deducting the remissions, by 860,034½ dáms (Rs. 21,500-13-7), because he estimated the kharwár in money which is of lower relative worth, above its value.

In the revenue returns forwarded by Kúzi Ali to the Imperial Exchequer, forty-one parganahs are taken while the return submitted by Asaf Khán contains but thirty-eight, there being but thirty-eight in point of fact. For Kúzi Ali on a review of the question separated the two villages Kurná and Dárdu, of the parganah of Kamráj, and dividing the parganah of Sáir i Mawázi into two, constituted these into two parganahs. In former times certain selected towns of each parganah were denominated Sáiru'l Mawázi (village-group) and were held as Khálisah. Kázi Ali

coupled together when remissions of taxation are mentioned and perhaps they were thus employed to express all cesses of whatever kind over and above the land revenue. Tampha occurs later under Kabul, signifying inland tolls.

• Lands of which the revenue was the property of the government, not being made over in grants or gifts, Júgír or Inúm to any other parties. Also to lands and villages held immediately of government and of which the State is the manager or holder. More generally it was applied to the exchequer under the Mulammagian administration. It is more usually pronounced Khálsah. Wilson's Gloss.

Vol. I, p. 411.

<sup>&</sup>lt;sup>2</sup> Var. 15,330 1.

I have retained these expressions as they may serve to throw some light on their exact nature. Tamghá has been already defined at p. 57 of this Volume, as being a demand in excess of the land revenue and báj is simply a toll or tax and must here have a somewhat similar application, but there were various other taxes in excess of land revenue, such as Jihát, Sáir Jihát, Farúa'át and others whose nature is defined at p. 58. Elliot discusses the value of the terms at p. 6, Vol II, of his Races of the North-West Provinces, but he arrives at no determination of their special fiscal significance. The two are, in several instances, found

united forty villages of the Marráj¹ side under the name of Parganah. Háveli and retained eighty-eight³ villages of Kamráj according to the for mer distribution, as parganah of Sáiru'l Mawázi.

The whole kingdom was divided under its ancient rulers into two divisions, Marráj on the east, and Kamráj on the west.

At the present day that a great part of the army in Kashmir has been withdrawn, the local militia consists of 4,892 cavalry and 92,400 infantry.

#### Sarkár of Kashmír.

Containing 38 Mahals. .Revenue, 3,011,618 kharwárs, 12 taraks, being equivalent to  $62,113,040\frac{1}{2}$  dáms. (Rs. 1,552,826); out of which 9,435,006 kharwárs, 14 taraks is paid in money, equivalent to 12,501,880 dáms. (Rs. 312,547.) Castes, various. Cavalry, 3,202. Infantry, 27,725.

#### The Marraj Tract.

Containing 22 Mahals. Revenue 1,792,819 kharwárs, 'equivalent to  $35,796,122\frac{1}{2}$  dáms, (Rs. 894,903), of which 670,551 kharwárs, 12 taraks are paid in money, equivalent to 8,885,248 dáms, (Rs. 222,131-3-2). Cavalry, 1,620. Infantry, 4,600.

City of S'rinagar. Revenue 342,694 kharwárs, 12 taraks, in money, 342,996 kharwárs, 8 taraks; in kiud, 1,698 kharwárs, 4 taraks.

Parganahs east of S'rinagar, 3 Mahals.

Abul Fazl duplicates the  $\tau$ , but at p. 98 of the text, one MS. gives Maráj which is the usual spelling. The Governor of Jammu says that both forms are in use. Vigne, (I. 272) and Moorcroft, (II. 113) give a list of 36 purganahs. H. H. Wilson the oditor of Moorcroft's travels notices that he has omitted some names.

Var. eight.

Var. Kashmah, and unintelligible variants of Zinah.

Further on, a variant gives Bhat, which in Elliot, I, 151, is one of the classifications of Bráhmans in the Census N.-W. P. for 1865.

Parganahs, north-east, 7 Mahals.

<sup>1</sup> Var. Háwah or Hádah.

Var. Káhú.

<sup>•</sup> This must be a mistake for 12, as 16 taraks make a kharwár: in the Arabic numerals the 2 (r) and 6 (7) are easily confounded.

<sup>•</sup> A horse load is 22 taraks.

<sup>&</sup>lt;sup>5</sup> Var. Taik. The Náik are classified in Elliot I, 152, as Bráhmans.

<sup>•</sup> Numeral omitted.

<sup>7</sup> Var. Rasah, Rinhah, Ratiah.

<sup>•</sup> Soérsaman, Súrsaman.

<sup>•</sup> Var. Bhakar. Drewe confirms the reading Thaker, which is the chief cultivating caste in the hills.

Sovereigns of Kashmír.

Fifty-three princes reigned during a period of 1266 years.

l.

Ugnand.

Damódar, } his sons.

Thirty-five princes succeeded whose names are unknown.6

II.

Lavah, (var. Lava.) Kishen, his son (var. Kish.)

- <sup>1</sup> Var. Akbari, Khaséri.
- <sup>9</sup> Var. Kahár,
- Var. Daneo, Danséo.
- Var. Khakar, Rinah, Kahikanku Díuah, Kahki Kahku.
- Gardhan. and Kardhan, in the Gulzár i Kashmír.
- As some of these names are supplied by the U. T., I append the series in apposition to the dynastics in the text. The series in Tieffenthaler corresponds, and is taken (says a note, apparently by Anquetil du Porron) from a history of Cashmir written by Haidar Maler. A. H. 1027 (A. D. 1607).

Rajas of Cashmir of the line of Curu in the lunar race worshippers of Nágas or snakes.

The Rájá Tarangini whence this line is taken, commences with an account of the dessication of the valley by Casyapa Muni, supposed to allude to the deluge. Wilson, As. Rs. XV, 1.

First period. Caurava race 1266 years.

- B. C. 3714. Cashmir colonised by Casyapa. B. C. 2666.

Fifty-three princes, names omitted by Hindu writers, Kahgandra, his son.
Surandra, his son.
Godhara, of another tribe.
Súran, his son.
Janaka, his son.
Shachinar, (var. Hashka, Bíshka).
Asóka, son of Janaka's paternal uncle.
Jalóka, his son.
Damódar, descendant of Asóka.
Hashka,
Zashka.

three brothers. Buddhists.

Kaniska, ) Abhiman.

> but partly supplied by Muhammadan authority as follows: Sulimán. Cassalgham. Maherkaz. Bandu Khán, (Pandu of the lunar line.) Lódi Khán. Leddor Khán. Khán, Hindú Sunder worship established. Cunder Khán. Sunder Khán. Tundu Khán. Beddu Khán. Mahand Khán. Durbinash Khán. Deosir Khán. Tehab Khán, dethroned by king of Cabul. Cálju Khán. Luvkhab Khán. Shermayaran Khán. Naureng Khán, conquered China. Barigh Klain. Gowasheh Khán. Pandu Khán II, extended empire to the sea.

Haris Khán.

Sanzil Khán. 13 Akber Khán. Jaber Khán. Nandor Khán. Sanker Khán, slain by. Bakra Rájá. An interval ensues and anthentic history commences with B. C. 2448. Gonerda, I, Kali Yuga 653. Gonanda or Agnand, a relation of Jarasundha, 1400. Wil-Damodara, I. Gonerda, II. Thirty-five princes: names forgotten. 1709. Lava (Bal-lava) Loo of Muhammadan historians. 1664. Causésaya. ,, 1660. Khagendra. 1600. Surendra, cot. with Bahman of Persia. 1575. Godhara. 1537. Suvarna. 1477. Janaca. 1471. Sachinara. 1394. Asoca, established Buddhism.

А. Ď.

971-3 Xema Gupta, destroyed many Viharas of Buddhists.

979-9 Abhimanyu, intrigues and tumult. 993-9 Nandi Gupta, put to death by his

grandmother Diddá. 994-10 Tribhúvana, shared the same fate.

996-10 Bhímá Gupta, ditto.

1001-1 Didá Ráni, assumed the throne, adopts.

1024-7 Sangráma Déva 11, with whom Wilson's list closes.

1032 Harirájá and Ananta Déva, his sons (continued from printed Taringini.)<sup>1</sup>

1054 Kalasa.

1062 Utkaršá, and Harsha Déva.

<sup>1</sup> The lengths of reigns only are given in the original; calculating backwards from Alán'ddín, it becomes necessary to curtail the reign of Harirájá (52 years) by about 30 years to form a natural link with Wilson's date of Sangráma Déva.—Prinsep. I add that the conclusion of this series is incompatible with the fictions even of Hindú Chronology, and though the intervention of 18 Muhammadan kings be conceded, the

term of four years is an extremely undignified allowance for this royal procession. The dates of the Muhammadan kings is continued from Table LXXV of the U. T. taken apparently from Briggs whose calculations are based on two dates given by Ferishta, riz, that of Shah Mir's arrival in Kashmir under Sinha Déva, in 715 (A. D. 1315) and the death of Rájá Adin in 747 (1346). According to Ferishta, the latter was succeeded by Kotahdevi who, after a brief opposition to Shah Mir, esponsed him. She was imprisoned the following day and her husband ascended the throne and died after a reign of three years. To his son Jamshid is allotted 1 year and 2 months. Allowing a year for the brief reign of the Ráni, this would give the accession of Alán'ddin about A. D. 1351. Ferishta does not give separate dates to each reign as might be inferred from Briggs' digest of his pages. He places the death of Kutbu'ddin in 796 (A. D. 1393); that of Sikandar the Iconoclast in 819 (1416). Ali Shah in 826 (1422) and Zain u'l Aábidin in 87. (1472).

the whole family and succeeded as Sri Shamsu'ddin.

18 Muḥammadan princes succeeded. Names not recorded.

Vikhyana Bhatt, overcame the last of these.

1298 ? Jayansara, his son overcome by Sultán.

1300 Alla'uddın, Muhammad Shah.

- Death of Kutbu'ddin 793. Ferishta.
- 2 Of the length of this reign, Ferishta states he is ignorant, but Briggs makes him 'led to believe' that it "must have been nineteen years."

- Ferishta, 894—(1483-9).
- \* Ferishta gives lifty years for the whole reign of Muhammad Sháh, which would place the date of his son Shamsu'ddin's accession in 941, (1534); Ferishta is unable to give the length of his reign and omitting mention of Ismail, follows it with the accession of Názuk who, after six months gives place to Mirzá Haidar. The Shamsu'ddin of Ferishta, is the father of Nazuk, viz., Ibrahím. The series and dates of Ferishta contiune in the following order:

| A. II.      | A. D.  | Y. | M. | D.        |
|-------------|--|----|----|-----------|
|             | Sultán Náznk Sháh, a second time,              | 13 | 9  | 0         |

Thus this series of 191 princes, reigning throughout a period of 4,109 years, 11 months and 9 days, passed away.

When the Imperial standards were for the first time borne alott in this garden of perpetual spring, a book called Ráj Tarangini written in the Sanskrit tongue containing an account of the princes of Kashmir during a period of some four thousand years, was presented to His Majesty. It had been the custom in that country for its rulers to employ certain learned men in writing its annals. His Majesty who was desirous of extending the bounds of knowledge appointed capable interpreters in its translation which in a short time was happily accomplished. In this work it is stated that the whole of this mountainous region was submerged under water and called Sati Sar. Sati is the name of the wife of Mahádeva, and Sar signifies a lake. One day of Brahmá comprises 14 manvantaras. Up to the 40th year of the Divine Era, of the seventh manvantara, at which time Kashmir began to be inhabited, 27 (kalpas) each of four cycles (yug)

985-1577. Yusuf Sháh, son of Ali Sháh who abdicated in 995 (1586) in favour of his son Yákúb, and in the same year Kashmír was occupied by Akbar and shortly after formally annexed.

<sup>1</sup> A manuantara is the period or age of a Manu, being equal to 12,000 years of the gods, or 4,320,000 years of mortals. Its nature and duration are fully described in II. II. Wilson's Vishnu Purána. as before mentioned, have elapsed and of the twenty-eighth three cycles, and of the fourth cycle 4,701 solar years. And when, according to the legend which they relate, the waters had somewhat subsided, Kasyapa who is regarded as one of the most sublime amongst ascetics, brought in the Brahmans to inhabit the new region.2 When men began to multiply they sought to have a just ruler over them, and experienced elders, solicitous of the public weal met together in council and elected to the supreme authority one who was distinguished for his wisdom, his large understanding, his comprehensive benevolence and his personal courage. From this period dates the origin of their monarchical government which proceeded thus to the time of Ugnand 4,014 years prior to this the 40th year of the Divine Era. Ugnand fell by the hand of Balbhadra, the elder brother of Kishan in the battle fought at Mathura between Kishan and Jarasandha rájá of Behár. Damódara (his son), to revenge his death marched against some of the relations of Kishan who were hastening to a marriago festival in Kandahár, and was killed fighting on the banks of the Sind. His wife being then preguant and the astrologers foretelling that it would prove a son, Kishan bestowed on him the government of the province. Thirty-five princes succeeded, but through their tyranny their names are no more remembered. When Lavah ascended the throne, justice was universally administered and deeds met their just recognition. He founded in Kúmraj the great city of Lavapúr the ruins of which are still to be traced It is said to have held 800,000,000 houses. As the sage of Ganjah well says:

> House linked to house from Ispahan to Rai Like jointed canes, I've heard, stretch countlessly, So that a cat might trace the distant span From roof to roof twixt Rai and Ispahan; But if the tale my credit doth belie, The teller is its surety, faith not I.

- <sup>1</sup> See p. 15 of this Vol.
- <sup>2</sup> According to Tieffenthaler, he was called "Cashapmír, from Cashapa grandson of Brahmá and mér, a mountain or habitation." Báber mentions in his Memoirs that the hill country along the apper course of the Indus was formerly inhabited by a race called Kás from whom he conjectures that Kashmír received its name. The Kasia regio of Plolemy applies to the race and seems to confirm his conjecture. Kasyapa was the son of Maríchi the son of Brahmá, and was
- father of Vivaswat the father of Manu. His name signifies a torroise which form he assumed as Prajapati, the father of all, and had a large share in the work of creation. He was one of the seven great Rishis Dowson.
- \* As the 40th year of Akbar's reign is A. H. 1003, commencing 5th Dec. 1594 and ending 25th Nov. 1595 A. D. the date of Ugnand would be B. C. 2449.
- <sup>4</sup> Shaikh Nizámi, who was born in that town. The lines occur in the Hajt

When the succession devolved on Asoka the son of Janaka's paternal uncle, he abolished the Brahminical religion and established the Jain faith. His personal virtues adorned his reign, and his son Rájá Jalóka was distinguished for his justice, and his conquests were limited only by the ocean. On his return from Kanauj, then the capital of Hindustán, he brought with him a number of learned and enlightened men and of these his sagacity and perception of worth selected seven individuals. To one of them he entrusted the administration of justice; to another the revenue department; to a third the finances; to a fourth the superintendence of the troops; the fifth took charge of the department of commerce; the sixth controlled the material resources of the state, and the seventh interpreted the mysteries of the stars. He had also a knowledge of alchemy. It is said that a huge scrpent ministered to his commands, mounted upon which be could descend below water for a long space. Sometimes he appeared as an old man, and at other times, as a youth, and marvellous tales are related of him. Buddhism became prevalent about this time.

Damodar (II) is said by some to have been one of the descendants of Asoka. He was a pious devout prince but was transformed into a snake through the curse of an ascetic. In the reign of Rájú Nara the Bráhmans prevailed over the Buddhists and levelled their temples to the ground. Rájú Mihirkal was a shameless tyrant, but by the strange freaks of fortune he made extensive conquests. As he was once returning homewards by the pass of Hastibhanj, an elephant lost its footing, and its screams and

Paikar, one of the Khamsah or Five poems of Nizámi. The other four are the Makhzan i Asrár, Khusrau wa Sairín, Laila wa Majnún, and the Sikandar Námah Some copies have the Khirad Námah (Aristotle's instructions to Alexander) instead of the Hoft Paikar.

1 The origin, history and sects of the Jains are sketched in H. G. Briggs' Cities of Gujarashtara. Prof. Wilson remarks that their faith was introduced into the peninsula about the 7th century A. D.; Col. Sykes thinks about the 4th. It is closely allied to Buddhism, though the Jains assert it to be long anterior. Sir W. Hunter deffices Jainism as Buddhism equipped with a mythology of saints and narrowed in its practical aspects from a

national religion to suit the exclusive requirements of a sect. According to one view, the Jains are a remnant of the Indian Buddhists who saved themselves from extinction by compromises with Hindnism and erected themselves into a separate caste. Another view represents them as the unbroken succession of the Nigantha sect of the Asoka edicts. The Buddhism of Asoka (214 B. C.) is said to be a later product than the Jain doctrines. The I. G. refers to the modern literature of the subject in Mr. Ed. Thomas' Jainism or the Early faith of Asoka. Mr. Rhys David's article in The Academy of 13th Sept. 1879; and Numismata Orientala (Ceylon fasciculus) pp. 55, 60. (Trübner, 1877.)

manner of falling caused him such amusement that he ordered a hundred elephants to be precipitated in a similar manner. From this circumstance the pass received its name hasti signifying elephant, and bhanj, injury. During his reign, a large rock blocked up the ferry of a river, and, however much it was cut away, it yet increased again during the night to its ordinary dimensions. Remedies were proposed in vain. At length a voice came forth intimating that if touched by the hand of a chaste woman, the rock would displace itself. Time after time it was touched by women in succession, and when no effect was produced, he ordered the women to be put to death for incontinence, the children for hastardy, and the husbands for consenting to the evil, until three krórs of human beings were massacred. The miracle was at length effected by the hand of a chaste woman, a potter by trade and caused great wonder. The Rájá being afflicted by various diseases, burnt himself to death.

Rájá Gopadit possessed considerable learning and his justice increased the extent of his sway. The slaughtering of animals was forbidden throughout his dominions and high and low abstained from eating flesh. The temple which now stands on Solomon's Hill was built by his minister.

Rájá Judishthira in the beginning of his rule administered the state with an impartial hand, but in a short space through his licentious conduct and intimacy with base associates, his subjects became extranged from him, and the kings of Hindustán and Tibet were arrayed against him. The chiefs of Kashmír throw him into prisors

During the reign of Rájá Tanjir (Banjír) snow fell when the sun was in Leo (July, August). The crops were destroyed and a terrible famine threw the country into disorder.

Rájá Jayandra possessed a minister wise, loyal and virtuous, and void of levity and dissimulation. His equals bore him envy and the wicked at heart but specious in appearance sought his ruin and undermined his influence by underhand misrepresentations. As princes are on these occasious apt to err and do not investigate closely, forgetful of former experiences of what envy can effect, the minister was overthrown, and

¹ In Sanskrit in or underdestruction, loss, injury. See p. 347—The Governor of Jamma informs me that this word does not occur in the body of the Ráj Tarangini, as Dr. Stein who is editing the Sanskrit text has shown him, but where the montion of this elephant story is

made, there is a marginal gloss in Dr. Stein's MS. in which it is stated that the spot where the accident took place is still known by the name of Hastibhanj or bitenj. There is no doubt therefore that the Hasti Watar of the text is incorrect.

banished in disgrace. His strange destiny, however, did not deprive him of his composure. He allowed not grief to encompass him, but gladdened his days with cheerfulness of heart. His wicked enemies represented him as aiming at the throne, and the Rájá, ignorant of the real facts, ordered him to be impaled. After some time had elapsed, his spiritual preceptor happened to pass that way and read on the frontal bone of his skull that he was destined to disgrace and imprisonment and to be impaled, but that he should again come to life and obtain the sovereignty. Amazed at learning this, he took down the body and secretly kept it and continued in supplication to the Almighty. One night the spirits gathered round and by their incantations restored the corpse to life. In a short time he succeeded to the throne, but his experience of life soon induced him to withdraw into retirement.

Megaváhan was renowned for his virtues and gave peace and security to Hindustán as far as the borders of the ocean. After the death of Rajá Hiran without issue, the chiefs of Kashmír paid allegiance to Rijá Bikramájít the ruler of Hindustán. Rajá Matrigupta was a learned Kashmíri Bráhman. Bikramájít profited by his wisdom but did not advance his temporal interests. He, however, gave him a sealed letter to convey to Kushmír and furnishing him with a small sum of money for his expenses as he started, despatched him on his mission. The Bráhman set out with a heavy heart. On his arrival in Kashmír, the letter was opened. It ran thus. 'The bearer has rendered important services at my Court and has experienced many reverses of fortune. On the receipt of this letter, let the government of the country be entrusted to him, and be this mandato obeyed under fear of the royal displeasure.' The chiefs met in council and yielded their submission.

Rijá Pravaraséna had withdrawn from the country and lived in retirement in Hindustán. A devout and enlightened servant of God predicted to him the good tidings of his future elevation to a throne. On the faith of this, he went to Nagarkót and possessed himself of that place. On hearing of the death of Bikramájít, Matrigupta abdicated and setting out for Benares lived in seclusion. Pravaraséna was universally distinguished for his justice and liberality. He founded Srinagar! the capital of the

<sup>1</sup> The old capital previous to the crection of Pravarascuapura is stated to have been founded by Asoka (Ráj Tarangini, i, 104) (B. C. 263—226). It stood on the site of the present Pándrethán and is said to have extended along

the bank of the river from the foot of the Takht i Sulaiman to Pántasok, a distance of more than three miles. It was still the capital in the reign of Pravarasóna I, towards the end of the 5th century when the king erected a famous symbol country and rendered it populous during his reign with 600,000 houses. With surpassing munificence he sent to Mátrigupta the aggregate of eleven years' revenue of Kashmír which that personage bestowed upon the indigent. Rájá Ranáditya was a just prince and made many conquests. In the neighbourhood of Kishtawár near the river Chenáb, he entered a cave with all his family and many of his courtiers, and was seen no more; many strange legends are related regarding him. Rájá Báláditya invaded Hindustán and extended his dominions to the borders of the sea.

In the roign of Rájá Chandrapíra the wife of a Bráhman appeared to him claiming justice, saying, that her husband had been killed and the murderer was undiscovered. He asked her if she suspected any one, to which she replied that her husband was of an amiable disposition and had no enemy, but that he often had disputations on points of philosophy with a certain person. This man was brought up, but strengously denied the accusation, and the complainant would not accept an ordeal by fire or water lest the man should employ some supernatural means of escaping it. The Rájá in his perplexity could neither eat nor sleep. An enlightened sage appearing to him in a vision taught him an incantation to be uttered over rice-meal scattered about, upon which the suspected person was to walk. If the footsteps of two people were observed as he passed over it, he was not to be suffered to escape. Through this suggestion the truth was discovered and punishment duly meted out. But as a Bráhman could not be put to death, an iron image of a man without a head was made and his forehead branded therewith.

Rájá Lalitáditya devoted himself to the prosperity of his kingdom and in the strength of the divine aid overran Irán, Turán, Fárs, Hindustán, Khata, and the whole habitable globe, and administered his dominions with justice. He died in the mountains of the north, and it is said that he was turned into stone by the curse of an ascetic, but others relate the story differently.

Rijá Jayápíra reached a lofty pitch of glory and his conquests were extensive. Ninety-nine thousand nine hundred and ninety-nine horses were bestowed by him in charity at Benares, and his gifts to the poor were on the same munificent scale. He asked of the elders whether the army of his grandfather Lalitáditya or his own were the larger. They answered that

of the god Siva, named after himself Pravareswara. The new capital was built by Pravaraséna, II, in the beginning of the 6th century. Anct. Goog. India, p. 97. Neither the text nor the U.T. mention two homonymons monarchs. This epoch given by Cunningham shows that they must have followed in close succession, and a single name has possibly been by error duplicated.

his contained but 80,000 litters, whereas 125,000 of such conveyances were arrayed under his grandfather's standard, by which 'proportion he might judge of the numerical strength of his other retinue. When he had proceeded some distance on his march of conquest, his brother-in-law, Jajja, who was in Kashmír disputed the throne. The nobles of the king, in anxious fear for their wives and children, betrayed him and preferred their outward reputation before their true honour. The Rájá hastened alone to Bengal, and with the aid of troops from that country, repossessed himself of his kingdom, Jajja being slain in battle.

Rájá Lalitápíra took low companions into favour and associated with buffoons, and his wise councillors withdrew from the court. His minister finding remonstrance of no avail, retired from office.

Rájá Sankar Varmá conquered Gujarát and Sind, and overran the Decean, but left it in the possession of its ruler. Although in the beginning of his reign he followed a virtuous course, he lacked perseverance. The intoxication of worldly prosperity plunged him into every vice.

During the reign of Rájá Jasaskardeva, a Bráhman lost a purse of a hundred gold mohurs. Under the impulse of violent grief he resolved to make away with himself. The thief hearing of this, asked him how much he would be satisfied to take, if he discovered the purse. The Bráhman answered, "Whatever you please." The thief offered him ten mohurs. The Bráhman, sore at heart, appealed to the Rájá who inquired into the case, and sending for the thief ordered him to restore ninety mohurs, intending by this, that the amount the thief desired to keep for himself, should be the portion of the Bráhman.

In the reign of Sinhadeva, a Muḥammadan named Sháh Amir who traced his descent to Arjun the Pandava was in the royal service. About this time Dalju the chief commander under the king of Kandahár, attacked and plundered the kingdom. The Rájá took refuge in the mountain passes and levied forcible contributions on the people, and sent them to him and entreated him as a supplicant. The invader withdrew, dreading the severity of the weather, and many of his troops perished in the snow. About the same time also, Rinjan, the son of the ruler of Tibet invaded the country which was reduced to great distress. On the death of the Rájá, the sovereignty devolved on Rinjan who was distinguished for his munificence. He appointed Sháh Mír his minister whose religion, through intimacy and association with him, he eventually adopted.

When Rájá Adindeva died, the aforesaid Sháh Mír by specious flattery and intriguing, married his widow. In the year 742, A. H. (1341-2,

A. D.) he caused the *khulbah* to be read, and the coin to be minted in his own name and assumed the title of *Shamsu'ddin* and levied a tax of one-sixth on al! imports into Kashmir. It had been revealed to him in a dream that he would obtain the sovereignty of the kingdom.<sup>1</sup>

Sulfan Alin'ddin issued an ordinance that an unchaste woman should not inherit of her husband.

Sultún Shahábu'ddín encouraged learning and proclaimed an equal administration of the laws. Nagarkót, Tibet and other places were over-run by him.

During the reign of Sullán Kuthu'ddín. Mír Sayyid Ali Hamadáni arrived in Kashmír and was received with great favour.

Sultán Sikandar was a rigid follower of religious tradition and a bigot. He overthrew idolatrous shrines and persecuted people not of his faith. During his reign, Timúr invaded Hindustán and sent him two elephants. Sikandar desired to pay his homage to that conqueror, but on his road to the interview he learnt that it was reported in Timúr's camp that the sovereign of Kashmír was bringing with him a present of a thousand horses. Concerned at the untruthfulness of this rumour he returned and sent his excuses. Ali Sháh appointed (his brother) Zainu'l Aábidín regent in his stead and set out for Ilijáz. By the persuasion of foolish and evil advisers and through inconstancy of purpose, he returned with the view of recovering his authority in Kashmír and aided by the Rájá of Jaminu he took possession of the kingdom. Zainu'l Aábidín set out for

Such is the literal translation according to the punctuation of the text which I suspect is in error. Ferishta states that Shamsu'ddin abolished the exactions of his predecessors and having repaired the ruin, caused by the invasion and exactions of Dalju, by written orders fixed the revenue at ath of the produce. The readings of Gladwin and the S. ul M. here complete the sentence and continue, that before he came to Kashmír, it was revealed to him in a dream that he should obtain the kingdom. I have little doubt that this is the correct division of the sentences. A full stop should follow بسقد and ازانکه should be preceded by the word um inadvortently omitted, but retained by

- Gladwin and S. ul M. The text would then run as follows "Assumed the title of Shamsu'ddin and fixed the revenue at one-sixth of the produce. Before his arrival in Kashmir, it had been revealed to him in a dream that he would obtain &c."
- Ferishta relates this circumstance with detail, somewhat curtailed by Briggs.
- These, states Ferishta, were his father-in-law the Jammú Rájá, and the chief of Rajuri, who dissuaded him from abandoning his authority and abdicating in favour of his brother. Finding that without their help, his restoration could not be effected they reinstated him by force.

the Panjáb and joined Jasrat of the Khokharl tribe. Ali Sháh collecting a large army advanced into the Panjáb and a great battle took place in which Ali Sháh was defeated and fell into obscurity whilt Zainu'l Aúbidín recovered the sovereignty of Kashmír. Jasrat leaving Kashmír advanced against Delhi but defeated by Sultán Bahlol Lodi retreated to Kashmír and with the assistance of an army from its monarch, conquered the Panjáb.

Zainu'l Aábidín overran Tibet and Sind. He was a wise prince, devoted to philosophical studies and it was his fortune to enjoy universal peace. He was regarded by high and-low as a special servant of God and venerated as a saint. He was credited with the power of divesting himself of his corporeal form, and he foretold that under the dynasty of the Chaks, the sovereignty of Kashmir would be transferred from that family to the monarchs of Hindustán, which prediction after a period of years was accomplished. His benevolence and love of his people induced him to abolish the capitation tax (levied on other than Muslims) and to prohibit the slaughtering of cows, as well as penalties and presents of all kinds. He added somewhat to the measure of the Jarib. His private revenues were drawn from copper mines. He often personally administered medicinal remedies and resolved all difficult undertakings with ease. Robbers were employed in chained gangs on public works. His gentleness of disposition dissuaded men from the pursuit of game, and he himself cat no flesh meat. He caused many works to be translated from the Arabic, Persian, Kashmiri and Sanskrit languages. During his reign musicians from Persia and Turkestán flocked to his court; among them Mulla Vúdi the imme-

1 According to Ferishta Jasrat Shaikha Ghakar imprisoned by Timur in Samarkand, escaped and founded or acquired a principality in the Punjáb. Zainu'l Aábidín with his aid defeated Ali Sháh who, according to one account was taken prisoner by Jasrat, and to another was expelied from Kashmír by his successful brother. Mention of Jasrat occurs in Ferishta under Bahlol Lodi, and Zainu'l Aábidín, he says, on his accession fitted out an army under Jasrat for the conquest of Dolhi and the Punjáb. Unable to cope with Bahlol Lodi at Delhi, he, however, possessed himself of the Punjáb. This freebooter gave considerable trouble to the Sayyid dynasty and

held his own against Bahlol Lodi when that chief governed Multan under Sayyid Muhammad. See Vol. I, 456, n. for the Gukkhars (as it is there spelt) and the reference to Delmerick's history of this tribe.

Ferishta says that for the encouragement of the study of medicine, he specially favoured Sri Bhat an eminent physician, by whose advice, the Bráhmans, expelled under Sikander the Ironoclast, were recalled. Briggs has been too sparing in his extracts of this reign of the most celebrated among Moslem monarchs of Kashmír. Wearied with his long task, the gaps are greater as he approaches its completion.

diate pupil of the famous Khwájah Abdu'l Kádir arrived from Khurásán, and Mulla Jamíl who in singing and painting was preeminent among his contemporaries. Sultán Abu Said Mirzá sent him presents of Arab horses and dromedaries from Khurásán and Bahlol Lodi king of Delhi and Sultán Mahmúd of Gujarát were in friendly alliance with him.

Sultán Ḥasan, collecting an army invaded the Punjáb and encountering Tátár¹ Kháu (Lodi) in several actions devastated the country.

In the reign of Fath Sháh, Mír Shamsu'ddín one of the disciples of Sháh Kásim Anwár, came from Irák and promulgated the Núr Bakshi doctrines, from which period date the dissensions between Sunnis and Shígs in this country.

During the third reign of Muḥammad Sháh when he recovered the kingdom by the help of Sultán Sikandar (Lodi of Delhi), Báber invaded Hindustán.

During Sultán Ibrahím's domination, Abdúl Mákri<sup>8</sup> represented to Sultán Báber, that Kashmír might be conquered with little difficulty. Shaikh Ali Beg, Muhammad Khán and Mahmúd Khán were therefore despatched to that country and obtained some success but the intrigues of the people prevented a settlement and they returned with gifts and presents and Názuk Shúh succeeded to the government. Under the reign of

- <sup>1</sup> The Delhi governor of the Punjáb and the country at the foot of the hills. Briggs mistranslates his author here, and makes Tátár Khan penetrate into Jamma and sack Siálkot, whereas Ferishta says that the Kashmír troops, under Malik Bari Bhat fought Tátár Khán, ravaged his country and plundered Siálkót.
- <sup>2</sup> Ferishta places the accession of Fath Sháh in A. H. 894 (A. D. 1488-9), about which time occurred the arrival of Sháh Kásim son of Sayyid Muhammad Nár Baksh, and the establishment of his doctrines as the prevailing creed. All religious grants and places of worship were made over to this sect, among the most illustrious converts to which were the Chak tribe. Their proselytes were very numerous, but the esoteric doctrines of Mir Shamsu'ddín being beyond the comprehension of some of them, on the
- death of this apostle, they fell into heresy or reverted to paganism. Briggs ornaments his page with the ceremony and explanation of the "cap of grace" given to the proselytes. It may be true, but Ferishta does not allude to it.
- IIe was the son of Ibrahim Mákri who was minister in chief to Muhammad Sháh during his second reign. Abdál Mákri his son played a considerable part in the stirring ovents of this time and was eventually driven from court by the intrigues of the minister Malik Káji. He went to India and incited Baber to the conquest of Kashmir. Fearing that the inhabitants would be opposed to the foreign rule of the Mughals, the enthronement of Názuk the son of Ibrahím was adopted as a pretext to conciliate the Kashmiris, who, on fis instalment in anthority, dismissed the troops of Báber with conciliatory gifts.

Muhammad Shah for the fourth time, the emperor Humayun ascended the throne of Delhi, and when Mirzá Kámráni was at Lahor, the officers formerly despatched to Kashmir (Ali Beg and Muham.nad Khán) persnaded him that Kashmir could be taken with little trouble. therefore, despatched Mahram (Bog) Kokah with a body of troops to that country which they occupied. Massacres were frequent and their intolerable tyranny drove the people to rise till the Mughal chiefs sued for terms and withdrew. In the year A. II. 930, (1523-4) by command of Sultán Said Khán of Káshghar, his son Sikandar Khán and Mirzá Haidara advanced into Kashmir at the head of 10,000 troops by way of Tibet and Lar, and taking an enormous booty retired after a short time under terms of peace. In the year A. H. 948 (1541-2) Mirzá Haidar, by command of Humáyún a second time entered Kashmír, guided by some of the natives of that country, as has been related in former accounts, and took possession of a part of Great Tibet. Káji Chak came to Hindustán and bringing with him the aid of an army from Shor Khán, engaged Mirzá Haidar but was defeated. The Mirzá won over the Kashmíris by peaceful and conciliatory measures, so that he succeeded in having the Khutbah read and the coin minted in the name of Humáyún, the Kashmíris having previously read the Khutbah in the name of Názuk Sháh.

At the present time under the sway of His Imperial Majesty it is the secure and happy abode of many nationalities, including natives of Persia and Turkestán as well as of Kashmír.

## Sarkár of Pakli.

Its length is 35 and its breadth 25 kis. It is bounded on the east by Kashmir, on the north by Katór, on the south by the territory of the Gakhars, and on the west by Atak Benáres. Timúr left a few troops to

- <sup>1</sup> Brother of the Emperor, governor of Kabul and Kandahár, to whom Humayún had ceded to government of the Punjáh and the Indus frontier.
- \* See Vol. I, pp 460-1, for a slight notice of this historian, poet, and prince who governed Kashmír for ten years. The events of his reign are condensed by Briggs under the name of the impotent Názak, who is as unworthy of the preference as are the reasons by which Briggs, against the authority of Ferishta, supports it.
  - Vár. Kiór, Kanór. T. Katour. G.

- Kinore. Erskine says (p. 144) that Kattor or Katár is a place of note in the Kafiristán country, but in the maps Kunar occupies a corresponding position.
- \* "The Gakar chiefs hold the lower valley of the Jhelum and the upper course of the Haro river to the S. W. of Kashmir. They are all Muhammodaus, but their conversion is comparatively recent as their names were Indian down to the invasion of Timur. Their occupation of these districts is of very early date; but they are Turanians and not Arians, as none but a Gakar will inter-

hold this tract, and their descendants remain there to this day. Snow lies perpetually on these mountains and at times falls on the plains. The period of winter is longer than the summer. The rainfall is somewhat similar to Hindustán. It is watered by three rivers, the Kishan Ganga, the Bihat and the Sindh. The language of the country differs from that of Kashmír, Hindustán or Zábulistán. Vetches and barley are the principal crops. Apricots, peaches and walnuts grow wild, it not being the custom to plant fruit trees. Game and horses, camels and buffaloes are of middling account: goats and poultry, plentiful. The rulers of this district generally paid tribute to Kashmír.

## Sarkár of Sawád (Swát).

It comprises three districts, those of Bimbar, Swát and Bajaur. The first is 16 k's long by 12 broad and is bounded by Pakli on the east, Kator and Káshghar 2 on the north, Atak Benáres on the south and Swát on the west. Two roads approach it from Hindustán, viz., the Shérkháni³ pass and the Balandari¹ Kólal; although both routes are difficult to traverse, the first is the more rugged.

The second district (Swát) is 40 kós in length by 5 to 15 in breadth. On the east lies Bimbar; to the north  $Kat\acute{o}r$  (Kunar) and  $K\acute{a}shghar$ ; to the south  $Bigr\acute{a}m^{5}$  and on the west Bajaur. It possesses many defiles. Near the  $Dangh\acute{a}r^{6}$  pass which leads to  $K\acute{a}shghar$  is the town of  $Mangh\acute{o}r^{5}$ 

marry with a Gakar, a practice repugmant to Hinduism which permits no man to marry one of his own tribe. They also occupy several portions of the E. Doah, as Guliána near Gujar Khán, and Bugiál under the lofty hill of Balnáth. But these districts do not properly belong to the hills, although they were subject to Kashmír at the time of Hwen Thrang's visit in the seventh century." Auct. Geog. Ind. p. 132.

- 1 I would amend the punctuation of the text, placing a stop after \$6 \$6.
- <sup>2</sup> By Káshghar cannot be meant the well-known town of E. Turkestán which is too far removed, but Chitral or Káshkar, which, according to Erskine, (Báber's Memoirs) is a corruption of Káshghar with the territory of which it was long included, the name having

survived the dominion. The Kasia or Akhassa regio of Ptolemy beyond Mount Imans has perhaps given its name to both Kashghar and Kashmir.

- <sup>8</sup> Var. Sarjani, Sarkháni.
- Var. Malandari, Makandari; a marginal gloss has Bulandi. Vol. I, p. 344, Balandri. Kotal signifies the crest of a defile.
- This name is said by Cunningham (p. 29) to signify "the city" par excellence and is applied to 3 other ancient sites near Kabul, Jalálábád and Pesháwar. Masson derives the name from the Turki bi or be "chief" and the Hind grám, a hybrid to which Cunningham prefers the simpler Sanserit prefix in vigráma.
  - دره و مغارگه or دره مغارکه ، Var
  - 7 This was the capital of Udyana, the

the residence of the governor. It is entered by two routes from Hindustán, viz., the passes of Malkand Baj¹ and Sherkhánah. It has no extremes of heat or cold, and though snow falls, it does not die in the plains for more than three or four days; in the mountains it is perpetual. It is springtime here during the periodical rains of Hindustán. Rainfall occurs and the spring and autumn are very delightful. Its flora are those of Turkestán and India, wild violets and narcissus covering the meadows, and various kinds of fruit trees grow wild. Peaches and pears are excellent, and fine hawks and falcons are obtained. It also possesses an iron mine.

The third district (Bajaur) is 25 kis in length by 5 to 10 in breadth. On the east lies Swit, on the north Kator and Kishghar, on the south Bigram, and on the west Kunér (and) Núrkil. Numerous passes lead from Kabul.

An ancient mausoleum<sup>3</sup> exists here, and there is a strong fortress which is said to be the residence of the governor. Amír Sayyid Ali Hamadáni died here and his body was conveyed to Khutlun<sup>4</sup> by his last testament. Its climate is similar to that of Swát, but the extremes of cold and heat are greater. It has only three roads, one from Hindustán called Dúnishkol, and two from Kábul, one called Samaj and the other Kunér and Núrkil, the easiest of these being Dúnishkol. Adjoining this and between the mountains and the Indus and Kabul rivers, is a plain, 30 kós in length by 20 to 25 kós in breadth.

The whole of this tract of hill and plain is the domain of the Yusufzai clan. In the time of Mirzá Ulugh Beg of Kábul, they migrated from

Sanskrit name for the modern districts of Panjkora, Bajaur, Swat and Bunér. It is mentioned by Hwen Theorem as Mung-kie-li or Mangala, probably the Mangora of Wilford's surveyor and the Manglora of General Court's map. It was about 24 miles in circuit and vory populous. Anct. Geog. Ind. p. 82.

- <sup>1</sup> Var. Malkand, Sher Khán; Malik Ranj or Ríkh.
- <sup>2</sup> Erskine states that Kûner and Nûryil form another Tumán situated in the midst of Kafiristán which forms its boundary. Núrgil, says Páber, lies on the west and Kúner on the east of the Cheghán sarúi or Kámeh river, p. 143.
  - The text is here in the hesitancy of

uncertain readings and makes fact or sonso of none. Bater removes the doubt. The word المرح should be transferred from the bottom of p. 585 to the top of p. 586, and a stop placed after باسلتني The word من عدد الله Burhán i Káti is equivalent to the arabicized form

4 Var. Jilán, but Báber confirms Khutlán. Hamadáni, he says, died one farsang higher up than Kúner, and his disciples carried him to Khutlán. A mausoleum is erected on the spot where he died and in the year 920 (1514) Báber circumambulated his tomb, near which are groves of orange and citron, p. 144.

Kábul to this territory and wrested it from the Sultáns who affected to be descended from a daughter of Alexander Bicornutus. It is said that this monarch left some of his treasures in these parts with a few of his kindred and to this day the descendants of this band dwell in these mountains and affect to show their genealogical descent from Alexander.<sup>1</sup>

Under the present ever-during Imperial sway, of the lawless inhabitants of this country, some have been put to death, others imprisoned, while some happily dwell under their tribal rule.

## Sarkar of Daur, Banu<sup>2</sup> and Isakhel.

This territory is to the south-east of Kábul, and is inhabited entirely by Afgháns. It is the principal settlement of the Shiráni, Kararáni and Waziri tribes.

### Sarkár of Kandahár.

It is situated in the third climate. Its length from Kalát Banjárah to Ghor and Gharjistán³ is 300 kós: its breadth from Sind to Farah is 260 kós. On its east lies Sind; to the north Ghór and Gharjistán; on the south Siwi, and on the west Farah; Kábul and Ghaznín on the north-east. Its mountains are covered with perpetual snow which seldom falls in the city.

Eighteen dinárs make a túmún, and each túmún is equivalent to 800

- <sup>1</sup> See Elphinstone's Cabul. App. C. p. 617.
- \* I am indebted to the critical acumen of Pandit Radha Kishan, governor of Jammu, for his ingenious emendation of the faulty text. The two first names of the three are jumbled together into one with a misplacement of the diacritical points in all the variants. alteration required to clear the difficulty was simple, but its simplicity unobserved, as is usually the case, until after the discovery. Isakhail is still a tahsil of Banu district, and Daur is independent The country which the territory. Isakhail, according to Baber, shared with the Keráni, Kivi, Súr and Niázi Afgháns, Las Chanpárah and the Indus to the south, Dinkot on the east, and on the west the Dosht, called also Bázár and Ták. After
- the sack of Kohát, Baber attacked the Isakhails who fled to the Chaupárah hills, and following them up stormed their sangars. See p. 160. But all through his operations in Banu, Báber uses W. for S. and the other points of the compass accordingly. Hence we have on the E. Chaupárah and Sind, Diukot on the N. and Desht or Damán on the S. Erskino.
- See Vol. I, p. 381. Its limits are defined by Erskine, (p. 152), within Herat on the west, Farah on the south and Ghor on the east, and the reader is referred to Silvestre de Saci's Mines de POrient., Vol. 1, p. 321 for a learned dissertation on its position.
- \* See Vol. 1, p. 35. Erskine's note on the tumán (p. 61) is at facilit through his not knowing its varying local values

dáms. The túmán of Khurásáu is equal in value to 30 rupees and the túmán of Irák to 40.

Grain is for the most part taken in kharwars, the kharwar being equivalent to 40 Kandahari man, or 10 of Hindustan.

The capital of the district is Kandahár. Its longitude is 107° 40', and the latitude 33° 40'. It has two forts. The summer heats are extreme and the cold in winter is inconsiderable, but the ice-pits are filled in December and January. Once in three or four years a fall of snow occurs and is hailed with delight. Flowers and fruits are in abundance. Its wheat is extremely white, and is sent as a present of value to distant countries. At a distance of five kos is a hill called Azhdarkoh (the Dragon Hill) in which is a wonderful cave known as the Cave of Jamshid. People enter with lighted lamps, but the oppression of its atmosphere prevents exploration of its extent. Eight kós from Kálút is a large mountain in the side of which is a huge cave called Ghár i Sháh (the King's Cave). Within it are two natural columns, one of which touches the roof of the cave and is 30 yards high. Water flows down it and enters a basin at its foot. The other is 11 yards in height. The waters of the Hirmand (Helmand) which rises between Balkh, and Kábul, flow in this direction along the skirts of the mountains. The meaning of Hirmand is 'abounding in blessings.' Mauláná Muínu'ddín in his history of Khurásán records that it feeds a thousand streams. At a distance of 16 kús is a mountain, at the base of which is an area of land called Natil,3 formerly full of watercourses, where melons are grown in great quantity and perfection. The mountain has several clear springs. There is also an iron-mine, and at the foot of the mountain is an iron-foundry for the smelting of the ore, a work of ancient times.

West of Kandahár is a long torrid tract of country, (Garmsír) through which flows the Hirmand. One side of it touches the Dáwar\*

which would account for the diverse reckonings of Tavernier, Chardin and Della Valle. Mandelsloe must be wrong in making the zecchin = 9 rupces, nearly double its gold value in silver at a time when the rate for the conversion of the rupce was as in Akbar's day, 8 or 9 to the £. bank of the Arghandáb which falls into the Dorí, a tributary of the Helmund. It is separated from the Arghandáb by a range of mountains.

Zamín Dáwar lies west of the Helmand below the hills or as Erskine

<sup>&</sup>lt;sup>1</sup> Var. 170. Properly, long. 65° 30' E., lat. 31° 37' N.

<sup>\*</sup> Kandahár is in a plain on the left

Var. Tanil, Tabsal, Batsal, Bansaníl, Bambal.

See Vol. I, Goog. Index for this tract as Garmsir and under Dúwar, and Elphiustone. Cábul. pp. 136-137.

territory, and on the other Sistán. There are many forts and much cultivation on both sides of the river. In this neighbourhood once stood a large city, the residence of the Sultáns of Ghor, and many ruins still exist of the palaces of its ancient kings.

Between the *Hirmand* and Kandahár is the well-known city of *Maimand*, described in old astronomical tables.

Wheat and barley are called Safédbari. The jarib of sixty (square) yards is used for measurements, but they reckon 30 yards of this according to the  $Hij\acute{a}zi~jar\acute{b}$ , each yard of  $24\frac{1}{2}$  digits, the gaz there in use; equal altogether to 54~gaz of  $Kandah\acute{a}r$ . In the exchequer, out of every ten kharwárs, two are taken for the minister of finance on account of revenue and  $jih\acute{a}t$  cesses. Cultivation is reckoned under seven heads. In the registers, the best kind of land is marked with an e and calculating the produce of each  $j\acute{a}r\acute{b}$  at 3  $kharw\acute{a}rs$ , 24~man are taken as revenue. Thus:

| No. 1 | Kirld of land.    | Distinguishing<br>Mark. | Produce in<br>Kharwárs. | Revoune in man. |
|-------|-------------------|-------------------------|-------------------------|-----------------|
| 1     | Best.             | 9                       | 3                       | 24              |
| 2     | Best and Medium.  | طو                      | $2\frac{1}{2}$          | 20              |
| 3     | Medium.           | 4                       | 2                       | 16              |
| 4     | Mediam and Poor.  | <b>b</b> 3              | 11/2                    | 12              |
| 5     | Poor.             | 3                       | 1                       | 8               |
| 6     | Poor and Poorest. | 3 33                    | 30 man.                 | 6               |
| 7     | Poorest.          | 33                      | 8                       | 4               |

But if the husbandman is incapable of sustaining this class of assessment, the produce is divided into three heaps, two of which are taken by the tenant, and the third is again subdivided into three shares, two of which go to the revenue department and the third is charged to incidental expenses.

dofines it elsowhere, on the right bank of the Helmand reaching from Jirbesha under the Huzara hills to the Helmand.

<sup>1</sup> Var. and G. safédtari. I am disposed to think the marginal reading correct and that it signifies white crops in contrudistinction to the sabzbari or green crops that follow lower down, though it

is not easy to see why rice should be relegated to the green, rather than the white class. There are, however, two kinds of sháli rice, the white requiring deep water and the red needing only a moist soil.

<sup>2</sup> I read 23 for 2 an evident error.

The revenue from grapes also is taken by agreement and by paying a special rate. In the latter case experts appraise the average outturn of the vineyard and exact 4 báberies for each kharwár. Under the reigns of Báber and Humáyún the rate was fixed at 2 báberis and 4 tangahs. The baberi is one miskáll weight and  $2\frac{1}{2}$  are equivalent to the rupec. Besides these three (wheat, barley, grapes), upon nine other articles called sabzbari,  $7\frac{1}{2}$  báberis are taken for every jaríb, formerly rated at 5 báberis, viz., rice (Sháli), musk-melons, water-melons, cucumbers, onions, turnips, carrots and lettuce. On other crops than these, two báberis were formerly taken, the Turkománs exacting three.

In the torrid tract (above-mentioned, between Dáwar and Sístan), the safédbari crops are divided into three heaps according to the Kandahár custom and all crops paying special rates are registered under the z and b class (No. 2), and for every jaríb, 50 man of the torrid tract (Garmsír) equalling 20 man of Kandahár, are taken. The kharwár of this district is 100 man, equivalent to 10 man of Hindustán. Grapes are treated in the same manner as at Kandahár. All articles under Sabzbari, payetwo baberis on each jaríb.

In the Dáwar tract, produce under safédbari is apportioned in three heaps as described above and the exchequer receives for every 4 jaribs, one kharwár weight of Dáwar, which is equivalent to one kharwár and ten man of Kandahár, and for other produce, one kharwár on three jaribs.<sup>2</sup>

## Sarkár of Kandahár.

Containing 24 Mahals. Revenue 8,114½ túmáns, 39,600 dinárs: 45,775 sheep; 45 Balochi horses: 3,752,977 kharwárs of grain; 420 man of rice; 2 kharwárs of flour; 20 man of clarified butter. It furnishes 13,875 Cavalry and 25,260 Infantry. Kandahár city—5,270 tumáns in cash; 35,120 kharwárs of corn; 550 horse; 1,000 foot.

wines, fishing, pearls and generally of products not derived from cultivation, was to be delivered in kind or paid in value even before the expenses had been defrayed. The customs and transit dues, for which unbelievers paid a double rate, and the taxes on trades, manufactures and handicrafts were also sources of public revenue. Sir II. Elliot. (Arabs in Sind, p. 78). His principal references are to Hammer-Purgstall In the Asiatic Journal, XXX, p. 52.

<sup>1</sup> See p. 36, Vol. I.

<sup>&</sup>lt;sup>2</sup> Under the Caliph., the land-tax was usually rated at  $\frac{2}{5}$  of the produce of wheat and barley if the fields were watered by public canals;  $\frac{3}{10}$  if in igated by wheels or other artificial means; and  $\frac{1}{4}$  if altogether unirrigated. If arable land were left uncultivated, it seems to have paid 1 dirhem per jarib and  $\frac{1}{10}$  of probable produce. Of dates, grapes, garden produce,  $\frac{1}{3}$  was taken either in kind or money; and  $\frac{1}{3}$  of the yield of

### Dependencies cast of Kandahár.

- Territory of Duki, has a fort of unbaked brick. 6 timins in money:
  1,800 kharwars of grain; 12,000 sheep; 15 Balochi horses;
  Afghans of the Tarin and Kakar tribes: 500 horse, and
  1,000 foot.
  - of Pashang; has an old fort of unbaked brick. 33 túmáns in money; 3,200 shoep; 500 kharwárs of grain; 1,500 horse and 1,500 foot.
    - of Shál, has a mud fort;  $4\frac{1}{2}$  túmáns in money; 940 sheep; 780 kharwárs of grain; Afgháns of Kást² and Baloch; 1,000 horse, and 1,000 feot.
    - of Mashtang, (Mastang) has a mud fort; 10 túmáns and 8,000 dinárs in money; 470 kharwárs in grain. Afgháns of Kúsi, 3 and Baloch 100 horse and 500 foot.
      - of Khelgari, 12 túmúns in money; 415 kharwárs of grain; 200 horse, 300 foot.
- Tribe of Pani, 60 sheep, an Afghan clan, 1,000 horse, 1,000 foot.
  - " Abdáli, formerly paid revenue 1,000 sheep; fixed in the time of the Kázilbáshis\* at 100 túmáns, 400 horse, 600 foot.
  - " Abdáli, 2,800 sheep, 5 kharwárs of butter. Afgháns. 2,000 horse, 3,000 foot.
  - , Jamandi, responsible for 11 támáns and 4,000 dinárs. Afgháns, 30 horse, 20 foot.
  - Surkh Rábát i Balochán, revenue included under city of Kandahár. 50 horse, 50 foot.

Dependencies south of Kandahar.

Kalát Banjárah, has a strong mud fort. 30 Balochi horses, 30 camels,—Baloch—500 horse, 500 foot.

Shórábak, 1,200 sheep. Afgháns. 200 horse, 100 foot.

- <sup>1</sup> Erskine says that the whole country probably took the name of Dúki from its lying among the hills, Dúki signifying a hill in the language of the country, and may be opposed to Desht, or plain, Báber, p. 164.
  - 9 Var. Kasi.
  - Var. Afghan and Sohat.
- This name (Kizil, red, básh, head) was given to the seven Turkish tribes, descendants of the captives released by Timur at the request of Safia'ddin ances-

tor of Shaikh Ismail the first of the Suffavean monarchs. To the gratitude of these Carmanian captives the Saji, (Anglice Sophy) dynasty of Persia owed its elevation to the throne. See the XIVth Chapter of Malcolm's History of Persia. Round the red cap was twisted a turban in 12 plaits to the memory and in honour of the 12 Imams. D'Herbelot. The term is applied generally to the Persians, and is so employed by Báber, p. 181.

- Tribe of Bisakh, 1 225 sheep. Afghans. 200 horse, 300 foot.
  - " Mirkháni, 9 túmáns in money, 3,250 sheep. Afgháns. 200 horse, 400 foot.
  - " of Maswáni,<sup>2</sup> 200 sheep. 7 man of butter. Afgháns. 50 horse, 100 foot.

### Dependencies north of Kandahór.

Territory of Kalát Tartuk<sup>8</sup> has a very strong mud fort. 520 tún.áns, 9,600 dinárs in money. 4,346 sheep; 1,171 kharwárs (of grain?) 1 man of butter; 1 kharwár of rice. Ghilzai Afgháns. 2,200 horse, 3,820 foot.

Hazárah Dahlah, 1,454 sheep; 20 kharwárs of grain; 200 horso, 500 foot.

Hazár Banjah Banji, 160 sheep; 15 horse, 50 foot.

Territory of Tarin, has a strong fort. 15,000 sheep; 1,000 kharwárs of grain. Hazárah tribe. 1,500 horse, 3,000 foot.

## Dependencies west of Kandahár.

Territory of the torrid tract (Garmsír). 602 túmáns, and 8,000 'dínárs in money; 12,000 kharwárs of grain. 200 horse, 2,000 foot.

of Zamín Dáwar, 1,200 horse, 1,000 foot.

Tribe of Siáhkhánah, 42 túmáns; 30 horse, 70 foot.

Fort of Kushk Nakhód, has a mud fort, revenue included under city of Kaudahár.

## Sarkár of Kábul.

It is situated in the third and fourth climates. Its length from Aṭak Benáres on the Indus to the Hindu kóh is 150 kós; its breadth from Karábágh<sup>6</sup> of Kandahár to Cheghán Serú, 100 kós. It is bounded on the

- <sup>1</sup> Var. Bíski.
- <sup>2</sup> Var. Maswáli, Mastiwáni.
- Var. and G. Barlúk, var. Kalá Yastarlúk, Turak.
  - 4 Var. Dahnah.
- Var. and G. Dhajar Banji; var. Sahar Sahi.
- According to Tieffentialer 11 royal miles from Ghagni (about 19½ common miles) on the road to Kandahár, I, 21. The greater part of the account of this

province is taken without acknowledgment by Abul Fazl from the Memoirs of Báber, which should be in the hands of the reader for comparison and illustration of this brief sketch. Cheghánserái contains one village only, according to Báber, and lies in the entrance of Kafiristán. The large river known as the Cheghánsarái river comes from the north-east behind Bajaur. Another smaller stream from the west after flowing through

east by Hindustán; on the north-west by the mountains and Ghór; between to the north lies Anderúb of Badakshán, the Hindu kóh intervening; on the south by Furmul and Naghr. Adequate praise of its climate is beyond the power of pen to express, and although its winter is severe rather than moderate, it occasions no distress. The torrid and cold belts are so contiguous that the transition may be made from one to the other in a single day. Such approximation of summer and winter pasturage in an inhabited country is uncommon. Snow falls both in the plains and on the mountains; in the former from November and on the latter from September: Báber states that the snowfall in the direction of Hindustán does not pass the crest of the Bádán Chashmah. This doubtless was the case in those days, but at the present time it extends to the crest of the Nimlah, and indeed as far as the Khaibar pass. Even in summer time covering is needed during the nights. There are various delightful fruits, but the melons are not so good. Agriculture is not very prosperous. The country is surrounded on all sides by lefty mountains, so that the sudden invasion of an enemy is attended with extreme difficulty.

The *Hindu kóh* separates Kábul from Badakshán and Balkh, and seven routes are employed by the people of Turán in their marches to and fro. Three are by the *Panjhír*<sup>3</sup> (valley), the highest of which is over the *Khawák* pass; below this is *Túl*, and the next lower in succession, *Búzárak*.

Pích, a district of Kásiristán, falls into it. Naghr is sometimes written Naghz. It is now unknown but Erskino conjectures it to have been on the upper course of the Kurram, and Farmul probably Urghún where the Persian race of Niamatu'llah still exist. (Dorn's History of the Afghans, p. 57) says that Farmul was originally tho name of a river running between the borders of Kábul and Ghazui and the dwellers on its banks were called Seo Elphinstono's Cábul, Farmulis. p. 315 for a fuller account of this division of the Tájiks.

- ¹ The pass of Bádám Chashmah lios south of the Kábul river between Little Kábul and Bárikáb Erskino.
- <sup>9</sup> Báber confirms or originates this fact, and adds that those raised from seed brought from Khurásán are tolerable.

He praises those of Bokhára, but pronounces those of Akhsi, a district north of the Jaxartes, to be beyond comparison the best.

\* The word is so written by Báber, but, according to Cunningham, (p. 32,) the true name is Panchir, the Arabs writing j for the Indian ch. The modern spelling of Panjshir, adopted by Burnes, Leech and others, now prevails. A town named Panjshir is mentioned by Ibn Haukal and a mountain called Pashái was crossed by Ibn Batúta on his way from Kunduz to Parwán. The height of the Khawák pass over the Hindu Kush is marked in Curzon's map. (Russia in Central Asia) 13,000 feet. enumeration, as Erskine observes, Báber begins from the east. The whole passage is taken almost word for word from the Memoirs.

The best of these is  $T\acute{u}l$  but it is somewhat long as its name implies. The most direct is over the heights of  $B\acute{a}z\acute{u}rak$ . Between the high range and  $Parw\acute{u}n$  are seven other heights called Haft Bachuh (the Seven Younglings). From Ander\'{u}b two roads unite at the foot of the main pass and debouch (on Parw\acute{u}n) by the Haft Bachah. This is extremely arduous. Three other roads lead by Parw\acute{u}n up the Ghorband valley. The nearest route is by the pass of  $Yangi-y\acute{u}li$ , (the new road) which leads down to  $Waliy\acute{u}n$  and  $Khinj\acute{u}n$ ; another is the  $Kibch\acute{u}k$  pass, also somewhat easy to traverse, and a third is the  $Shibert\acute{u}$ . In the summer when the rivers rise, it is by this pass that they descend by way of  $B\acute{u}mi\acute{u}n$  and  $T\acute{u}lik\acute{u}n$ , but in the winter the A'bdarah route is chosen, for at this season, all other routes but this are closed.

There is also a road leading from Khurásán to Kandahár which is direct and has no mountain pass.

1 I have corrected the inaccuracies of the text by the true readings in Baber. and for ينگييولي read بايكيبول and for For Bamian and بوليات read يوليان Tálikan, Erskine has Bámián and Saighán. He adds that Bázárak must be the straight road from Saifábád to Chármaghzár (p. 139). The Parwan route is that by Parwin to Chármaghzár which passes between Saifábád and the head of the valley of Saulch-auleng (between Panihir and Ghorband). Yangi-yuli is that by Doshákh direct upon Khinján. The Kipchák route runs up the valley of Ghorband and then over the mountains to the junction of the two rivers at Kila Beiza. The Shibertú pass is by Shiber. There seems to have been a direct road from that to Mader in dry weather; but in wet, people went round by Bámián, Saighán and the pass of Dendán Shiken, or the Tooth-breaker. Báber himself passed through Bámián and by the Shibertú Kotal on his march from Khorasan to Kabul in February 1507. Three of these roads, the telofor of Strabo, leading to Bactria parted at Opián near Charikár, the Hupian of Baber, identified with Alex-

andria Opiana by Cunningham, who gives the rontes as follows:

- The north-east road, by the Paujshir valley, and over the Khawak pass to Anderab.
- 2. The west road by the Kushán valley, and over the Hindu Kush Pass to Ghori.
- The south-west road up the Ghorband valley and over the Hájiyak (Hújigak) Pass to Bámián.

The first of these roads, he continues, was taken by Alexander on his march into Bactriana from the territory of the Paropamisadae, and by Timur on his invasion of India. It was also crossed by Lieut. Wood on his return from the sources of the Oxus. second road, he supposes Alexander to have followed on his return from Bactriana, as Strabo mentions the choice of another and shorter route over the same mountains. The third was taken by Changiz Khán after his capture of Bámián; by Moorcroft and Burnes on their journeys to Bokhara; by Dr. Lord and Lt. Wood when driven back by the snow from the Kushan pass, and was surveyed by Sturt in 1840 after its successful passage by a troop of horseartillery.

From Hindustán five roads are practicable. 1. Karpah, which after traversing two defiles, leads to Jalálábád. This route is not mentioned by Báber and doubsiess was not used in his time. 2. Khaibar, this was formerly somewhat difficult, but by the command of His Majesty it has been made easily practicable for wheeled conveyance, and at the present time travellers from Turán and India take this route. 3. Bangash which is reached by crossing the Indus at the Dhankot ferry. 4. Naghr. 5. Farmul, by which the Indus must be crossed at the Chaupárah ferry.

Eleven languages are spoken in this province, each nationality using its own, viz., Turkish, Mughal, Persian, Hind?, Afgháni, Pushtu, Paráchi, Geberi, Bereki, Lamgháni and Arabic.<sup>3</sup> The chief tribes\* are the Hazárahs

¹ The S. al M. states that by the command of Nádir Sháh, after his conquest of Kábul, the Afgháns made the Khaibar pass proad enough to allow 40 horsemen to ride abreast, and it was so swept and cleared that travellers were uninconvenienced by thorns and stones. Behind his commands was the sword. The Karpah or as Elphinstone writes it, Carrapa Pass is in the Mohmund country, but seldom traversed on account of its rugged defiles and the frequent crossings over the stony and rapid fords of the Cabul river. (p. 355).

<sup>2</sup> Erskine writes the word Dinket and locates it near "Khushalghar" or "perhaps Kalabagh." The read from Chauparah to Farmul was probably the direct read from Kaniguram to Urghun. Chauparah itself he places near "Kagalwala" on the Kurram.

Bábor adds Pashái; Gabri is said in the Khulásatu'l Ansáb, to be a place in Bajaur. Dore, p. 131.

\* See Vol. I, p. 371. The meaning there given to 5 | 42 | does not apply here. The word is constantly used by Báber either alone or in conjunction with It and Ulús, as at pp. 77, 133, 140, to signify the wild nomad tribes of the country. At p. 151 is the following passage: "As in Khorasán and Samarkand, the possessors of the Wolds are the Turks

and Aimáks, so in this country, (Kábul) the inhabitants of the Waste are Hazáras and Afghans. The most powerful of the Hazaras in this territory, are the Sultán Masaúdi Hazáras, and the most powerful of the Afghans are the Mehmond Afgháns." This interpretation is also confirmed by Dorn who in his annotatious on Part 1st of his History of the Afghans, p. 67, refers to this passage of the Ain i Akbari in discussing the origin of the Hazáras and Afgháns. The general name of Aimák or Eimák has become the special designation of a particular cluster of septs. The author of Ansábuámah i Afághinah employs the term term plural of in the meaning of tribes, and in another passage speaks of the Chár Aimák consisting of 60,000 families. De Guignes (Hist. des Huns. I. Part II, p. 9) gives the eponymous founders of these four tribes or Aimáks and the curious origin of their names, but he is in error in making Nikodar the grandson of Hulagu (I. 283). Nikodar took the name of Ahmad Khán and according to D'Herbelot was the 9th of the Moghal Emperors of the race of Chengiz Khán. He reigned from A. D. 1282 to 1284. places the event related by Abul Fazl betwcon A. H. 644-647. Elphinstone (Cábul) devotes an interesting chapter to the

and Afgháns, and the pasturage of the country is in the hands of these two clans. The Hazárahs are the descendants of the Chaghatai army, sent by Manku Káán to the assistance of Hulákú Khán. Thest troops were sent to these parts under the command of his son Nikodár Oghlán. Their settlements extend from Ghazni to Kandahár and from Maidán to the confines of Balkh. They number more than 100,000 families, the third part of which consists of cavalry. Thoy possess horses, sheep and goats. They are divided into factions, each covetous of what they can obtain, deceptive in their common intercourse and their conventious of amity sayour of the wolf.

The Afgháns consider themselves the descendants of the Israelites. They assert that their remote progenitor, named Afghán, had three sons, viz., Saraban to whom the Sarabani clan trace their lineage; the second, Ghurghusht from whom the Ghurghushis claim descent, and the third Baţan to whom the pedigree of the Baṭani tribe is ascribed. From these three branches they developed into their several clans, each distinguished by its eponymous tribarch. The following septs unite in SARABAN, viz., Tarín, Baraich, Miyánah, Kharshín, Shiráni, Urmar, Kási, Jamand, Kheshqi, Katáni, Khalil, Mohmandzai, Dáúdzai, Yusufzai, Kaliyáni, and Tarkaláni. From GHURGHUSHT spring the Suráli (var. Suráni), Jilam, Orakzai, Afrídi, Jaqtáni, Khattaki, Kararáni, Báwar, Mansúb, Kákar. Nághar.

Aimáks and Hazárahs. The former, he says, live in camps, called Orde, derived from the Turkish Ordu from which name is derived the *lingua franca* of Hindustán and our English word, 'horde.' Do Guignes applies the same name to the palaces of the four principal wives of Chengíz Khán. (III. 70.)

- <sup>1</sup> Lit. houses; the Tartars reckon the numbers of their families by households, tents and sometimes by kettles. Erskine's Báber.
- \* In Dorn, Abdúr Rashíd, surnamed Pathán. See p. 41, Part II, and annotations for these genealogies. Baṭan according to Dorn is more frequently written that and sometimes with and sometimes with the tribal ramifications are given by Miamat-u'llah in considerable detail which it is unprofitable to transcribe and may be pursued in Dorn, in Elphinstone's Cábul, and Sherring's Tribes, Vol. II.
- According to the Khulásat-u'l Ansáb (Dorn, p. 127) the Katánis possess no territory but are scattered in single families. From Niázi descend the Músakhail, Isakhail, Sambal Saharangh, conjointly called Niázis: they reside about the town of Makhad on the banks of the Indus as fur as Dera Ismail Khán. The descendants of Pani reside about Shikarpur. Another account places them, after their expulsion from their country, about Jeypúr and Jodhpúr where they subsist by traffic and carry merchandise to the Deccan. Nághar's descendants reside about Dera Gházikhán, and Kákarís near Kandahár. The word 'zai' or 'zacy' as Raverty writes the word, signifies 'son,' and answers to Mac, Fitz, and O. Suffixed to the tribal name, it means 'a man' of the particular clan.
  - Probably a misscript for Gagiyáni.

Báni, Maswáni, Pani, and Táran. To BAŢAN are ascribed the Ghilzai, Lódi, Niyázi, Loháni; Súr, Bani, Sarwáni and Kakbór.<sup>1</sup>

It is said that Mast Ali<sup>2</sup> Ghóri whom the Afgháns call Matí had illicit intercourse with one of the daughters of Batan. When the results of this clandestine intimacy were about to become manifest, he preserved her reputation by marriage, and three sons were born to him, viz., Ghilzai, Lódi, and Sarwáni.

Some assert the Afgháns to be Copts, and that when the Israelites. came to Egypt from Jerusalem, this people passed into Hindustán. The tradition is too long to be condensed within parrow limits, but it is noticed in passing as a fanciful digression.

There are many wild tribes, such as the Khwájah Khizri, Kókshál, Maidáni, Uzbek, Kalatki, Paránchi, Nilpúrchi, Bakderi, Bahsúdi, Súlibái, Tufakundáz (matchlockmen), Arab, Gilahbán (shepherds) and Túkbai but not as numerous as the first mentioned, and most of them at the present time have become settled colonists.

The City of Kábul is situated in the fourth climate. Its longitude is 104° 40,'3 and its latitude 34° 30.' It is one of the finest of ancients cities, and is said to have been founded in the time of Pashang. It possesses a double earthwork fortress of considerable strength. To the southwest of the fortified town is a low hill which is a source of much beneficence, called Sháh Kábul, doubtless with reference to an edifice erected

- 1 Var. Gakbor.
- <sup>2</sup> According to Dorn, Sháh Husain, Prince of Ghor, (pp. 46, 48, Part II.). Matu was the name of Shaikh Patni's daughter and Sháh Husain not being of Afghán extraction, his descendants were called by the maternal name of Matí. The name of Ghilzai was given on account of the clandestine amour, 'ghil' signifying thief, and 'zai' born, a son.
- This is taken, according to Tieffenthaler, from the Fortunate Islands. Its true position is long. 69° 5′ E., lat. 34° 30′. This meridian is the subject of a later portion of the A. A.
- It was the old capital of the country, says Cunningham, before the Macedonian conquest, and Ibn Haukal states that inauguration at Kábul was a necessary qualification for government in a

- king. Tieffenthaler names 4 gates, riz., Lahor, Kábul, Nalbandi and Fatouhi, adding that near this last was an ancient castle with mud walls. It was pulled down by Ahmed Abdáli, and the houses in front of the Fatouhi gate razed to the ground. A new fort was then erected of brick work 'sur un lieu elevé,' and its garden laid out by the governor.
- Erskine says that there is a hill south of Kábul on which Kábil (Cain) the founder, is said to have been interred, but the only hill south-west is that known as Báber Bádsháh where Báber himself was interred, and is the great holiday resort of the people. Báber's description is as follows: "There is a small ridge which runs out from the hill of Sháh Kábul and is called Akábain, and there is besides another small hill on which stands

apon it by one of its former kings! Upon its summit stands the citadel, and there was a separate ridge! named Akábain. As it somewhat overlooked the fort, it was included within its precincts by royal command. Skirting its base are fair embankments, pleasure-gurdens and delightful groves. amongst which the Shahr Ará (Pride of the City) are especially beautiful. The city is watered by two streams. One of these, called the Júi Khatíbán, enters from Lalandar and flowing through the Shahr Ará passes by the city; the other, the Júi Pul i Mastán,2 more wholesome and limpid than the former, from the narrows of the Dehi Yakub winds past the Delhi Gate and runs on to Deh i Mamurah. Near this a canal called Mahum Anagah3 has been brought, which is of extreme convenience, and adjacent is the Gulkanah quarter fair to the eye and dear to the heart. From the hill (of Shah Kabul) flow three streams citywards; at the head of one is the shrine of Khwajah Hamu; the second, according to popular belief, had been visited by the prophet Khizr; the third is over against (the tomb of) Khwajah Abdu's Samad known as Khwajah Roshanai. The wise of ancient times considered Kabul and Kandahar as the twin gates of Hindustan, the one leading to Turkestán and the other to Persia. The custody of these highways secured India from foreign invaders, and they are likewise the appropriate portals to foreign travel.

In Kábul as well as in Samarkand and Bokhára, a parganah which comprises towns and villages is called a Túmán.<sup>5</sup> The Túmán of Bigrám is called Parasháwar, the spring season of which is delightful. Here is a shrine greatly venerated called Kórkhatri,<sup>6</sup> visited by people especially jógis from distant parts.

the citadel. The fortified town lies on the north of the citadel." Erskine identifies Akábain with that now called Ashikán Arifán, which connects with Báber Bádsháh. The Bálá Hissár is on the same ridge further cas, and south-east of the town. The beneficence of the Sháh Kábul mentioned in the text, is due to three streams that issue from it, two of which are in the vicinity of the shady and retired Gulkanah, the scene, as Báber not regretfully notes, of many a debauch. The position of the citadel and of the conjoined hills, has been carefully described by Forster. Travels, p. 73.

I read بيني كرهى and would so amend the text.

- <sup>2</sup> It is a canal derived from the river Logar as it enters the plains of Shevaki and has a course of about five miles. I. G.
- <sup>a</sup> The name of Akbar's nurse (Anagah) who attended him from his cradle and exercised a backstair influence that affected many political fortunes. See Vol. I. 323 and note, and Vol. I. 90 of Mrs. Beveridge's Translation of Count Noor's Kaisar Akbar."
  - Var. Samu, but Báber, Shams.
- And Báber adds that in Andeján, Káshghar and the neighbouring countries, it is called *Urchin*.
- This shrine, is mentioned by Báber as one of the holy places of the Hindu jógis who came from great distances to

The Timán of Niknihál is one of the dependencies of Langhán. The residence of the governor was formerly at Adinahpúr but is now at Jelálábád. There is here no snowfull and the cold is not so severe. Nine streams irrigate the cultivated lands; the pomegranates have no seed-stones. Near Jelálábád is the Bágh i Ṣafā (The Garden of Purity) a memorial of Báber, and adjacent to Adinahpúr is the Bágh i Wafá (The Garden of Fidelity) another relic of the same monarch. To the south lies the stupendous range of the Safed kóh (The White Mountain) with its perpetual snows from which it derives its name. In this neighbourhood is a low hill where when it snows in Kábul, a similar snowfall occurs.

cut off their hair and shave their beards at this spot. He rode out to Bigram to see the great tree but was not shown the shrine in 1505. Fourteen years later his curiosity was gratified. Gor Khatri was once a Buddhist monastery, (I. G.) then rebuilt into a Hindu temple, and now used as a sarái. refer the reader to the Gazetteer for a sketch of the ancient and modern history of Pesháwar. His curiosity may be further gratified or confounded by the learned details of Cunningham of this ancient capital of the Gandhára kingdom. Gor or Kor Khatri, (the Grain Merchants' House,) he says, was applied to a cell in the Ranigat hill, sixteen miles north of Ohind, as well as to the great whara of Kanishka at Pesháwar which is mentioned in the Memoirs of Báber. Pesháwar was also fortunate in possessing, during the first centuries of the Christian era, the begging-pot of Buddha and the holy pipal tree which had shaded the great eremite when he predicted the coming of the king Kanishka.

1 Var. Néknihár; in the I. G. Nangnihár and by Báber Nangeuhár, or Nokorhár, the district south of the Kábul river in the province of Jelálábád, that on the north, bounded on the west and east by the Alingár and Kunar rivers, being Lamghán. It lies along the Kábul river on the south, and the name is said to mean 'njne rivers.' The I. G. affirms it to be a distortion of the ancient name of Nagarahára, identified by Lasson with the Nagara of Ptolomy regarded by Cunningham as identical with Jelálábád. Adínahpúr is south of the Kábul river

- <sup>2</sup> A garden of this name was planted by Báber at Keldeh-Kehár (Kuller Kaher) near Pind Dádan Khán, cleven years after that of the Bagh i Wafa near Adinahpúr south of the Kábul river. It was situated 10 kes from Bahrah in the middle of the hill of Jud on a level plot of ground in the centre of which was a lake which received the water of the surrounding hills and was about five miles in circumference. Bahrah or Bhíra is marked in the maps 20 kes from Kuller Kaher, but the name is said to be common in the district. I find mention of no other Bágh i Safá nearcr Jelálábád. Júd is apparently a spur of the Salt Báber states that the tribos of Jud and Janjuhah descended from a common ancestor, are the ruling races of the district and of all the tribes between the Sind and Bahrah. The hill received its name from its supposed resemblance to Mount Ararat, (Júdi).
  - Báber is more explicit. 'On the south of the fort of Adinahpúr is the Surkh-rúd (runs into the Kábul river between Jagdalik and Gandamak). On

The Túmán of Mandráur: moukeys here abound. The Alishang river uniting with the Alingár joins the Bárán, while the Cheghán Sarái river flowing through the north-east quarter enters Katóx.<sup>1</sup>

The Tum'an of Alishang is surrounded by lofty mountains covered with snow in which is the source of the Alishang river. The inhabitants are called K'afirs. In the vicinity is a tomb asserted by the people to be that of Ldm the father of Noah, called also Lamek (Lamech). The people here pronounce the k'af like a ghain, and hence the currency of the name (Lamghán).

The mountainous Túmán of Najrár<sup>2</sup> also is peopled by the káfirs. Instead of lamp they burn the chilghozah.<sup>3</sup> There is also an animal called the Flying Fox,<sup>4</sup> which flies upward about the height of a yard. There is also a rat which exhales the smell of musk.<sup>5</sup>

Charkh is a village of the Túmán of Loghar which gives its name to Maulana Yakúb Charkhi. Sajáwand is also one of the well-known villages of this Túmán.

The mountains of the Túmán of Badráo<sup>6</sup> are the home of káfirs and wild Házarahs and Afgháns.

the north is a detached mass of mountain dividing Nangenhar and the Lamghanat. Wherever it snows at Kabul, the snow falls also on the top of this mountain by which means the people of the Lamghanat can tell when it snows at Kabul.

- <sup>1</sup> Báber's words are: 'The river of Cheghansarái, after passing through Kaferistán from the north-east, unites with the river Bárán, in the Balúk of Kámeh and then passes onwards to the east.'
- <sup>2</sup> It lies north-east from Kábul in the hill country according to Báber, who adds that their inhabitants are wine drinkers, never pray, fear neither God nor, man, and are heathenish in their usages.
- \*The seed of the Pinus gerardiana; the cone, which is as big as a man's two fists, and also the tree itself, said to be derived from chihal fortyc and ghosa a 'nut.' Sansk.
- Copied from Baber whose account is as follows: "It is an animal larger than

- a squirrel with a kind of leathern web stretching between its fore and hind feet like a bat's wing. It is said that they can fly a bowshot from a higher tree to a lower one. I myself have never seen them fly, but have let one go beside a tree which it quickly clung to and ascended, and when driven away, expanded its wings like a bird and came to the ground without injury." This must be the flying squirrel, which does not fly though wing-handed, but is supported by its membrane as it leaps.
- <sup>5</sup> Báber likewise mentions the muskrat, but adds that he had nover seen it; whence Erskine suggests the inference that it may not have been as common in India in his day as it is now.
- Perhaps the upper part of Tugow now called Báhághái. Charkh is now called Charkh Beraki. The geography of this part of the country may be followed in Elphinstone's Cábul, Cap. II, 94.

The Túmán of Alsá<sup>1</sup> is situated intermediately between the torrid and cold belts. Birds cross this tract about the beginning of spring and good sport is had.

The Tumán of Bangash<sup>2</sup> furnishes 7,000 Cavalry and 87,800 Infantry, viz.:-

|   | •                         |     |     |     | Cavalry. | Infantry. |

The Tumán of Gardéz has a strong fort. The houses are for the most part three and four stories high.

<sup>1</sup> Báber, Alah-sái, which Erskine says is now called Tugow. "It lies two or three farsangs east of Najráo from which you advance straight towards Alah-sái." Baber places it between the cold and warm belts, and says that the birds take their flight across in the spring. Fowlers sit behind, scream and raise nots as the flights of fowl approach and intercept them. In the winter season the birds come down to the skirts of the hills and if in their flight they happen to pass over a vineyard they are no longer ablo to fly and are caught. A similar story is told of some fields near Whitby. (Notes to Marmion.) The pomegranates of Alah-sái are famous in the country, and are sent to Hindustán.

- <sup>3</sup> Occupies the lower grounds from Gardez to Kohát. Báber says it is infested by Afghán robbers such as the Khugiáni, Khirilchí, Búri and the Linder.
  - Var. Kharkúli.
- \* Upwards of sixty-five miles southcast from Kábul. Báber says that the Daroghá of the Túmán of Zúrmat, south of Kábul and south-east of Ghazni, resides at Gardóz which is not named as a separate Túmán. Next follows the Túmán of Farmul omitsed by Abul Fazl. It is notable only in the fact that the Shaikhzádahs, who were treated, as

Ghaznín is situated in the third climate, and is also known as Zábul, and was the capital of Sultán Mahmúd, Sultán Shahábu'ddín and several other monarchs.

This territory was formerly called Zábulistán, and some reckon Kandahár as included within it. Here is the last resting-place of Hakím Sanái' and many other saintly personages. The winter season is said to resemble that of Samarkand and Tabríz. A river runs from north to south which waters all the arable tracts. The cultivators are put to great trouble as fresh soil has to be supplied each year to fertilize the land and it becomes then more productive than that of Kábul. The metal called ruín's is here abundant and is imported into Hindustán. In the time of Báber there was here a temb which shook whenever the praises of Muhammad were recited. The investigations of acute observers discovered that this was effected by the fraud of relic mongers. There is also a spring into which if any filth be thrown, a thunderstorm ensues with a fall of snow and rain.

The Túmán of Dúman i koh<sup>5</sup> has a profusion of flowers and its spring and autumn are matchless in beauty.

Báber says, with such distinguished favour in Hindustán during the time of the Afgháns, were all of Farmul and descended from Shaikh Muḥammad Musalmán.

- ¹ This tomb is mentioned by Elphinstone, Cábul, 433. He was a mystic of high authority and repute whom the great Sufi Maulaná Rúm looked up to as his master. He flourished under Bahrám Sháh son of Masaúd Sháh of Ghazni (A. D. 1118-52) to whom he dedicated his Hadíkat úl Hakáik. He left also the usual Diwán which is n. sessary to every Persian poet's fame or ambition. He is said to have died in 1131 at the age of 62. Orient. Biog., Beale.
- <sup>2</sup> Ghazni is situated on the left bank of a river of the same name. It runs north to Loghar and joins the Kábul river. Báber says it may be large enough to drive four or five mills.
- Composed of four sere of copper to 1½ of lead. See Vol. I. p. 41.
- 4 Albirúni in his Chronology, Chap. XIII alludes to the "famous well in the mountains of Farghana" which causes rain if contaminated and adduces several similar traditions. Piber says that he made strict inquiry for the well but no one could give him the slightest information about it. " The discovery of the fraud at the tomb is due to his observation. A scaffolding had been erected over it, so contrived, that it could be set in motion when any one stood upon it, so that a looker on imagined it was the tomb that moved. He directed the persons who attended the tomb to come down from the scaffolding, after which no number of prayers or praises could persuade it to stir.
- This beautiful plain is better known as Koh Dámun the hill skirt of the Paghmán range. The gardens of Istalif at its north extremity, gay with flowers, its limpid ice-cold streams, the Arghwán troes with their vivid blossoms of scar-

In the Timan of Ghorband the variety of floral hues is beyond expression. Three and thirty species of tulips here bloom and one kind named the rose-scented takip breathes the fragrance of the blush-rose.<sup>1</sup>

Mines of silver and lapis-lazuli are also found. Near the mountains is a sandy tract called *Khwájah Rég i Rawán*<sup>2</sup> and from this quicksand, the sound as of drums is heard in the summer time.

• In the Timán of Zohák and Bámián, the fortress of Zohák is a monument of great antiquity, and in good preservation, but the fort of Bámián is in ruins. In the mountain-side caves have been excavated and ornamented with plaster and paintings. Of these there are 12,000 which are called Sumaj and in former times were used by the people as winter retreats. Three colossal figures are here: one is the statue of a man, 80 yards in height; another that of a woman 50 yards high, and the third is that of a child measuring 15 yards. Strange to relate, in one of these caves is placed a coffin containing the body of one who reposes in his last sleep.<sup>3</sup>

let and yellow seen in no other part of the country, its groves of oak and spreading plane trees have excited the eloquent admiration of Báber.

1 It is needless to say that the nomenclature of native flora by Persian or Indian writers is extremely unscientific and vague, and beyond a few well-known kinds, the rest are indiscriminately expressed by a shuffling of the few botanical terms they possess, and the same name does duty for more than one flower. Thus nasrin is the eglantine and the narcissus; lilah the tulip and the red poppy and the prefix of gut which means both 'roso' and 'flower' increases the confusion. Again 'rayáhín plur. of 'rayhán' means particularly the Ocymum basilicum, hence any sweet smelling shrub, and further extended in a general sense to flowers of any kind. A glance at the Abul Fazl's description of the flora of India at p. 82, 1st Vol. suffices to show the breadth and freedom of his treatment. This large licence of expression in Oriental writers may be perhaps considerately permitted in their trans-This account of the talips is lators.

taken directly from Báber's Memoirs who mentions that he himself thus named the tulip alluded to in the text. He also noticed in the skirts of the same hills below Parwán, the lálah i şad barg or hundred-leaved tulip, found only in one narrow spot emerging from the straits of Ghorbaud. This flower Erskine calls the double poppy. The etymology of Ghorband is given by Báber from band a steep hill pass, and gher the country to which it mainly leads.

<sup>9</sup> This is mentioned by Báber. The name of Khwájah Róg i rawán (Khwájah quicksand) appears in the margin of Elphinstone's Turki copy of Báber's Memoirs as that of one of three personages known as the Sch Yárán or Three Friends who have given this name to a fountain in the Koh Dáman (Khwájah Soh Yárán) mentioned by Báber. The other two are Khwájah Maudud Chashti and Khwájah Khawend Saíd, p. 147.

The punctuation in the text is clearly misplaced. The asterisk after اگاه دل should be removed and intervene between وايسيون and برايسيون the former word losing its izafut. Moorcroft describes

The oldest and most learned of antiquarians can give no account of its origin, but suppose it to be of great antiquity. In days of old the ancients prepared a medicament with which they anointed corpser and consigned them to earth in a hard soil. The simple deceived by this art, attribute their preservation to a miracle.

The territory of Kábul comprises twenty Túmáns. The Emperor Báber in his Memoirs sets down the revenue at twenty lakhs of Shahrukhis, inclusive of Tamghal imposts, equivalent to three lakhs and twenty thousand Akbar Sháhi rupees, the rupee being reckoned at forty dáms.

these idols with his usual accuracy of observation, (II, 387). The ancient city of Bámián called Gulgula stood on a conical hill pierced with caves. colossal idols are cut out of the rock opposite the hill on which the city stood. The larger, said to represent a male, is called Sang-sal, the smaller called Shakmuma, is said to be a female, but the general appearance indicates no difference of sex. They stand in recesses cut out of the rock; and both have been The height of the smaller mutilated. figure is 117 feet; and the larger is probably a third more. Dead bodies have been occasionally found in subterranean chambers which have fallen to dust on exposure to the air. Moorcroft is convinced from his intimate acquaintance with the monasteries of Ladakh and Chanthan, and from the character of the painting and sculptures, that Bámián was the residence of a great Lama bearing the same relation to the Lamaism of the West as Lassa does to the East. The excavations which were connected by means of galleries and staircares, constituted the accommodation of the higher orders of the clergy and the insulated cells were the dwellings of the lower monastic society. The word Shakmuma, he considers a probable corruption of Shak-muni. Burnes, eight years later, visited Bámián and gives the height of the larger figure as 120 feet and an illustration of the idols as he saw them. He records the plastering and the vivid colours of the paintings but his opinion on their origin has little to recommend it. Masson (Journ. A? S. Soc. 1836, p. 188) ascribes them with a confidence not shared by his readers, to the Sassanian age and dynasty, A. D. 220.

<sup>1</sup> Inland tolls. See Vol. I. 189, but Báber's words are: "The amount of the revenue of Kábul, whether arising from settled lands or raised from the inhabitants of the waste, is eight lakks of Sháhrukhis." The word 'twenty' must be a copyist's error for mae eight, as the Akbar Shahi rupee being equal to 21 Shahrukhis, the whole would give exactly three lakks and twenty thousand rupces. The word tampha on the case in point, occurs later at p. 172 where Baber says, with reference to one of his officers. "The revenue of Kabul arises from a Tamgha. This tamgha I bestowed on him, and made him at the same time Darogha of Kábul and Panjhír, gave him the property tax levied from the Hazárahs and conferred on him the office of Captain of my Guards." Erskine notes tampha as the stamp tax. All animals, goods, clothes &c. brought into the country are stamped or marked and a tax collected.

At the present time notwithstanding the remission of various taxes, by the blessing of this ever-during rule, the revenue has reached the amount of six kwirs, seventy-three lakhs, six thousand, nine hundred and eighty-three dams. (Rs. 1,682,674-9.) The increase is to be attributed to the improved state of the cultivation, and also that Parasháwar and Ashtaghar! were not included in the former account, and lastly, that the revenue officers of that time were not as capable as they are at present.

In the year 77 of the Flight (A. D. 696-7) Abdu'l Malik b. Marwan removed Umayyah b. Abdu'l Malik from the government of Khurasan and conferred it upon Hajjaj b. Yusuf of the tribe of Thakif, and sent Abdu'llah b. Abu Bakr to Sistan, who levied an army, marched against Ranthél king of Kabul. The latter unable to withstand him took refuge in the depths of the mourtains. Abdu'llah not realising the difficulties of his undertaking eagerly pursued. The mountaineers barricading the passes with stone breast-works, blocked his road. The invading force was hard-pressed and reduced to extremity through want of provisions. Abdu'llah was therefore compelled to purchase a retreat with the sum of 700,000 dirhams, equivalent in present money value to 3,00,000 rupees. Shuraih b. Hani in indignation at the compact advanced to an engagement notwithstanding his being stricken in years, and fell bravely fighting. Hajjaj on hearing of the event, reprimanded Abdu'llah and removed him from his

command. In the year 80 (A. D. 699) he appointed Abdu'r Rahmán b. Muḥammad Ashath to conduct the war against Ranthél and bestowed on him the government of Sistan and the adjacent torritory. Raḥmán on his arrival in Kábul adopted the former tactics, but prudently occupied each defile with his pickets and performing prodigies of valour, secured a large booty. The difficulties of the country, however, prevented its permanent occupation. Hajjáj disapproving his retreat sent him a sovere reprimand in the following terms: "Although your exertions during the present year have been strenuous, the retribution demanded by your dishonourable retreat is that immediately on the receipt of this letter, you take possession of the country. Should you, through persistence in your own opinions of through fear of the consequences to yourself, refuse to comply and defer operations till the coming year, you are removed from your command, and are hereby required to look upon Ishak b. Muhammad as your commander and to place yourself under his orders." Abdu'r Rahman, confiding in the strength of possession, disloyally formed a compact with his officers and refusing submission, made peace with the king of Kábul and marched against Hajjáj. The conditions of peace were that Abdu'llah if victorious should altogether withdraw from Kábul and in no way molest it, but if defeated, the king should on his part afford him protection and assistance. Hajjáj was enraged at this rebellions conduct, and gave him battle outside the walls of Tustar. Abdu'r Rahmán was victorious, and Hajjáj retreated to Başrah. A second engagement took place in which the rebel was defeated and took refuge in the fortress of Bast2 which was held by one of his licutenants. This accursed of God and man, with a view to ingratiate himself with Hajjáj, seized him with the intention of surrendering him to Hajjáj. The king of Kábul, on being informed of the circumstance, set out with the greatest expedition and releasing him, returned with him to Kábul. On several subsequent occasions, with the assistance of the king, he continued the war but without success. In the lunar year 84, (A. D. 703) Ranthél overcome by the persuasion and seductive promises of llajjáj, sent Abdu'llah to him as a prisoner. The latter resenting the dishonour, whilst on the road, threw himself from a precipice and was killed.

In A. H. 107 (A.D. 725-6) under the caliphate of Hisham b. Abdu'l Malik, Amin b. Abdu'llah Kashari, governor of Khurasan conquered Ghor,

<sup>&#</sup>x27; Now Shuster in Khuzistán. It was first conquered in A. H. 20 in the Caliphate of Omar. See my translation of

A. S. Suyúti's History of the Caliphs, p. 136.

Basht in Luristán.

Gharjistán, the territory of Nímtoz¹ and Kábul and made (the latter) his capital. From that time continuously under the dynasties of Umayyah and Abbás, it was held by the governor of Khurasín, until under the Sámánis, Alptegín a slave of that House, withdrew from their obedience, took possession of Ghaznín and Kábul and asserted his independence. On his death Sabuktegín father of the great Mahmud succeeded to the kingdom, and it continued under the House of Ghazni. From this it passed to that of Ghor and thence into the possession of their slaves, one of whom was Táju'ddín Eldoz. The kings of Khwárizm succeeded, yielding in turn to the Great Káán Changiz Khán. From him it reverted to Timur and is held by his descendants. May its fortune, through the enduring justice, unstinted elemency and ever increasing wisdom of the Imperial House, be blessed by an unfading prosperity.

## AI'N 16.

## The Karóh or Kós.

The system of survey and measurement, as promoting the interests of civilization having deeply engaged the attention of His Majesty, directions were issued for the ascertainment of distances and their determination by the standard measure of the kis. The kis was fixed at 100 tanihs, cach consisting of 50 Ilihi gaz, or of 400 poles (bins) each pole of 12½ gaz. Both of these measurements give 5000 gaz to the kis.

Whenever His Majesty travels, the distances are recorded in pole-

- <sup>1</sup> Usually applied to Sejestán. Elliot. Arabs in Sind, p. 172.
- 2 See p. 61 of this Volume. This subject is discussed by Elliot. (Races, N.-W. P. II. 194). Cunningham (Anct. Geog. of Ind. App. B. p. 571) and Tieffenthaler (I. 23). To the measurements of Abul Fazl, I may add the length of the kós, as fixed by Báber. On Dec. 19th, 1526 he gave orders, as his Memoirs record, to have the distance measure. between Agra and Kábul; that at every 9 kós, a minár should be raised 12 gaz in height surmounted by a pavilion; that at every 10 kós, a post-house for 64 horses should be placed. The kós was fixed in conformity with the mil according to the following verse in Turki.

Four thousand paces are one mil Know that the men of Hindustán call it a kuroh.

This pace is a cubit and a half;

Every cubit is six hand-breadths;
Each hand-breadth is six inches;
and again each inch

Is the breadth of six barleycorns.

Know all this.

The measuring tanáb, was to consist of 40 gaz or paces, each measuring one and a half of the cubit that has been meationed and so equal to nine hand-breadths, and 100 of these tanábs were to go to one kés.—Erskine adds that the larger gaz or pace was 9 hand-breadths; the smaller or cubit, 6 hand-breadths.

measurements by careful surveyors, and their calculations are audited by the superintendent and inspector.

Sher Khan fixed the kis at 60 jaribs, each of 60 Sikundari gaz which measurement is employed in the Delhi country. In Málwah it consists of 90 tanábs of 60 gaz each and in Gujarát is called the cow kis, that is, the greatest distance at which the ordinary lowing of a cow can be heard, which is put by exports at 50 jaribs. In Bengal it is called dhapiyah, which is the distance that a fast runner can traverse at one breath. Some assert that it is the distance within which a green leaf placed on the head of one who walks rapidly, will become dry.

In ancient tables of measurement by farsakh of distances and magnitudes, it is recorded that the circumferences of the globe according to the method of the old geographers, was 8000 farsakh, but 6,800 of the modern school, while all agree in defining a farsakh as three kis. The former made the kós 3000 gaz, each gaz of 32 digits. The latter fixed it at 4000 gaz, each of 24 digits. The digit with both was the breadth of six ordinary barleycorns placed front to back in succession, and the breadth of each barleycorn was equal to the thickness of six hairs of the mane of a Turki horse. To short-sighted superficial observers, it would appear that these two systems differ in their estimate of the  $k \delta s$ , but it is clear to the perspicacity of the far-secing that their conclusion is the same, and the apparent difference is caused by the variance in the number of the digits as may be proved by the rule of proportion. This consists of four numbers, the first bearing the same ratio to the second, as the third does to the fourth, as for instance, two is to four as eight is to sixteen. Of the properties of this relation one is this that the product of the extremes is equal to the product of the means, as is evident from the example above mentioned. The proof is given in the 19th proposition of the 7th book of Euclid<sup>3</sup> where the apparent contradic-

- ¹ Properly **\*IQUI**. The word is Hindi and not Bengali as might be inferred from the text. It means a short run according to Wilson's Glossary, about ‡ of a kes or half a mile.
- <sup>2</sup> The circumference of the earth, according to our calculations is 21,897 miles and the fursakh is about 3½ English wiles; there are of course many local variations. Ḥamdu'llah Mustaufi, the author of the Nuzhat'nl Kulúb, says that the farsakh under the Kaianiau dynasty contained 3 miles of 12,000 feet: that of
- Khwarizm was 15,000 yards; in Azarbíján and Armenia, 12,000 yards, while in the two Ira'ks and the neighbouring provinces it was reckened at 6000 yards, and in some other places at 8000. The diversity is noticed by Pliny. Persæ schænes et parasangas alii alia mensura determinant.—See Ibn Haukal. Ouseley. Pref.
- The Elements of Euclid were restored to Europe by translations from the Arabic which were begun to be made under the Caliphs Harún and Mamún

tion is removed. The ratio of 3000 to 4000 is the ratio of 24 to 32. Although the four numbers are here severally distinct, the product of 3000 and of 32 which are the extremes, is equal to the product of 4000 and of 24 which are the means, namely, 96,000. Thus the result in both is the same, and the discrepancy in the number of yards is through the difference in the number of digits. Each farsakh therefore consists of 12,000 gaz (of 24 digits) according to the measure of the moderns or of 9000 (of 32 digits) according to the gaz of the ancients. The properties and virtues of these proportional numbers are manifold. Among them are the following: If one of the extremes be unknown, multiply the means together and divide by the known extreme, and the quotient is the unknown extreme. For instance in the given example, if 2, the first extreme, be unknown, by multiplying the means together which are 4 and 8, we get 32. Dividing this by 16, the quotient (2) is the unknown extreme. In the same way, if the other extreme, which is 16, be unknown, by dividing the product of the means by 2, the known extreme, the quotient is 16. Again, if the unknown quantity be one of the means, we divide the product of the extremes by the known mean, and the quotient is the unknown mean. For example, if 4, the first mean, be unknown, by dividing the product of the extremes, which is 32, by the known mean which is 8, the quotient is 4.

at a time when the very name of that geometrician had disappeared from the West. Nasíru'ddin Tási (see p 4, n. 4 of this Volume) in the preface to his Arabic Edition of the thirteen books of the Elements, describes their original composition by Euclid and the subsequent addition of two books by Hypsicles who is disgnised under the name o انسقالوس (probably a copyist's error for ايسقالوس) of Ascalon. The attempts of succeeding geometricians to add to or explain the Elements are enumerated, and the reasons that led to his own. This edition, excellent in type but somewhat faulty in the orthography of the Arabic, was printed in Rome in 1594 and from it I transcribe the enunciation of the proposition referred to in the text.

كل اربعة اعداد مقناسية نمسطح الاول في الرابع نممسطح الثاني في الثالث و ان كان مسطم الأول فى الرابع كمسطم الثاني في الثالث فنشيّة الأول الى الثاني كنسبة الثالث الى الرابع: . . . . . .

"When four numbers are proportionals, the product of the 1st and 4th = the product of the 2nd and 3rd, and if the product of the 1st and 4th = the product of the 2nd and 3rd, the ratio of the 1st is to the 2nd as the ratio of the 3rd to the 4th." The proof follows. The 7th, 8th and 9th books of Euclid treat of the fundamental properties of numbers on which the rules of arithmetic must be founded. The 10th is the development of all the preceding ones, geometrical and arithmotical. When the modern system began to prevail, these books were abandoned to the antiquary. In Smith's Dictionary art. Eucleides, the Greek and Arabic editions of the Elements are fully discussed and onumerated.

And if the second mean, 8, be unknown, by dividing the product of the extremes by 4, the quotient is 8.

By the same means the distance and altitude from the base of a given object can be ascertained. A staff of a given height is fixed upright. shadow and that of the elevate object are measured. The ratio of the shadow of the staff to the staff is proportional to the ratio of the shadow of the object-height to the height itself. Again, a staff is fixed in the ground in the same line with the height to be measured and regarded from such a point that the line of vision may pass over the top of the staff to the summit of the object-height; the ratio of the distance from the stand-point of vision to the base of the staff is to the height of the staff as the ratio of the distance from the same point to the base of the object is to the height of the object. And if the altitude of an object be measured in a mirror or water and the like, a position must be taken whence the incident line of vision may strike the summit of the (reflected) object-height. The ratio of the distance of the reflected summit from the foot of the spectator is to his height as the ratio of the distance of the same point from the base of the object is to the height of the object. And if it be required to find the depth of a well, the observer must stand where his line of vision traversing the brink of the well touches the level bottom of the well on the side opposite to him. The ratio of the distance of the brink of the well from the foot of the observer is to his height as the breadth of the well is to its depth.1

Some take the barid as the standard measure of length and make.

```
1 barίd equal to 3 farsukh.

1 farsakh ,, 3 míl.

1 míl ,, 12,000 báφ (pole).

λ bάφ ,, 4 gaz.

1 gaz ,, 24 digits.

1 digit ,, 6 barleycorns.

1 barleycorn ,, 6 hairs of a mulc's tail.
```

According to the Hindu philosophers-

8 barleycorns stripped of husks

and laid breadth-ways make 1 digit (angusht).

24 digits
4 dast
2000 dand

, 1 dast (cubit).
1 dand (pole or perch)

1 dand (pole or perch) or dhanuk.
1 karóh o kós.

, 1 yoojana.

4 karóh

<sup>&</sup>lt;sup>1</sup> This method of calculating distance and altitudes is more scientifically given

with illustrations in the Sidhanta Siromani of Pundit Bapu Deva.

Some measure by the steps of a woman with a water-jar on her head and carrying a child in her arms, reckoning a thousand such steps to a kós.

Praise be unto God that the institutes of imperial administration have been completed and a general survey of the Empire, by the aid of divine grace, placed upon record. The numbers of the tribal contingents and the chronology of the ancient kings with some other particulars have cost considerable labour, and from the conflicting accounts received, I was well nigh relinquishing the task, but the accrees of fate cannot be resisted. I have set down what has best commended itself to my judgment, hoping that it may win lustre from the light of public acceptance and its errors escape the carping of illiberal criticism.
